EDUCATIONAL RESOURCES

INFORMATION CENTER

Resources in Education (RIE) is processed for printing by Computer Sciences Corporation, under contract with the U.S. Department of Education, Office of Educational Research and Improvement (OERI), and is published monthly by the U.S. Government Printing Office (GPO) with printing funds approved by the Office of Management and Budget. The contents of RIE do not necessarily reflect official OERI policy.

RIE is available on subscription (12 issues/year), or as individual issues, from the Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, D.C. 20402. Inquiries regarding prices should be directed to the Superintendent of Documents.

#### Introduction

Resources in Education (RIE) — A monthly abstract journal announcing recent report literature related to the field of education, permitting the early identification and acquisition of reports of interest to the educational community.

Sponsor: Educational Resources Information Center (ERIC)

National Library of Education (NLE)

Office of Educational Research and Improvement (OERI)

U.S. Department of Education Washington, D.C. 20208-5720

ERIC is a nationwide information network for acquiring, selecting, abstracting, indexing, storing, retrieving, and disseminating significant and timely education-related reports. It consists of a coordinating staff in Washington, D.C. and 16 Clearinghouses located at universities or with professional organizations across the country. These Clearinghouses, each responsible for a particular educational area, are an integral part of the ERIC system. The Clearinghouses are listed on the inside back cover.

Organization of Journal: *Resources in Education* is made up of resumes and indexes. The resumes provide descriptions of each document and abstracts of their content. Resumes appear in a "Document Section" and are numbered sequentially by an accession number beginning with a prefix ED (ERIC Document). The indexes appear in an "Index Section" and provide access to the Resumes by Subject, Personal Author, Institution, and Publication Type.

Availability of Documents: The documents cited in *Resources in Education*, except as noted, are available from the ERIC Document Reproduction Service (EDRS), in both microfiche (MF) and paper copy (PC), or microfiche only. Availability in microfiche only may be determined by the source, for proprietary or copyright reasons, or by ERIC for reasons related to legibility and reproducibility. The price per document is based on the number of pages and is subject to change over time. An ERIC Price Code Schedule permits the user to convert all price codes to actual dollar amounts. Current price information for documents, microfiche, and subscriptions to microfiche collections is to be found in the section entitled "How to Order ERIC Documents" in the most recent tissue of RIE.

How to Submit Documents to ERIC: If you have documents that you would like to have considered for announcement in *Resources in Education* (RIE), you should send clean, legible copies (in duplicate, if possible) to the ERIC Processing and Reference Facility, 1100 West Street, 2d Floor, Laurel, Maryland 20707-3598. A reproduction release, giving ERIC permission to reproduce in paper copy and microfiche (or microfiche only), and signed by the author or official representative of the source institution, is requested for all documents selected for inclusion in RIE. Standard reproduction release forms may be obtained from the ERIC Facility (a sample appears at the back of this issue of RIE).

How to Order RIE: The U.S. Government Printing Office (GPO) prints *RIE* and functions as subscription agent. Detailed subscription information appears on the page in the back of RIE entitled "How to Order *Resources in Education*".

### **ERIC Clearinghouse Publications**

This page highlights publications announced in this issue of *Resources in Education* which were created by the ERIC Clearinghouses and which have been selected as having special significance for educators. For each brief citation appearing here, there is a full abstract appearing under the same ED number in the pages of the issue.

In addition to collecting the literature of education for announcement in *Resources in Education* and *Current Index to Journals in Education*, the ERIC Clearinghouses analyze and synthesize the literature in a number of different formats designed to compress the vast amount of information available and to meet the varying needs of ERIC users. These formats include research reviews, state-of-the-art studies, interpretive studies on topics of high current interest, research briefs, annotated bibliographies, digests, and compilations. While some publications are comprehensive reviews designed for those who are interested in pursuing a subject in depth, others are brief analyses designed for the busy practitioner whose time for staying abreast of new developments in education is limited.

ERIC publications are published either by the ERIC Clearinghouses responsible for producing them or through cooperative arrangements with other organizations. Original copies are usually available directly from the responsible Clearinghouse or from the source listed in the citation. In addition, the publications announced in *Resources in Education* are contained in all ERIC microfiche collections, and are available in reproduced paper copy and/or microfiche from the ERIC Document Reproduction Service (EDRS), 7420 Fullerton Road, Suite 110, Springfield, Virginia 22153-2852 Telephone: 1-800-443-ERIC (3742).

**DOCUMENT SECTION** 

#### SAMPLE DOCUMENT RESUME

#### **Document Resumes**

The document resumes in this section are arranged in numerical order by ED number, and also alphanumerically by Clearinghouse prefix and Clearinghouse accession number.

As explained in the Introduction, each Clearinghouse focuses on a specific aspect of education. The reader who is interested in one of these major aspects (e.g., Reading) may, however, find pertinent resumes among the entries of virtually any Clearinghouse, dependent on the orientation of the document. For this reason, it is important to consult the Subject Index if a comprehensive search is desired.

The following is a list of Clearinghouse prefixes and names used in this Section, together with the page on which each Clearinghouse's entries begin:

Identifiers-\*Resources in Education Resources in Education (RIE) is a monthly abstract journal that announces (catalogs, indexes, abstracts) documents of interest to the educational stracts) documents of interest to the educational community (including researchers, teachers, students, school board members, school administrators, counselors, etc.). Each issue announce approximately 1,100 documents and provides indexes by Subject, Personal Author, Institution, Publication Type, and ERIC Clearinghouse Number. This special Computer Output Microfiche (COM) edition is prepared directly from the ERIC magnetic tape database prior to publication of the printed tape database prior to publication of the printed journal and therefore is lacking the cover and other regular introductory and advertising matter con-tained in the printed journal. The COM edition con-tains only the first three of the five indexes in the printed edition. The first accession in each issue of RIE is the issue itself. In this way, the monthly microfiche collection for each issue is immediately preceded by a microfiche index to that collection. This practice began with the RIE issue for May 1979. (CRW/WTB)

This manual, produced and used in a project of the Central Oklahoma Area Vocational Technical School, provides direction for developing and implementing a school-to-work curriculum for secondary students. Based on the Central Oklahoma Vocational-Technical Model, the guide contains the following 11 sections: (1) blueprint for getting students ready for work based on the U.S. Department of Education's school-to-work system; (2) a description of Project ACCESS (Attainment of Competent Career Employment Skills for Success); (3) recruitment; (4) assessment; (5) advisement; (6) counseling and guidance; (7) curriculum; (8) skill development; (9) applied learning; (10) job placement; and (11) follow-up services. Throughout these sections, checklists, samples, scales, and examples are provided. An appendix provides job deplementing a school-to-work curriculum fo these sections, checklists, samples, scales, and examples are provided. An appendix provides job descriptions of Project ACCESS personnel. Also included are the following: project newsletter, sumer camp brochure, senior scholarship brochure, consumer information handbook, tech prep brochure, student job placement form, pocket resume form, "Implementing a Local School-to-Work Partnership: A List of Suggested Activities," and "The ABCs of the Oklahoma School-to-Work System: A Glossary of Terms." Education
The international advisory committee of the International Project on Technical and Vocational Education (UNEVOC) held its first session in Berlin in September 1993. The advisory committee's 10 members and observers from the United Nations' control of the Committee of members and observers from the United Nations' specialized, intergovernmental, and nongovern-mental organizations discussed educational policy, links between technical and vocational education and the world of work, and financial implications. Special attention was paid to smoothing the adjust-ments/transitions between the educational system and the labor market and elevating technical and vocational education's status in education systems. and the labor market and elevating technical and vocational education's status in education systems worldwide. After reviewing the first phase of the UNEVOC project, the advisory committee recommended that the following areas be deemed priorities for 1994-1995: raising the attractiveness and status of technical and vocational education within the education system; fostering links between technical and vocational education, industry, and the labor market; and developing the technical and vocational education systems. Activities were planned under the project's three program areas: international exchange of ideas/experiences and policy studies, strengthening national research and development capabilities, and facilitating access to databases/documentation. (Appended are the following: opment capabilities, and facilitating access to data-bases/documentation. (Appended are the following: meeting agenda, participants' names/addresses, and the opening address by Colin N. Power. Both French and English versions of the report are in-

The deep economic and social problems associated with the Russian Federation's move to a market economy have extended to Vocational Education (VE). Nearly 50% of 1994's VE graduates could not get a iob, and Russia's new constitutes

ates could not get a job, and Russia's new constitu-tion has thrown vocational schools into the market without any state support, thereby forcing many schools to become overly commercialized. In an attempt to remedy the situation, a new state standard has been adopted to serve as a model for VE that is has been adopted to serve as a model for VE that is based on the European system of five stages of VE. It is designed to prepare students for professions requiring three different levels of qualification. The new model views VE as an element of a system of interaction between the state, employers, and trade unions and gives vocational schools and regional educational authorities more independence. Unfor-tunately, the finds allocated to implement the new educational authorities more independence. Unfor-tunately, the funds allocated to implement the new model are sufficient only to design the standards. The immediate challenge is to identify the priorities of VE in order to develop and implement needed reforms gradually enough to avoid drastic social consequences. (Contains 12 references. Appended are tables/facts about the following: development of VE in 1985-1994; VE students, graduates, and per-sonnel; provisions of the state standard.) Countries, International Cooperation, \*International Educational Exchange, Material Development, \*Office Occupations Education,
Postsecondary Education, Program Development, Program Implementation, Secondary Education,

Identifiers—\*Germany, \*Russia
A pilot center was established in Yaroslavl, Russa, to train business clerks using German curricula and training that could be applied to Russian condi-tions. Choice of Germany as a model was due to increasingly developing cooperation with that country in the field of vocational education. The Russians analyzed German curricula and worked out the project for a new profession-industrial busi-nessperson. Three principal directions of commercial activity were chosen: retailer, wholesaler, and industrial businessperson. The curriculum, which had in-class and vocational (industrial) components, was structured as follows: general educational, vocational education, in-class and practical training, and consultations and exams. Curriculum content included these topics: organization of bookkeeping, crediting, and taxation; basics of management; ba-sics of marketing; commercial law; modern office equipment and business planning; foreign language for business; and culture of business activity. Content for industrial business clerks would also include basics of industrial production, science of commodities, and special courses: specialization by type of industry. In comparison with the German curriculum, the Russian one increased teaching time and redesigned syllabi in subjects due to principal differ-ences in the economic mechanisms of Russia and Germany. (Appendixes include occupational information, comparative analysis of Russian to German curricula, and the syllabi). (YLB)

It is designed to help students identify oppor-tunities and have the knowledge, attitudes, and skills to develop innovative small business ideas into successfully managed small businesses. The first section covers these topics: target student group; curriculum length; delivery issues; options for se-quencing delivery of the modules; requirements for entry, recognition of prior learning, and accredita-tion; and definitions of terms. The course consists of six modules: entrepreneurial skills; planning to start a small business; establishing a small business; man-aging and operating a small business; evaluating a small business; and entrepreneurial small business project. Each module lists the purpose, duration, and learning outcomes. Components provided for each learning outcome may consist of any or all of the following: learning outcome, assessment crite-ria, assessment, and range statement. Module 6 con-tains these additional materials: a list of entrepreneurial small business project topics; a list of 130 print and video reference and support material; and a list of 8 suitable textbooks. The section following the modules outlines the principles that underpin the development of the curriculum: signif-

The two papers in this document explain various options and modalities for UNEVOC (International Project on Technical and Vocational Education) Member States' financing of their individual systems of technical and vocational education and dis-Member States' innancing of their individual systems of technical and vocational education and disseminating experiences in this area. "Financing Vocational Education and Training in Developing Countries" (Pradeep Bolita) provides a systematic overview of various modalities of public and private finance of technical and vocational education. It describes four of the more well-known financing mechanisms: public financing, enterprise financing, private and public sponsored financing, and international donor assistance. The advantages and disadvantages of each type are identified and policy implications indicated, with some country examples. "Financing Vocational Education: Concepts, Examples, and Tendencies" (David Atchoarena) draws conclusions from experience with various existing concepts of financing. It first reviews the main issues, such as cost sharing and subsidiarity; apprenticeship: privately financed institutional training; the use of earmarked taxation to finance training; and training funds. It then focuses on selected country experiences, illustrating different kinds of strategies and instruments involved in the financing of vocational education. These countries are highgies and instruments involved in the mancing or vocational education. These countries are high-lighted: Brazil, Republic of Korea, Singapore, Mau-ritius, and Ivory Coast. A final chapter looks at future trends and variables affecting funding scheme options. (Each paper contains references.) (YLB)

(Data), \*Trade and Industrial Educational Directors
Identifiers—\*Colorado, Impact Studies

The potential impact of the implementation of cluster programs in trade and industrial/technical education in Colorado was examined through a reeview of literature on cluster programs in the United States, a national survey of 51 state supervisors of vocational education (VE), and a survey of 196 local vocational directors in Colorado. The national and state surveys elicited 54 (68.6% response rate) and 127 (65% response rate) usable responses. The state directors reported that cluster programs had been used in VE in 22 (64.7%) states and were accepted used in VE in 22 (64.7%) states and west positively by industry and secondary and post-positively by industry and secondary personnel. Of the 52 secondary-level program personnel. Of the 52 (41.3%) local Colorado directors from districts where cluster programs had been used, more than 67% reported that cluster programs were achieving their intended outcomes (basic occupational and academic skill development and occupational awareness, preparation, and exploration). Local directors considered cluster programs more effective than traditional programs in supporting occupational/catraditional programs in supporting occupational/ca-reer decision-making processes and preparing indi-viduals to work in a rapidly changing labor market. Appended are the following: questionnaires and cover letters used in the national and state surveys; information about clusters reported; and additional state supervisor comments.) Contains 35 tables/fig-ures and 26 references. (MN)

The rapid development and decreasing costs of communications technologies, including microcomputers, the Internet, and the World Wide Web, are puters, the Internet, and the World Wide Web, are affecting the delivery of distance education (DE) and expanding its potential audience. The DE literature reflects the increasing interest in the potential of current technologies to alter traditional teacher-student relationships. Four possible scenarios of

distance educators' response to the opportunities afforded by new communications technologies have been offered: the minimal change model (educators use technology as an instructional aid without making any fundamental changes in the delivery of DE); the marginal change model (the pedagogy and orga-nization of education remain unchanged and students are added on to conventionally taught classes); the systemic change model (DE instruction is reorganized into a technology-driven system); and the virtual system (the formal organization of universities/schools either becomes minimal or disappears). Two issues associated with the recent changes in DE as a result of new technologies are the need to ensure learner access to the information highway and the need for more staff development to train teachers to adapt to DE's new emphasis on learner centeredness and interaction between/ among learners. (Concluding this document is an annotated bibliography of 17 print and 4 organizational resources.) (MN)

This document contains four papers that examine four diverse topics from the field of adult education: multiculturalism, assism, mathematics, and new

multiculturalism, ageism, mathematics, and new paradigm research. In "Editorial Introduction," Roger Fieldhouse gives an overview of the papers and the experience of their authors. The first paper, "Multi-Cultural Perspectives on Adult Education: Putting Policy into Practice" (Nancy Gidley), discusses the need for multicultural education and issues of curriculum, access, staff development, resources, and management. The role of nurse eduresources, and management. The role of nurse edu-cation in challenging ageist attitudes among student nurses in the delivery of health care to older adults is examined in Catherine Cadman's paper "Ageist Practice in Nursing: The Challenge to Professional Education." In her paper "Transposing Mathematics from the Margins to the Centre." Roseanne Benn discusses the links between democracy, adult education, and mathematics. Allen Parrott's paper "Adult Education and New Paradigm Research" describes new paradigm research and suggests that adult education would be an especially fertile ground for new-style inquiry methods and philosophy because of their accord with adult education values. The literature on business involvement in educathe literature on business involvement in education in Canada, the United States, Germany, Denmark, Sweden, Switzerland, Japan, the United Kingdom, and other European countries was reviewed. Special attention was paid to the following topics: workplace trends/changes; skill requirements/deficits; youth employment/unemployment; integration versus separation of vocational and academic curricula; education spending; school leavers; organizations interested in school-to-work transitions; apprenticeships; vocational/career guidance/counseling; government role in education for work; cooperative programs; continuous learning; industry-based education; training of teachers/ trainers and teacher education/development; and ment of skills/knowledge. The literature regarding the Japanese and continental European ex-perience identified a history of cooperation among business, labor, and government in developing/debusiness, labor, and government in developing/de-livering high-quality youth training that was not present in Canada. Like Canada, however, the other countries studied were struggling with the issues of global competitiveness, failtering economies, social tensions induced by immigration, high unemploy-ment, long-term welfare dependency, and a chang-ing workplace. It was concluded that Canadian policymakers and educators must develop a school-to-work transition system possessing the fol-lowing traits: responsive to the concerns of industry; flexible; committed to quality; and oriented toward integration of academic and vocational education and provision of career education, guidance, and support and opportunities for lifelong learning. (Contains 88 references.) (MN)

Identifiers-\*Alberta, \*Business Role, Employer

Surveys Approximately 9,500 stakeholders in school-business partnerships in Alberta (including representa-tives of key business/education associations, school boards, and schools; a sample of businesses with some involvement in school-business partnerships; and a random sample of 3,000 employers) were surveyed regarding their views on business involvement in education. The 795 respondents (response rate, 8.4%) characterized themselves as follows: employers, 42%; educators, 28%; members of the public, 15%, and high school students, 15%. The ger eral consensus was that students are not well prepared for entry into the work force and that empl must work together to articulate their expectations regarding competencies required of high school completers. Eighty percent of the employers and 68% of the educators felt that employers should be more extensively involved in education. Sixty-six percent of educators and 72% of employers wanted more government involvement in education. Nearly two-thirds of respondents wanted employers repre-

sented on provincial boards/agencies addressing education curricula. (Twenty-six tables/figures are in-cluded. Appended are the following: selected general comments made by respondents; summary of written submissions to the survey team; profile of employer respondents; and survey instrument. Also included is a technical appendix that contains the survey questionnaire and a detailed breakdown of responses to all questions.) (MN)

In March 1990, Alberta's Education Minister es tablished five teams to help implement Alberta's 3-year plan for education. Two of those teams, the Implementation Team on Business Involvement and Technology Integration (I-Team) and the Business Involvement Advisory Group (BIAG), worked to develop plans and recommendations regarding expanding business involvement in education expanding outsiress involvement in education through workplace learning opportunities for students and to increase the effective use of technology in the delivery of education. The I-Team and BIAG gathered information through the following activities: survey of approximately 9,500 stakeholders in distribution in Alberta (response set 8.4%). High education in Alberta (response rate, 8.4%); litera-ture review; survey of all Alberta schools to identify existing/planned school-business partnerships; and invitational forum of 250 educators and lay Albertans. The I-Team and BIAG synthesized the information gathered into recommendations regarding wing: school-business communication/un derstanding; business/employer involvement in ed-ucational policymaking, employability skills; entrepreneurship education; valuing all career arentrepreneurship education; valuing all career areas/educational programs equally; part-time jobs; career education/counseling; independent/interdependent lifelong learning; and equity. This document contains materials for teachers to use in presenting the community health strand of the career and technology studies (CTS) program that has been approved for secondary schools in Alberta, Canada. The first three sections outline the

philosophy/rationale, organization, and curriculum and assessment standards of the CTS program in general and the community health strand in particu-lar, as well as various considerations in planning for instruction in the community health strand at the junior and senior high school levels. The next three sections define the curriculum and assessment standards for the 31 modules constituting the introduc-tory, intermediate, and advanced levels of the community health strand. Among the topics cov-ered in the modules are the following: family dy-namics; child care/development; home care-personal safety management; adolescent health; marriage; community volunteerism; day care; anatmarriage; community volunteerism; day care; anatomy, physiology, and pathology; complementary therapies; first aid; parenting; aging; prenatal/postnatal care; challenged individuals; mental health; and medical technology. The remaining four sections contain the following: assessment tools generic to the CTS program and specific to the community health strand modules; overview of linkages and tensitions of CTS words as with a number of constitransitions of CTS modules with a number of organi-zations; guidelines for establishing a resource-based classroom; and sample student learning guides for two modules. This framework was developed using results of a

This framework was developed using results of a 1995 business partnership survey, a survey of over 9,000 Albertans (800 responses), and discussion of recommendations by a forum of approximately 140 Albertans. The surveys and discussion focused on ways in which business and schools could work to-gether to provide the best possible education for young people. This framework sets out seven projects: (1) create community structures; (2) proprojects: (1) create community structures; (2) promote workplace learning; (3) encourage apprenticeships; (4) enhance lifelong career education; (5) review school programs and standards; (6) develop credentials for a global economy; and (7) provide legislative and policy support. Each project is described, and an action plan is proposed that recommends both immediate steps and longer term suggestions toward the year 2000. Appendixes include the husiness involvement advisory group. clude the business involvement advisory group member list and ethical guidelines for business-edu-cation partnerships. (YLB)

(Paulo), Uganda
The participatory rural appraisal (PRA) technique
was used with 1,550 women and 420 men in more
than 100 villages in Uganda, El Salvador, and Bangladesh over a 2-year period to develop and pilot
test an approach to literacy education called REFLECT (Regenerated Freirean Literacy through
Empowering Community Techniques). The RE-FLECT (Regenerated Freirean Literacy through Empowering Community Techniques). The RE-FLECT approach, which is based on the theoretical framework developed by Paulo Freire, draws on PRA techniques to promote active dialogue and em-powerment as literacy circle participants develop their own materials and thereby take ownership of the issues that arise as their skills develop. In each country, the changes observed in individuals receiv-ing literacy instruction based on the RFFLECT aning literacy instruction based on the REFLECT approach were compared to those observed in control groups taught by traditional teaching methods. Of those adults who initially enrolled in REFLECT circles, 65% in El Salvador, 60% in Bangladesh, and ctrcles, 65% in El Salvador, 60% in Bangladesh, and 68% in Uganda achieved basic literacy over a 1-year period compared to only 43%, 26%, and 22% of individuals in the control groups in the respective countries. The REFLECT circle participants remained motivated and dropped out in much lower numbers than did their control group counterparts. Contains 59 tables/figures/photographs and 31 references. (MN)

This study identified federal programs designed to assist people with disabilities, with a special emphasis on programs promoting employment. The study focused on the extent to which information, eligibility, and services were coordinated under these programs and the efficiency of federal programs in promoting employment among people with disabili-ties. Findings indicated that 130 federal programs targeted people with disabilities; 26 of these pro-grams provided direct employment services such as skills training and job search assistance. Although the federal government provided funds for all pro-grams, the extent of the federal role in their administration varied considerably. Although many federal programs had decentralized the provision of serprograms had decentralized the provision of services to state governments, the programs had adopted a variety of funding mechanisms to do so. Programs helping people with disabilities did not work together as efficiently as they could to share information about their programs and overcome obstacles posed by differing eligibility criteria and numerous service providers. Because services were not coordinated among programs, people with disabilities received duplicate services or faced service. gaps. Past federal efforts to reorganize and restruc-ture service delivery have succeeded only margin-ally compared with more modest, local initiatives. any compared with more modest, local initiatives. (Appendixes include objectives, scope, and methodology; federal programs targeting people with disabilities; federal employment initiatives targeted to people with disabilities; geographic distribution of expenditures for selected programs; and definitions. Identifiers—\*Business Incubators

A national survey examined the collective experiences of entrepreneurs, business incubator manag-ers, and postsecondary institutions involved in educational and training strategies aimed at foster-ing entrepreneurship. The sample included incubators sponsored by universities (n=75), two-year colleges (n=25), and other sources (n=100). The survey also targeted 400 clients of incubators. Quessurvey and targetted vote that the tionnaires were returned from 40 percent of incubator managers and 45 percent of incubator clients. Results showed a limited contribution of two-year colleges in business incubation; they appeared to be colleges in business incubation; they appeared to be providing primarily commercial space at low cost and clerical support to entrepreneurs rather than consulting services and strategies aimed at fostering entrepreneurship. Although incubators sponsored by two-year colleges appeared to be supporting a slightly more diverse population of entrepreneurs in comparison to university-sponsored incubators, both managers and in house clients were predominated and the control of the control both managers and in-house clients were predomi-nantly represented by Caucasian males. Five entre-preneurial characteristics were identified by managers and entrepreneurs: personal characteris-tics, technical preparation, business and manage-ment while the preparation of the present while the present and present ment skills, entrepreneurial vision, and interpersonal skills. The contribution of two-year colleges to the business and technical preparation of entrepreneurs was disproportionately low in comparison to the contribution of four-year colleges and graduate schools. (Appendixes include 30 references and the survey instruments.) (YLB)

Followup

Followup

This guide is designed for local and state authori-ties who seek a better understanding of the performance of their vocational education programs. Its basic theme is management diagnostics. The first section provides a brief introduction to three decades of research that has been conducted on wage records submitted by employers under unemploy-ment compensation laws. The second section uses an optics metaphor to demonstrate the interplay of candidate qualifications, employer requirements, and employment opportunity as these ultimately determine whether and how a former student prospers in the workplace-employment and earnings history. This section shows that a single vocational education event cannot be easily isolated as the force that resulted in a particular employment outforce that resulted in a particular employment outcome. The third section uses multiple concepts and
measures of employment and earnings. The relevance of preenrollment, concurrent, and postenrollment measures of each is emphasized. This section
offers many examples of the weakness of single
point-in-time measures of employment status and
documents why attribution of observed markers of
employment as placements cannot be sustained in employment as placements cannot be sustained in many cases. The fourth section explores the followmany cases. The fourth section explores the follow-ing: (1) alignment of enrollment and employment affiliations, (2) documentation of continuing educa-tion, (3) multiple employer affiliations, (4) censor-ing reported earnings, and (5) specification and estimation of models. Contains 47 references. (YLB)

Scores
Identifiers—\*General Educational Development
Tests, \*National Adult Literacy Survey (NCES)
A comparison study used the National Adult Literacy Survey (NALS) to describe the English-language literacy skills of individuals who passed the Tests of General Educational Development (GED Tests) and of those who did not. The research exwhat the GED and NALS instruments measured in common and what was measured separately. Findings indicated that higher scores on the GED Tests corresponded to higher scores on the NALS literacy assessments. Passing the GED Tests tended to distinguish between persons whose literacy skills were in the moderate range and those whose skills were more limited. The probability of passing the GED Tests rose for each increase in demonstrated level of literacy. The average literacy scores of adults who passed the GED Tests fell within the moderate range on all three literacy scales-regardless of the test taker's age, sex, race or ethnicity, country of origin, geographic region, or ethnicity, country of origin, geographic region, or disability status. About 3 in 10 GED test takers reported they were currently or previously enrolled in a program other than regular school to improve their basic skills. Employed examinees had higher average quantitative literacy scores than unem-ployed examinees. The GED Tests and the NALS instruments both assessed skills that appeared to represent verbal comprehension and reasoning. The GED Tests seemed to tap unique dimens writing mechanics and mathematics, the NALS-unique dimensions of document literacy. (Appen-dixes include methods, definitions of variables, and 18 data tables.) (YLB)

opment Tests

From September 1991 to June 1992, the General Educational Development (GED) Testing Service conducted a national survey of adults who took the GED Tests in Canada. The purpose of the study was to describe background characteristics, experiences, attitudes, and expectations of adults who took the GED Test. Findings indicated that the average age OED lest. Pindings indicated that the average age of adults who took the GED Test was 30; most were between the ages of 25 and 44. More than four in five were white and one in seven was nonwhite, similar to their proportions among all Canadians. Nearly two in three had completed the 10th grade or higher before leaving school. Their most impor-tant reasons for not completing school fell into six categories: critical judgments about school, home categories: critical judgments about school, normal and family problems, marriage or pregnancy, em-ployment-related reasons, social behavior, and aca-demic problems. Nearly 9 in 10 candidates reported that they reviewed or studied in some way before they wrote the GED Tests. On average, Canadians studied for a total of 60 hours before taking the studied for a total of 60 hours before taking the GED Tests, twice the amount of time reported by GED candidates in the United States. Nearly half (48 percent) reported they were employed for pay. Two in five reported household incomes, in Canadian dollars, of less than \$20,000 per year. One in three planned to earoll in a two- or four-year college or university during the next year. Includes 13 tables and 3 figures. (appendixes contain 14 references, methodology, survey, form, and survey. ences, methodology, survey form, and survey administration information.) (YLB)

The Bureau of Labor Statistics examined the characteristics of high school students and full-time college undergraduates who work during the school

lege undergraduates who work during the school year. Data were from the October 1994 supplement to the Current Population Survey (CPS). Findings indicated that over one-fourth of high school students and almost one-half of full-time college undergraduates were employed. In general, younger students were less likely to work than older students. College students were nearly twice as likely to work as high school students. In both high school and college, men and women were equally likely to have worked, although there were some differences have worked, although there were some differences within specific age groups. White high school students were about twice as likely to have to worked as black or Hispanic students. Among college students, about half of white and Hispanic students worked compared to just over one-third of blacks. Three-fifths of high school students and about two-fifths of college students worked in the retail trade. The vast majority of both worked 20 hours or less per week. Black and Hispanic high school students were heat and Hispanic high school students. less per week. Black and Hispanic high school stu-dents worked more hours than white students. Male

and female students worked about the same number of hours. Over 90 percent of high school and college

students combined were paid by the hour, compared with about three-fifths of all wage and salary workers. For college students, median weekly hours were about the same regardless of age, sex, or race. The median hourly earnings of high school students were \$4.73 and of college students were \$5.19. For both high school and college students, male and older students earned more. (YLB)

Although not a new concept, mentoring is being seen as an increasingly important part of an individ-ual's career and work force development, requiring sophisticated skills of those who provide it. Mentor-ing has been defined as "a relationship in which a more experienced person facilitates the broad development of a less experienced person on a regular isis and over an extended period of time.' directed to intellectual, personal, and social matura-tion as well as occupational development. Most mentoring is offered within school settings. It occurs in formal classroom settings, through work experience and apprenticeship programs, and through company- and community-sponsored programs. Recognizing the complexity of successful mentoring, educators are focusing on establishment of per-formance standards for mentoring services in career development. The quality of mentoring in school settings will depend on staff members' ability to settings will depend on staff members' ability to incorporate career development concepts and activities into the curriculum and to consult with and use employers, community groups, and the general public to support the schools' career development process. Youth mentoring programs in the workplace are becoming increasingly prevalent, especially for noncollege-bound youth. A mentoring initiative implemented by the Association for Women in Science was found to be most helpful to the students in ence was found to be most helpful to the students in the areas of self-image and self-confidence, networking and professional contacts, career opportu-nities and options, letters of reference, and balancing family and work. With national education efforts focused on effective school-to-work transi-tions, it is likely that the use of mentoring will continue to grow, expand in focus, and improve in quality. Descriptors—Consumer Education, "Critical Thinking, Curriculum Development, "Educational Change, "Educational Philosophy," Educational Trends, Family (Sociological Unit), Family Life Education, Higher Education, "Home Economics, Secondary Education Within the last decade, many schools and departments of home economics have changed their name to "buman ecology," whereas others have become

to "human ecology," whereas others have become "family and consumer sciences," and still others have remained unchanged. "Human ecology" has tended to be used more in higher education, and

"family and consumer sciences," in secondary schools and professional organizations. The name changes are one manifestation of extensive soul searching within home economics, beginning in the late 1970s. At that time, Marjorie Brown and others proposed a reorientation of the curriculum from the traditional emphasis on technical and vocational skills of homemaking toward a critical sciences approach in order to help extended them. skills of homemaking toward a critical sciences approach in order to help students learn to think, reflect, and take action through the study of perennial, practical family problems. Forces driving the changes in name and focus include the following: (1) changes in women's roles and family structures; (2) poor image and low priority accorded to home and family in society generally and consequently to the home economics field; (3) desire to increase the field's standing in academia and to recruit and retain students with a more relevant curriculum; (4) the influence of feminist thought, with its emphasis the influence of feminist thought, with its emphasis the on valuing the family sphere as much as the public sphere; and (5) the trend toward integrated curricula and holistic, connected forms of knowledge. The restructuring in home economic reflects the overall restructuring taking place in many educational insti-tutions. The field of study still retains its focus on the work of the family, however. This book, a report from the National Center for purpoying Science Education, examines how technological transportations of the Proprint Programment of the Programment of the Programment P

Improving Science Education, examines how tech-nology can be taught in the classroom. The five chapters establish the need for technology education, describe its status, develop a vision of what it could and should look like, and make suggestions and recommendations about how to achieve that vision. Vignettes, mostly from lessons and curricula used in existing programs, give specific examples of the ideas being discussed. Chapter 1 establishes the need for technology education by analyzing current educational practice in the United States and introduces a comprehensive vision for technology educa-tion. Chapter 2 provides an overview of the major difficulties that lie in the way of creating a place in difficulties that he in the way of creating a place in the K-12 curriculum for the kind of technology education discussed in the first chapter. The five sections of chapter 3 contain the following: a statement of guiding principles for technology education; explicit goals for technology education; description of how technology should be taught, and general guidelines for curriculum planning and for teaching and learning strategies. Chapter 4 illustrates a range of specific curricular alternatives, and chapter 5 deals with implementation issues and makes recomdeals with implementation issues and makes recom-mendations for action designed to deal with them. mendations for action designed to deal with them. Five appendixes include the following: (1) descriptions of technology education in various countries, including England and Wales, Germany, Japan, and the Netherlands; (2) a slice of a K-8 technology program; (3) fictitious excerpts from a high school handbook and student transcripts that illustrate a linked set of science and technology programs for grades 9-12; (4) an annotated list of 89 additional readings and resources useful in planning and implegrades 9-12; (4) an annotated list of 69 additional readings and resources useful in planning and imple-menting technology education programs; and (5) a list of school sites and teacher education collabora-

This report contains 17 profiles that illustrate the successful strategies, environments, and activities taking place within the School to Work/Vocational Technical Education arena in Arizona. (Currently, there are 130,908 students in 251 schools in the state participating in these programs.) The profiles include many types of activities, from a 3-month project to an entire district's effort to implement project to an entire district's effort to implement systemic reform. Examples include the following: using a work-based curriculum and apprenticeship system in machining, welding, assembly, and electrical and engineering occupations; Call-A-Teen Center of Excellence; building a house as part of a building trades program; and a house as part of a building trades program; and a house as part of a building trades program. The strategies serve a number of populations and reflect geographical diversity, as shown on a locator map. They are used in many institutions: businesses; elementary, high school, and community college districts; community-based organizations: a charter school: and govnity-based organizations; a charter school; and gov-ernment agencies. Additionally, most profiles demonstrate ways to combine funds and leverage resources. All 17 strategies share at least 2 characresources. All 17 strategies share at least 2 charac-teristics: a willingness on the part of educators to step away from their comfort zone and view a situa-tion from a broader point of view or from a new perspective; and the demonstration of extra effort. Each profile includes a brief summary of the goals, a description of the program or activity, things to consider in order to replicate the strategy, a contact consider in order to replicate the strategy, a confact name, and a listing of the funding sources involved. Key words appear at the upper right-hand corner of each page. The template in the lower right corner of each profile illustrates the levels of education in-volved, whether the activities are school based or work based, and the efforts to collaborate with other education and business resources on the activity. The template is described in detail on the reverse side of each profile. A glossary includes definitions of 61 key words and educational terminology used throughout the report. (KC)

Identifiers—\*United Kingdom
A survey of 6,000 registered nurses in memberahip in the Royal College of Nursing across the
United Kingdom examined some key factors that
determined the supply of nurses. A study of the UK determined the supply of nurses. A study of the UK nursing labor market indicated that the number of nursing about market indicated the later land and registered nurses has remained more or less static since the late 1980s. Rising demand appeared to be met by increased working hours and workloads, with an accompanying increase in the proportion of unfilled nursing posts. Analysis of New Earnings Survey data revealed that nurses' earnings remained stable, but consistently below the national average for non-manual workers. Findings showed a rise in for non-manual workers. Findings showed a rise in turnover for a third successive year. Twenty-two percent of nurses changed jobs or stopped working in the last 12 years. Job satisfaction, ill health, injury, and redundancy accounted for nearly one-third of the job changes. Asked what they expected to be doing in two years, nearly one in five nurses said they expected to leave nursing. The spread of short-term contracts was associated with a rise in perceived job insecurity, even among those on permanent contracts. Although the majority of nurses had caring responsibilities for dependent children or adults, only 20 percent reported employers had "family friendly" policies. Reported shift lengths ranged from 3 to 28.5 hours and the average shift length was 8.9 hours. Over half felt under too much pressure at work. Includes 26 figures and 32 tables.
(Appendixes contain 21 references, methodology, and workload scale.) (YLB)

The aim of the Basic Skills at Work Program was to help improve the competence of the work force

The aim of the Basic Skills at Work Program was to help improve the competence of the work force in England and Wales in basic literacy, numeracy, and communication skills. Of the 82 Training and Enterprise Councils (TECs) in England and Wales, 73 participated. Surveys of basic skills requirements as perceived by local employers indicated that very few jobs could be done without competence in basic. skills and particularly in reading and oral communi-cation. Employers showed a considerable demand for higher-level basic skills in jobs that were far from the top of the labor market. Results of the second stage of the program that looked at the supply side indicated that much basic skills instruction did not directly address the needs of the workplace or the needs of particular jobs. Forty pilot projects were sponsored to address some of these needs, with part-nerships between 37 TECs and local basic skills pro-viders, in most cases colleges of further education. viders, in most cases colleges of further education. Some 300 companies participated in these projects where basic skills training was delivered to around 7,400 employees. A study of the effectiveness of the projects showed that in nearly three quarters of the projects work continued after program funding stopped. Where the TEC had a high level of involve-ment in the project, the likelihood of the work con-tinuing in some form was much higher. (VLB) tinuing in some form was much higher. (YLB)

"Federal Government, "Governmental Structure, "Government Employees, "Public Agencies Identifiers—"Department of Education, "Department of Labor."

Identifiers—"Department of Education, "Department of Labor
This study gathered information on the Departments of Education and Labor field office structures as follows: the location, staffing, square footage, and operating cost for each department in total and its field offices. Findings were that in fiscal year 1995, the departments had a field structure composed of 1446 field offices, such as regional offices, area of the departments and a neito structure composed of 1.146 field offices—such as regional offices, area of-fices, and district offices. They were located in 438 localities across the 50 states, District of Columbia, and 2 territories. Reflecting its centralized structure and nature of its responsibilities, the Department of Education used about one-third of its 5,131 authorized staff resources in its field offices. Labor, with its varied responsibilities requiring on-site presence, had more than 60 percent of its 17,632 authorized staff allocated to its 1,074 field offices. Both depart-ments' largest field office costs were staff salaries and benefits. They have also eliminated and/or con-solidated a few field offices within the last 5 years to improve service delivery or office operations. (Extensive appendixes to the report include the following: scope and methodology; Departments of Education and Labor component profiles; Departments of Education and Labor field offices and staff by loca locality; and comments from both departments.)

Museums, 2008, nature centers, soisnes centers

Museums, zoos, nature centers, science centers, aquariums, and other similar places provide an op-portunity for lifelong learning in a nonthreatening setting for most adults. They are places where non-formal learning (outside the formal learning setting formal learning (outside the formal learning setting and characterized by voluntary participation) can easily take place through such methods as tours, informational signage, exhibits, and demonstrations, and they can also offer more formal education through workshops and classes. Hundreds of millions of people visits these institutions, and probably more than half of them are adults. Many adults come to these institutions for primarily social reasons, so their learning opportunities may need to be sons, so their learning opportunities may need to be constructed in a manner that supports the social activity. To engage adult visitors effectively, educa-tion programs can use adult education principles to enhance the visit for the purpose of learning. The places must be user friendly and comfortable. In-creasingly, institutions are using interpretive layering, which provides information in small, layered levels so that visitors can choose to absorb the essence of the exhibit without filtering through com-plex descriptions or discussions. Whether the purpose of the visit is social or educational, adult visitors attend attractions with an overall positive attitude. Learning is a lifelong process, and the role of the educator in this setting is to enhance the attraction and help guide the adult visitor to new levels of understanding and action. Journals have a long history as a means of
self-expression, and they can be used as learning
tools in adult education. Types of journals include
the reader response journal or literature log, the
learning journal, the reflective journal, and the electronic journal. Journal writing offers several benefits
for adult learners: journals are less threatening and
closer to natural speech, they document mental procloser to natural speech; they document mental procloser to natural speech; they document mental pro-cesses; and they can be used as a tool for growth through critical reflection. Obstacles to students writing reflectively include the following: their lack of proficiency with reflective writing, fear resulting from open-ended writing requirements, privacy is-sues, and unequal balance of power between teacher and students. To overcome some of the obstacles of open-ended assignments, students should be given some guidelines that answer such questions as the following: "What is a journal?"; "What do I write?"; "Why keep it?" and "How will it be used?" Four factors affect willingness and ability to reflect: individual developmental level, perception of the trust-worthiness of the teacher, clarity and nature of the

expectations of the journal, and quantity and quality of feedback. Several teaching strategies can be used to encourage reflection. Teachers can serve as mentors and coaches, steering adult learners to document their learning journey through journal writing. (Contains 18 references.) (KC)

Learners of all ages need to expand their self-knowledge and determine the ways their interests and abilities are applicable in the changing so-cial, economic, and work environments. Many of the new ways of teaching and learning offer processes by which students can gain experiences that enhance their self-knowledge. These varied learning processes include brain-based learning and prob-lem-based learning. Educational methods such as performance-based instruction with criterion-referenced evaluation components, assessments using performance tests and authentic assessments, or performance tests and authentic assessments, or documentation of performance through career passports and portfolios also contribute to self-awareness. Self-knowledge requires reflection on what was learned through these processes and what needs to be learned, the process by which learning occurred, and how that learning has enhanced what the student knows about him/herself in relation to work. Journal writing is a useful technique to stimulwork. Journal writing is a useful technique to stimu-late reflections throughout the learning process. Whether through experiential, on-the-job, class-room, or community and service learning, students can enhance their awareness of themselves and their career development by continually summarizing for reflecting upon what they are learning as they continue their progression through school and work.

Identifiers—Literacy Task Analysis
This document contains a final report, evaluation, and curriculum materials from a project conducted at the RJR Nabisco plant in Indianapolis to upgrade the literacy and numeracy skills of the workers to facilitate technological changes to production lines. As the final report explains, although the goal of the project was to recruit and test 150 workers, more than 300 workers actually participated in the project (with some turnover). During the project, the project staff recruited and tested workers, developed job-specific literacy training materials, and conducted training classes in a flexible way that allowed workers to study around their shifts. Be-cause of excessive overtime, workers were not able to attend all the planned classes, but an extension of the project remedied some of the time factors. The

project was successful in terms of worker attitudes toward the opportunities and management and su-pervisors' favorable reports about workers' attitudes and ability to adapt to new technology more quickly. The external evaluation report notes the very favorable reaction to the project and the fact that the company chose to continue the project after the federal funding period. Actual pretests and postthe recerai runding period. Actual pretests and post-tests were conducted on a very small sample of the participants, however, and results were not statisti-cally reliable. The main part of this document con-sists of a skills matrix developed through a literacy task analysis, learning objectives, curriculum guide, and practice exercises used in the program. (KC)

Andersen Consulting is a global training firm with more than 20,000 consultants serving clients from 151 officers in 46 countries. In 1995, Andersen Consulting introduced a career development model Consulting introduced a career development model (CDM) as a new organizing structure for its consultants in North and South America. The CDM, which translates the findings of research on integrative learning into practice, identifies skill tracks, more specialized skill domains, and six levels of more specialized skill domains, and six levels of competence within each domain. The CDM was introduced to Andersen's consultants through an applied CDM workshop that was developed using the Integrative Learning System, which is based on the following support components: applying integrative learning to build knowledge and skill, providing a learning-safe work environment, coaching to think, teaming to innovate, and trusting to syner-gize. The applied CDM workshop was tested with one training development team in Washington, D.C., and three teams in Atlanta, Georgia. During the workshops, teams engaged in a reflective learn-ing process involving the following steps: do, look, think, continually evaluate relevance, and plan. The tests demonstrated that integrative learning can be developed quickly and effectively with limited resources by ensuring that all support components for integrative learning are in place. A new integrative learning model has been designed to help corporate educators facilitate employee learning transfer and on-the-job

ployee learning transfer and on-the-job performance. The model's components are as fol-lows: (1) access new information, ideas, experi-ences, and/or perspectives; (2) identify relevance ences, and/or perspectives; (2) identify relevance and value based on integrated life experience and wisdom; (3) engage in activities with a reflective learning approach; (4) apply new concepts within temporarily transformed life experiences; (5) apply new knowledge to life through action or guiding others to action; and (6) continually evaluate rele-vance and value in life and add to life experience and wisdom. Integrative learning binges on the foland wisdom. Integrative learning hinges on the following support components: applying integrative leaning to build knowledge and skill, providing learning-safe work environments, coaching to think, teaming to innovate, and trusting to synergize. An earlier version of the model was used to teach human relations and reflection skills to more than 300 teachers in training at a public university in Florida. The learners demonstrated acquisition of desired competencies in the classroom and in their private and professional lives. A workshop on new ways of doing business was developed based on the new in-tegrative learning model and will be tested on 1,000 managers employed by a major U.S. airline. (Contains 15 references.) This document is a curriculum guide for middle school and junior high school family and consumer sciences courses in North Dakota. The guide is organized in 16 sections. The first section provides a rationale for a middle-level family and consumer sciences curriculum and identifies nine major areas of study to be covered by the curriculum. It is followed by a scope and sequence for these nine areas, outlining the skills taught in each unit. The following 10 sections explain the curriculum outline and provide a curriculum outline for the 9 thematic areas: Future Homemakers of America; communica-tion and relationship skills; decision-making skills: personal health issues; family issues; resource management; employment skills; technology; and com-munity service. Each of the outlines includes key ideas, learning outcomes, learning activities, and suggested resources. A listing of 49 general resources follows. The last three sections include sam-ple lesson plans, a discussion of student assessment. with examples and a list of 19 resources; and 36 World Wide Web resource addresses. (KC)

A literature review examined how literacy proan iterature review examined now iteracy programs can assess their effectiveness by looking at outcomes and using this information. Very few empirical studies showed the impacts of literacy programs or identified predictors of program success. One reason was the lack of common criteria for evaluating performance. One evaluation issue was whether the same measures should be used to assess both individual progress and program effectiveness. Results of the U.S. National Evaluation of Adult Education Programs (NEAEP) showed that using the same types of measures across programs allowed discovery of what program components most affected outcomes. The NAEAP study was also used to investigate research on variables assumed to be linked to program effectiveness. According to the study, the strongest predictors of retention were support services, instruction during the day, and support services, instruction during the day, and type of learning environment. Age was not a barrier to acquiring literacy and increased hours of instruction were not sufficient to ensure increased skill development. Literacy skills were not easily transferred between workplace and general literacy programs; family literacy programs had potential for both adult and child literacy. Questions for further outcomes-based research were suggested, including the cost benefit of putting limited resources into instruction rather than outreach, maintenance of learner motivation, and instructor training. This book is designed for instructors and tutors working with female learners in literacy and English-as-an-additional language (EAL). It consists of a series of papers that explore some of the links among feminism, literacy, violence, and a wom-en-centered curriculum while simultaneously presenting suggested activities, readings, and discussions to use with female learners. The following papers are included: "What Is a Feminist Curriculum?" (Kate Nonesuch); "Women at the Centre of ulum?" (Kate Nonesuch); "Women at the Centre of the Curriculum" (Janet Isserlis); "Responding to Disclosures of Abuse in Women's Lives" (Jenny Horsman); "Daily Lives" (Janet Isserlis); "Explor-ing Learning and Identity" (Jenny Horsman); "Self-Esteem and Literacy" (Dorothee Koman-gapik); "Gender Roles" (Kate Nonesuch); "Cultural Awareness Activities" (Alice Li); "Role Models" (Evolum Estall): "Women and Works" (Salvi Vers. Awareness Activities" (Alice Li); "Role Models" (Evelyn Battell); "Women and Work" (Selvi Varathappan Dyck et al.); "Tools for Building Self-Esteem" (Francene Gillis); "Choosing Safer Sex" (Sue Mendel); "Songs about Women's Issues" (Dharini Abeysekera); "Poetry by Canadian Women' (Helen Winton); "Women's Ways of Learning" (Linda Shohet); and "Women of Courage: Herstory" (Anne Moore and Women's Group of Action Read). The book contains a 184-item bibliography of print and media resources. (MN)

Identifiers-\*Australia, \*Family Literacy, Language Diversity
This document consists of an overview and five

papers examining the findings of a comparative analysis of literacy practices in urban and rural Australian communities. The study included case studies of 23 families in 6 communities and documentation of the literacy practices within the 9 schools attended by the children of those families. Presented first is an overview of the methods and results of the case studies, which were conducted to identify the following: similarities/differences in literacy practices between urban and rural communi-ties; possible influences of variations in language background and social class on literacy practices; and similarities/differences in literacy practices be-tween home and school. The following papers, which are all based on information gathered during the case studies, constitute the remainder of the document: "Doing Case Studies" (Mari Rhydwen); "Literacy Practices in Urban and Rural Communi-"Literacy Practices in Urban and Rural Communi-ties" (Judith Rivalland); "Language Diversity and Literacy Practices" (Caroline Barratt-Pugh); "So-cial Class and Family Literacy Practices" (William Louden); and "Home and School Literacy Prac-tices" (Mary Rohl). Each paper contains references.

An evaluation was conducted of the Better Opportunities for New Directions (BOND) demonstration that tested the conformance between the Texas Food Stamp Employment and Training (E&T) and Job Opportunities and Basic Skills (JOBS) programs. The research design was a longitudinal panel approach. First-round interviews with 54 individuals probed clients' basic needs and per-sonal circumstances, patterns of public and other outside assistance, employment histories, barriers to employment, and anticipated benefits of BOND participation. Second-round interviews with 37 individuals elicited their assessment of activities and services and the impacts of participation. Partici-pants portrayed a broad range of individual needs pants portrayed a broad range of individual necessaria and circumstances. Most participants felt they had benefited from BOND. It enhanced their employability through education, training, and job readiness/job search activities and through improved self-esteem, motivation, and communication skills. Participants felt that BOND improved their job preparation and search skills, encouraged and enabled them to attend postsecondary and General Educational Development classes, and helped them by providing support services. They suggested that not only sanctions but opportunities and perceived benefits drove participation. Participants' suggestions delivered these "messages" to policymakers encourage voluntary participation; value less tangible program outcomes; provide access to advanced education and training; provide statewide coverage; and recognize external barriers. (Appended are profiles of survey participants.) (YLB)

This guide, which is intended for project directors, coordinators, and other professional staff involved in developing and delivering workplace education programs, explains the role of the advisory council in the development and implementation of workplace education programs structured as partnerships place education programs structured as partnersing between businesses and educational providers and discusses various issues surrounding the formation of advisory councils. First, advisory councils are de-fined as panels of experts whose function is to pro-vide businesses and educational providers with a structure through which workplace education pro-grams can be developed and program issues/prob-lems can be identified and solved. Next, the role of

an advisory council in the following aspects of workplace education program development/delivery are explained: critical job tasks identification, job task analysis, skills assessment, curriculum develop-ment, instruction, and evaluation. Discussed next are various considerations in forming an advisory council, including the following: determining the types of individuals to include on an advisory countypes of indivious to include on an activity coun-cit; identifying the factors motivating businesses to participate in workplace education; and approach-ing prospective advisory council members. Con-cluding the guide is a list of helpful tips for working with advisory council members. (MN)

This guide, which is intended for project directors, coordinators, and other professional staff involved in developing and delivering workplace education programs, explains the implications of identifying critical job tasks and details a process by which education is a process by which educations of identifications of identifications. cational partners can facilitate identification of criti-cal job tasks. First, critical job tasks are defined as cal job tasks. First, critical job tasks are defined as job tasks dealing with projected changes and/or current performance/training problems that affect a company's bottom line. The importance of identifying critical job tasks to the job tasks analysis, skills assessment, curriculum development, instruction, and evaluation processes is explained. Presented next are a four-step process for identifying critical job tasks (identify in-house program experts; facilitate a meeting of the advisory council; identify and select two or three critical job tasks; and document the advisory council's decision) and an eight-step process for conducting an advisory council meeting (state meeting objectives, describe advisory panel responsibilities, present criteria for classifying critiresponsibilities, present criteria for classifying criti-cal job tasks, elicit information about positive comcal job tasks, elect information about positive company activities, transition to more sensitive issues, focus on specific job tasks or departments/problems, select two or three critical job tasks to target, and schedule job task analyses). Contains a list of six informational resources. (MN)

This guide, which is intended for project directors, coordinators, and other professional staff involved in developing and delivering workplace education programs, explains the process of conducting a job task analysis to create customized curricula to meet the workplace education students' needs. After a brief discussion of the rationale for conducting a job task analysis, the job task analysis process is described as a procedure whereby supervisors and competent workers are observed, questioned, interviewed, and asked to supply materials so that the work-related competencies and basic skills required to perform a given job can be identified and used as a basis for developing a job-specific curriculum. Pro-vided next are general guidelines for conducting a job task analysis and specific guidelines for inter-viewing/observing and collecting and organizing in-formation. Also included are the following: sample employee and supervisor questionnaires; lists of reading, grammar/usage, math, writing, and speak-ing skills typically required in the workplace; lists of selected work-related competencies in the areas of selected work-related competencies in the areas of identifying /using resources, working with others, acquiring/using information, understanding complex interrelationships/systems, and working with technology; and a sample job task analysis form. Contains a list of nine informational resources.

This guide, which is intended for project directors, coordinators, and other professional staff involved in developing/delivering workplace education pro-grams, explains the process of developing a func-tional context workplace education curriculum. Discussed first are the following: the types of infor-mation needed to develop a functional context curmation needed to develop a functional context cur-riculum; procedures for gathering the information; and the process of using the goals, objectives, and critical tasks defined by a workplace advisory coun-cil to organize the information gathered. The following components of a workplace education curriculum module are explained and illustrated: workplace education module goal(s); workplace education objective(s); workplace competencies; and basic skills. Next, the functional context approach of translating identified job tasks into job performance indicators is illustrated, and workplace competencies, and basic skills are outlined. The four components of general lesson plans (background information, demonstration, practice, extension) are explained, and the organization and layout of a typical lesson plan are illustrated with a sample lesson plan taken from a workplace writing module. Concluding the guide are a brief discussion of the process of reviewing/validating a workplace education curriculum and a list of four informational re-sources. (MN)

Identifiers—353 Project
This guide, which is intended for project directors, coordinators, and other professional staff involved in developing and delivering workplace education programs, explains the workplace education programs, explains the workplace education evaluation process, the main approaches to evaluation, and considerations in selecting appropriate evaluation instruments. Discussed first are the importance of program evaluation and measurable outcomes. Spe-cial attention is paid to the importance of evaluating 'soft skills' training and elements business wants from evaluation (those which involve key players, from evaluation (those which involve key players, use multiple evaluation measures, incorporate continuous feedback, use evaluation findings to review/revise training as needed, assess program outcomes through measurable outcomes). The similarities and differences between formative and summative evaluation are detailed, and several noninstructional factors that may influence training and several noninstructional factors that may influence training outcomes are mentioned. Described next are the four levels of Donald L. Kirkpatrick's model for evaluating training, which entails measurement of the following: training participants' reactions to training at the time of training; their learning of the training materials' content; their use of new skills on the job; and observable business results (the return on investment as a result of training). The strengths/weaknesses of using student reaction, student learning, student performance, and organization results as measures of program effectiveness are weighted. Contains 10 informational resources. (MN)

In September 1994, South Africa's Human Sciences Research Council mailed 215,284 questionences Research Council mailed 215,284 question-naires to graduates to ascertain their occupational income as of July 1, 1994. The 39,495 question-naires returned represented a response rate of 18.3%. Thirteen percent (5,138) of the respondents received no income. Of the economically active respondents, 40% were employed in the public sect and earned a median income package worth 90300 Rand (R90300). The median income package of the 39% of respondents employed in the private sector equaled R117100, whereas that of the 21% of respondents who were self-employed equaled R143600. Individuals employed in the public sector usually had more working experience than their counterparts in the private sector, and self-em-ployed people generally had more experience and worked longer hours than either public sector or private sector employees. (This detailed survey re-port includes 13 tables/figures detailing the re-sponding graduates' remuneration by the following: occupation; employment in the public and private sectors versus self-employment; geographical area; post level; years of work experience; working hours; economic sector; gender; population group; and qualification. Appended is a list of occupational groups. An alphabetical index of occupations is in-cluded. Side-by-side English and Afrikaans versions of the document are provided .) (MN)

Identifiers-Maryland

Identifiers—Maryland
To ensure that the new physical therapist assistant
(PTA) curriculum at Allegany Community College
(Maryland) met current professional needs, a survey was undertaken of establishments likely to employ PTAs. An employer needs questionnaire was returned by 272 establishments (of 1,250 surveyed). Findings indicated that more than half of the respondents were hospitals or private practice. The typical respondent had 10 employees, of whom 1 was a PTA. Nearly 4 in 10 respondents did not hire PTAs. Hospitals were more frequent users of PTAs in the skill areas covered by the survey than were other facilities. Each of the general skill areas surveyed was performed frequently by PTAs. Patient documentation and recognizing indications/contraindications were performed most often. PTAs needed to have a good command of medical terms and anatomy. PTAs were frequently called upon to assist patients in recognizing/practicing proper gait patterns and using assistive devices. They were also called upon to perform a variety of exercise techniques. With the exception of volume measureniques. With the exception of volume measurements, PTAs were actively used in measuring patient functions. The generally nontechnical areas of practice listed on the survey were among the most frequently needed PTA skills. In response to most frequently needed PTA skills. In response to open-ended questions, respondents offered suggestions for additional skills and improvement of clinical training; reiterated the importance of communication and interpersonal skills. (The survey and responses to open-ended questions are appended.) (YLB)

This guide is a compilation of material critical to incarcerated women and to women in the community who have a history involving the criminal jus-tice system. It provides them with a framework for analyzing problems, formulating strategies for change, and crafting solutions. Section 1 deals with

negotiating the prison system. Six chapters address these topics: communicating with the outside, sentence computation, religious practice, sexual harass-ment and sexual abuse, disciplinary reports, and dispute resolution. Section 2 concerns community transitions. Four chapters focus on furloughs, es corted trips, surviving the parole process, and halfway houses. Section 3 discusses maintaining family ties in two chapters: child custody concerns for incarcerated women and filing for divorce. Sec-tion 4 deals with staying healthy. Its five chapters tion 4 deals with saying neatiny. Its reconstruc-cover general medical care, pap smears and breast exam, AIDS and other sexually transmitted dis-eases, pregnancy, and getting help for drug addic-tion and alcoholism. Section 5 provides information on community resources in five chapters on public benefits, housing, job training referral sources, edu-cation and literacy training programs, and drug treatment programs. Many chapters conclude with names of individuals or organizations to contact for assistance. (YLB)

Employment Employment of minors is in-tended for 14- through 17-year olds, their parents, and employers. It first lists requirements for em-ployers who hire minors. Then it lists the jobs that 14- and 15-year-old workers can do, both the types of businesses that would hire them and examples of the kinds of jobs that 14- and 15-year-olds may apply for. It also describes restrictions on jobs that apply for. It also describes restrictions on jobs that 16- and 17-year-old workers can do. Other sections address the following: working hours for 14- and 15-year-olds and for 16- and 17-year olds; working conditions (breaks, meal periods, adequate work, weight lifting); paychecks (minimum wage, overtime, paydays, deductions, uniforms, final paychecks); agriculture employment (who can work, nower driven, mechiners, agricultural minimum power driven machinery, agricultural minimum wage, hours in agriculture); entertainment producwage, nous in agriculture; entertainment productions; canneries; door-to-door sales; and youth camps. The final section lists prohibited/hazardous occupations or operations for 16- and 17-year-olds. (YLB)

A task force studied youth work and its impact on the health, education, and safety of 16- and 17-year-olds. The study covered such issues as the following: effects of work on school performance, work's physical and psychological effects on young people, the effects work can have on young people's people, the effects work can have on young people spreparation for lifelong work, and what steps can be taken to emphasize the positive benefits enjoyed by working young people while limiting the drawback. Four methods were used to gather information: a review of major research and studies, public hearings throughout Oregon, a survey of employers, and a survey of 16- and 17-year-olds. Findings indicated that the number of 16- and 17-year-olds who work had increased in recent years and many businesses who employed minors relied heavily on them. Stuwho employed minors relied heavily on them. Stu-dent jobs were often low-paying, unfulfilling, and offered little in the way of educational value or prep-aration for adult work. A number of positive bene-fits were enjoyed by young people who worked, such as enhanced self-esteem, an early appreciation

for the work ethic, and a degree of financial freefor the work etnic, and a degree of financial free-dom. However, the study also concluded that these benefits could be short lived if not linked to long-term career and education goals. Youth work was not inherently good or bad. Many young people could effectively balance school and work, whereas others could not. A school-to-work connection and transition was necessary. (Appendixes contain a 34-item bibliography and questionnaire.) (YLB)

This workbook explains the process of using the

This workbook explains the process of using the goal-based learning (GBL) approach to accelera goal-based learning (GBL) approach to accelerating performance change to design an education or training program. The first half of the workbook, which focuses on the nature and benefits of GBL, discusses the following topics: shifting the focus of education; differences between lecture-based and goal-based learning environments; structure in lecture-based and goal-based environments; developing a web of support for GBL; the paradox of GBL as flexible yet consistent learning; characteristics of GBL; the interactive learning model as an explanation of the proconsistent learning; characteristics of GBL; the integrative learning model as an explanation of the process of learning to change performance; performance change; and the team performance process. In the second half of the workbook, a systems approach to GBL design is presented that entails using a 10-step transforming process to transform inputs (needs as perceived by stakeholders) into desired outputs (task/learning outcomes). The 10 steps of the transforming process, which are repeated a minimum of three times (each time incorporating feedback), are as follows: determine learning outcomes; identify activities required; plan corporating reconscit, are as follows: determine learning outcomes; identify activities required; plan continuous learning; select relevant context; identify overall goal; determine task outcomes; establish benchmark standards; plan support; build support; and practice facilitating learning experience. This workbook explains the principles and benefits of the integrative learning model and outlines a
systems approach to developing an integrated learning-based education/training program. First, the integrative learning model is discussed in the contexts
of the shift from teaching-focused to learning focused education and client-based environments and
the increasing emphasis on investment priority decithe increasing emphasis on investment priority decisions. Discussed next is the integrative learning model. In this model, a five-step reflective learning process (do, look, think, probe value, plan) is used process (do, look, think, probe value, plan) is used to integrate new information, experiences, and perspectives into existing life experience and apply new and existing knowledge/skills to accelerate individual and organizational performance change. In the second half of the workbook, a systems approach to integrative learning design is presented that entails using a 10-step transforming process to transform inputs (needs as perceived by stakeholders) into desired outputs (task/learning outcomes). The 10 steps of the transforming process, which are repeated a minimum of three times (each time incorporating feedback), are as follows: determine peated a minimum of three times (each time incor-porating feedback), are as follows: determine learning outcomes; identify activities required; plan continuous learning; select relevant context; iden-tify overall goal; determine task outcomes; establish benchmark standards; plan support; build support; and practice facilitating learning experience. Postsecondary Education, Program Improvement, \*Public Agencies, Secondary Education,
\*Vocational Education

\*Vocational Education Identifiers—\*Department of Education

Four agencies are involved in the U.S. Department of Education's vocational education data collection and reporting activities, as mandated by the 1990 Perkins Act: National Center for Education Statistics (NCES); Office of Vocational and Adult Statistics (NCES); Office of Vocational and Adult Education (OVAE); National Institute of Post-secondary Education and Lifelong Learning (NI-PELL); and Office of the Under Secretary (OUS). NCES, NIPELL, and OUS primarily provide data for use in formulating policy, whereas OVAE primarily collects and reports data for use in program administration. In its capacity as the Department of Education's statistical agency. NCES collects and Education's statistical agency, NCES collects and reports general-purpose education statistics that are often relevant to vocational education (for example, information on issues such as whether enrollment is declining and whether students with disabilities take the same amount of advanced vocational courses as students without disabilities do). Both NIPELL and OUS staff conduct major studies of federal educa-tion programs, whereas OVAE monitors vocational programs by collecting data through its performance and financial status reports. In compliance with its mandate under the 1990 Perkins Act, the Department of Education has prepared a biennial report detailing its strategies and activities to improve the data collection and reporting activities of NCES, OVAE, NIPELL, and OUS. leges can use to plan a hospitality symposium that will accomplish the following objectives: provide students with a forum to demonstrate their culinary skills; provide faculty with an opportunity to share and network; promote cooperation among students, faculty, and schools statewide; and increase education's involvement with industry. The following top-ics are examined in the guide's seven sections: development of the symposium concept; the timeline for planning a symposium; expenses; competi-tion rules; items to include on a planning checklist; publicity; and areas to improve. Numerous sample forms are included throughout the guide. Appended are a variety of sample materials for and about planning a culinary competition, including the follow-ing: sample correspondence to various parties involved in a symposium (community college deans, team coaches, competitors, judges, and vendors); participation survey; sample list of competition events, score sheet, and vendors list; and sample publicity materials (invitation, brochure, news re-leases). Achieving Necessary Skills

The impact of school-agency partnerships on the professional development of the agency personnel working with teachers on partnership teams was ex-amined in a qualitative study of 18 of 157 natural amined in a quantative study of 18 of 137 natural resources, business, and health care agency profes-sionals identified as having participated in elemen-tary school-based partnerships for 1-6 years in a midwestern state. The professionals were inter-viewed by telephone to collect demographic information and ascertain how participation in school-based partnerships had affected their attitudes toward schooling/teachers/students and their mastery of Secretary's Commission on Achieving Necessary Skills (SCANS) skills/competencies. The interviews confirmed that participation in a school-based partnership did indeed enhance all three groups' professional development. All three groups of professionals credited participation in a ool-based partnership with improving (at least minimally) their competence in many of the 25 SCANS skills/competencies investigated. The nat-SCANS skills/competencies investigated. The nat-ural resources professionals reported the highest levels of professional development, especially in the following areas: interpersonal skills/personal quali-ties, thinking and basic skills, and managing re-sources/information. Professional development occurred among the business professionals as well, albeit not as widely or as uniformly as in the case of the natural resources professionals. The health care professionals expressed more focused professional professionals expressed more focused professional growth than did the natural resources professionals. (Contains 17 references.) ple During its first year, the Appalachian/ African-American Cultural Education (ACE) Project undertook an evaluation to assess the pro-gram's impact on the knowledge, behaviors, and at-titudes of its teachers. Assessment tools included pre- and posttests on cultural content, observation, teacher interviews, teacher self-evaluation, and par-ticipant evaluations. Teachers reported the following: (1) greater familiarity and comfort with cultural ing: (1) greater familiarity and comfort with cultural subject matter; (2) more confidence in their ability to facilitate group learning, as opposed to relying on traditional teaching materials and activities; (3) greater familiarity and comfort with alternative teaching methods; (4) increased desire and ability to treat students as equal partners in the learning process; (5) increased confidence in their own abilities a wall so other exercise changes; and (6) positive as well as other personal changes; and (6) positive advances for their learners. Teachers identified a number of needs, such as ongoing support and as-sistance from inside the Urban Appalachian Council, resources to move students from oral to written stories, and their ongoing ability to expend the time and energy required. A study investigated how a sample of British fur-ther education (FE) colleges used the first round of Competitiveness Funding and how it affected the development of collaboration between colleges, Technical Education Councils (TECs), industry, Technical Education Councils (TECs), industry, and government agencies. A key ingredient in successful fund bids was matching the project's activity and outcomes to the needs of the regional economy by colleges' and TECs' sharing of each other's labor market information. Few colleges reported active industrial support for their fund project at the bid-preparation stage. Regional partner agencies were infrequently involved publicly in "launching" the fund, but appeared distant from the bidding. the fund, but appeared distant from the bidding, approval, and implementation processes. The likelihood of successful outcomes was enhanced through evident compatibility between fund project activity and existing college planning. Ways in which col-leges developed the local training market included targeting small and medium sized enterprises, funding capital development, and breaking down barriers to access. Project innovations were also enhancing colleges' offer to existing students and opening up new markets through the deployment of flexible learning opportunities. Potential benefits from collaborative work with other colleges included the following: sharing good practices, accessing staff expertise and cooperation from the higher education sector, dividing jobs according to strengths of partner colleges, and enhancing purchasing power. of years have come to realize that an increasing number of them are disruptive. This book offers number of them are disruptive. Imb sook offers alternatives for responding to disruptive students. Solutions are offered from the perspective of a men-tal health professional with years of experience on a college campus. A code of student conduct is care-fully outlined and is followed by some recom-

mended procedures for dealing with incidents of disruptions, including tips on prerogatives, docu-mentation, and the aversion to administering discipline. Steps to follow when dealing with disruptive students are explored next, and an entire chapter is devoted to disruptiveness in residence halls. Topics in the latter chapter include dealing with the harassin the latter chapter include dealing with the harass-ment of residential staff, countermeasures to harass-ment, coping with self-destructive students, assaults, rape, thefts, and vandalism. A college's mental health program should also play a part in helping with disruptive students and the role of the mental health consultant and mandatory psycho-therapy as a form of discipline are examined. Some special problems, such as mental illness and danger-ousness, medications, child care, and offensive dress, are treated in the next chapter followed by a selection of case studies. Contains a 25-item bibliography. (RJM)

This book presents excerpts from a large collec-tion of student journals which were submitted to an English professor over a 15-year period. The diaries, many of which were read aloud and anonymously in class, offer a unique glimpse into the personal world of students' lives. The journals demonstrate many of the themes that students write about and these per-sonal narratives raise crucial issues regarding the sonai narratives raise crucial issues regarding the rewards and risks of introspective classroom diary writing. Most of the chapters here examine subjects that students addressed every semester, and in-clude: problems children experience with divorced parents; the alarming number of college women sufparents; the assuming numer of conege women sur-fering from eating disorders; how students cope with the devastating loss of relatives and friends who have killed themselves; and sexual activity which men and women reveal or conceal. The final chapter explores how diary writing intensifies the student-teacher relationship and stimulates personal growth and discovery in the classroom. It is believed that by writing weekly diaries and by hear-ing a few of these entries read aloud, students are n able to experience personal breakthroughs

Experiences with uncontrollable events may lead Experiences with uncontrollable events may lead to the expectation that future events will elude control, resulting in disruptions in motivation, emotion, and learning. This text explores this phenomenon, termed learned helplessness, tracking it from its discovery to its entrenchment in the psychological canon. The volume summarizes and integrates the canon. The volume summarizes and integrates the theory, research, and application of learned help-lessness. The chapters discuss: the phenomena of helplessness and personal control; observations of learned helplessness in animals, including an account of how the condition was first observed in dogs who were repeatedly shocked; the biology of learned helplessness, with an emphasis on biochemical reactions and their effects on organisms, learned helplessness in people, including a meta-analysis of human helplessness studies; the attributional refor-

mulation, which looks at causal explanations and the locus of control; connections between learned helplessness and depression; social problems arising from learned helplessness; correlations between learned helplessness and physical health; and an epilogue which examines the importance of control and some of the disputes surrounding the concept of learned helplessness. Each chapter critically evalu-ates what is known and not known about relevant topics and offers suggestions for future research.
Contains over 550 references, as well as an author index and a subject index. (RJM)

Identifiers—\*Psychotropic Medication

A compilation of literature and clinical wisdom, this handbook provides the reader with current information on the safety and efficacy of the psychotropic agents in the pediatric population. It lists information on the pharmacokinetics, adverse effects, dosing, and suggested monitoring guidelines for children and adolescents. The guide may also be used as a reference by practitioners. The handbook avoids repeating or extrapolating the adult informa-tion on indications, adverse effects, and dosing, and it is assumed that any adverse effect that has been reported in adults may occur in children and adolescents. Only the drugs that have been used to treat disorders in children and adolescents are included in this text. It is divided into six sections: central nervous system stimulants; antidepressants, including tricyclic antidepressants, bupropion, and trazoing tricyclic antidepressants, bupropion, and trazo-done; antipsychotics, lithium: benzodiazepines; and other agents used in child and adolescent psychia-try, such as beta-blockers, buspirone, clonidine, and naltrexone. Also included are practical monitoring guidelines which include needed baseline assess-ments and specific instructions for parents or care-givers. Contains over 100 references and a comprehensive index. (RJM)

The old-fashioned focus on individuals as separate from their surroundings is no longer tenable. The papers in this edited volume are informed by the Group Relations model which was designed to help those providing services to children and adole to evaluate treatment programs and to make needed improvements. The chapters describe how a multitude of factors-the competence of staff; the safety, nurturing, and protective elements of the emotional, physical, and political setting; and overt and covert organizational dynamics-determine whether or not organizational dynamics-determine whether or not a treatment setting accomplishes its therapeutic aims. The specific issues discussed here include the residential setting in psychotherapeutic work with adolescents, angry children and frightened staff, ap-plications of the Tavistock Group Relations Model in community mental health and protective service systems, revitalizing human service organizations, and the school romance, which is an analysis of the subjective experience of school life. Topics covered include the emphasis on groups-as-a-whole in problem solving and treatment design; narrowing the gap between plan and outcome; issues of staff selection, training, and development; the dynamics involved in the psychiatric treatment of children, revitalizing organizations, and countertransference responses in organizations, and countertransference responses in the treatment of children and adolescents. Each pa-per features a short bibliography. (RJM)

Management Identifiers—\*Canada, ERIC Digests

A major survey of career and employment coun-seling in Canada was completed in 1993, with over 1600 counselors, department heads and managers of counseling centers, and regional directors working in career and employment counseling centers being polled. Survey results indicated: (1) there is a strong need for evaluation in all aspects of career counsel-

ing; (2) counselors face a number of challenges, such as dealing with client expectations and personal barriers, as well as their own stress and frustration; (3) clients know what they want from counseling, but their initial expectations undergo changes; (4) counselors need to examine how they spend their time; (5) there is a need for more effective leadership in the explastion; and (6) counselors need to become the profession; and (6) counselors need to become better at marketing what they do. A call is made for a different model for delivering counseling services, moving away from ineffectual individual counseling and toward more group work, evaluation, mentor-ing, marketing services, and large-scale resource sharing. If counseling is to survive to service the clients who desperately need it, counseling will need to become truly client-centered, not program, or test, or counselor centered. (RB)

Stay-in-School is a Canadian government initiative launched in the early 1990's encouraging young Canadians to build a solid foundation for the future by finishing high school and by acquiring the skills needed for the labor force of tomorrow. Three fundamental principles guided the initiative: (1) comneeded for the labor force of tomorrow. Three fundamental principles guided the initiative: (1) compassion, caring, and commitment are essential to change; (2) change is possible and likely when there is significant 'buy-in' by participants; and (3) collective action can be expressed through the interdependency of many partners. The initiative used a strategy to reduce Canada's dropout rate through collective responsibility and action, and through the empowerment of every person. The strategy consisted of three components: (1) creating public awareness of the problem of dropouts; (2) mobilizing people by encouraging them to develop and share ideas, approaches, and solutions; and (3) providing moral and financial resources for implementing local interventions. Effects of the Stay-in-School ing local interventions. Effects of the Stay-in-School initiative include a noticeable increase in student retention, improved scademic achievement and life skills of participants, and increased public aware-ness of the dropout issue. Several recommendations are made regarding other large-scale student reten-

There is evidence, that these who could be a surface.

Identifiers—\*Canada

There is evidence that those who seek employment during difficult times, but are not successful, will continue to experience ongoing hardships throughout their working lives, often developing an ongoing dependency on the social safety net. This digest describes two federal programs on the youth employment front: (1) Youth Service Canada

(YSC), aimed at putting out-of-school and unem-ployed young people back to work; and (2) Youth Internship Program, which supports new, entrylevel training programs for occupations in expand-ing industries. In 1994, YSC engaged over 1,100 unemployed youth in productive community service work terms which provided a weekly stipend and a completion grant in the form of a voucher. The Youth Internship Program will offer internships to high school students, high school graduates, and early school leavers who are looking for training or opportunities. Internships will consist of school-based training, community-based training, or entry-level training in industry sectors. Both programs contain career and skills development com-ponents, with participants provided special services in such fields as career planning and counseling, career and labor market information, volunteer adult mentors, and transition assistance. Counseling Resources for Youny initiative was created in response to the large numbers of young people in need of career development assistance in Canada during the late 1980s. These groups included out-of-school youth, youth with special needs, underemployed youth, youth at risk of leaves asked and these instability without a risk of leaves. ing school, and those in school without a sense of career/life direction. CAMCRY included 41 distinct projects at 18 colleges and universities across Canada, each project meeting numerous criteria: 50-50 funding (half from government and half from elsewhere), innovation, practicality, emphasis on young people, and containing rigorous field test and evaluation components. Some projects targeted pro-fessionals who work with youth, while the majority ressionais who work with youth, while the majority focused on youth themselves. Organizers learned that: (1) Collaboration (both in planning and operation) takes significant time; (2) Marketing is important; (3) Field test data are important but are not enough; and (4) Advisory committees can be helpful. Several elements are discussed which would enhance the initiative were it possible to do again. These elements include: (1) building a solid vision statement early to focus the advisory committee and provide cohesive direction to the projects; (2) building into the master plan ample time for implementa-tion and mobilization; (3) recognizing that a training program is as important as the program for youth;
(4) recognizing that consultants are necessary in program development; (5) providing ample support for evaluation; and (6) planning and budgeting for "spin off" events. (RB)

One of the goals of education in Canada is to prepare young people to participate in paid work, either as employees or self-employed. Many educators faced the challenge of preparing youth for the highly competitive and changing global marketplace by calling on employers to articulate and communicate their needs. In an attempt to address the changing ability needed to be successful in the workforce. ing skills needed to be successful in the workforce, the Conference Board of Canada developed an Employability Skills Profile, based on input from employers and validated by a wide range of stakeholders. Twenty-five major employers state that employers in Canada were looking for people possessing the following traits: (1) ability to communications of the communication of the com possessing the rollowing traits (1) about to Commin-nicate, think, and continue to learn throughout life; (2) ability to demonstrate positive attitudes and be-haviors, responsibility, and adaptability; and (3) ability to work with others. The Profile, which is presented as a table, has become a benchmark which educators, counselors, and businesses use to identify ndational skills necessary for successful liv ing. (RB)

Identifiers-Canada, ERIC Digests The contextual considerations outlined in this di-gest provide a framework for career counseling with Canadian Native youth, a process which requires an unusually large range of cultural understanding and an appreciation of diversity and uniqueness. Counan appreciation of diversity and uniqueness. Coun-selors need to be aware of individual diversity within Native groups. Four Native "cultural-self" definitions presented are: (1) traditional; (2) assimi-lated; (3) transitional; and (4) bi-cultural, each of which have profound implications for the career counseling process. Ways in which dominant soci-ety schools impede the career development of Native youths are discussed, as well as reasons why training in multicultural counseling is inappropriate for those working with Native youth. Research sug-gests at least five ways in which career work with Native youth can reduce racism and dominant society suppression of Native identity and give Native youth a greater voice in the formulation of career conceptions which are sensible to them: (1) support for educating Natives as career counselors; (2) ensure that Native youth can access credible couns ors; (3) restructure counselor education programs to include Native culture; (4) develop counseling programs tailored to the needs of Native youth; and (5) revise the basic process of career counseling for Native needs. Identifiers-Canada, ERIC Digests

It is essential for career counselors working with Canadian Native youth to be cognizant of Native communication patterns, which include non-intru-sive listening, story-telling, patience, and respect for family influences. Native students and their parents want non-biased treatment, information, and guid-ance from counselors so as to ensure both successful navigation of the school culture and transition to worklife. There is a great deal of diversity among Native groups. Counselors must not fall into the trap of seeing all Natives as the same, or as "different in the same ways." A counselor's best tools are: knowledge of Native culture and protocol; a per-sonal, informal, and accessible counseling style; useful knowledge about the school and work; patience, respect for world-views (including balance, harmony, spirituality and non-intrusiveness); and an ability to relate to native youth on the basis of their strengths and successes, rather than their failures and deficits. Contains seven references.

Identifiers—Canada, ERIC Digests In hoping for a brighter future of self-government and self-determination, Canadian Aboriginal communities have placed great hopes and expectations on their youth. The complexity and uniqueness of career-related issues pose a formidable challenge in the development of career counseling programs for Aboriginal youth. This digest describes the process involved in creating "Career Counselling for Ab-original Youth: The Journey Inward; The Journey Outward," a program based on the traditional concept of a vision quest. The participatory, program-planning approach resulted in several important outcomes: (1) the participatory process continued into program implementation; (2) plan-ning team members from Aboriginal communities ning team members from Aboriginal communities became strong program advocates; (3) the communities demonstrated ownership of the program and encouraged community member participation; and (4) new inter-community and inter-agency networks resulted in other partnership initiatives. Most works resulted in other partnership intuitives. Most importantly, the participatory process resulted in a program which integrated appropriate knowledge and cultural components in a career-counseling pro-gram which met the needs of Aboriginal youth.

Identifiers-\*Secrecy

Identifiers—"secrecy
The prevailing view of secrets as undesirable or
unhealthy is challenged in this exploration of the
meaning and significance of secrecy. As a crucial
dimension of human development, secrets lead to a
child's awareness of inner space and external
worlds. This in turn leads to the development of a critics awareness of imner space and external worlds. This in turn leads to the development of a sense of self, personal responsibility, autonomy, and intimacy in human relations. Numerous accounts of everyday experiences with secrecy are presented which challenge assumptions about the ethics of silence, privacy, reserve, and lying. Chapters are: (1) The Question of Secrecy; (2) Modes of Secrecy; (3) How Do We Experience Secrecy; (4) Secrecy in Fiction; (5) Where Do Secrecy and Privacy Come From?; (6) Differences Between Secrecy and Privacy; (7) The Physiognomy of Secrecy; (8) Secrecy and the Origin of Identity; (9) The Development of Inwardness; (10) Secrecy and Postmodern Culture; (11) Lying and Secrecy; (12) The Childhood of Secrecy; (13) Guilt, Shame, and Embarrassment; and (14) The Pedagogy of Secrecy. While revealing the pervasiveness of secrets in human life, this book explores the ways in which teachers and parents can give the experience of secrecy the opportunity to give the experience of secrecy the opportunity to bring meaningfulness to the lives and relationships of children. Identifiers-Peace Education

Teacher education programs are rapidly changing to ensure that pre-service teachers are well prepared to successfully conquer the critical issues they will encounter in K-12 public schools. The major issue encounter in K-12 public schools. The major issue influencing teaching and learning is school violence and the lack of a sense of peace and caring in educational institutions. The educational system provides an excellent opportunity for adults and children to explore and practice mutuality and reciprocity of respect and caring. Peace education refers to a non-authoritarian educational process that is compatible with peace and avoids all structural violence. A model for implementing Peace Education in the kindergarten through third grade curriculum as an effort to teach caring skills in elementary school is presented. The model addresses concepts related to presented. The model addresses concepts related to peace and caring such as: (1) The meaning of peace and caring; (2) Peace and caring enhancing healthy families; (3) Peace and caring as a tool for positive relationships; (4) Peace and caring as related to diversity issues; (5) Visions of a peaceful, caring society; and (6) Emotional intelligence as related to intelligence quotient. Strategies are provided for parents, teachers, and principals. (JBJ)

\*Intervention, School Counseling, School Counselors, \*School Psychologists
School psychologists need to employ a multicultural perspective in the areas of death, dying, and bereavement. To develop multicultural sensitivity and competency requires setting aside one's personal beliefs in an attempt to adopt another's perspective. Consequently, school psychologists first need to explore their own attitudes about death and origing a waller as the heart assumptions that pressal in grief as well as the basic assumptions that prevail in their local culture and subculture. Ross' (1994) eight factors to consider in providing services to mu factors to consider in providing services to multicultural students, parents, and communities are discussed. They are: (1) communication; (2) values; (3) concept of the family; (4) religious beliefs; (5) attitudes toward the body; (6) attitudes toward death; (7) bereavement, grief, and mourning practices; and (8) funereal practices. In reviewing dying, death, and bereavement practices throughout many cultures, some commonalties can be found. The community are services are serviced to the community of the commun tures, some commonalties can be found. The community provides group support, while funeral rites provide a sense of closure. Professionalism of "death and dying" is found more in urban rather than rural areas. Fatalism regarding life and death can be found among the poor, and immortality beliefs among the oppressed. Children in rural areas directly observe and participate in death and grief rituals while urban children are more sheltered. Appendices are: (1) Death Awareness Questionnaire; and (3) Multicultural Awareness Questionnaire. Contains 33 references. (JBJ)

"Substance Abuse
According to current estimates, approximately
5.5 percent of all American pregnant women use an
illicit drug during pregnancy. National concern for
drug-exposed infants prompted interest in the needs
of substance using pregnant women and in the development of drug treatment programs for them.
A total of 147 comprehensive programs have been
funded under the "Decreated and Rectreatment funded under the "Pregnant and Postpartum Women and Their Infants" (PPWI) initiative, the largest federal program targeting pregnant sub-stance-using women and their infants. A 2-day fo-cus group was held with representatives from 10 of these recently completed projects to share lessons learned about how best to recruit and retain this population. Before successful recruit and retain this population. Before successful recruitment can take place, program staff must have a thorough understanding of participants' needs and lifestyles. Cultural sensitivity to ethnic backgrounds of clients is critical to making substance abuse programs inviting. Women who are addicted to substances live in a social environment where there is little long-term a social eavisonment where there is nitre tong-term planning. Therefore, programs must reduce waiting time from initial contact to program entry. Recom-mendations are made relating to child care, trans-portation, staff training. Contains 58 references. Appended are a list of focus group participants and descriptions of 10 programs. (JBJ)

There is a widespread problem with schools having the ability to turn out young people equipped with skills needed to properly function in society. This report describes a program for increasing skills necessary for learning and for living such as cooperation, perseverance, problem solving, and friendship. The targeted population was elementary school students in a growing, middle class commu-nity. Faculty reported a weakness in student's interpersonal and social skills, and data revealed a lack of knowledge and skills related to working together, achieving personal best, problem solving, and mak-ing friends. Review of curricula content and instrucing friends. Review of curricula content and instruc-tional strategies revealed an over emphasis on skilled subjects, leaving little or no time for life skills to be taught in the classroom. Three categories on intervention were indicated: (1) an integrated unit to teach students basic life skill vocabulary; (2) the development of a program to implement the use of life skills in the classroom; and (3) a plan to connect life skills in the classroom; and (3) a plan to connect the life skills throughout the entire school. Post-in-tervention data indicated an increase in awareness of the Life Skill vocabulary, an improvement in us-ing and understanding Life Skills, and the develop-ment of a foundation for future growth. Twenty-two appendices account for 25% of the document and contain all materials used in intervention. Contains 41 reference. (IBI) 41 references. (JBJ)

Personality is defined as the dynamic organization, within an individual, of the systems that determine his or her characteristic behavior or thought.
The study of personality involves many aspects of

The study of personality involves many aspects of human behavior. Four approaches used to study personality are presented in this document: (1) So-

cial Learning theory; (2) Trait theory; (3) Phenomenological theory: and (4) Cognitive-Development theory. Some principles of these theories overlap, but basic concepts are distinguishable. Social Learning theory's basic tente is that human behavior results from an organism's past learning as it has developed through interaction with the environment. Trait theory asserts that personality is more or less organized by persistent characteristics or dimensions of individual differences—within each individual there exist predispositions to respond to situations in a certain manner. Phenomenological theory stresses the cognitive acquisition of meaning from stimuli an individual is presented with in life's daily activities. Cognitive-Developmental theory traces development of personality from birth to adulthood as capacities and concerns and thought processes develop. Some theorists posit that all normal individuals pass through the same sequential mal individuals pass through the same sequential periods. Major theorists and approaches to person-ality assessment are described for each approach. Contains 23 references. (JBJ)

Quality substance abuse training for 279 educational personnel (school counselors, school nurses, and school psychologists) across the state of Ala-bama was provided in a series of two-day training omia was provided in a series of two-day training sessions through a federal grant. Although the origi-nal grant proposed 7 training sessions, 9 training sessions were ultimately offered over the course of the project, with class sizes ranging from 9 to 46 participants. Four of the training sessions were held in Birmingham, Alabama. Goals and objectives of the grant are listed, and how each goal was met is described. The goals were to: (1) improve the quality of drug education materials by developing training materials; (2) increase the number of qualified school-based substance abuse professionals; and (3) increase the amount of technical assistance available to school coursely expected into a specific and increase the amount of technical assistance available to school counselors, psychologists, and nurses to aid them in establishing prevention/intervention activities at the local level. Participants' project evaluations were highly positive. Contains three tables. Appendices, which account for 80% of the document, are: (1) Advisory Board Members; (2) Participant List by Site Trained; (3) Qualitative Evaluation Comments; (4) Evaluation Report; and (5) Alabama Peer Helpers Association Conference Brochure. Pub Type— Information Analyses (070)

Before any type of mental health treatment for a client with this dual diagnosis can begin, proper as-sessment is critical. Clinicians working with this population have to adapt their treatment strategies and assessments to the cognitive level of their cli-ents. In addition, persons with mental retardation rarely seek out treatment on their own. Using a personal psychotherapy/counseling perspective, counselors need to carefully build relationship components which include the essential attributes of genuiness, empathy, and unconditional positive regard. In addition to a strong therapeutic relationship the counseling and properties of the counseling the co ship, the counseling environment must be seen as supportive, beginning with the initial interview. Key factors include setting a positive emotional tone for interactions, responsive and active listening, labeling feelings, and interpreting in understandable ways the client's statements and feelings expressed. The highly verbal nature of the counseling process is an important factor to consider when working with clients who may have limited or no verbal abili ties due to their level of cognitive impairment. Specific types of therapies are examined. Education for mental health service providers treating these cli-ents is strongly recommended. Contains 22 refer-

Feminist therapy, born of activism and opposition

Identifiers—Relativism
Feminist therapy, born of activism and opposition to the bias within conventional psychotherapy, is most often defined by its emancipatory goals for women and its approach to treatment which examines the link between the patient's problem and systemic discrimination. In this study, 20 feminist therapists were interviewed in order to explore the way in which feminism is manifested in their psychotherapy practice. Respondents described the defining characteristic of their feminist practice as the nutruturine, compassionate, and respectful nature of fining characteristic of their feminist practice as the nurturing, compassionate, and respectful nature of the therapist-client interaction. Feminist therapy, having developed outside academia, has resulted in intellectual isolation of the practitioners from the ongoing debates among scholars. Among issues discussed are gender essentialism, relational theory, and moral relativism versus absolute feminist values. Rather than a vision of feminist therapy that joins feminist ideology with psychotherapy, the respondents graft elements of feminism onto the process of their practice. This acts to guide the patient to the goal of personal fulfillment from within the existing power structure, rather than challenge it. existing power structure, rather than challenge it. (LSR)

tions, Self Concept Identifiers—\*Racial Identity Attitude Scale One way in which theorists have attempted to understand the differences in identity and attitudes of minority groups, and more recently majority groups, has been through theories of racial identity development. In this study factor analysis was apgroups, has been through theories of racial identity development. In this study factor analysis was applied to J. E. Helms' models of racial identity development: the Black Racial Identity Attitude Scale, Form B (RIAS-B), and the White Racial Identity Attitude Scale (WRIAS). The responses of two samples (N=363; 203 Black and 160 White undergraduate students) were analyzed in order to investigate

whether stage scores displayed the structure exwhether stage scores displayed the structure ex-pected of variables that measure a hierarchical, de-velopmental sequence. Characteristics expected of developmental models include the display of a sim-plex-like structure in the intercorrelations of stage plex-like structure in the intercorrelations of stage scores and the factor loadings for stage scores approximating a two-factor semicircular configuration with variables ordered by stage along a semicircle. The pattern of the RIAS-B scores appeared to approximate the developmental stage structure requirements with a reversal of the Disintegration and Reintegrations scales. Unlike the RIAS-B, the stage scores for the WRIAS failed to demonstrate a developmental stage order. Defining racial identity via developmental stage models would appear to merit reconsideration. Four tables and six graphs present hypotheses and analysis. Contains 37 references. (Author/LSR)

In this study, a peer-operated university-based anonymous hotline is a data source for the assessment of student concerns and needs, providing em pirical information for prevention-oriented psycho-educational campus programming. This pa-per covers the collection and assessment of data from the anonymous hotline service of the Middle

Earth Peer Assistance Program at the State University of New York at Albany. For the 1994-95 academic year, peer assistants recorded information on all calls to the hotline: demographic, call content, and counselor's response. Five tables reflect the patterns of usage of the hotline, representing the topic and frequency of calls and gender of caller. Data indicates that males used the hotline more than females, with most male repeat callers discussing sex-ual issues. Females, twice as likely to be non-repeat callers, were concerned with such issues as assault, rape, and eating disorders. Training undergraduate hotline staff to record calls with a data collection instrument is vital to the assessment of patterns of usage. Empirical analysis guides future curricula and the targeting of program intervention while ac-quainting students with the research aspect of the mental health profession. Appended are two record-ing instruments, and several tables which present statistical analysis. (LSR)

Identifiers—Aliteracy, Illinois (North)
This report describes a program for increasing intrinsic reading motivation. The targeted population consisted of lower primary students in a growing middle class community, located in northern Illinois. The problems of aliterate students were documented through teacher observations and student surveys. Analysis of probable cause data revealed that students lack access to books; view too much television; and are not read aloud to at home. The

ever-growing diversity of the community increased a reading/language barrier in the classroom. This may have complicated the teacher's ability to individualize instruction. Major categories of intervention were arrived at after a review of solution strategies. A 1983 national commission on reading found conclusively that reading aloud in the home was the important activity in determining eventual was the important activity in determining eventual success reading. Numerous studies since then sup-port these findings. In 1995 J. Trelease reported that one of the major purposes of reading aloud is to motivate children to read independently for pleasure. These findings, combined with an analysis of the problem setting, resulted in 2 major categories of intervention: a program to increase book awareness and exposure to reading materials and reading models both at home and at school. Post-intervention data indicated an increase in the students' intrinsic reading motivation. (Contains 30 references and 21 appendixes, including surveys, and sample reading buddy activities.) Identifiers—"Lee County School District FL
A study examined how Accelerated Reader Program (a computerized reading management program used in elementary education) affected attitudes toward reading and use of the media center. Fifth-grade students in three Lee County, Florida schools were surveyed. One school had no Accelerated Reader program in place; one school had a mandatury Accelerated Reader Brogram; and had a mandatory Accelerated Reader Program; and one school had a voluntary Accelerated Reader Pro-gram. All schools had similar pupil composition (so-cioeconomic, multicultural, achievement levels) and so were comparable. A two-page survey instru-ment was developed that included queries about the use of the media center, number of books checked out, enjoyment of reading, and favorite indoor activities. A total of 222 surveys were completed and the results tabulated. Results indicated no relationship between the use of Accelerated Reader and frequency of library use or attitudes toward reading and the media center. Results also indicated that the great majority of fifth-grade students in all three schools enjoyed reading. The most common re-sponse to the open-ended query "What would you change in the media center?" was "change nothing." (Contains eight references. Appendixes present the survey instrument, seven charts and one table of data, and information from Accelerated Reader Program.) (Author/RS)

Preservice Teacher Education, Student Atti-tudes, "Student Participation, Teacher Role Identifiers—"Alternative Assessment A methods course teacher, as part of a newly de-veloped 12-hour integrated block that combines reading, social studies and science methods courses with clinical field experience, used student-negotiated assessment in one section and teacher-directed assignments and assessment in another section. In the portfolio section, the instructor could see the connections between what was taught and what students learned through the evidence in the portfolios. The other section ended with a traditional final exam. Many students struggled with the effort, and connections between what was taught and what stu-dents wrote sometimes were not obvious. In the portfolio section, the instructor began introducing portfolios to the students the first day of class. The second day of class they began to co-construct a framework for guiding the portfolio process. The students collectively decided how much to weigh the portfolio as a part of their overall final grade and were given the option of deciding individually how much a of a role the instructor had in evaluating the portfolio. Overall, the instructor and the students agreed on the general grade for the learning docu-mented in the portfolio. While most students effec-tively documented the acquisition of new ledge, fewer were effective at documenting how they applied that knowledge. The use of stu-dent-negotiated evaluation through the portfolio process provided the instructor opportunities to model effective strategies for alternative assess-ment. The portfolio helped students to see connec-tions between the methods class and their clinical experience. (Contains 8 references.) (RS)

tions, Word Learning
A study was conducted which addressed the following questions: (1) Do elementary school chi-dren infer word meanings from context?; (2) Are older students more successful in using context to infer the meanings of new words than younger students?; and (3) is a longer context more facilitating to word meaning inference than a shorter context?; and (4) Is context more facilitating to the inference of high frequency words than to low frequency words? Eighteen children in grade 3 and 18 children in grade 6 were randomly assigned to 1 of 2 condi-tions: words-in-isolation and words-in-context. Stu-dents in the words-in-context conditions read long dents in the words-in-context conditions read long passages containing high frequency words, long passages containing low frequency words, short passages containing a high frequency word, and short passages containing a low frequency word, and short passages containing a low frequency word. Students in both the words-in-isolation (no passages) and the words-in-context conditions worde definitions to the target words. An analysis of variance comparing the performance of the words-in-isolation group to the words-in-context group revealed a significant differ-ence between the performances, in favor of the words-in-context group. A repeated measures anal-ysis of variance revealed differences by grade, passage length, and word frequency, as well as interaction effects. Results suggest that older students are better able to use context than younger students and that shorter passages are more facili-tating to inferring word meanings from context than longer passages. (Contains 2 tables of data, 2 figures, and 50 references; 2 sample forms are appended.) (Author/CR)

Part 1 of a two-part handbook presents course information, reading materials, and sample execu-

information, reading materials, and sample exercises for a distance education course designed to enhance an understanding of the nature of family literacy needs and to show how to develop and teach in family literacy programs. The first section discusses the structure of the course, the assessment scheme, texts, and assignments. The second section presents a required reading for the course, "Family and Intergenerational Literacy Programs: An Update of The Noises of Literacy" (Ruth S. Nickse). The third section contains readings for the two required modules of the course, which address the need for family literacy and planning issues. The fourth section consists of an introduction to the six elective modules. The fifth section presents reading materials and a sample exercise related to the third module (an elective module) of the course-proposal information, reading materials, and sample exermodule (an elective module) of the course-proposal writing. Some modules contain selected abstracts from the ERIC database. (RS)

Identifiers—Authentic Assessment, \*Kentucky, Kentucky Education Reform Act 1990, Process Approach (Writing)
A study examined whether Kentucky primary teachers were adopting the changes in literacy instruction recommended in the Kentucky Education Reform Act (KERA/1990) which, in part, encouraged the use of whole language and integrated reading/language arts approaches and the teaching of writing as a process. The study employed direct classroom observations and teacher interviews with 96 subjects, selected by random sample from 24 schools in Kentucky's 8 regional service center areas. Results indicated that approximately 70% of teachers were using recommended practices in eas. Results indicated that approximately 70% of teachers were using recommended practices in reading and writing instruction and 60% were using authentic methods of literacy assessment. Half or more of the teachers were having difficulty implementing continuous progress, using flexible grouping, and varying their instruction to meet individual needs. Teachers were also having difficulty sharing control with students. It appears that statewide mandates in literacy instruction and assessment can mandates in literacy instruction and assessment can bring about changes in teachers' instructional practices (CR)

A study examined the relationship between two
variable sets: (1) epistemological beliefs (Quick
Learning, Simple-Certain Knowledge, and Innate
Ability) and performance goals; and (2) conceptual
understanding and application reasoning in conceptual change learning. In addition, effects of different
kinds of prior knowledge on conceptual change
learning were investigated. Subjects were 95 eleventh- and twelfth-grade students enrolled in science
classes at an inner-city public high school in New
York City. Results from repeated measures
ANOVA (Analysis of Variance) indicated that refutational text was effective in facilitating conceptual
change learning. Results from canonical correlation
analyses demonstrated that beliefs about innate ability contributed the most to conceptual change learnanalyses demonstrated that beliefs about innate abitity contributed the most to conceptual change learning, whereas beliefs about quick learning contributed the least. Findings suggest that beliefs about innate ability are an important factor in conceptual change learning among inner-city high school students. (Contains 38 references and 5 tables of data.) A pilot program of teacher education was conceptualized in response to the increased diversity within the elementary classroom and a growing realization that evolving service delivery paradign the public schools suggest a need to examine how educators are being prepared for this environment. The College of Education and individual faculty members of the Teacher Education and Educational members of the Teacher Education and Educational Leadership Departments of Saginaw Valley State University, Michigan have organized the Unified Elementary Pilot Program (UEPP) in conjunction with Bangor Central Elementary and the Bangor Township Schools. The program is "unified" in several ways: (1) the College of Education is "unified" with Bangor Township Schools in a partnership that permits and supports the pilot; (2) a unified instructional team consists of university teacher educators and classroom teachers; (3) methods courses are taught in integrated, semester-long blocks using thematic units; and (4) the knowledge/skills competencies unique to special education teacher preparation has been unified with course work and field experiences required throughout the elementary program. A cohort group of 25 students was selected from among those students admitted to the College of Education. The pilot program commenced during among those students admitted to the College of Education. The pilot program commenced during the Winter Semester 1995 and will be completed by the end of the Spring semester 1997. (A list of the competencies, skills, and knowledge needed to teach in the unified classroom; a list of variables and evaluation methods for the pilot program; and a list of program outcomes are attached.) Student Motivation
Identifiers—Communication Behavior, Educational

A literature review investigated the still nebulous area of email's implications for literacy learning by reviewing the existing literature across disciplines on the interests and concerns of literacy researchers and educators about email and the major issues and areas of concerns which are and will be relevant for ilteracy researchers. The empirical papers and posi-tion papers examined dealt with email's impact on human behavior, cognition, and affects and its char-acteristics facilitating or hampering human interac-tions. Materials reviewed were published between the mid-1980s and late 1995. Results of the literature review indicated that (1) in reducing the social cues and enriching functions of easy editing, storing, and manipulating, email lends itself to more user control and user responsibility; (2) email is capable of bringing traditionally peripheral persons into the instructional mainstream; (3) due to its reduced sense of social presence, email communication exhibits some sense of anonymity and depersonaliza-tion; (4) email is direct, straight forward and more self-centered; (5) email offers users chances to de-velop positive attitudes but can also touch off some velop positive attitudes but can also touch off some undesirable behaviors; and (6) anecdotal reports suggest that email might have effects on social behaviors such as collaboration and motivation. Further research should investigate cognitive implications of email-related literacy activities, social effects such as increased collaboration, affective anecdotes concerning motivation, and email's effects on different age groups and different language proficiency groups. (Contains 88 references.) (RS)

This book is divided into three parts. It begins with fundamental principles about reading, texts, and teaching which underlie the way the book approaches its subject; the second part looks more closely at some of the theoretical issues and how they affect reading teaching. The third focuses on the importance of exensive reading, the choice of materials, and the way courses and lessons are learned taught and exessed. materials, and the way courses and lessons are planned, taught, and assessed. The book examines the skills required to read effectively; focuses on getting the message from the text; suggests class-room strategies for developing reading skills; and looks at both linguistic and non-linguistic features of texts. Chapters in the book are (1) What Is Readtexts. Chapters in the book are (1) What Is Read-ing?; (2) Text and Discourse; (3) Approaching Reading in the Foreign Language Classroom; (4) Efficient Reading; (5) Word Attack Skills; (6) Read-ing for Plain Sense; (7) Understanding Discourse; (8) An Extensive Reading Programme; (9) Planning Reading Lessons; (10) Selecting Texts; (11) Ques-tioning; (12) Other Kinds of Reading Task; (13) The Textine of Reading Ohy I. Charles Addengers) and Testing of Reading (by J. Charles Alderson); and (14) The Teacher as Reader. Appendixes present texts, extracts from reading courses, lesson plans, and useful addresses, a key to activities, and a 273-item select bibliography. (RS)

Identifiers—Cognitive Research, \*Knowledge Acquisition, Research Suggestions
This book examines the "think aloud method," which asks people to think aloud while solving a problem so that the resulting protocol can then be analyzed to answer questions about problem solving behavior. The method is presented in detail in the book, along with examples. The book finds that the method is useful both for psychological research and problem solving—and also for knowledge acquisition in the context of building expert computer programs. Presupposing almost no specific knowlprograms. Presupposing almost no specific knowledge, the book can be used as a practical guide book by social scientists who want to use the think aloud by social scientists who want to use the think aloud method for research on cognitive processes, and by knowledge engineers who wish to use the method for knowledge acquisition. The book contains introductory sections on those topics which are relevant for both communities. The book concludes with exercises which follow the examples: instructions for 2 problem-solving tasks, protocols of "learning word meanings," analyzing expert problem-solving, coding scheme architectural design, and a protocol of povice problem-solving in physics. Providing guidance to language arts teachers and those responsible for curriculum development, this handbook provides a model competency-based lan-guage arts program that provides direction for Ohio school districts in developing local competency-based educational programs. The model includes the following for grades 1 through 12: (1) a model curriculum for instruction in composition, listening and visual literacy, oral communication, and readand visual literacy, oral communication, and reading; (2) model performance objectives in composition, reading, listening, and oral communication; (3) recommended strategies for standardized, gradelevel assessment suitable for measuring progress in meeting performance objectives in composition and reading for grades 1-10; and (4) a recommended program of intervention services by grade level for learners who do not make satisfactory progress toward achieving performance objectives in composition and reading. After an introduction, sections of the handbook discuss the philosophy, curriculum strands, curriculum matrix, and curriculum by grade levels and course of the model program. The handbook then presents detailed subject objectives and pupil performance objectives for each of the grades book then presents detailed subject objectives and upuil performance objectives for each of the grades kindergarten through grade 12. The handbook next presents a district-wide grade-level assessment, a third-grade guarantee checklist, ninth-and twelfth-grade reading and writing proficiency test outcomes, a reading rubric, a writing rubric, a description of intervention services, portfolio assessment, guidelines for selecting reading materials, and suggestions for a reading list. A 79-item glossary and a list of 8 recovers are attached (85). d a list of 8 resources are attached. (RS)

fornia Santa Barbara
This paper begins with "insider" voices from disciplines that students in a writing program rarely encounter. As background, the paper muses on the theoretical and pedagogical potential of studying and understanding the rhetoric of inquiry in other disciplines as a way of arriving at a social constructionist view of knowledge. The paper notes that there is value in making faculty and students participants in conversations across disciplines and having them immerse themselves in the research processes that give rise to and shape the discourse of various them immerse themselves in the research processes that give rise to and shape the discourse of various fields. The paper focuses on the research process courses that students may take at either the sophomore or upper division level to satisfy the second quarter of the University of California, Santa Barbara's 2-quarter composition requirement. The paper points out that these are not courses in the research paper, but rather courses in the research process and the nature of disciplines. According to the paper, students hearin by reading interviews that process and the nature of disciplines. According interviews that the paper, students begin by reading interviews that were conducted with faculty of different disciplines; then, in this section of the course, the students learn to move from a position or an interest to a research question. In the second section, the paper states, students learn how to research a question driven by library research; in the third section, students explore methodology, such as qualitative and quantitative research, field studies, or in-depth interviews. The paper contains illustrative comments which show student efforts in each of the sections of the

Identifiers—"Academic Discourse, "Gilyard (Keith), University of Minnesota
In a basic-level writing course at the University of Minnesota, students were asked to read and engage in intelligent conservation about Keith Gilyard's "Voices of the Self." The book is about education but alternates autobiographical material with scholarly analysis. Literacy researchers expect students to read a text, understand what it has to say, and use it in some way (in writing or speaking) that demonstrates their understanding as part of the conversation of their classes. Many students, however, are not familiar with academic culture and ideology; they do not know what constitutes a literate reading; and they do not have the confidence to read they do not know what constitutes a literate read-ing; and they do not have the confidence to read-texts that would be considered standard in the acad-emy. Writing instructors may want to help students overcome these limitations but they also want to make the experience of academic discourse human make the experience of academic discourse human and meaningful. Students need to make sense of their reading in light of their own experience and lives. Frequent and informal writing assignments handled over electronic mail can help attain these objectives since the instructor has a chance to respond personally to the development of each stu-dent, to encourage them to cultivate their own readings of a text. Excerpts from students' e-mail messages and essays shows their noteworthy devel-opment over the course of a semester. In the final weeks of the class, they communicated with Gilyard himself. Their understanding of literate conversa-tion is shown by the critical nature of their questions. (TB)

At the State University of New York at Albany, a controversy arose over what type of writing assignment is appropriate in introductory literature classes, particularly those taught by graduate students. Undergraduates applying for the honors division were unable to produce even one literary criticism essay despite 9 hours of literature courses taken. The assumption was that creative writing assignments serve a lesser purpose and require less in the way of critical analysis. If in fact the "lit-crit" paper is superior to the creative paper, what is it that it possesses? "The Norton Introduction to Literature" asks atudents to cite evidence and "so forth" At the State University of New York at Albany, ture" asks students to cite evidence and "so forth' in their literary criticism essays, to consider tone, "thesis" and "central thrust." Excerpts from a model lit crit essay the Norton provides share many virtues with excerpts from a creative literary essay written by a student. Each seems aware of focus, organization and central thrust. It is hard not to wonder, however, whether constructed defenses of the creative approach such as this are honest. Perhaps the real reason an instructor chooses a certain approach is because he/she likes it. Could it be that re is something disingenuous about claiming a

certain critical approach is more "accurate," more "responsible," more "scholarly," or more "intellectual." Are these words not smoke screens for the instructor's desires? Admitting the genres have much in common might be a way to compromise. (Contains 13 references.) (TB)

Writing capters have to adapt their philosophies

Writing centers have to adapt their philosophies to meet challenges that are unique to individual into meet challenges that are unique to individual institutions. Working with faculty in other disciplines inevitably brings changes in what writing centers do, creating a need for some adaptation in the way a center operates—on at least a practical, day-to-day level. The greatest challenge is to find practical property of fortering the account of fortering the account of fortering the account of contents of the control of t ievet. The greatest challenge is to find practical means of fostering the growth necessary to achieve the ideal. It is fortuitous that Stephen North's essay (1994) and Muriel Harris' essay (1995) appeared in mailboxes at nearly the same time because while North tries to shake what is left of the comfortable assurance that writing centers know what they are about, Harris looks past the proliferation of things writing centers do to discover their unique function, their valuable contribution to education one and in their valuable contribution to education now and in their valuable contribution to education haw and the he longed-for, transcendent future. Among North's major points is that writing centers hamper their own growth by adhering to flawed, idealistic images of themselves. Writing centers, he suggests, are more likely to be coopted by than to change their institutions. In contrast, Harris believes that transforming the institution is part of the writing center's

job and goal. These essays suggest that writing cen-ter administrators need to become less rigid or less defensive in their advocacy of their ideals. They might begin to do that by talking to those who stand between the theory and the daily demands of the writing center, the tutors. (Contains six references.)

\*Learning Environments
Classroom language and literacy practices need to
be reconceptualized to account for the valuable role talk and interaction play in the process of learning to write. Teachers should construct learning environments within which interaction between stu-dents and teachers is the primary focus. The participation framework of kindergarten journal writing activity constitutes a shared indexical ground within which the social process of learning to write may occur. The concept of indexicality is grounded in language socialization theory and can be defined as the relationship of properties of speech to cultural contexts (such as the participation frameto cultural contexts (such as the participation framework) and how this relationship constitutes particular stances and acts in activity. The participation framework is socially constructed over time. Teacher and student in the kindergarten classroom socialize each other to discrete roles within an instructional participation framework, thereby creating a normative structure for participation in writing activity. Data were drawn from an ethnographic study of kindergarten journal writing activity that examined how a context for the social distribution and appropriation of literacy knowledge was consti-tuted in situated participation frameworks. Five interconnected roles were identified that contributed to the socially mediated knowledge distribution process: teacher/scribe, primary author, overhearer, peripheral respondent, and pivot. The teacher uses multiple indexes to indicate the instructional goal of independent writing. The combination of gesture and shifts in register directly indexes approval or praise and simultaneously indirectly indexes the larger instructional goal of independent writing to the group as a whole. (Contains examples of interactions and 33 references.) (TB)

Rosenblatt (Louise)
Pointing out that influential movements in psy chology, reading instruction, and curriculum devel-opment have greatly altered the terrain formerly occupied by the "teaching of literature," this litera-ture review outlines the different ways education researchers have examined the following questions about literature instruction: (1) What are the desired about literature instruction: (1) What are the desired goals or outcomes of litrature instruction? (2) How does the teaching of literature influence learning, and how can it be employed in content areas like social studies and science? (3) What are the roles of literature texts in language education, and how do literary genres and textual formats impede (or facilitate) learning? (4) What is "good literature?" and (5)

How should literature be presented in the classroom, and what instructional strategies are espe-cially effective in the teaching of literature? The review argues that Louise Rosenblatt's (1978) disinction between aesthetic and efferent reading is one that is relevant to most of these questions— cording to Rosenblatt, "efferent" reading occurs when "the reader responds to the printed words or when "the reader responds to the printed words or symbols...toward concepts to be retained, ideas to be tested, actions to be performed after reading." The review sees sesthetic reading, by contrast, as involving a more emotionally engaged relationship to the text. The review finds that current research offers a potpourri of theories, objectives, and strate-gies which frequently present contradictions and paradoxes-especially as regards different orders of learning outcomes and the role of the teacher of literature in the classroom. Identifiers—Illinois (Chicago Suburbs)

A program for improving the quality of student writing was developed. The targeted population consists of kindergarten, first- and second-grade students in an expanding middle class community, located in a suburb southwest of Chicago. The problem is documented through data collected from writing samples, anecdotal checklists, student interviews, and student reflections. Analysis of probable cause data indicated that students who have difficulties with writing frequently experience a lack of ownership or purpose and often fail to recognize the ownership or purpose and often fau to recognize the relevance of writing in their lives. Reviews of profes-sional literature also pointed to inadequate time al-lotted to writing, failure to directly instruct writing strategies, and an insistence by many teachers that writing be accomplished in a silent, non-interactive environment. A review of solution strategies sug-gested by professional researchers, combined with environment. A review or solution strategies sug-gested by professional researchers, combined with an analysis of the problem setting, resulted in the formation of three major intervention strategies: (1) specific experiences will be provided to improve stu-dents' view of writing as a desirable form of communication; (2) frameworks will be devised to organize the classroom environment and instructional time into regularly scheduled opportunities to directly instruct and guide the writing process; and (3) a classroom climate will be created which will encourage social interaction as an integral part of the writing process. (The eight appendixes include a student writing interview, a sample lesson plan, writing rubrics, and a glossary. Contains 27 references.) (Author/TB)

\*Yavapai College AZ English or rhetoric and composition faculty must English or rhetoric and composition faculty must work to collapse disciplinary boundaries in their institutions. The challenge facing English departments is to collapse the "we-they" mentality, to develop productive partnerships with other departments, and to develop a healthy respect for other disciplines. At Yavapai College in Arizona, a survey examined the ways in which faculty in other departments were using writing as part of a writing across the curriculum program. The two disciplines selected were far removed from the humanities and English: gunsmithing and nursing. Sociology was chosen as a third discipline. Research consisted of classroom observation and student and faculty interviews and questionnaires. Results showed that terviews and questionnaires. Results showed that much writing and thinking was going on in the class-rooms but that it was being used to show learning, rooms but that it was being used to show learning, not to discover ideas or create new knowledge. Most all writing was transactional in its effort to complete tasks and not reflective, or as Donald Gray asys, a "record of the mind in the act of knowing." Faculty expected a polished piece, not a trail of invention or thinking. Instructors were also vague about their rationales for their writing assignments. (Contains 4 tables of data, a table of recommendations for working with faculty in other disciplines, and 14 references.) (TB)

ment Tests, Teacher Surveys
The work of the Placement/Progress Subcor The work of the Placement/Progress Subcommit-tee for the City University of New York (CUNY) system is important. The Freshman Skills Assess-ment Program (FSAP) comprises one set of instru-ments used at two points and for two purposes: at initial placement in reading, writing, and math and later at exit from remedial programs. The CUNY Writing Assessment Test (WAT) and Mathematics Assessment Test (MAT) were developed in-house; for reading, the DTLS is used. This system is ex-termely momental because it forms a major part of tremely powerful because it forms a major part of the foundation upon which articulation among the 17 colleges rests. It is of especially sharp concern to 17 coneges rests. It is of especially snarp concern to community colleges because of its effect on transfer. Faculty surveys at the various colleges revealed some patterns and problem areas. "Initial Place-ment" actually comprises two judgments. It deter-mines whether or not a student is remedial; then it places the student in the appropriate course. The tests were found to be more effective in the first task tesis were found to be more enective in the institution.

In the second. In the measuring of student progress, many campuses have developed exams or portfolios or other assessment procedures to be used instead of or along with the FSAP. These in-house measures have the advantage of a closer relationship to the institution's curriculum. The subcommittee came forward with a number of recommendations for initial placement and the assessment of progress: in each case they tried to balance the need for sys-tem-wide articulation with the desirability of re-sponsiveness to locally determined curricula. The "consultant" model for the writing center

The "consultant model for the writing center professional is especially appropriate when graduate students are the ones seeking assistance with their writing. For many academicians with backgrounds in the humanities and liberal arts, "consulting" is a term fraught with mystery. Many have never "consulted" and are not entirely clear what a consultant does. Much has been written on the subject of condoes. Much has been written on the subject of consulting ethics. The American Association of Professional Writing Consultants (APWC) developed a code of ethics in the mid-1980s and June Gallessich has published one in her book "The Professional Practice of Consultation." She provides a detailed discussion of 28 principles of consulting ethics, some of which could apply to the development of ethical, adult relationships between writing center professionals and graduate students. The consultant model for the writing center professional way also professionals and graduate students. The Consultant model for the writing center professional may also be developed along Aristotelian lines. In the Aristo-telian scheme, the writing center professional would be considered as a "useful" friend, which is one of three types of friends Aristotle defined. (TB)

Bringing the electronic classroom to the traditional classroom is a challenge—especially if students
do not have access."

tional classroom is a challenge-especially if students do not have access to computers. There are, how-ever, some exercises that can be conducted in the ever, some exercises that can be conducted in the classroom while the computer grant is being processed. Many computer and writing theorists argue that computer-mediated writing classes tend to be "democratic" and inclusionary, with student writing and revision poised toward a larger audience than just a teacher-evaluator. Theorists like Gail Hawisher (1992) also note that electronic conferences, in which students use a computer network to comment about each other's papers, promote writing as communication. These benefits of computer-based writing can be reproduced through traditional methods. It goes without saying, for instance, that an instructor can focus class readings stance, that an instructor can focus class readings and discussion on technology and culture. In addi-tion, a class structure can simulate a "network" cul-ture. For instance, students can experiment with a ture. For instance, students can experiment with a nonelectronic version of the web's system of author-ity and democracy. If during the first half of the semester, the classroom is hierarchical, during the second half it can become fashioned into a "hyper-textual network of affiliations." Gradually, students can form a "network" of interest groups in which they share their relevant skills, research, and access to knowledge. Using this "web" of mutually-supportive contacts, students can create an individual research paper. (Contains 11 references, 3 suggested class readers, and information on joining an electronic discussion list.) (TB)

Back in the Courtroom Again: Ciceronian Theory as a Method of Critical Thinking. Pub Date—Mar 92

Note—11p.; Paper presented at the Annual Meet-ing of the Conference on College Composition and Communication (47th, Milwaukee, WI,

and Communication (47th, Milwaukee, W1, March 27-30, 1996). Pub Type— Opinion Papers (120) — Speeches/ Meeting Papers (150) EDRS Price - MF01/PC01 Plus Postage. Descriptors—\*Court Litigation, \*Critical Thinking, Higher Education, Student Interests, Student Needs, Writing (Composition), \*Writing Instruction.

Identifiers—Analytical Methods, Cicero, Classical Rhetoric, \*Stasis Theory Using statis theory in the composition classroom composition classroom is not new. The three main questions of stasis-the "an sit," or conjectural issue, the "quid sit," or issue of definition, and the "quale sit," or issue of qual-ty-roughly approximate different kinds of writing. The method originated with Hermagoras and was The method originated with Hermagoras and was developed by Cicero as a method of inquiry for use in the courtroom. Thus a case regarding the "an sit" or conjectural issue might concern whether one in-dividual killed another, whereas the issue of definiaction would address the name and type of a particular action, manslaughter versus premeditated murder. In cases where agreement has been reached regarding both the committal and the type of act, the question that remains is the quality of the act. This might include, for example, to what degree intent was present in the act. Stasis theory can be used as a method of critical thinking. Stasis theory may be used as a tool of invention, comparison, and, ultimately, analysis when applied in conjunction with Ciceronian judicial rhetoric. It can predict the out-Ciceronian judicial rhetoric. It can predict the out-comes of current cases in court, including those con-cerning Mayor Marion Barry of Washington, D.C., Mike Tyson, and William Kennedy Smith. A com-parison of Tyson's and Smith's cases shows one way to use the method. Stasis theory assists students in their critical thinking since it requires them to zero in on the point in question. (TB)

Composition teachers and researchers recognize
the difficulty young writers, especially females, face
as they enter postsecondary education and attempt
to learn the language of the academy. Addressing
academic audiences "takes confidence and author-

academic audiences "takes confidence and author-ity, qualities that are often challenged in women because of their historical exclusion from and mar-ginal status within academic institutions" (G. Kirsch, 1993). Feminists often describe expressive writing as "personal" or "private" and academic writing as "public" at the same time they resist the dichotomy this description implies. An instructor conducted a series of freshman composition classes in which combining the methodology of composi tion studies and feminist theory was attempted. As students wrote, she looked at their responses to assignments and noted that some made the transition from personal to public more easily than others. A from personal to public more easily than others. A writing assignment can help students merge the personal and the academic by implementing exploratory in-class writing, research, peer collaboration, teacher-student conferencing, and revision. Students first write in class about their college experience, then read an article about the freshman year, discuss the article in class, and incorporate the ma-terial in their essays or look for additional material in the library. Essays are revised in successive drafts, going through peer collaboration, an individ-ual conference with the teacher, and a final revision for a grade. (CR)

Rereading the history of basic writing can serve as Rereating the instory of basic writing can serve as a context for and a springboard to a reading of selected contemporary basic writing textbooks. For critical scrutiny, articles by Joseph Harris and David Bartholomae offer retellings of the history of basic writing, retellings that challenge the more "heroic" tellings that have become part of the basic writing teaching experience. Because little training on either practical or theoretical levels exists for college teachers of basic writing, many teachers turn to textbooks for guidance and method. The text-book becomes the authority, and how success and progress occur is reflected in the textbook. Accordingly, six textbooks with diverse approaches were selected for examination. The textbooks define their audience ('fear of error" is the most common characteristic) and describe success on the local level of the student's experience with the textbooks them-selves. For some textbooks, successful students will find pleasure in becoming a writer, for others suc-cess is writing skill, and still others equate success with empowerment. In fact, success for basic writing students in these textbooks may be perceived in terms of skills versus empowerment. In the future, basic writing courses and textbooks need to be de-signed and written so that they produce a narrative of the intellectually, developmentally, cognitively, and emotionally capable and, most importantly, literate adult. Student Educational Objectives
Identifiers—Liberal Arts Colleges, \*Rhetorical
Stance

Many liberal arts colleges have moved away from the central aim of liberal arts learning-person for-mation for a qualitatively rich life-while still main-taining the liberal arts title. Of America's 3,400 colleges and universities, there are only 212 (6%) genuine liberal arts colleges today who do not award over 60% of their total number of annual degrees in professional fields. The vast majority of these are affiliated with a Christian church denomination or adhere to a Christian creedal stance. The art of rhet-oric should be considered to articulate what liberal learning is and why it is important to educators and students. What is needed is not only a bold rhetoric, but a prophetic rhetoric which links the liberal arts message with the transcendent beliefs and values of the Bible. For a teacher at a Christian liberal arts college to possess a prophetic rhetoric, that teacher must assume, to some degree, the role of a prophet. Prophetic rhetoric challenges students toward deeper and stronger convictions about what they believe, why they learn, and how they relate to other. ers. The rhetoric of consumerism vies for control, but is exposed and opposed by the prophetic rhetoric as it relates to the aims of education. Christian rhetoric should challenge students and instructors to consider again the reasons why they study and teach at religiously affiliated liberal arts colleges. ('A Rhetoric of Christian Liberal Arts' is attached; contains 9 references.) (CR)

Identifiers-\*Educational Issues

Education helps children select and progress toward appropriate goals. One of the impediments to education for American students is their lack of skill in English. Clear insight into the essentials of language comes from observing how the variables

function in a model language such as Esperanto. Once children understand the basic anatomy of language, they will not be defeated by the rules of the English language, where fully 80% of the words are not spelled phonetically. Esperanto serves as a generic introduction for all languages and should be taught in first or second grade. Since it is unlike foreign languages it can easily be learned by class-room teachers. Esperanto can serve as an ideal transcom teachers. Esperanto can serve as an ideal transcom teachers. room teachers. Esperanto can serve as an ideal tran-sition into formal English for English-speaking children, and can serve children of different native languages by helping them with the transition into English. Esperanto in the elementary school can convert the abject failure of foreign language programs into success. (CR)

position, \*Grading, Higher Education, Portfolio Assessment. \*Student Evaluation, Student Assessment, \*Student Evaluation, Student Needs, \*Student Participation, Teacher Student Relationship, \*Writing Evaluation Identifiers—\*Alternative Assessment, Grids

Most freshman composition instructors have to field student inquiries and complaints about grades. Research and thought about alternative methods of evaluation can help lessen this burden. Grading hoevaluation can help lessen this burden. Grading hoistically, team and partner grading, and portfolio grading are all effective methods. Often the instructor's evaluation "language" can cause difficulty. Students can help in determining the guidelines by which they will be judged. Through a series of steps, students can be engaged in the process. Among these are asking students to write about what "good writing" is, having them brainstorm on the blackboard, and then having them provide examples of board, and then having them provide examples of "good writing" to be read aloud and discussed. A survey is then designed based on these classroom activities, and the answers are used to construct a response sheet or grading grid with general catego-ries that outline the criteria agreed upon in class. Teacher comments, including emotional or intellectual reactions to the writing, can be written in the margin or at the end of the paper. Grids are a way to satisfy students' hunger for ranking without giving conventional grades on individual papers. (CR)

Training Needs,

Social workers write under many and varied pres-sures. A study examined the writing tasks and chal-lenges facing social workers. An open-ended questionnaire was administered to 16 social workers in the Boston area-half were clinicians, and half were administrators/clinicians. The questionnaire was divided into three sections: a description of writing tasks, a description of writing practices, and a description of the education and/or training that prepared the participants for these writing tasks. Results revealed that social workers view writing as Results revealed that social workers view writing as essential to their profession, yet many have difficulty meeting their professional writing demands. One major concern for this sample was balancing three challenges: working with confidential material, producing under tight time constraints, and writing for multiple audiences. Findings suggest that social workers not only desire but would also benefit immensely from ongoing writing instruction geared specifically to their profession. As the profession places increasing importance on effective writing in the future, it is imperative that social workers become strong, competent, and confident writers. To achieve this goal, writing instructors and social workers can join forces in both the academic and professional realms. (Author/NKA)

Identifiers-\*Aesthetic Reading, \*Literary Canon This book argues against the politicization of liter-ature and presents a guide to the great works and essential writers of the ages, the "Western Canon." The book studies 26 writers and seeks to isolate the qualities that made these authors canonical, that is, authoritative in Western culture. Noting that although originally the "Canon" meant the choice of books in teaching institutions, the title here is meant not only for the student but for any reader "who follows the art and passion of reading well and deeply." The book is divided into five sections: (1) deeply." The book is divided into five sections: (1) On the Canon; (2) The Aristocratic Age (including Shakespeare, Cervantes, Montaigne, Moliere, and Goethe) (3) The Democratic Age (including Emily Dickinson, Tolstoy, and Ibsen); (4) The Chaotic Age (including Proust, Joyce, Kafka, and Walt Whitman); and (5) Cataloging the Canon. Appendires contain additional material on each age.

Needs, Teaching Methods Identifiers—University of Alaska Anchorage Self-empowerment techniques are personal growth activities that are used over time to create a sense of self-worth, personal accountability, and power in an individual. Generally, the goal of these techniques is to recognize, accept, and act upon individual hidden reserves of talent, ability, and courage. The techniques are learned experientially (through direct experience) and are best presented in combination or groups of activities. The climate in comonation or groups or activities. In elimate in the self-empowerment classroom is warm, friendly, active and supportive. The students tend to see themselves as family, helping each other work on confidence and personal growth. In a pilot study, two primary beliefs led to the introduction of self-empowerment techniques in seven college

classes: (1) that students value speech education that uses self-empowerment techniques; and (2) that students' confidence and competence improves as students commerce and competence improves as their self-concept improves. Subjects were 180 students at the University of Alaska in Anchorage. During the public speaking phase, peer, teacher, and self-evaluations were performed. Three formal tests were also administered, including ongoing honesty statements in which students state frankly how they feel about their state of mind and their work. Th day-to-day format includes a mixture of extemporaday-to-day format includes a mixture or extempora-neous and impromptu speeches, notes, lectures, ex-periential individual and group activities, discussions and PIG pages (Purpose, Intended Re-sults and Groundrules for the class). Student and administrative evaluations of the pilot project were positive. (Contains 21 references.) (TB)

student Relationship, Team Teaching, Under-graduate Students
Identifiers—Capstone Courses, Facilitators, \*Mul-timedia Technology, \*Technology Integration A course entitled "Communicating through Mul-timedia" was designed as a capstone experience for upperclassmen. It was a team-taught interdisciplin-ary course in the application of multimedia technology. Students in the course came from three disciplines-speech communication, mass communication, and management information systems. The students were ultimately (as a final project) asked to develop a multimedia application for a client. In practice, the goals set for the course were difficult to achieve. Student evaluations were critical. Attention dance was poor; lectures were considered "filler"; and the class as a group did not work together well on the final project. A small group of students, who came to the class with computer skills and a knowledge of multimedia, spent large amounts of time in the lab finishing the project. In retrospect, it is ironic that in a course in new media technologies, neither the facilitators nor the students made use of new technologies to facilitate classroom interaction, communication, or learning. Sprague (1993) besuggested that most learning occurs outside of the classroom, not in it. It makes sense, therefore, that communication among peers and with the facilita-tors should take place outside as well as inside the classroom. And computers certainly are one means of facilitating that kind of communication, a communication that is immediate and ongoing. (Contains 13 references.) (TB)

This paper shows how visual media may be used in the high school and college classroom to foster analytical, communicative, and interpretive skills traditionally developed through reading. It suggests

analytical, communicately, and merpretive axis traditionally developed through reading. It suggests that L. Joplin's (1985) 5-stage experiential learning model and Anita Covert's (1980) EDIT system can be used to teach a range of media. It describes in detail how Covert's system-moving from "experi-ence," "description," "inference," to "transfer"- helps the students to analyze and understand a me-dium and then apply it to their own living experi-ence. It gives specific examples of how magazines from non-American cultures can help students become aware of different cultural practices and how television magazine shows like "20/20" or "60 Min-utes" can raise issues of intercultural communication. The paper specifically looks at "20/20" episodes such as "The Vine Jumpers" and "Lesbians" and movies such as "When Harry Met Sally" and "Circle of Friends." The paper outlines Covert's system step-by-step in suggesting how each of these media could be used in the classroom. Contains 11

Identifiers—Compressed Video, \*Interactive Com-

munication, Teacher Surveys
A study of seven interactive telecourses taught over a compressed-video-network-an environment where two or more classrooms equipped with cam-eras and microphones are connected by means of telephone lines-led to the formulation of some communication ideas. In this particular setup, the teacher and students could both see and hear each other in concurrent analyses of videotapes classes. An interpersonal, interactive-mediated model was chosen to examine how teachers formulated and eachanged messages with students and how stu-dents interpreted those messages in a distance edu-cation setting. Research data were gathered by means of teacher and student surveys and two concurrent analyses of videotaped sessions. Both student and teacher questionnaires covered simple top-ics. Findings generally support the observation that instructors bring more to distance learning than is generally thought. The research suggests that courses whose teachers used more interactive ques-tioning and technology strategies generally tioning and technology strategies were generally better received. Lecture as a presentation style was less successful but worked well for courses with mo-tivated students. Some recommendations are for teachers to work from their strengths and to be open to the new environment. (TB)

This paper describes a faculty-designed program evaluation procedure established at Appalachian State University in North Carolina, focusing on the Communication Department. The assessment po-tential of this process is examined and, following an explication of the process itself and the Program Evaluation Committee (PEC) Report, the five elements of the final report are explored: (1) centrality to the university's mission; (2) department over-view; (3) faculty workload/reassigned time and scholarly activity; (4) program demand; and (5) program duplication. The paper outlines the eightenember PEC structure and functions, noting that the committee was not established as an assessment agency per se, and that its direct mission is summative rather than formative. The paper illustrates how this or similar program evaluation processes have this or similar program evaluation processes more the potential for assessing departmental effective-ness for departments wishing to take advantage of the opportunity. Academic program review evalua-tion criteria are appended. Contains 15 references. (CR)

Identifiers-Interviewers

Although interviewing looks easy, it is much more complicated than it appears, and generally, students are not taught how to conduct an interview. Planning and preparation must include research about the subject of the interview and the person being interviewed. Good questions build on the question interviewed. Good questions build on the question before, make the person being interviewed think, and sometimes surprise the interviewee. Questions which can be answered "yes" or "no," too personal questions, and questions with obvious answers should be avoided. Among types of interviews are: the fact interview, to obtain current information of general interest to the public; the biographical inter-view; the descriptive interview; and the personality or celebrity interview. Classroom applications are included. (CR)

Identifiers—Cognitive Models

This paper considers the process by which humans are able to select from the complex string of sounds impinging on the ear and understand certain frequency combinations to be linguistic signals while other combinations are not. A brief review of the complex subcortical region, particularly the known but seldom studied reticular system, indicates the probability that prior to its assessment in the creater learner to the strength operator. the cerebral cortex, the signal is filtered and inte-grated into matrices or patterns. From this hypothegrated into matrices of patients. From this hypotics sis, a model is presented suggesting the process by which a speech signal is integrated subcortically into a series of increasingly complex matrices before be-ing transmitted to the cortex. The matrix form of the

transmitted electric signal causes cortical neurons to fire simultaneously in bursts rather than resonate sequentially. The pattern of each burst will reflect the distinctive features carried in the matrix stimulus. With memory considered held in holistic pat-terns, or matrices, rather than as strings of energy terns, or matrices, rather than as strings of energy frequencies, identification of the distinctive features of the fired pattern with the matrices of language elements held in cognitive memory forms the basic element in oral language cognition, identified here as a cogneme. Certain pedagogical implications are considered; for example, cross cultural programs and cross cultural exposure should be extended into all areas of education to include the variety of cultural differences in America. Education

This paper begins by pointing out that approximately 15-20% of college students suffer from a fear of public speaking, and that a 1993 study of 369 students at Northern Kentucky University revealed high levels of speech apprehension (SA) at the beginning of the semester in the introductory speech course. The paper reports that although end-of-the-semester results were better, many students did not reduce their apprehension levels. The paper then describes the development of a special SA section of the Speech 101 course at Northern Kentucky, offered each fall and spring semester. The paper discusses recruiting techniques, publicizing the program, and interviewing for course enroll-

ment. The SA course content mentioned in the paper includes cognitive, affective, and behavioral techniques for apprehension reduction. The paper offers teaching techniques, such as partners, methods to desensitize conspicuousness, modeling, and ods to desensitize conspicuousness, modeling, and impromptu speeches, and also gives grading and counseling center advice. The paper also reports that a review of pre- and posttests for all semesters shows that the special SA section has been a success. Samples, including forms, a syllabus, and schedules are appended; contains 11 references. (CR)

A study examined whether ethical sensitivity can
be measured in response to radio programming. The

be measured in response to radio programming. The study was interested in the extent to which a person feels a program is unethical in either its substance or its presentation. Subjects, 17 undergraduates in telemunications at a large midwestern university, received course credit for their participation. Sub jects were randomly assigned to one of the four tape orders. All subjects heard all four of the stimuli representing the within subjects factors. Experimental data suggests that ethical sensitivity can be mea-sured in response to both radio news and humor. Comparisons of thought-list and written question-naire data suggest that while people have more ethi-cal thoughts when specifically questioned about ethics, ethical sensitivity can be measured equally well without probes. Future research in this area seems warranted. (Contains a figure, 2 data, and 46 references.) (Author/NKA) 2 tables of

Communication

A study examined communication skills essential for small work groups and whether the quality of small group teaching and research is in decline. The study reviewed small group research done previously by others and the problem of existing pedagogy and research in small group communication which does not provide practical solutions to real life problems. The study instrument was based on an analysis of in-depth interviews with six managers representing five major comparations and a national analysis of in-depth interviews with six managers representing five major corporations and a national government agency, all based in a large midwestern city. Thirteen specific communication skills were identified as vital for employee success in the work-place. A small group was defined as being from 3-20 members. Results from the 38 (76%) completed survey forms returned by recipients, the personnel directors of each of the top 50 employers, revealed that the reliability of the survey was acceptably high. Respondents agreed most strongly with the that the reliability of the survey was acceptably high. Respondents agreed most strongly with the statement that effective listening was important, and least strongly with the importance of the ability to make effective information presentations. Other important communication skills listed by 14 responimportant communication skills listed by 14 respondents were interpersonal communication climate and demonstration of leadership in keeping the group task oriented; 27 responses agreed on the importance of effective small group communication. Findings suggest that for small group research to be applicable to groups that operate in the real world, it must be conducted in contexts that at least approximate real life. Issues, \*Faculty Attitudes, Professional Con-cerns, \*Technology Integration
Having automated many professions, computers may now be used to downsize higher education. How do professors respond to this concern? A sur-vey at a small branch of a northeastern university suggests that the question generates profound anxiety as it moves from the theoretical to the personal. Such anxiety about information technology can be seen as a communication problem. All 250 full-time faculty members of the branch campus were sur-veyed about their current and anticipated future veyed about their current and anticipated future uses of technologies, including computer labs, "smart classrooms," distance learning, local access networks, the Internet, etc. The survey contained 28 multiple-choice questions and a single open-ended question about any concerns the faculty member question about any concerns the faculty member had about the use of computer technology in education. Returned surveys numbered 135, and 29 (21.5%) of these answered the "concerns" question. Respondents expressed two main areas of concern: they worried about the devaluation of the teaching profession, and with it, the loss of their jobs; and profession, and with it, the loss of their jobs; and they were anxious about the dehumanization and alienation their students might face in a computer-dominated learning environment workplace. Al-though concerns voiced by respondents are not the exclusive domain of communication scholars, these respondents are the educators who teach others how to use communication media, and how to create and disseminate messages through them. Comments of the participants suggest that the expansion of the information economy is a cause for deep concern in higher education. (Contains 22 references.) (Author/NKA)

Little academic research has examined what public relations actually does for an organization. A study explored definitions of effectiveness in public relations and the value of effective communication.

Interviews with 32 practitioners and 10 organiza-tion heads revealed numerous definitions of effec-tiveness, most having to do with achieving objectives for communication programs. The orga-nizations for which these practitioners work include corporations, nonprofits, government, associations, and public relations agencies. Information is anecdotal and represents a breadth of perspectives. Some of the respondents included an adjunct professor who mentioned that effectiveness in fessor who mentioned that effectiveness in em-ployee relations makes money for organizations by improving job satisfaction and productivity, a publi-cations manager for a state university who believed that her internal communications efforts have that her internal communications efforts have boosted job satisfaction and morale, and a director of development and alumni relations for a state uni-versity who argued that the visibility generated by effective public relations advances her department's goals. Other examples of effective programs uncov-ered are those whose respondents believe that pub-lic relations brings value by helping organizations survive when threatened making money by fostersurvive when threatened, making money by foster-ing good relationships with key publics, and saving money through preventive media relations. One ex-ecutive argued that the communication function could be elevated by better conveying the power and value of public relations in helping organiza-tions move toward their goals. Users, Journalism Educators
A study examined the use of online computer resources by students and educators in journalism and mass communication programs. Heads of 200 journalism and mass communication programs at member schools of the Association of Schools of Journalism and Mass Communication were surveyed in February 1996. Of the 133 (67%) responding the average enrollment was 40% students 368. ing, the average enrollment was 409 students, 368 undergraduates and 41 graduate students, with an average of 16 full-time faculty. Results indicated that access to online resources, including email and the Internet, was provided to average in 265. that access to online resources, including email and the Internet, was provided to professors in 96% of the journalism and mass communication programs, with 87% providing access to the World Wide Web (WWW). Students had access to these resources in 93% of these programs, with 90% giving access to email and the Internet, and 80% to the WWW. Other online services include university library catalogs, registration and class information, and networked software. A home page on the WWW was reported in 71% of the programs and 50% of the professors have WWW pages. Professors used computer online resources in teaching classes in 88% of the schools and 72% communicate with students via email. Online distance education was only offered email. Online distance education was only offered in 23 of 133 programs (17%) and only 3 met in real-time. Findings revealed, however, that only about 60% of program administrators reported that online resources had substantially changed how these programs were taught. Although online teaching may not be as effective as traditional classroom teaching, respondents suggest that it is a viable dis-tance learning method, reaching students who could not otherwise be reached. Students

Identifiers—Advertising Education, \*Creative Problem Solving, Small Group Communication An underinvestigated aspect of advertising education is the consideration of methods by which groups effectively solve creative problems. Brainstorming has been popularly used by teams in classes to generate ideas; yet, little research exists classes to generate ideas; yet, little research exists that compares small group structures for creative problem solving. Bridging this gap, a study compared structured group, unstructured group, and dividual efforts. Subjects, 46 undergaduate students enrolled in courses at 2 midwestern universities were divided in courses at 2 midwestern universities were divided in the 1 of 2 midwestern universities were divided in the 1 of 2 midwestern universities. students enrolled in courses at 2 midwestern univer-sities, were divided into 1 of 3 groups—a group that used the Nominal Group Technique, an unstruc-tured group, and individuals. Subjects were asked to generate possible themes/topics for a new magazine targeting college students. Subjects also completed magazine-groups and the property of the completed of the complete of the complete of the complete of the completed of the complete of the com questionnaires. Results indicated that the Nominal Group Technique, while most effective for creative projects, will be enhanced when combined with the elaboration/interaction of unstructured group activ-ities. (Contains 20 references and 1 table of data. Appendixes present instructions for each group and questionnaires.) (Author/RS)

veys, Prediction, School Surveys Identifiers—\*Diversity (Faculty), \*Faculty Atti-

A survey was conducted to examine whether an underlying structure existed among items related to the practice of diversity, particularly practices re-lated to diversity as an institutional process versus diversity as an assured outcome. The survey also examined whether a structure existed among items related to attitudes and beliefs about the outcomes of diversity, and sought to discover the utility of treating the practice measures as predictors of the outcomes measures. Respondents were 6 female and 4 male faculty members (8 were Caucasian and 2 were African-American) from a large south ern college of journalism and communications with 59 full-time faculty (68% male/32% female with 12% racial minorities). Findings suggest a single di-mension underlying responses to the policy items, and five dimensions underlying responses to the di-versity outcome measures. Analysis of the five outcome measures showed ideology as a significant predictor of subjects' beliefs about diversity implications while group membership was not. It was con-cluded that ideology may be a strong yet relatively unexplored variable in understanding faculty's attiunexplored variable in understanding faculty 8 actives the state about the effects of diversity policies. What was uncovered in this research was a clear dichotomy in ideology and at least two different views of the world. Further research is needed to explore the multidimensional issues uncovered in this research. (Contains 5 tables of data and 38 references.) (Au-

Identifiers—Replays (Video), \*Technology Integration

The use of videotape technology is an effective pedagogical tool with which to improve the overall performance of students enrolled in sections of basic public speaking. These uses and benefits in the class-room include: (1) practice feedback; (2) identification of style inhibitors; (3) analysis of structural-content issues; (4) suggestions for im-provement of speaking style; and (5) suggestions for improvement of presentational content and struc-ture. Students are encouraged to conduct their own impression management assessment as they view a recording of their initial presentations, focusing on a variety of verbal and nonverbal cues which include eye contact, gestures, physical movement, among others. The videotaped records can assist students in overcoming communication apprehension and reinforce the lessons introduced through classroom lecture and discussion pertaining to speech struc-ture and evidence usage. The use of videotape has greatly enhanced the quality of student presentations, improved the classroom climate, and helped produce positive educational outcomes in the areas of delivery style, structural development, and re-search. study examined the difference and effects of sex and sex-role on course evaluations of journal-ism/mass communication instructors at a midwestern university that had recently consolidated its school of communication and its journalism/mass communication courses. Subjects, students in 18 communication or journalism/mass communication classes taught by 9 full-time instructors, completed a questionnaire. Both standardized evaluations and the indexes of culturally desirable gender traits showed high ranking for women instructors. Instructors were not matched for variables such as experience. Interaction effects between same-sex instructors and students were not found; however 2-way interactions between instructor sex and type of course were observed. Further research in gen-der-based evaluation is called for. (Contains 41 ref-

ent Teacher Cooperation Identifiers-\*Hong Kong, \*Parent Teacher Associ-

After the government established the Home After the government established the Home-School Cooperation Committee in 1993, parent in-volvement in Hong Kong schools has received in-creased attention. This paper presents findings of a study that examined the attitudes of various groups toward the Parent-Teacher Association (PTA) and toward the Parent-Teacher Association (PTA) and its role. Specifically, the paper attempts to: (1) pro-vide understanding of the perceptions of the various actors in the school system towards the PTA; (2) discuss the functions of the PTA and to explore its actors in the school system towards the PTA; (2) discuss the functions of the PTA and to explore its possibilities and limitations with respect to school education; and (3) propose a model to help illustrate and analyze the various PTA functions and networking. Data were derived from a survey of all PTA chairpersons, school supervisors, and principals. Teacher and parent samples were drawn from 99 kindergartens, 112 primary schools, 90 secondary schools, 12 English School Foundations and International Schools, and 13 special schools. Parents, constrained by time, expressed apathetic views about the PTA. Teachers were constrained by heavy workloads; principals in general assigned the PTA as a medium-to-low priority and did not invite parents to participate in school decision making. It is recommended that PTAs improve their homeschool communication in order to increase parent involvement and collaborate with schools to develop complementary objectives. A model illustrating the various PTA functions, including networking, is also presented. Eight tables and 3 figures are included. (Contains 38 references.) (LMI)

"State Legislation, State School District Relation-ship, Tax Effort Identifiers—"Arkansas In 1995, Arkansas enacted two new bills that changed the way in which schools were financed. Act 916 required all school districts to levy a 25-mill tax based on an assessment ratio of 20 percent of use tax based on an assessment ratio of 20 percent of use value on all property for maintenance and operation. The act also revised biennial appropriations for the State Department of Education, transferring several categorical funds to basic school support. Act 917 mandated the distribution of all funds on

the basis of average daily membership (ADM) and

prioritized certain types of school aid. This paper describes the provisions of Acts 916 and 917 and explains how school districts are to expend funds they receive. A conclusion is that Act 917 is exceedingly complex and difficult to understand. School district superintendents dislike the reform because district superintendents dislike the reform because no district collects 98 percent of its taxes. The law abandons weights and instead specifies real dollars, meaning that there must be regular reviews. The law also abandoned weights for special education, which increases the potential for litigation by parents of special-needs children. In light of these conse-quences, equity in Arkansas has yet to be solved. One table is included. (LMI)

This handbook is part of an ongoing process to share models of Total Catholic Education boards, religious education boards, and Catholic school boards. The purpose of the book is two-fold: (1) to provide a rationale for having a group within the parish that sets the direction for the religious education of children, youth, and adults; and (2) to provide models for the formation and operation of this leadership body. Chapters cover a broad range of topics: group-formation models; roles, relationships, and responsibilities: training: snirtuality: adaptaand responsibilities; training; spirituality; adapta-tions to various cultures; and the rationale for havand responsibilities; training; spirituality; adaptations to various cultures; and the rationale for having a religious education board/commission. Following the preface and introduction, the articles include: (1) "The Call To Be a Watercarrier: The Religious Education Board" (Matthew J. Hayes); (2) "A People, a Mission, a Structure!" (John S. Balaguer and Maria Thornton McClain); (3) "The Spirituality of Decision Making" (Mary Benet McKinney, OSB); (4) "Forming a Religious Education Commission—A Team Effort" (Elaine Ouellette); (5) "The Why and How of Forming a Religious Education Board" (Eileen Loughran); (6) "Parish Religious Education Committees—Why Bother with Them?" (James J. DeBoy, Jr.); (7) "What Do Parish Religious Education Boards Do?" (Maureen Kennedy, OP); (8) "A Rainbow of Adaptations" (Maria Thornton McClain); (9) "Professional Growth Day for Parish Catechetical Leaders, religious Education Boards" (Joanne Spizzo Sanders and James P. Studdert); and (10) "An Effective Way for a Pastor and DRE to Support the Board of Education" (Mary Jo Thomas-Day). Appendices contain a sample constitution for a Religious Education Board, a Total Catholic Education Board/Commission, and a Parish Board of Education; amodel yearly calendar for meetings: a report form: Commission, and a Parish Board of Education; a model yearly calendar for meetings; a report form; a list of additional resources; and a sample vision of a parish religious education program. The decline in the number of Catholic sisters, brothers, and priests serving as teachers and admin-

The decline in the number of Catholic sisters, brothers, and priests serving as teachers and administrators in Catholic schools has been accompanied by an increase in the number of men and women educators from the laity. This handbook presents guidelines for preparing the laity to teach and administer effectively in Catholic schools. Specifically, it is a support of the control cally, it seeks to prepare them to communicate the

nature and purpose of Catholic education and to lead others to reflect on the fundamental purposes that guide the Catholic educational apostolate. It lays out the values and beliefs that give Catholic schools their culture and identity and describes practical ways for Catholic educators to create practical ways for Catholic educators to create unique cultures and identities in their institutions. Following the overview and foreword, chapter 1 de-scribes indicators of excellence and stresses the need for administrators who are mindful of their need for administrators who are mindful of their vocation and who practice reflective inquiry. The next two chapters distinguish between competence and excellence, in particular, the forces of Catholic excellence. Chapter 4 provides a scriptural perspective for the principalship, including theological perspectives from the Pre- and Post-Vatican II Church. Daily efforts to be mindful of the Catholic administration. trator's vocation and school's purpose are discussed in the fifth chapter. The final chapter offers reflec-tions to stimulate Catholic educators to become more mindful about why they do what they do. Three figures are included. (Contains 74 references.) (LMI)

African-Americans have been present in Catholic schools since their beginnings in the United States. The six essays in this book examine Catholic education from the perspective of the African-American Catholic. The essays underscore the continued challenge for continuing Catholic schools in the African-American community. They include: (1) an overview of African-American Catholic culture and history, by Dr. Giles A. Conwill; (2) suggestions for transforming the curriculum for inclusion, by Sr. Eva Regina Martin, SSF; (3) a philosophy of black religious pedagogy, by Dr. Joseph A. Brown, SJ; (4) an examination of evangelization and spirituality in the African-American Catholic experience, by Therese Wilson Favors and Beverly A. Carroll, (5) African-American leadership in Catholic education, by Dr. Loretta M. Butler; and (6) descriptions of model schools, by Beverly A. Carroll. References accompany each article. Samples of gospel reflections and accompanying African proverbs are offered in the fourth essay. (LMI)

Administrative managers who have the trust of their employees, who listen to their employees openly, and who share power with their employees openly, and who share power with their employees are better equipped to confront and overcome obstacles. This paper discusses models for structural management that include participatory reforms. It identifies four common models of administration-rational, mechanistic, organic, and bargaining. The models are respectively driven by scientific, bureaucratic, collegial, and political theories of management. The paper argues that a transformational leader who incorporates features of each model will be most effective. Contains seven referenced model will be most effective. (Contains seven references.) structuralism

This book provides an introduction to poststructuralism by examining a range of interrelated themes central to the field of education that focus on the critique of reason and the problematic nature of the subject. The first chapter examines the history poststructuralism in terms of the broader canvaof European formalism, futurism, surrealism, and structuralist poetics. The second chapter focuses on the notion of intellectuals and examines this idea in relation to postmodern culture. Chapter 3 continues the emphasis on culture to examine one of the most influential and virulent attacks on postmodern culinfluential and virulent attacks on postmooth ture and poststructuralism. The fourth chapter address the neoliberal notion of the "market," utilizing Foucault's work to understand the paradox of the routant's with the treatment of paradox of the neoliberal state. Chapter 5 is an attempt to overcome the despatialized nature of critical educational theory. The metaphor of "after Auschwitz" is the organizing theme for the sixth chapter. The thesis of chapter 7 is that science and education become the main "knowledge industries" within an "informa-tion state." Chapter 8 extends and develops the emphasis on the politics of the information society by examining the work of the Italian postmodern phi-losopher Gianni Vattimo. The theme of communication and the dream of a universal language constitutes the subject of chapter 9, which is investigated in terms of the metaphor of Hermann Hesse's "The Glass Bead Game." The metaphor of the "glass bead game" is used as a cultural lens for investigating the dream of a universal language and for examining the place of the university in cyberspace. Endnotes accompany each chapter and an in-dex is included. (Contains 298 references.) (LMI)

\*Social Problems Identifiers—\*Social Construction

One of the six national goals in the United States is to achieve a 90 percent graduation rate by the year 2000. In the last 50 years, high school gradua-tion has become the norm. Concurrent with the new expectation of high school graduation came the expectation of night school graduation came the dominance of the word "dropout" to describe those without diplomas. Many Americans view dropping out as dangerous for the individual as well as for society. Dropping out as a definition of a social problem, a reflection of expectations, and the target of social policies is the subject of this book. It begins with a brief summary of graduation experiences since 1940 and the changing role of high schools. The core of the book covers the early 1960s, when the phrase "dropout" emerged to become the domi-nant term describing those who leave school before receiving a diploma. The stereotype of high school dropouts that coalesced in the 1960s said much about how educators and social critics saw juvenile delinquency, labor markets, and gender roles. Dropouts continue to be spoken of as a social problem, and the language of dropping out reflects a deep ambiguity about the purposes of schools and the inability of schools both to socialize everyone and to

act as meritocratic judges of ability and worth. The book argues that instead of seeing different educa-tional outcomes as evidence of remaining inequities in schooling, Americans have focused instead on the social costs of dropping out, typically imagined as dependency, criminality, and lower economic pro-ductivity. Through use of this language, the social ductivity. Through use of this language, the social construction of dropping out has given high schools the burden of ameliorating poverty and preventing social chaos. However, schooling cannot solve the real problems that poor people face. Five tables are included. (Contains 438 references.) (LMI)

The seeming increase of violence in American society and its schools has become a pressing issue. Some researchers argue that the American educa-tion system mirrors the dynamics of society. The articles in this book address the following issues: the extent of violence in American achools; the forms that violence takes; its root causes; the effects of violence on students; teachers, administrators, and violence on students; teachers, administrators, and the learning process; strategies to counteract violence; and responsibility for dealing with violence in the schools. The following articles in part 1 describe the problem of school violence: (1) "Violence in the Classroom: A Teacher's Perspective" (Mary Hatwood Futrell); (2) "Weapon-Carrying in Schools' (Jennifer C. Friday); (3) "The Anatomy of Gangs" (Allan M. Hoffman and Randal W. Summers); and (A) "Gange and School Safety" (Kenneth S. Trupp). (Alian M. Hoftman and Kandai W. Summers); and (4) "Gangs and School Safety" (Kenneth S. Trump). Causes of school violence are examined in articles included in part 2: (5) "Media and Television Vio-lence: Effects on Violence, Aggression, and Antiso-cial Behaviors in Children" (Daniel John Derksen cial Behaviors in Children" (Daniel John Derksen and Victor C. Strasburger); and (6) "The Influence of Child Abuse and Family Violence on Violence in the Schools" (Jeffrey J. Haugaard and Margaret M. Feerick). School security and other legal issues are the focus of articles in part 3: (7) "Critical Decisions, Critical Elements in an Effective School Security Program" (S. D. Vestermark, Jr.); and (8) "Legal and Policy Issues of School Violence" (Ivan B. Gluckman). Articles in part 4 describe general strategies for a less violent school environment: (9) "Safe Schools for All" (Gwendolyn J. Cooke): (10) strategies for a less violent school environments: (9)
"Safe Schools for All" (Gwendolyn J. Cooke); (10)
"Communities, Schools, and Violence" (Deborah Prothrow-Stith and Sher Quaday); (11) "From Fight or Flight to Collaboration: A Framework for Prothrow-Stith and Sher Quaday); (11) "From Fight or Flight to Collaboration: A Framework for Understanding Individual and Institutional Development in the School" (Steven Brion-Meisels and Robert L. Selman); (12) "Learning to Care and to Be Cared For" (Nel Noddings); and (13) "Victims of Violence: Helping Kids Cope" (Melba F. Coleman). Specific approaches are highlighted in the fifth part: (14) "NEA's Perspective and Policies on Violence in the Schools" (Keith Geiger); (15) "Waging Peace in Our Schools: The Resolving Conflict Creatively Program" (Linda Lantieri, William DeJong, and Janet Dutrey); (16) "Strategies to Reduce School Violence: The New Mexico Center for Dispute Resolution" (Melinda Smith); (17) "The New York City Board of Education and Violence Prevention" (Ramon C. Cortines); (18) "The Virginia Model: School to Community Intervention Techniques to Prevent Violence" (Yvonne V. Thayer); and (19) "Violence in the Schools: The Texas Initiative" (Christie Bourgeois with an introduction by former Texas Governor Ann W. Richards). A community-based approach is described in the sixth neart's single article."

School security is a national concern. Throughout school security is a national concern. Infougnout the country, youth crime and violence threaten to undermine the safety of American students' learn-greaten environment. This handbook is the product of a joint effort of the National Association of Secondary School Principals (NASSP) and DynCorp to ary School Principals (NASSF) and Dynkorp to help educators develop plans for reducing violence in schools. It provides step-by-step instructions for assessing security at a school and for developing an individualized security plan. The introduction de-scribes in detail the five phases of getting start-ed-identify problems, determine objectives, scribes in detail the five phases of getting start-ed-identify problems, determine objectives, evaluate measures and identify options, select op-tions, and develop plan. The following sections offer guidelines for communicating the plan, complying with school law, responding to various incidents, and designing safe school buildings. Appendices contain a discussion of different security measures, a list of school-safety resources, a description of security-systems hardware, and a selected bibliogra-phy of 77 references. (LMI)

Cultural and national history have profoundly modeled Greek society and continue to play a vital role in Greek policy and in cultural and social life. This handbook provides a brief overview of secondary education in Greece. The first part describes the country's societal, historical, and political backcountry's societai, historical, and pointical societa-ground; educational history and current education system; the structure of secondary education; and administrative structure of the education system. The second part examines specific issues in Greek secondary education, including curricula and innovation; the relationship between school and society and between the internal and external support struc-tures; evaluation and assessment, training, func-tions, and employment conditions of teachers and principals; and financing and budgeting. Eight ta-bles and one figure are included. (Contains 5 refer-

School principals face personal challenges as a
result of the effect their job has on their health. This
paper presents findings of a study that examined the
extent to which eight health concepts, developed by
the Medical Outcomes Study (MOS) team at the the Medical Outcomes Study (MOS) team at the Health Institute, were prevalent within a population of school principals. A survey mailed to 266 elemen-tary and secondary principals and assistant princi-pals in 4 school corporations in northern Indiana and Missouri elicited 166 returns, a 73 percent re-sponse rate. When compared to baseline data from the national population, both the sample and the national population reported similar responses to national population reported similar responses to the eight health concepts, and both the principals the eight health concepts, and both the principals and the national sample scored lower on measures of vitality. Principals' perceptions of their health were above the national means in physical functioning, bodily pain, and general health perceptions. However, principals ranked below the national means in the health concepts of social functioning, role in physical activities, general mental health, and role activities in emotional health. African-American female principals reported means for their overall physical and emotional health that were higher than those of the national population. It were night than inose of the handhal population. It is recommended that training programs be revised to recognize stressors and physical and emotional health in order to increase the overall effectiveness of school principals. Three tables and a copy of the questionnaire are included. (Contains 27 references) (IM) ences.) (LMI)

In fiscal year 1995, about 26 million students in
about 94,000 schools nationwide were served
lunches each day through the National School
Lunch Program (NSLP). In response to concerns
raised about the amount of food thrown away by raised about the amount of food thrown away by students (called plate waste), the General Account-ing Office (GAO) surveyed a random sample of cafeteria managers in the public schools. Responses were received from cafeteria managers in about 80 percent of the 81,911 public schools that partici-pated in the NSLP during the 1993-94 school year. Cafeteria managers varied in the extent to which they perceived plate waste as a problem in their school. Although the majority perceived plate waste as a little or no problem, almost one in four reported that it was at least a moderate problem. Managers in elementary schools were more likely to perceiv waste as a problem than managers of middle or high schools. Cafeteria managers strongly agreed on some of the reasons for and ways to reduce plate waste. For example, 78 percent cited students' atwaste. For example, 78 percent cited students attention being on recess, free time, or socializing rather than on eating. Almost 80 percent believed that allowing students to select only what they want to eat would reduce plate waste. Most managers reported satisfaction with the federal commodities reported satisfaction with the federal commonline they received for use in the lunch program. However, about 10 percent reported that they would prefer not to receive at least half of the different types of commodities provided. Appendices contain a list of estimates with sampling errors over 5 persecutive the delegies of the commodities of the sampling errors over 5 persecutive the delegies of the common terminal program of the c cent, methodological notes, survey results, and a list of contributors. A total of 18 figures and 3 tables are included. (LMI)

tional Communication, "Principals Identifiers—"Ontario Metaphors are useful for creating new meanings and making assumptions explicit. This paper describes the metaphors that four female principals used to conceptualize their thinking about leadership and power. Data were derived from observations and interviews with the principals, who had been identified by their school boards as outstanding leaders, over a 3-year period, and from interviews with teachers at their schools during the first vear of the study. Three themes emerged in analysis year of the study. Three themes emerged in analysis of the metaphors: the relational aspects of leadership and power; the ethic of responsibility toward coworkers; and the sense of nurturance for coworkers. The data suggest that rather than controlling the dialectic in the schools, each principal is attempting to empower, facilitate, and encourage open expression among members of their school communities. The leadership styles expressed through the metaphors illustrated the concept of "power-with" authority and the notion of leadership as multifaceted. (Contains 17 references.) (LMI)

Schools represent a major social investment in

Australia. Assessment of Australian schools' performance depends on how one defines what they should be doing and on how well they can be expected to do it. In the official account, schools are

of "high quality and modest cost" when compared with their own past and other school systems. An alternative view, however, assigns Australian schools with an equivocal rating. This paper considers current conditions and trends in schools from each of these different points of view. This second alternative view suggests that the goals of the "official" reform agenda are unlikely to be met, and that a different and more ambitious approach is required. The new approach might include: (1) national targets for improved levels and distribution of attainment; (2) work place and work force reform; (3) changes in the governing structures of schooling (a shift to a devolved, regulated market); and (4) substantial increases in public and private funding to schooling and redistribution of resources according to need. Neither of the two views is clearly right or wrong. The first view is vulnerable to the charge that it is not able to produce the kind of schooling required now and in the future. The second can be criticized as being too ambitious in current and likely future economic and political circumstances. Six figures are included. (Contains 47 references.) (LMI)

Education researchers have moved beyond asking whether money matters to school performance. They are now investigating how money matters to student learning and achievement. There are three They are now investigating how money matters to student learning and achievement. There are three questions that policymakers and citizens must address: How much money are they willing to spend on the education of the young? How should it be fairly spent? How should it be wisely spent? This document summarizes research on the spending patterns of schools and the money-performance link. It identifies four points that policymakers should know. First, money is related to student learning outcomes, but the dynamics of human learning mean that there is no one-to-one correlation. Second, school districts spend their money in remarkably consistent proportions, regardless of their wealth, and the bulk goes to instructional services. However, there are large differences in wealth and student need across schools and districts that strongly affect performance. Third, money also matters by maximizing a wide range of opportunities to learn. New knowledge about teaching and learning points to the importance of strategic investments as well as funding "the basics," if more children are to learn and perform at high levels. Finally, after three decades of modest equalization efforts by the states, reliance on local funding of schools is now rising, just as income inequality among communities is growing. Poor children are hardest hit. The appendix outlines the evolution of "equal educational opportunity" as a legal concept. (Contains 52 references.) (LMI)

The literature on first-year teachers identifies the difficulties of this transition period and supports the

need for first-year teacher-induction programs. Lit-tle attention, however, has been paid to the princi-pal's role in the induction of beginning teachers. This paper presents findings of a study that exam-This paper presents findings of a study that examined the perceptions of principals and beginning teachers regarding the problems, role expectations, and assistance that pertain to the first year of teaching. Data were derived from a survey of 75 Nebraska elementary and secondary teachers who were beginning their second year of teaching in both public and nonpublic schools. The response rate was 65 percent (n=49). An additional nine teachers were interviewed. A survey of 75 Nebraska principals from elementary and high schools and from public and nonpublic schools elicited a 75 percent response rate (n=56). Beginning teachers reported public and nonpublic schools elicited a 75 percent response rate (n=56). Beginning teachers reported that their principals' interaction and guidance were important to them. Both groups ranked classroom management and discipline as the number-one problem. Teachers reported the need for a year-long induction program that included mentoring. Ninety-four percent of the principals said that they assigned mentors; however, much variance existed in the selection, assignment, and training of mentors. It is suggested that orientation programs be tailored to the school context and teachers' unique needs. (Contains 23 references.) (LMI)

Budgeting, \*Budgets, Demography,
\*Economic Factors, Economics, Elementary Secondary Education, Income, Inflation (Economics), \*Prediction, \*State Action

When states prepare their budgets, they usually base revenue and expenditure projections upon forecasts of national and state economic and demographic trends. This brief presents findings of a Center for the Study of the States survey that asked state budget offices what they were assuming for many key variables. The survey obtained 41 state forekey variables. The survey obtained 41 state forecasts, most of which were used to prepare official executive budget projections for 1996-97. The most commonly forecasted state-level variables included employment (39 states), nominal personal income (41), Medicaid caseloads (25), Aid to Families with Dependant Children (AFDC) caseloads (29), and prison populations (27). State budget-office forecasts of the national economy were slightly more conservative than those of private forecasters. The median budget forecast of 1996 real GDP growth was 2.4 percent, slightly below the comparable Blue Chip consensus of 2.6 percent. The states' median forecast of 1996 consumer price inflation was 2.8 Chip consensus of 2.6 percent. The states' median forecast of 1996 consumer price inflation was 2.8 percent, compared to the median Blue Chip forecast of 2.9 percent. States expect a significant slowdown in corporate profits over the next 2 years, with eight states expecting declines in 1996. States do not appear to suffer from a "provinciai illusion": fast-growing states were not more optimistic about the national economy than allow-growing states. Finally. growing states were not more optimizate about in-national economy than slow-growing states. Finally, many states are expecting declines in AFDC case-loads in the next 2 years. More than 60 percent of reporting states expect a decline in 1997, with Dela-ware's anticipated decline of 22 percent by far the largest. Two tables and three figures are included. (LMI)

This brief summarizes some of the highlights of the book "State Tax Relief for the Poor," by David

S. Liebschutz and Steven D. Gold. It examines the S. Liebschutz and Steven D. Gold. It examines the policies that states can adopt to provide tax relief for the poor. Although poor families are generally exempt from the federal income tax, they still pay a large amount of taxes to state and local governments. The book explains the major differences among the various policy options for relieving the taxes of poor persons. It also describes nine desir-able features of tax-relief provisions, five major alternatives for relieving income taxes of low-income households, changes in tax relief for the poor since 1987, and eight guidelines for tax relief. Findings indicate that nearly all states have some form of tax relief aimed specifically at low-income residents. Property-tax relief is a common form of tax relief, though most programs have not changed since the mid-1980s. Six states added earned income tax credits (EITC) between 1987 and 1996. Most states have not changed their major tax provisions suffi-ciently to compensate for inflation since 1987. Two tables are included. (LMI)

At the heart of the controversy over public educa-At the heart of the controversy over public educa-tion in a democratic system is the tension between majority rules and minority rights, and public and individual interests. This contextual framework sets the stage for the emergence of charter schools in Alberta, Canada. This paper describes the establish-ment and characteristics of the first charter schools ment and characteristics of the first charter schools in Alberta, issues and concerns about charter schools in the province, the components of their charters, and problems and obstacles that each of the three schools has faced. A 1993 report released by Alberta Education cites the absence of competition as the primary reason "for the failure of public schools to provide the level of excellence in education preserved for success if an interestical comtion necessary for success in an increasingly competitive society." The three schools include: (1) a school for street youth-Boyle Street Co-op Education Centre, Edmonton, Canada; (2) Education for the Gifted (EFG) Charter School, Elk Island School Division, Sherwood Park, Canada; and (3) ABC School for the Gifted and Talented, Calgary, Canada. Although charter schools in Canada are still in the early stages of implementation, they have had a significant impact on public education by making educators reevaluate public education and its role in society. Some school boards have recognized that society. Some school boards have recognized that charter schools provide options for students whose needs are not being met in a traditional system and open access to students who otherwise might not afford the tuition fee. Finally, the new schools have not created a stratified education system. (Contains six 1cferences.) (LMI)

Corporate involvement in public education is nothing new. This book offers a critique of the growing corporate control and commercialization of public schools. Chapter 1 describes the history of

business influence on American education with a focus on the case of Wisconsin, in which the corporocus on the case of wisconsis, in which the corporate-led restructuring of the American economy has defined the terms of the current national debate over school reform. The chapter outlines current trends that strengthen the link between the provision of public education and the ability of schools to sion of public education and the ability of schools to deliver corporate profits. Chapter 2 examines how a multibillion-dollar market that employs large numbers of high-priced corporate talent (advertising) is transforming America's schools. Chapters 3 and 4 describe the development of Channel One and other privatization efforts for profit, including the Edison Project and Education Alternatives, Inc. (EAI). Chapters 5 and 6 provide a history of private school vouchers and charter schools. The seventh chapter suppressives the social coatts of privatization arguing summarizes the social costs of privatization, arguing that it fails to redistribute power and economic opportunity and contributes to increased intolerance by creating economic insecurity. The appendix lists several standards developed to guide corporate in-volvement in the schools and resource organizations. An index and endnotes are included. (LMI)

This booklet offers a summary of United States
Supreme Court decisions handed down through the
end of the Court's 1994-95 term. The synopses include only the rule of law of the case and the facts
necessary to the decisions. In a few situations the
synopsis also includes a legal theory. The reference
contains virtually all cases in which a public school
district was a party and in which a substantive decision was rendered. It also includes some cases in
which a school district was not a party. The book is
organized by the constitutional provisions and federal statutes upon which the U.S. Supreme Court
has based its decisions affecting public schools. It
includes cases related to the U.S. Constitution and
Bill of Rights (Amendments 4, 8, 10, 11, and 14),
Civil Rights statutes, and funding statutes. A table
of cases, a table of constitutional provisions and
federal statutes, and a descriptive word index are
also provided. (LMI)

Identifiers—\*Americans with Disabilities Act 1990
In 1990 the Americans with Disabilities Act (ADA) became law to ensure the full participation and equal opportunity of the disabled in the United States. Among its many requirements is the obligation on employers, including school districts, to provide those applicants and employees with disabilities who possess the requisite skill, education, experience, and other job-related requirements with reasonable accommodations to perform the essential functions of a position. What constitutes a reasonable accommodation in various circumstances has been the subject of many cases under both the ADA and its statutory predecessor, section 504 of the Rehabilitation Act. This publication contains a comprehensive list of case summaries on 504 of the Rehabilitation Act. This publication con-tains a comprehensive list of case summaries on reasonable accommodation of disabled employees under both laws. It covers the applicable standards, burdens of proof, defenses, and types of accommo-dation and undue hardship and provides guidelines for school attorneys on the scope of school districts' accommodation responsibilities. A table of cases is included (JMD). included. (LMI)

\*Public Education, \*School Based Management, \*School Restructuring
The problems facing public education in the 
United States today are many. School-based management is one type of reform that takes into consideration the diversity of student populations and 
builds shared goals among the students, staff, 
school, and community. This paper summarizes research findings on the components of effective 
school restructuring, particularly school-based management. A review of current literature on school 
reform susgests two themes: (1) the importance of agement. A review of current literature on school reform suggests two themes: (1) the importance of involving all affected groups at all stages of reform; and (2) the establishment of priorities. Theodore Sizer (1991) suggested that school reform can be initiated within existing budgets. Because school reform is not instantaneous, educators must not disband reform efforts if immediate resolution of educational problems does not materialize. (Contains 10 references.) (LMI)

Although differences in the organization of public and private schools are a focus of school reform discussions, those differences are not well understood. Using data from a national sample of secondary schools in the 1990-91 Schools and Staffing Survey, conducted by the National Center for Education Statistics (NCES), this report examined organizational differences across public and private schools and among private school types. The study examines six key organizational domains: educational goals; the professionalization of principals; teacher compensation; size of administrative staff; school-based control; and curricular emphasis. Overall, the results show considerable organizational variation among different types of private schools and some significant similarities between public schools and some types of private schools. Although religious development of students is the most important goal among many private schools. Although differences in the organization of public

comparable proportions of public, Catholic, and unaffiliated religious secondary schools hold aca-demic excellence as their main educational goal. Although private school principals may hold fewer education credentials than their public school counterparts, there are differences across private school types. The ratio of administrative staff to faculty is types. The ratio of administrative staff to faculty is larger in the private than public sector; however, there is considerable variation among private school types. Although private schools tend to have more onsite control of key administrative decisions, not all public schools lack this feature. There are few substantial sector differences in graduation requirements. Finally, after controlling for many other school characteristics, information about sector ments. Finally, after controlling for many other school characteristics, information about sector membership and private school type greatly increased prediction of a school's teacher salaries, but only modestly improved prediction of administrative staff size and the degree to which the principal is a key decision maker. In summary, school sector is not a simple organizational fault line running through the nation's schools. Eight tables and 11 figures are included. Appendices contain additional information about educational scales details of the information about educational goals; details of the multiple regression analysis; tables of standard errors; a formula used in calculations; and technical notes. Schooling, "Private Education, "State Regulation Choosing to homeschool or to educate a child traditionally is often a difficult and confusing deci-

sion for parents and guardians. To help them make the best possible choice, this brochure answers basic questions about homeschooling and suggests other useful sources of information. The questions include useful sources of information. The questions include the following: (1) Do families have a right to school their children at home? (2) What does the federal government do for families who school at home? (3) How do educators and policymakers view homes-chooling? (4) How well do home-schooled children do? (3) What are college-admission policies with regard to home-schooled students? and (6) What resources are available to homeschoolers? The bro-chure also identifies additional sources of informa-tion (1 M). tion. (LMI)

Research supports the following four key elements of any comprehensive education-improve ment effort: (1) high standards for all students; (2) teachers better trained for teaching to high standards; (3) flexibility to stimulate local reform, coupled with accountability for results; and (4) close partnerships among families, communities, and schools. By focusing resources on these key ele-ments of education improvement, the Improving ments of education improvement, the improving America's Schools Act (IASA), the law that reau-thorizes the Elementary and Secondary Education Act of 1965 (ESEA), substantially contributes to advancing the quality of teaching and learning for all students. This brochure describes how the IASA certificiate to each of the elements of comments. contributes to each of the elements of comprehen-sive education improvement. For example, the IASA provides resources to states, districts, and schools to support their efforts to help students reach high state standards. The IASA created the new Eisenhower Professional Development pro-gram as well as programs funded by the new Title I and by Title VII. The IASA revises the ESEA to provide broad flexibility to states, school districts, and schools in their implementation of federal programs. The IASA simultaneously calls for strategies to hold school districts and schools accountable for improved student achievement. Title I promotes improved student achievement. Title I promotes greater family-school and community-school con-nections. The brochure also describes activities aimed at achieving the Department of Education's goal of coordinating efforts to implement reform legislation. (LMI)

ment Act Chapter 1

The Chapter 1 program represents the nation's largest federal investment in elementary and seclary schools. This report describes the operation of Chapter 1 services, with a focus on instructional practices and classroom organization. Specifically, practices and classroom organization. Specifically, the report describes how services differed by the poverty level of a school and by the type of delivery model utilized. The study followed large national samples of students in three grade cohorts. Information was collected from the students, their teachers, parents, principals, and school districts. Baseline parents, principals, and school districts. Baseline data were collected on students in the first-grade cohort in autumn 1991 and on students in the third-

and seventh-grade cohorts in spring 1992. The report is based on the 1992 first-year followup data. Findings indicate that high-and low-poverty schools differed in several important ways in which Chapter 1 services were organized and used. High-poverty schools were far more likely to use inclass ser-vice-delivery models, which allowed more time for instruction, disrupted service delivery less often, and created a greater emphasis on coordination between Chapter 1 and regular teachers. Teachers in tween Chapter I and regular teachers. Teachers in high-poverty schools reported allocating more time for instruction and more consistent scheduling of Chapter I services than did their counterparts in low-poverty schools. The operation of Chapter I in high-poverty schools also encompassed a greater diversity of services than it did in low-poverty schools thowever, high-poverty schools tended to follow traditional reading-instruction methods, experienced a more pronounced lack of basic supplies, and were less likely to have student access to comand were less likely to have student access to com-puters. A total of 34 exhibits are included. The appendix contains 47 supporting tables. (Contains seven references.) (LMI)

is a comprehensive survey of the practice of con-tracting out in public education. It provides a broad tracting out in public education. It provides a broad historical background for the U.S. education system as a whole. Chapter 2, by Craig Richards, conducts a close financial analysis of the current industry leader in the field of educational contracting, Edu-cation Alternatives, Inc., and presents an indepth budgetary analysis of EAI's arrangement with the

city of Baltimore, Maryland. In the third chapter, Max Sawicky considers how economic theory and practical experience inform the concept of contracting out the management of public schools. The final chapter, by all three authors, focuses on the policy implications of the previous chapters' findings and offers recommendations on ways to approach con-tracting. Findings indicate that, to date, schools and businesses have little experience in privatization. There is a lack of genuine competition in the market for education-management services, low priority for information gathering or evaluation, and insufficient evidence to support privatization's claims of superior instructional practices. EAI has failed to establish a reputation for corporate responsibility, to take effective control of the schools under its purview, to produce improvement in educational out-comes (despite the advantage of additional resources), or to demonstrate that it can make money managing public schools. To date the bulk of the company's cash flow has been derived from stock offerings and financial speculation. stock offerings and financial speculation. Twenty-two tables and 8 figures are included. Appendices provide information on the informal structure of EAI and statistical tables. Endnotes and an are included. (Contains 187 references.)

This book delineates the effects of the Great Depression upon the schools and explores how the sup-

pression upon the schools and explores how the sup-porters of public education responded to the retrenchment of school budgets. The introduction postulates that the public schools as a bureaucratic system in the best of times produced what it was capable of producing, which at times coincided with the wishes of parents and the community. In the worst of times the institution muddled through. Chapters 1 and 2 describe how educators failed to come forward with a new paradigm for the schools. The chapters also analyze the contents of the "So-cial Frontier," a journal founded by educators. The third chapter recounts the Depression's depths as hard times rocked the U.S. schools. Chapter 4 focuses on the reorganization of schools in New York City and concludes with a review of the "McCarthyite" tactics of the chief medical officer of the schools, Dr. Emil Altman, in removing "insane" teachers. The fifth chapter describes the impact of the Depression on Seattle, Washington, schools. Chapter 6 describes the Tusher affair, a case study of school bureaucratic responses to parental wishes to have their children attend their neighborhood schools. The chapter concludes with a look at parental and student complaints of the schools else including those by the Pennsylvania Amish. Chap-ter 7 describes the historical albatross under which teachers have labored since the father of the public schools, Horace Mann, initiated the patriarchal tradition of expecting single, virtuous women to staff the classrooms of the United States for little remuneration. The eighth chapter focuses on the increasing role of the federal government in providing "emergency" financial aid to the schools, especially the role of the Works Progress Administration. Chapter 9 reveals how the aborted New Deal economy caused school districts to undergo financial reomy caused scnool districts to undergo financial re-trenchment. It also reviews parental concerns over curricula changes and describes black education during the 1930s. The final chapter describes a New York City school war that took place between school officials and politicians in 1939. Photo-graphs, endnotes, and an index are included. The appendix contains statistical tables. (Contains 103 references.) (LMI) ED 399 654 EA 027 904 Burtless, Gary, Ed.

Even when studying the same measures of school performance, some educational researchers conperformance, some educational researchers con-clude that greater spending is useful in promoting student progress; others find little evidence that ex-tra spending produces meaningful improvement in student performance. The studies in this book focus on two measures of educational effectiveness. Half examine the effect of school spending on the academic achievement of youngsters while they are in school. The other half assess the impact of school resources on students' earnings after their formal schooling has ended. About half of the papers find no persuasive evidence that increased spending pro-duces consistent gains, either in student achieveduces consistent gains, either in student achieve-ment or in adult carnings. Two sets of authors conclude that added spending improves student outcomes. The last two groups of authors argue that variations in the level of school spending are less important than effective organization of school re-sources in determining whether spending differences have important consequences for student outcomes. Chapters include the following: (1) "In-troduction and Summary" (Gary Burtless); (2) "School Resources and Student Performance" (Eric "School Resources and Student Performance" (Eric A. Hanushek); (3) "Have Times Changed? The Re-lation between School Resources and Student Per-formance" (Larry V. Hedges and Rob Greenwald); (4) "Evidence from Fifteen Schools in Austin, Texas" (Richard J. Murnane and Frank Levy); (5) "Labor Market Effects of School Quality: Theory and Evidence" (David Card and Alan B. Krueger); (6) "It These a Link between School Invite and and Evidence" (David Card and Alan B. Krueger);

In 1994 Arkansas's school-finance system was de-In 1994 Arkanas s school-inance system was celared unconstitutional. A compromise plan was drawn up during the following year to appease both the state legislature and the governor. This paper discusses the confusing and contradictory aspects of three pieces of the state's school-finance legislation: Act 916, Act 917, and the Biennial Appropriations bill. The paper focuses on problems and inconsistencies in the laws, including funding priorities, incentive funding, the use of miscellaneous funds, rewards for debt, spending of Additional Base Funding, and the use of real dollars. Finally, Act 917 violates the concept of vertical equity and places the constitutionality of the new law in jeopards (I MA).

A consortium is the most advanced form of col-A consortium is the most advanced form of col-laboration, in which two or more institutions create a new mechanism to undertake "programs and projects of mutual interest" (Konrad and Small 1989, p. 200). This paper describes three dis-tance-education consortia that were developed among Alberta, Canada, school districts. It de-scribes the project's rationale, the role of the consor-tia in delivering distance education, the issues that tia in delivering distance education, the issues that emerged during the development and maintenance of the consortia, the strategies that were utilized to resolve issues, the factors for effective district participation, and the necessary policies and supporting services. A conclusion is that consortia, especially school-district consortia, are more difficult to orga-nize and run successfully than they originally ap-pear to be. Their chief advantages, however, are cost-savings and access to teacher specialists. Ob-stacles included new staff roles and greater staff workloads, the need for new kinds of leadership, power issues, unclear financial and operational agreements, and districts' reluctance to surrender control and autonomy. The following eight guide-lines are offered: (1) establish among all consortia lines are offered: (1) establish among all consortia representatives an atmosphere where frequent and open dialogue is expected and where appreciation of others' points of view is the focus; (2) appoint a full-time leader who is granted meaningful authority and independence; (3) develop a clear agreement that specifies financial arrangements, policies, and procedures; (4) develop clear role descriptions; (5) provide support for staff, especially teachers; (6) delegate authority for local decision making to principals; (7) allow sufficient time for planning; and (8) budget for extra personnel and staff time. Identifiers—\*Poststructuralism
Few superintendents of K-12 public school districts in the United States are women, though many women have leadership positions in schools. This book presents findings of a study that explored what it was like to be a qualified woman aspiring to the superintendency. Data were obtained from interviews with 27 self-identified women aspirants who lived in a northwestern state characterized by a relatively homeogeneous population. The participants tively homogeneous population. The participants were highly capable administrators with clear visions of education, had spent over 20 years in educa-tion, and modeled commitment to the success of all children. The first chapter provides an overall conchildren. The first chapter provides an overall con-text for the study of the superintendent. Chapter 2 elaborates feminist poststructuralism, the theoreti-cal framework of the study. Chapter 3 discusses what it means to be qualified for the superinten-dency, incorporating the beliefs of participants and of those within the dominant discourse. Data from the interviews are analyzed in chapters 4 through 6. the interviews are analyzed in chapters 4 through 6. Chapter 4 looks at how the women administrators operated within the working context of educational administration; how personal contexts influenced the lives of women aspiring to be superintendents is the focus of chapter 5. The sixth chapter describes the approaches to leadership that the women had developed, with a focus on the relational aspects of administration. The seventh chapter explores the administration. The seventh chapter explores the evolution of leadership behaviors and attitudes from evolution of leadership behaviors and attitudes from a feminist perspective. The final chapter presents conclusions and discusses some implications for reformed practices within educational administration to provide for a more equitable distribution of future superintendencies. The findings: (1) confirmed some alternative approaches to leadership; (2) revealed the white, gendered nature of K-12 administration; (3) identified gender as a factor in a woman's preparation for the superintendency; (4) identified a variety of individual responses to barriers to the superintendency; and (5) describe how the ers to the superintendency; and (5) describe how the women resisted discouragement. Appendices con-tain a description of the research design and methodology and sample interview questions. (Contains 129 references.) (LMI)

Views about privatization's advantages and disadvantages vary widely in the educational research literature. These disparate views are shaped by re-viewers' frames of reference and the evaluation cri-teria that they use. This book was written to help readers develop more refined lenses for viewing the

RIE FER 1997

privatization movement. Chapter 1 asserts that the use of private strategies in education should proceed from an informed understanding of the strengths and weaknesses and goals and objectives of this array of policy instruments. Chapter 2 defines privatiray of poncy institutents. Chapter a demes private zation and reviews the objectives that the arrangement is designed to meet. The chapter pres-ents a typology of 10 privatization strategies, based on the dimensions of allocation and provision of services. The third chapter traces the evolution of privatization as a policy initiative. The first part examines the growth of the public sector between 1900 and 1980, and the second half addresses the expansion of privatization over the past 25 years. Chapters 4 and 5 examine the pressures and ratio-nale that contributed to the growth of privatization and unpack the arguments advanced by advocates and opponents. The sixth chapter reviews the specific forces supporting privatization initiatives in education, showing how the privatization movement draws strength from: (1) central dimensions of the larger reform agenda; and (2) the privatization efforts under way in other areas of public-service de-livery and analog initiatives in the private sphere. Four tables, one figure, and an index are included. (Contains 220 references.) (LMI)

In July 1994, the British Columbia Ministry of
Education invited proposals from school districts
interested in studying the feasibility of year-round
schools (YRS). This paper presents findings of a
study of six partner school districts, each of which
implemented its project independently of others
while engaging in cross-district collaboration. Conducted during autumn 1995, the study examined the districts' consultation processes during Phase 1 of the YRS Project. Data were obtained from telephone interviews with one contact person from each district, examination of district reports and documents, and observation of partner meetings. The process by which districts became involved in the project; established committees; and acquired, as-sessed, and shared information is described. The following recommendations are offered: (1) The call for proposals should set clear criteria for school-dis-trict selection consistent with the project's intent; (2) the Ministry of Education should make a variety of resources available prior to committees starting the information gathering process; (3) the ministry should provide districts with guidelines to help them interpret the research literature; (4) the participants should respect and balance opposing viewpoints about YRS; (3) that the membership of both cross-district and district committees be carefully considered to reflect all groups equally; and (6) the ministry should play a more extensive leadership role. Appendices contain a list of the interview ques-tions and profiles of partner districts. (LMI)

This paper reviews research literature on year-round schools (YRS) for the British Columbia Ministry of Education. The literature review is orga-nized around the goals of the British Columbia Minnized around the goals of the British Coulimbia smistry of Education: (1) impact on student in terms of academic achievement, attitudes, and behavior; (2) costs and benefits; (3) facility use; (4) impact on educational personnel; (5) impact on parents and communities; and (6) the role of policy agencies and governing bodies. The review shows compelling evi-dence that YRS benefits at-risk students. Although there are dissenting findings and viewpoints, the review found that where implementation of YRS was carefully planned, involved appropriate consultative processes, and was monitored and evaluated over a period of time, levels of satisfaction were high on the part of all stakeholder groups. The review found no negative effects on student achievement and frequent positive impact in terms of student attitudes and behavior. Educators-both district- and school-based, both administrators and teachers-generally favored YRS once they experienced it. generally tavored YKS once they experienced it. Parents and community organizations across all schools levels and in both single- and multi-track schools were highly supportive of YKS. Multi-track schools, despite the substantial amount of time and effort involved in organization, have greater poten-tial than single-track schools to relieve overcrowding, save money at the school district level, reduce teacher absenteeism, and improve student retention and motivation. In conclusion, the risk incurred by a district planning to pilot year-round schooling would be minimal. A list of abbreviations and an annotated bibliography of research on YRS that distinguishes the quality of the research are included. (Contains 72 references.) (LMI)

Descriptors—Academic Achievement, College Preparation, Core Curriculum, \*Educational En-vironment, \*High Risk Students, \*High Schools, \*Nontraditional Education, \*School Organization, Standards, Student Motivation, \*Talent Development, Teacher Role, Teacher Student Ratio The Talent Development Model for high schools was developed to fill a major current void in Ameri-can education-the lack of a proven model of high school effectiveness. This report presents the essential components of the Talent Development High School, a model of changes in high school organiza tion, curriculum, and instruction based on research on student motivation and teacher commitment. Part 1 of the report describes the components of the model, which emphasizes: (1) a college preparatory core curriculum based on high standards; and (2) a learning environment that incorporates four sources of student motivation-relevance of school work, a caring and supportive human environment, oppor-tunities for academic success, and help with per-sonal problems. Part 2, which comprises about 75% of the report, describes the research base from which the model was derived. (Contains 99 references.) (LMI)

Sorting practices in the public schools place students, especially those from poor and minority fami-lies, at risk. The "talent-development" model is based on the assumption that all students, with adequate support, can learn. This report describes out-comes of the first Talent Development High School, was established in September 1995 at Patterson High School in Baltimore, Maryland. The model at Patterson, which features career-focused academies for the upper grades, a ninth-grade acad-emy with teams of teachers and students, and other key Talent Development components, was designed and developed by the school's faculty and adminis-tration with the participation of Johns Hopkins' Center for Research on the Education of Students Placed At Risk (CRESPAR) staff as partners. First-year priorities included improvements in school climate, student attendance, and studentmotion rates. After the first 7 months of the 1995-96 school year, data indicate that, compared to previous years, there is dramatic improvement in overall school climate (student behavior and faculty collegial support), in student attendance, and in expected student-promotion rates, especially from 9th grade to 10th grade. Identifiers—"New York
Conventional research dealing with education finance in general and resource allocation in particular has focused on the raising of revenues at federal,
state, and local levels and the subsequent apportionment of these resources across schooling systems,
typically school districts. Concern about productivity and equity, however, cannot be addressed ade-quately at the district level. This monograph focuses on the importance of understanding resource flows at the micro-level and reports on the progress made in New York to measure those flows. Chapter 1 introduces recent activity in two areas: (1) concerns about productivity and efficiency; and (2) concerns over equity in the distribution of educational oppor-tunities. Chapter 2 provides an overview of the conceptual underpinnings of the approach guiding the Consortium for Policy Research in Education's CORSOTUM for Folicy Research in Education's (CPRE's) multistate inquiry. Chapter 3 presents the results of a cross-sectional analysis of district resource-allocation patterns in New York State's public schools for 1991-92. Utilizing data from New York State's Education Department, the study expenses the state of the amines the allocation and use of professional staff across elementary, secondary, and administrative levels of schooling. It also examines trends in the allocation and use of professional staff in school districts with different structural characteristics, including school district size, spending, fiscal capacity, incidence of poverty, and performance level. The fourth chapter extends the analysis and reports findings from CPRE's longitudinal analysis of state-collected data. The chapter examines trends in the allocation and use of professional staff during an era of intensive education reform in New York State from 1983 to 1992. Chapter 5 reports findings from a series of case studies that permit the exploration of resource-allocation phenomena at more mi-crolevels than is customary in educational finance crosevels than is customary in educational manner research. The chapter applies a microlevel cost-allocation model to six secondary schools within four districts in New York State, identifying conditions and constraints that impact the configuration of professional staff within schools and classrooms. Chapter 6 adapts the personnel data into a resource-allocation framework. Twenty-seven tables are included. The appendix contains a list of expense categories by objective and by function and 45 statistical tables. (LMI)

Health problems related to school buildings can be categorized in five major areas: sick-building syndrome; health-threatening building materials; environmental hazards such as radon gas and asbestos; lead poisoning; and poor indoor air quality due to smoke, chemicals, and other pollutants. This paper smoke, chemicals, and other pollutants. This paper provides an overview of these areas, describing the extent of the problem, sources of the problem, and control/regulation of the problem. The term "sick-building syndrome" refers to a host of mysterious illnesses thought to result from tightly sealed, poorly ventilated buildings. In addition, the rapid proliferation of new building materials makes monitoring more difficult. The House of Representatives Committee on Energy and Commerce, Subcommittee on Health and Environment (1993) determined that serious environmental threats exist in the air of American schools. Comparative risk studies con-American schools. Comparative risk studies con-American schools. Comparative risk studies conducted by the Environmental Protection Agency in 1990 concluded that indoor air pollution is among the top four environmental risks to public health. Solutions depend upon the specific contaminant. Most, however, can be controlled by installing and using appropriate HVAC systems. (Contains 19 references.) (Author/LMI)

Satety
Every day, school-aged children encounter a wide
variety of hazards that occur both outside and inside
schools. This document presents findings of a report
that examined the scientific data on the risks for student injury and illness in the school environment The information is designed to help administrators set priorities for reducing risks to students. The report focuses on the risks that students between 5 to 18 years old encounter while they are at school, on To years oid encounter while they are at school, on the school grounds, at school-related activities, and traveling to and from school. Key findings include: (1) The two leading causes of death in school-aged children are motor vehicles and firearms; however, relatively few of these deaths occur in schools or on school bears. (2) cuits either the activities of the school buses; (2) quite often, the relative safety of schools, on a national average basis, is unknown; and (3) schools contribute to the risks of injury or illness in school-aged children; however, little is known about schools' contribution to nonfatal ill-ness and injury. Finally, national data, particularly for environmental hazards, were usually inadequate to assess the risks to students. Data are presented for incidence of unintentional injuries, including playground-related, school-athletics, transporta-tion, school-bus-related, pedestrian injuries, along with data for intentional injuries, including school-associated violent deaths and weapons. In-formation is presented for illness caused by environmental hazards, such as asbestos and lead, and for mental nazards, such as asbestos and lead, and for those that arise from exposure to infectious agents. Suggestions for comparing and managing risks are offered. References accompany each chapter. Eight figures and 35 tables are included. (LMI)

Act Title I

Act 110e 1
The largest single federal elementary and secondary education grant program to local school districts is title I of the Elementary and Secondary Education Act (ESEA) of 1965. Title I educational sernon Act (ESEA) of 1965. The Feducations services may be financed by four funding formulas, which cover basic grants, concentration grants, targeted grants, and Education Finance Incentive Program grants. Title 1's Education Finance Incentive Program would provide additional funds to states with high levels of "fiscal effort" for education (that is, high state spending relative to the state's ability to pay) and equity in per pupil spending. This General Accounting Office (GAO) report analyzes proposed measures of effort and provides options for improving them. Methodology included a literature improving them. Methodology includes a interactive review, consultation with experts, and analysis of school-district data from the Department of Education's National Center for Education Statistics (NCES) for school year 1991-92. It is recommended that the effort factor include an indicator of charged while the part which compared while the part of the t states' ability to pay that is comprehensive, reflect-ing all sources of potential revenue-raising capacity; avoid using indicators that are not directly related to state fiscal effort; and provide a direct incentive for increased effort. To assess the equity factor, the report recommends the following criteria: (1) the measure of spending disparities should be comprehensive; (2) the measure of students' needs should be as comprehensive as possible; (3) spending differ-ences should be adjusted for differences in purchasing power across school districts; and (4) the equity factor should provide an incentive for states to fur-ther reduce spending disparities. Appendices con-tain background information, a description of methodology, formulas for measuring effort and equity, examples of alternative allocations, and implications for impact aid. Contains seven tables a three figures. (LMI)

This report contains the findings of the first year of a 2-year Hudson Institute study of U.S. charter schools, which focused on their startup problems, solutions to the problems, and the policy environsolutions to the problems, and the policy environ-

solutions to the problems, and the policy environ-ments in which such schools are most likely to thrive or falter. Data during 1995-96 were derived from site vissits to 35 charter schools, which comprise a cross-section of the approximately 225 charter schools operating at that time. Approximately 600 interviews were conducted with local business and educational leaders and with 107 state-level policymakers, educators, and interest-group lead-ers. Some highlights of the findings include the following: Of the nearly 8,400 students in the sample, 63 percent were minority-group members. Eighty-one percent had been enrolled in public schools immediately before coming to the charter schools. Charter schools include schools for at-risk youngsters and special populations, distance learning teacher, cooperative, and contract, meaned ing, teacher cooperatives, and contract-managed schools. Major startup problems included the large numbers of disadvantaged and at-risk students, lack of capital and startup funds, burdensome paper work, regulatory restrictions, and governance difficulties. Charter schools are most likely to arise in states with stronger charter-school laws, which feature sponsorship options for other than school boards, openness to diverse charter applicants, auto-matic exemption from laws and regulations, and true fiscal and legal autonomy for charter schools. The report also reviews policy issues that face charter schools, including special education, teacher unter schools, including special education, teacher unions, finance, ascountability and evaluation, prevention of school failure, and federal policy. The report concludes that: (1) The demand for charter schools currently exceeds the supply; (2) there is growing evidence that supports charter schools' educational effectiveness; (3) charter schools' attractive features include their smaller size, focused missions, freedom from excessive senulations and missions, freedom from excessive regulation and control, and choices offered to students and teachers, and (4) charter schools foster innovation and promote accountability. Policy recommendations are included. Appendices contain characteristics of state charter-school laws, state case studies, a list of participating schools, and a list of interview partici-pants. (Contains 5 tables and 13 references.) (LMD)

Educational supervision has historically sought to
improve the quality of teaching. This book is a text

for undergraduate and graduate students who are engaged in the study of issues in educational supervision; it is a compendium of informed commentarion on current issues written by prominent scholars in the field. The first part (12 chapters) presents contrasting viewpoints on critical issues in the field of educational supervision. Each topic is preceded by a brief summary of its essential argument and by a series of guiding questions. The chapter closes with a series of review questions and a series of questions for further research. The argument in favor is presented first, followed by the dissenting argument. Chapters and their corresponding issues argument. Chapters and their corresponding issues include: (1) "Should Supervision Be Abolished?" (Robert J. Starratt, Robert J. Alfonso); (2) "Can We (Robert J. Starratt, Robert J. Alfonso); (2) "Can We Put Back the S in ASCD [Association for Supervision and Curriculum Development]?" (Jean McClain Smith and Barbara S. Thomson, Robert Krajewski); (3) "Do Teachers Benefit from Supervision?" (Lee Goldsberry, Duncan Waite); (4) "Is the Estrangement Between Curriculum and Supervision Reconcilable?" (O. L. Identifiers-Oregon Block Scheduling has been considered a cure for a lengthy list of educational problems. This report reviews the literature on block schedules and describes some Oregon high schools that have inte-grated block scheduling. Major disadvantages included resistance to change and requirements that teachers change their teaching strategies. There is evidence, however, that block scheduling leads to a more relaxed school attropathers; improved tudent evidence, however, that block scheduling leads to a more relaxed school atmosphere, improved student attitudes, improved student-teacher relationships, decreased dropout rates, decreased absenteeism, a dramatic drop in disciplinary problems, and accelerated student progress. Recommendations for successful change include: (1) promote stakeholder ownership; (2) obtain support from the school district and school board; (3) provide adequate time for planning, staff-development opportunities, and collaborative problem solving; (4) brainstorm creative

alternatives; and (5) conduct regular evaluation. Interviews were conducted with a total of 20 principals, assistant principals, administrators, and educators. (Contains 32 references.) (LMI)

Although an underrepresentation of women in ed-ucational administration persists, the reasons for the disparity have changed over the past 30 years. This book presents findings of a study that examined successful women administrators' insights and viewpoints regarding career achievement and leadership.

Phase 1 of the study surveyed 151 women administrators, and phase 2 elicited indepth personal narratives from 15 of the women. The introduction reviews related literature and describes the research methodology and participants. The chapter titles research methodology and participants. flect the study's analysis of the advice most often given by the women to other aspiring female admin-istrators. Chapter 1, "Be Prepared," focuses on the importance of attaining the proper credentials as well as being prepared psychologically to overcome the barriers that women encounter in seeking a ca-reer in educational administration. Chapter 2, "Plan Your Career," advises women to plan strategically for their careers as early as possible. "Persevere," the topic of the third chapter, deals with the vere," the topic of the third chapter, deals with the keys to persistence despite a host of barriers particu-larly associated with gender bias. Chapter 4, "Be Diligent and Professional," substantiates the per-ception that women in administrative positions are expected to work harder for less compensation and are usually scrutinized more critically than are male administrators. Chapter 5, "Honor, Preserve, and Protect Your Integrity," emphasizes the virtue of adhering to one's principles despite political pres-sures. "Reach Out to and Through Others," the title of the sixth chapter, stresses the importance of deof the sixth chapter, stresses the importance of de-veloping personal and professional support net-works. The seventh chapter, "Practice What You Seek: The Importance of Mentoring," identifies the characteristics of effective mentors and describes how being a mentor can favorably affect one's pro-fessional life. "Lead by Example," the eighth chap-ter, explores the leadership styles and strategies most employed by successful women leaders. Chapter 9 briefly reviews historical perspectives on women in leadership positions in education and identifies important shifts that have occurred with respect to issues surrounding the underrepresenta-tion of women in educational administration. The final chapter challenges women to seek leadership positions and to believe in their capabilities. Appendices contain copies of the two surveys. (Contains 78 references.) (LMI)

This document presents the Educational Excel-lence Network's third annual report card on the progress of education reform in the United States. Despite much activity, the report assigns reform efforts for 1995-96 the overall grade of C, which is the same grade given for the previous year. Part 1 presents data on academic achievement in American public schools and takes the position that dismal academic performance is the result of innercity academic performance is the result of innercity schools, the mediocrity of many public schools, and the lack of suitable challenge and expectations for students. Part 2 distinguishes between "content" standards and "performance" standards and dis-cusses problems in setting consistent standards and determining real accountability. The third part dif-ferentiates between "systemic reform" (in which ferentiates between "systemic reform" (in which federal or state governments set standards and shoulder primary responsibility for orchestrating implementation) and "reinvention" (in which the delivery of public education is opened up to a wide array of providers), and provides a rationale for the reinvention model. The discussion describes progress made in the charter-school, contract-managements. Part 4 in. ment, and school-choice movements. Part 4 indicates that pedagogical dogma excludes practices that are teacher-directed or that involve direct instruction. The whole-language approach in California, the standards proposed by the National Council of Teachers of Mathematics, and "natural" learning are offered as examples of instructional approaches are offered as examples of instructional approaches that shut out "instructivism" programs. The final chapter expresses the opinion that the current federal role in education is archaic, that the federal government subsidizes complacent establishment interests rather than those of consumers and reeducational dogmas that are often politically motivated and frequently at odds with the concerns of parents and communities. (Contains 34 references.)

dent Participation, Student Role, Teacher Role In recent years, schools have been moving away from centralized decision making, granting teachers the authority to determine course content. This book explores the concept of including students in curricular decision making. Chapter 1 explains why students at all grade levels should be involved in choosing topics of study. Educational research and choosing topics of study. Educational research and theory to support the model are presented in chapter 2. Involving students in decisions about curriculum improves the following areas of student performance-autonomy, student learning, motivation, and classroom behavior. Step-by-step guidelines for promoting student curricular decision making are offered in the third chapter. The fourth chapter describes how student participation in curriculum development worked in one middle-school classroom. Tins for ensuring that course content is riculum development worked in one middle-school classroom. Tips for ensuring that course content is adequately covered and a discussion of factors for increased efficiency are offered in chapter 5. The final chapter provides answers to commonly asked questions about student involvement in curricular decision making. An index and 15 figures are included. (Contains 41 references). (LMI)

Identifiers-\*Kenmore Tonawanda School District

In the wake of the educational reform efforts of the 1980s, researchers sought to identify the characteristics of effective schools. This book describes the reform efforts of the Kenmore-Town of Tonawanda (Ken-Ton) Union Free School District, which is lo-

cated outside Buffalo, New York. Data were obtained from observations; document analysis; and interviews with administrators, teachers, support staff, board of education members, and external staff, board of education members, and external consultants. Part I describes in detail the evolution of the district's improvement initiative, with a focus on understanding the process of the school improvement program (SIP). Chapter 1 provides an overview of the district environment and participants' perceptions of the first steps leading to implementation of the SIP. Chapter 2 describes the conceptual framework of the school-improvement model adopted by the district. The third chapter describes practices used by the district to develop its guiding conceptualization. Chapter 4 describes the 4-year stage during which the staff overcame their skepticism. The fifth chapter describes the third stage of the initiative, during which the SIP philosophy became an accepted standard practice. At the end of the third stage (after 11 years), the district applied for and won the New York State Excelsior Award, an award based on the philosophy of Total Quality Management (TQM). Chapter 6 relates the results of the self-assessment process that required the district to examine and document its actions using TQM criteria. Part 2 examines the transformation consultants. Part 1 describes in detail the evolution TOM criteria. Part 2 examines the transformation of the Ken-Ton School District from the perspective of five conceptual frameworks. Four are drawn from Bolman and Deal's writings on structural, human resource, political, and symbolic frames, and the fifth perspective comes from chaos and complexity theory. Eight figures are included. (Contains 122 references). (LMI)

The long-term success of school improvement de-The long-term success of school improvement de-pends on the ability of participants to function pro-ductively together. This book explores a variety of forms for collaboration in schools and presents a framework for understanding how to build stronger working relationships among colleagues. Following the introduction, chapter 1 establishes the ground-work for the discussion of collaboration. It first pres-cents a basic understanding of collaborative work for the discussion of collaboration. It first presents a basic understanding of collaborative relationships and a straightforward model for understanding the process of collaboration. It next introduces the "bedrock skills" of listening and influencing. Chapters 2 through 8 address seven common opportunities for adults to work together in schools: two ways of pairing up with another educator, four types of small-group work, and one type of working with the faculty as a whole. The bulk of each chapter is devoted to ideas and strategies for forming and fostering effective work relationships. The ideas and strategies are organized according to the four phases of collaboration in the process model—convening, contracting, composing, and following through. Each of the chapters closes with a list of conditions essential for collaboration is schools and an annotated list of resources for further schools and an annotated list of resources for further reading. Chapter 9 presents several overarching recommendations for nurturing collaboration in schools, based on the preceding chapters. It first examines some of the common obstacles that educators face: a school culture that does not value or understand collaborative work, conflict within and outside the group, and flagging energy and commit-ment. The chapter offers recommendations about four critical facilitating conditions for collaboration space, time, leadership, and a supportive culture. Each chapter contains references. An index is in-cluded. (LMI)

Relationship, School Effectiveness Research seeking to evaluate the effectiveness of SBM has been complicated by the complex policies and practices that have been implemented with great variation. Given this difficulty, this book presents findings of a study that sought to understand the ways in which school-based management (SBM) actually operates in a school recognized for its successful self-transformation. The study took place at Jackson Elementary School, a large school located in a low-income area of Los Angeles, California. Data were obtained from observations; interviews with the principals some staff and 15 teachers in with the principal, some staff, and 15 teachers; inwith the principal, some staff, and 15 teachers; in-formal conversations with students, parents, and staff; and document analysis. Chapter 1 presents a review of related literature and outlines the study's conceptual framework and methodology. The sec-ond chapter describes the context of the school. Chapters 3 through 6 analyze four conditions that contributed to the successful functioning of the school: (1) a consistent powerful focus on learning. school: (1) a consistent, powerful focus on learning; (2) strong, yet facilitative leadership; (3) a commitment to nurturing a sense of internal and external community; and (4) resources aimed at building the community; and (4) resources aimed at building the capacity of persons within the community to lead, learn, and teach. Recommendations for policies, structures, and professional development to enhance positive educational change are offered in the final chapter. A conclusion is that although SBM contributes to the organization's success in certain ways, it is by so means the cause of positive work at Jackson. SBM is a promising approach if the goal is to create schools that function more democratically. However, if the reformers' goal is to use SBM to improve student learning, certain conditions must first be in place. An index is included. (Contains 203 references.) (LMI)

The board collects state-by-state data every 2 years and compares how states are doing on over 60 different indicators. This document presents findings for 1996 and reports that most improvements are accompanied by cause for concern. The positive findings are that over 90 percent of first graders have attended kindergarten, which was not true 10 years ago; enrollment is up in kindergartens and in prekindergarten programs for three- and four-year-olds; dergarten programs for three- and four-year-olds; more high school students are graduating with college-preparatory courses; record numbers of students are taking Advanced Placement college-credit courses in high school; and the percentages of the South's young adults who have high school diplomas and who have attended college are virtually at the national averages. However, the report found no marked general improvement in the skills and knowledge of elementary and secondary school students as measured by state and national tests. In addition, while states spend more on education now than a decade ago, they spend a smaller proportion of state and local budgets for education even though school and college enrollments in most states are school and college enrollments in most states significantly larger than in previous years. This manual contains the Cultural Competence
Self-Assessment Questionnaire (CCSAQ), a measure designed to assist service agencies working with children with disabilities and their families in self-evaluation of their cross-cultural competence. The measure is based on the Child and Adolescent Service System Program Cultural Competence Model. This model describes cultural competency model describes cultural competency in terms of four dimensions: attitude, practice, policy, and structure. Introductory material notes ways the CCSAQ has been used to identify an agency's cultural competence training needs in a variety of agencies in seven states. Individual sections of the manual provide information on the application and administration of the measure, its outcomes, its reliability, its content validity, the scoring guide, and presentation of resulting data in a comprehensible format. Implications for training are discussed. Ap-pendices include two different versions of the questionnaire-one for direct service providers and one for administrative staff. The measure contains ques-tions in the following areas: knowledge of communitions in the following areas: knowledge of communities; personal involvement; resources and linkages; staffing; service delivery and practice; organizational policy and procedures; and reaching out to communities. Also included is a scale for collecting demographic information. (Contains 31 references.) (CR)

Several issues surrounding adoption are addressed Several issues surrounding adoption are addressed in this journal. "Openness in Adoption," by Ruth G. McRoy and others, explores the movement away from confidentiality in adoption. "Mid-Life Reflections on Adoption" by Carol Yttri and "An Adoption Journey" by Shannon Latimer detail the experiences of adults who were adopted as children. In "Emotional Disorders in Adopted Children and Youth" (Ruth G. McRoy and Harold D. Grotevant), a research review finds that adopted children are referred for psychological treatment two to five are referred for psychological treatment two to five times as frequently as their nonadopted peers. A study of 50 adopted and 50 non-adopted adoles-cents in residential treatment centers indicated that cents in residential treatment centers indicated that adoption outcomes are influenced by a variety of child and parental factors, including the parent's reasons and motivation for adoption and their attitudes toward adoptive parenthood. "Intercultural Adoption" (Joan D. Ramos), "The Case Against Transracial Adoption" (Leora Neal), and "The Birth of Intercountry Adoptions" (Susan Soon Keum Cox) discuss the impact of adoptions between members of racial, ethnic, national origin, and religious groups on the children and families involved. "The Multiethnic Placement Act" by Carol Williams reviews this 1994 law. "Parent and Child Attachment" (Margaret Redfern) examines the bonding between parents and their children. "Adoption Subsides: A Boon for Children" (Ann Sullivan) discusses the federal adoption subsidy. "My Family: Formed by Adoption" (Stephanie Ward) is a personal narrative by a woman who adopted a child sonal narrative by a woman who adopted a child with mental disorders. Selected adoption resources are also listed. (CR)

Educ Act 1988, Ohio
This monograph contains three structured interview guides for interviewing principals, parents, and community leaders regarding gifted education as part of the needs assessment process under the Javits Grant Program. Many of the interview questions are multiple choice and all questions also solicit comments. The first interview is for building principals and asks questions on the number of gifted students by grade level and race; existing gifted education programs: who makes referrals: gifted education programs; who makes referrals; identification of gifted students; parental notificaidentification of gifted students; parental notifica-tion; parental involvement; community resources; student placement; timing of screening; program monitoring; individualization of instruction; support staff; professional preparation; knowledge of Ohio's definition of giftedness, ability to use portfolio as-sessment; ability to identify gifted children, under-achievers, and disadvantaged children; public awareness, and obstacles that prevent parental par-ticipation. The parent interview includes questions addressing; identification of parent as gifted; child identification; activities in which the child has par-ticipated; characteristics of the child; parental interventions; and effectiveness of school programs. The third interview is to be used for community leaders and includes questions on: availability of informa-tion on gifted programs; community's response to gifted programs; parent involvement in the school; effectiveness of school programs; use of community resources; and parent training. This is the first publication in a series of three
reports that summarize the results of Ohio's Javits
Project, a 3-year federally sponsored program to
improve the identification of and services to young
economically disadvantaged gifted children in 25
Ohio schools. The report focuses on the project's
first year's activities. It describes the advisory committee formation, purpose, functions, and membermittee formation, purpose, functions, and member-ship, which includes parents, teachers, university personnel, professional association leaders, state depersonnel, professional association readers, state de-partment personnel, and community groups. The site selection process is reviewed. Building teams, consisting of the principal, gifted coordinator, gifted teacher and two regular classroom teachers, and a parent, are described, as are the community aware-ness meetings held at each school. The needs assess-teach recess, involving attractived interviews with ness meetings held at each school. The needs assess-ment process, involving structured interviews with 42 parents, 25 principals, 21 teachers, and 28 com-munity leaders, is reviewed. Among best practices suggested for similar projects are the importance of being inclusive in creating advisory committees and building teams and allowing for flexibility in project design. Appendices includes an Ohio Javits Grant abstract, a list of participating buildings and sites, a list of advisory committee members and Javits project staff, and an executive summary of the needs assessment. This is the third publication in a series of three This is the third publication in a series of three reports that summarize the results of Ohio's Javits Project, a 3-year federally sponsored program to improve the identification of and services to young economically disadvantaged gifted children in 25 Ohio schools. This report provides information about the successes of the project teams in improving identification and service delivery practices. The overrepresentation and underrepresentation of ethoverrepresentation and service celevery practices. The overrepresentation and underrepresentation of eth-nic groups in traditional gifted programs are dis-cussed. The benefits to providing gifted services in the regular classroom, including teacher collabora-tion and challenges for all students, are highlighted. Noted are the move away from traditional gifted identification methods to a more inclusive multifactored identification process, and the effects of this change as seen in the ethnic composition of identichange as seen in the ethnic composition of identi-fied gifted students before and after the program. Positive transformative learning experiences of par-ticipating teachers and the resulting provision of differentiated instruction to gifted students are de-scribed. A graph shows the academic and social growth of participating students. Best practices in differentiating instruction to meet individual learner needs include are identified. Appendices include an Ohio Javits Grant abstract and a list of participating buildings and sites. (Contains 20 references.) (CR)

This report summarizes the actions and outcomes This report summarizes the actions and outcomes of a seminar attended by State Education Agency (SEA) directors of gifted and talented programs in December 1994. The meeting identified important issues in the gifted field, including: lack of gifted preservice course work and training programs; service for students in the regular classroom; the need for quality assurance through evaluation, state accountability systems, and dissemination of research; the need for mobility assurance and the need to puild the need to mobilize parents; and the need to build on Goals 2000 and other federal legislation. Action steps the directors need to take are described, in-cluding: creating a means for communication, dialogue, and meeting with one another; consolidating findings of projects and research; developing and ing best practice models for identifying and providing services to gifted students; endorsing the adoption of national standards for a more challenging curriculum for all students; and creating a forum that allows SEA directors and preservice/postserthat allows SEA directors and preservice postser-vice providers to narrow the gap between practice and what is being taught in professional develop-ment courses. Appendices include a list of partici-pants, an Ohio Javits Project description, a summary of SEA Action Seminar evaluations, and a comprehensive list of challenging issues developed at the seminar. Identification

Identification Identifiers-Differentiated Curriculum (Gifted), Disproportionate Representation (Spec Educ),

\*Ohio

Using the results of model gifted and talented projects in Ohio (32 during Fiscal Year 1992-93 and 31 during 1994-95), this report provides informa-tion to local education agencies to improve the identification of and delivery of services to students who are gifted. Alternative identification strategies such as using a multifactored assessment are reviewed in the context of the underrepresentation of minority groups in gifted and talented programs. The value of a full range of service delivery methods (resource room, separate classrooms, cluster grouping, accel-eration, cooperative learning, and the regular classroom) is emphasized, as is the provision of differentiated curriculum to gifted students. Specific individual model projects and their outcomes are reported, in relation to their efforts in meeting the following three priorities: (1) identification of un-derserved populations; (2) provision of a differenti-ated curriculum within the regular classroom; and (3) provision of a full range of services to gifted students. The report stresses the importance of professional development in helping teachers develop competencies in differentiating instruction and curriculum. A list of participating school districts completes the report. (Contains 46 references.) (CR)

Centers

Major ongoing supported employment studies conducted at the Rehabilitation Research Training Center at Virginia Commonwealth University are profiled in this newsletter. The training center in-volves individuals with disabilities in the design, implementation, and interpretation of the research. The first research study examined the opinions of 110 individuals with disabilities who were working in supported employment. Results showed that 90 to the control of percent of these consumers liked their jobs and 96 percent were satisfied with supported employment and believed they would not be working without its assistance. The second research project was a voca-tional integration study of 390 consumers of supported employment services. Findings indicated a significant difference between the level of integration experienced by the consumers and the type of job they held. Consumers employed in clerical jobs were more integrated than in other job types. The third study was a national survey of 365 agencies which found that 98.9 percent of respondents reported that their agencies were continually convert-ing facility-based resources to community-based employment. These participants were also asked questions on the use of Plans for Achieving Self-Support (PASS). Results showed that supported employment participants were major users of PASS plans. (CR)

Identifiers—Brigance K and 1 Screen
The purpose of this study was to determine if
there were differences between learning disabled
and nonlearning disabled students in skill areas and
total scores on the Brigance K & 1 Screen for Kindergarten and First Grade. The study investigated
whether students with learning disabilities would
show significant weaknesses in language-based skill
areas and whether their total skill area scores would areas and whether their total skill area scores would be significantly lower than the other students. Results indicated that the students with learning dissuits indicated that he students with rearning us-abilities did have significantly lower total scores, but there were no specific weaknesses in language-based skill areas. The need for early intervention in chi-dren with learning disabilities and the definition of learning disabilities are discussed. The problems with early identification of learning disabilities are noted, including the fact that preschool and early elementary-aged children have not had much expe-rience in academic skills, and some tests designed

for young children are not good predictors of future achievement and ability. The capability of language tests to accurately assess pre-academic abilities in younger children is highlighted. A review of studies on language ability is presented. Appendices in-clude a review board approval letter, parental con-sent forms, and the data collection form. (Contains 26 references.) (CR)

todulers with obsahington State early interven-needs enrolled in Washington State early interven-tion services. Enrollment numbers, rates, and pat-terns are discussed. Out of a total of 264,410 children ages 36 months and under, 4,324 were enchildren ages 36 months and under, 4,324 were en-rolled in an early intervention service plan as of December 1993. Washington State was found to have slightly lower enrollment rates than the na-tional rate. Enrollment was higher among children of Medicaid-eligible families and there were large differences in enrollment rates by ethnicity/race, with higher prevalence and/or reporting of disabilities among American Indians than the nation as a whole. Rural counties were found to have higher enrollment rates than non-rural counties. An exami nation of risk factors for children under 3 found that low birthweight babies were four and a half times more likely to be enrolled for early intervention services. Appendices provide data and models supporting the report. (CR)

teachers in educating children with Attention Deficit Disorder-Hyperactivity Disorder (ADD-HD).
The effectiveness of early classroom intervention
models is explored. Modifications to physical classroom arrangements are evaluated, including open
classrooms, centers, reduced space versus enlarged
space, and various arrangement of desks. The paper
presents information that supports the need for children with ADD-HD to have a highly structured
environment. Althouse open classrooms in seperal environment. Although open classrooms in general are not recommended, open classrooms or traditional classrooms that are arranged in centers are tional classrooms that are arranged in centers are suggested to be effective. The paper notes that there is limited research to support the use of study carrels for students with ADD-HD. Cluster seating, befor students with ADD-HD. Custer seaung, oc-cause it promotes student interaction, is not recom-mended for students with ADD-HD, though seating well-behaved peers next to the child with ADD-HD is suggested. Questions are raised regarding past research that led to recommending reduced enviresearch that led to recommending reduced environmental stimuli for children with ADD-HD. The use of functionally stimulating, versus visually stimulating, bulletin boards is evaluated. The report emphasizes that no single educational program or strategy is suitable for all children with ADD-HD. Teachers are urged to use the insult of march and Teachers are urged to use the input of parents and special education practitioners in developing an individualized education program for a child with ADD-HD. I his text addresses curriculum development for students with mental retardation based on the prem-ise that it is the primary job of educators to teach these individuals independence skills and also based on criticism of the academic focus of most current instructional approaches. Individual chapters consider the following topics: (1) an overview of mental retardation; (2) the aim of instruction (including an instructional definition of mental retardation and the aim of independence for persons with mental retardation); (3) the concepts of curriculum and cur-riculum goals (including 10 principles and goals adriculum goals (including 10 principles and goals addressing curriculum structure, content, and functions); (4) formulation of the instructional aim and curriculum goals (offering a four-step procedure for selecting and formulating goals); (5) curriculum development (with a five-step procedure suggested); (6) planning an assessment of curriculum objectives (with principles of assessment and a five-step proce-dure for planning an assessment); (7) conducting an assessment and developing an individualized program of instruction; (8) the program objective analysis (establishing performance standards and analyzing skill clusters); (9) providing information (techniques, feedback, fading, and motivation); (10) monitoring instructional plans (a three-step plan for developing a monitoring system); and (11) modifying instruction (appropriate responses when learners are achieving desired instructional results and when learners are not progressing satisfactorily).

Appendices include a list of terminal goals, worksheets, and a checklist of potential physical prob-lems. (Contains over 175 references.) (DB)

ED 399 702 Thorpe, Harold Chiang Berttram
A Study of Wisconsin's Application of State and
Federal LD Eligibility Criteria.

Pub Date—[96] Note—321p. Pub Type— Reports - E Tests/Questionnaires (160) Evaluative (142) -EDRS Price - MF01/PC13 Plus Postage. Descriptors—Compliance (Legal), Criteria, Definitions, \*Disability Identification, Educational Ditions, "Disability Identification, Education eli-agnosis, Elementary Secondary Education, "Eli-gibility, "Evaluation Criteria, Federal Legislation, Incidence, Intelligence Quotient, "Learning Dis-abilities, Minority Groups, Referral, "State Stan-dards, Student Evaluation, Student Placement,

dards, Student Evaluation, Student Piacement, Surveys Identifiers—Discrepancy Formulas, "Individuals with Disabilities Education Act, "Wisconsin This study reviewed 1137 students' records from 25 school districts to determine if there is a possible conflict between Wisconsin's learning disabilities (LD) eligibility criteria and the federal definition under the Individuals with Disabilities Education Act. It also surveyed student evaluation and placement of the property of the control of the contr Act. It also surveyed student evaluation and place-ment teams concerning their application of the cri-teria. Wisconsin requires an individual to have normal intellectual functioning and academic dis-crepancies in two or more achievement areas. A crepancies in two or more achievement areas. A literature review examined: prevalence, referral, and eligibility; IQ scores and discrepancy models; and prevalence of ethnic groups in special educa-tion. Results suggest that although some students in Wisconsin may be denied eligibility for learning dis-abilities when using Wisconsin's criteria inflexibly. others demonstrating the same conditions may be found eligible when the criteria are applied flexibly. It was found that the eligibility decision was based on two points: the extent to which a child has demonstrated inability for success in regular education, and the extent to which further modifications cannot be anticipated in the regular education setting without assistance from special education. Recom-mendations for improvements in Wisconsin's identification procedures and services for students with learning disabilities were proposed by parents, ad-ministrators, and other school personnel. Twenty appendices provide letters, questionnaires, statisti-cal analyses, and responses to a survey. (Contains 54 references.) (CR)

This resource and planning guide provides a framework for practitioners to create an effective rannework for practitioners to create an effective educational program for students with traumatic brain injuries. Chapters 1 and 2 provide an overview of brain injuries including information on brain physiology, types of brain injuries, and differences by age. Chapter 3 discusses returning to school, home and the community after a brain injury. home, and the community after a brain injury. Chapter 4 provides information on screening, referrals, and determination for special education. It also includes information on developing an individual-ized education program (IEP). Chapter 5 discusses the assessment of educational needs, including assesament goals, planning the assessment, choosing assessment methods, interpreting results, and reevaluation. Chapter 6 describes components that should be addressed in individualizing an education program, including physical abilities, cognitive abilities, academic activities, and nonacademic activi-ties. Chapter 7 discusses behavior management from understanding underlying factors to designing behavioral interventions and implementing behavior management strategies. Chapter 8 presents ma-terial on providing physical, occupational, and speech and language therapy. Chapter 9 discusses empowering the family and relationships with siblings and peers. Chapter 10 focuses on preventing injuries and identifying remedies. Chapter 11 includes appendices on federal legislation definitions, measures of consciousness, and a tip sheet on paren-tal preparation for IEP Meetings. An extensive resource list of materials and organizations is provided. (Individual chapters contain references.)

A metacognition instructional strategy was employed to increase class participation and motivation in 21 seventh grade "at-risk" students at 2 schools in the context of the national problem of meeting the needs of "at-risk" students. A survey of the third the context of the students. the students' content area teachers and of the students themselves found evidence of the students' dents themselves found evidence of the students' deficient learning strategies. Some probable causes of the students' lack of participation and motivation may have included the schools' tracking systems, departmentalization leading to curriculum being taught in isolation, teacher-directed classes, the lack of basic skills, and the lack of self-regulatory learning skills. The Strategies Intervention Model was used to address the academic accided and motivaused to address the academic, social, and motiva-tional needs of students at risk for school failure. A major program component was the SLANT Strat-egy Model which helps students remember to: Sit up, Lean forward, Activate thinking, Name key inup, Lean forward, Activate thinking, Name key in-formation, and Track the talker. After using SLANT, teachers reported that roughly two-thirds of students exhibited the sitting up, learning for-ward, and tracking the talker behaviors. On "acti-vating thinking," teachers observed that slightly more than one-third of the students asked clarifying questions. A little less than half performed the behavior of "naming key information" by answering teacher questions and sharing ideas during class discussions. (Contains 26 references.) (CR)

Identifiers-Virginia

This paper reports the findings and recommenda-tions of a task force of the Virginia Department for the Deaf and Hard of Hearing (VDDHH) on cur-rent trends in the education of students who are deaf rent trends in the education of students who are dear or hard of hearing (including deaf-blind students) and the implications of a proposed Deaf Child's Bill of Rights. The task force reviewed the literature and existing mandates of Virginia and other states and convened focus groups of students, parents, consumers, and educators. Findings addressed the fol-lowing areas: placement options, modes of communication, current mandates, personnel stan-dards, demographic information, educational inter-preters, curriculum information, information available to parents, the role of adults who are deaf available to parents, the role of adults who are dear or hard of hearing, focus group results, and other current initiatives addressing related issues. Among 10 recommendations proposed are the following: (1) revision of teacher endorsement requirements; (2) reexamination of the need for a teacher training program in Virginia to prepare teachers of students with hearing impairments; and (3) increased partici-pation by persons who are deaf or hard of hearing on advisory groups and boards. The task force did not recommend a Deaf Child's Bill of Rights but indicated that if such a bill was introduced it should he given careful consideration. Brief summaries of the major reports evaluated are appended. (CR)

This resource guide lists over 170 people in Illi-nois who are willing to share their expertise or expe-rience concerning the inclusion of children with disabilities in the regular education classroom. Among individuals listed are general and special education teachers, school board members, individ-uals with disabilities, parents of children with disabilities, and attorneys in special education law abilities, and attorneys in special education law. Individuals in the directory were nominated by different sources and completed a profile form. An alphabetical section provides personal histories including each person's name, address, telephone number, and a brief description. The listing also includes information about what type of support the person is willing to give (i.e., telephone contacts, public speaking). A chart that lists the individuals by position is provided indicating where the person position is provided, indicating where the person lives and whether the person is willing to do speak-ing engagements. Blank forms for people wishing to be included in later editions are also provided. (CR)

This follow-up study tracked the employment outcomes, job retention, and average wages of 576 individuals in Washington State with mental health disabilities or developmental disabilities 2 years after they had received supported employment ser-vices and entered into competitive employment. The study matched client records from the Division of Vocational Rehabilitation with Employment Security earnings records. The study was able to track the employment outcomes of 86 percent of the individuals. It found that for those with developm disabilities, about 70 percent were still employed after the first and second years and for those with disabilities related to mental health, about 70 per-cent were employed at the end of the first year and 50 percent at the end of the second year. Patterns of retention in employment were quite similar, reof retention in employment were quite similar, re-gardless of gender, age, or race/ethnicity. Wages averaged between \$400 and \$500 per month the first year, increasing to about \$570 during the sec-ond year. These wages were obtained by working, on average, about half time, at \$5 to \$6 per hour. Among those with mental health disabilities, the clients who received additional services as a result of a 1993 legislative proviso had higher wages than others. Tables and graphs detail the findings, and an appendix explains methodological issues and the aunated monitoring process. (DB)

This paper reviews the research on factors that contribute to or protect from the development of antisocial behavior in children, especially those with attention deficit/hyperactivity disorder (ADHD) and learning disabilities (LD). It also presents a

model to promote prosocial behavior. General risk factors that put all children at risk for antisocial behavior are identified, such as individual risk factors related to personality, temperament, and cognitive ability and family/community/societal risk factors. Risk factors that are specific to children with ADHD and LD are identified, such as individual characteristics and innate traits, academic failure, social failure, emotional impairment, differential treatment, and low self-esteem. Children with ADHD and LD are reported to be aspecial risk for oppositional defiant disorder, conduct disorder, and delinquency. The report also considers resiliency in overcoming risk, noting general protective factors (such as good schools) and specific protective measures for children with ADHD and LD (multidisciplinary intervention). The importance of the child's attachment to at least one prosocial supporting adult is stressed for the ual characteristics and innate traits, academic failone prosocial supporting adult is stressed for the promotion of prosocial behavior. Recommendations for policy and practice address risk reduction; cultivation of resiliency; encouragement of bonding; in-creased self-esteem; and creation of a consistent system of expectations, reinforcement, and recognition. This curriculum on supported employment for in-dividuals with disabilities is intended for case managers in Montana and focuses on programs and agers in Montana and focuses on programs and processes relevant to the case manager's typical roles of long-range planning, coordination, and facilitation. Part I discusses the move toward inclusion, including its value, the concept of normalization, and past service delivery systems. Part 2 reviews the values and philosophies of supported employment, noting differences between traditional woments. ditional vocational programs and supported employment and characteristics of supported employment. Part 3 is on community integration, with information on how to facilitate social interactions. Part 4 discusses the referral process, the funding of supported employment services, how vocational re-habilitation works, and funding for extended ser-vices. Part 5 presents information on consumer assessment including different assessment procedures. Various employment advocacy activities are described in Part 6. Ways to establish supportive relationships in supportive employment are high-lighted in Part 7, with suggestions on meeting the unique needs and desires of families and caregivers, job coach techniques that enhance supportive rela-tionships with families, and addressing common concerns of families. Finally, Part 8 surveys the Sup-plemental Security Income system and Social Security Disability Insurance program. Each chapter includes a quiz for self-evaluation. (Contains 21 references.) (CR)

This book presents an introduction to the range of technology that can be used to assist in the educa-tion of students with visual impairments, with descriptions of the main features of approximately 45 systems. After an introductory chapter, Chapter 1 identifies four key uses for technology: in communication, in the production of materials, to provide access to information, and as a curriculum tool. Chapter 2 explains different computers and accessories including expansion cards, ink printers, scaniers, CD-ROMs, special access systems, and overlay boards. Chapter 3 describes large display systems, including large text on screen, large print word processors, computer magnification systems, magnification system hardware, closed circuit television systems, and large print (paper). Chapter 4 reviews a variety of Braille systems such as electronic Braille displays, Braille note takers, mechanical Braille keyboards, and translation software for Braille. Chapter 5 evaluates speech systems, including screen readers, speech synthesizers, talking word processors, and different speech devices. A final section includes articles and information inimal section includes articles and information in-tended for specialists. Articles address materials production, selection of a laptop, the Internet, and sources of information and support in the United Kingdom. Includes a list of resources in the United Kingdom and a glossary. (CR)

provement, "Student Responsions," rauge. This paper describes a project to improve the responsibility levels of 16 gifted students in fourth grade attending a daily 2-hour language arts gifted education class. Students had become inconsistent about completing assignments, maintaining an or-derly environment, and communicating necessary information to parents. A teacher-developed check list used before and after the intervention to chart list used before and after the intervention to chart different measures of student responsibility is in-cluded. Probable causes of the students' behavior problems are identified, such as the lack of character education at the school. Literature supporting the low level of responsibility generally displayed by students and the need for intervention is reviewed. The specific strategies used to increase the responsibility levels of the gifted students are described, in-cluding: teaching the core value of responsibility daily; making use of ceremonies, rituals, and rites to create a place where students experience a sense of security and belonging; seeking student input for rules, guidelines, and procedures; presenting moral dilemmas for students to analyze; teaching a unit on heroes and heroism; creating an anthology empha-sizing the virtues of care, quality, and responsibility; having students engage in cooperative learning; and involving students in the community. Data analysis indicated that students became more responsible in producing quality work, maintaining home/school communications, environmental clean-up, effective decision-making, and working cooperatively. Identifiers—\*Case Management, \*New York
This report describes a federally funded project
designed to meet the needs of culturally diverse designed to meet the needs of culturally diverse children with special health care needs and their families in New York. The goal was to establish a model program that would demonstrate that the quality of life for culturally diverse children with special health needs and their families would be enspecial neath needs and their lamines would be a hanced and strengthened by linking: (1) case man-agement for children with special health care needs and their families, and (2) community-based self-help/mutual support programs. The project funded development of models for the delivery of case management services to children with special health care needs and their families in 11 countries and in New York City, New York. Case management models had these goals: to develop a policy statement of the need for culturally competent programs; to identify culturally diverse populations within their areas; to provide special outreach services to culturally diverse populations; and to train vices to culturally diverse populations; and to train staff in cultural competency. Self-help clearing-houses worked to enhance self-help/mutual support to culturally diverse families of children with special health care needs. In addition to training clearing-house and case management project staffs in cul-tural competency, the project implemented a series of seminars, called Partners in Policy Making, to provide leadership training to parents as a way of

empowering culturally diverse families in the care of their children. Twenty-four appendices are attached to the report and include: a directory of New York self-help/mutual support services for children with special health needs; guidelines for creating a local self-help/mutual support group, in English and Spanish; evaluation reports of training sessions; and materials developed by the clearinghouses. This paper explores the problems of Arab children with hearing impairments living in Israel. It ad-dresses the linguistic challenges involved such as the intrinsic problems of the Arabic language, the diglossis phenomenon expressed in colloquial dis-lects and literary registers, and the problems associated with a minority language in Israel. It describes the population of Arab children in Israel with hearing impairments, considers the identification prob-lems associated with this population, and notes the lack of special schools or programs for Arab children with hearing impairments. The paper con-cludes with seven identified problems of the Arab population with hearing impairments: (1) intra-fam-ily marriages continue, preventing a decrease in the number of offspring with hearing impairments; (2) there are no Arabic-speaking parent support groups;
(3) there are few educational institutes for Arabic-speaking children with hearing impairments; (4) there are no social groups for Arabs teenagers with hearing impairments; (5) there has been no survey nearing impairments; (j) there has been no survey of those with hearing impairments in the Arab popu-lation; (6) sign language is less preferred for the Arab population in their educational institutes; and (7) there is a problem determining which sign lan-guage system to use. The difficulties and differences of the Hebrew speech of nine children (ages 7 through 11) with speech of nine children (ages 7 through 11) with severe hearing impairments were compared with the speech of seven children (ages 4-8) without hearing impairments. Each child was asked to name the ob-jects in 20 colored pictures. From the 20 objects, words were selected which included the five main vowels of the Modern Hebrew phonological system in unstressed and stressed syllables. The study ana-lyzed the children's production of 10 syllables from six Hebrew nouns (five bisyllabic and one trisyl-lable) in terms of the features of oral speech that are labic) in terms of the features of oral speech that are characteristic of individuals who have deafness, in-

spoken segments. The following distinct differences spoken segments. The following distinct differences between the two groups were found: (1) average pitch values were higher in the children with hearing impairments; (2) maximum pitch in accented vowels of children with hearing impairments was higher; (3) pitch ranges of children with hearing impairments were higher; (4) standard deviation

cluding: pitch; minimum and maximum values; ranges and standard deviations; and the duration of

values were somewhat higher in children with hearing impairments; and (5) vowel durations were larger in children with hearing impairment. An anal-ysis of accent differences was also conducted. Attached figures show details of the comparison. (Contains 18 references.) (CR)

This paper describes a three-phase program which places students with disabilities into job sites in strip malls, enclosed malls, industrial parks, and individ-

places students with disabilities into job sites in strip malls, enclosed malls, industrial parks, and individ-ual businesses to prepare them for their transition to independent living. The paper explains that in phase I of the program students train at a different site each day; in phase 2, students train at one or two sites weekly to focus on more site-specific skills; and in phase 3, the student is placed at a specific training site. It outlines the functions of the transition core staff and the responsibilities of the teacher/job start and the responsibilities of the teacher/job coach. A program success rate of 40 percent em-ployment of graduates is reported. Stressed is the importance of supervision during the transition to independence. The handbook includes: (1) job de-velopment forms (a check list, teacher referral, parvelopment forms (a check inst, teacher reterral, par-ent permission, hold harmless, and business agreement); (2) job coaching forms (a student daily profile, task documentation, grading summary, stu-dent evaluation, and survey); and (3) supervisory forms (a student portfolio, master schedule, and semester task summary). Also attached are presenta-tion summary sheets that can be used as overheads. The software that was used in creating the presenta-tion materials is also described. (CR)

This book includes four papers presented at a conference on teaching science to students with disabilities. The first paper, "Science Education for Motor/Orthopedically-Impaired Students" (E. C. Keller, I.). Season: (J.). Despective for motor/orthopedically-Impaired Students" (E. C. Keller, I.). Season: (J.). Despective for motor/orthopedically-Impaired Students" (E. C. Keller, I.). Keller, Jr.), covers: (1) categories of motor/orthope-dic-impairments, (2) life function assessment, (3) formal and informal science teaching methods and experiences for students with disabilities, and (4) experiences for students with disabilities, and (4) past work on science education for students with disabilities. The second paper, "Science Education for Students with Disabilities: The Visually-Impaired Student in Chemistry" (H. David Wohlers), addresses challenges that students with blindness face, based on personal experience in acquiring a doctoral degree in chemistry and working as a chemistry professor. Challenges include attitude barriers, laboratory safety, access to theoretical and experimental data graphics, and adaptations of computers and lab equipment. The third paper, "Learning Disabilities" (Helenmarie Hofman), discusses: general education settings for students with learning ing Disabilities" (Helenmarie Hofman), discusses: general education settings for students with learning disabilities; science education opportunities for such children; and strategies for teaching students with learning disabilities. The fourth paper, "Science for Deaf Students: Looking into the Next Millennium" (Harry G. Lang), provides recommendations on: 1) teacher training. (2) science materials, (3) scientific societies, (4) professional collaboration, and (5) involvement in national science standards efforts. Critical responses follow each paper. Appendices provide a summary of the recommendations of the conference working groups, a list of conference participants, and conference evaluation information. Each paper contains references. (CR)

This annual report details activities by the New
York State Commission on Quality of Care for the
Mentally Disabled, which oversees the public and
private service system for individuals with mental private service system for individuals with mental disorders. The report notes that during 1994-1995, the Commission's cost-effectiveness studies identified over \$15 million in potential savings, and its fiscal investigations resulted in the criminal conviction of one home administrator, the revocation of a medical lighter than the control of the co medical license, and a judicial ruling enabling the enforcement of a \$7.5 million Medicaid fraud judgenforcement of a \$7.5 million Medicaid fraud judg-ment. Also noted are Commission policy studies on restraint and seclusion in psychiatric facilities, its systematic evaluation of private psychiatric hospi-tals, and its day-to-day oversight activities in re-sponding to complaints and reports of abuse or neglect. The first section of the report describes Commission investigations of psychiatric centers and recommendations on the governance of re-straint and seclusion practices in psychiatric facilistraint and seclusion practices in psychiatric facili-ties. The second section describes the Commission's investigations into program inefficiency and the outcomes of these investigations. The third section provides information on the number of cases the Commission reviewed and the outcomes of selected cases. The fourth section describes actions the Commission took to ensure quality services to children with mental disorders. Commission investigations into facilitated communication are also reviewed as are the Commission's activities in early intervention are the Commission's activities in early intervention programs. The fifth section discusses the Commission's administration of protection and advocacy programs. The final section describes planned activities. The appendices include a list of 1994-95 publications and a list of regional offices. (CR)

This curriculum guide provides units for use in teaching children (ages 6 months through kindergarten) with visual impairments. The emphasis throughout is on experiential learning, development of independence, and language development. The first section includes five chapters which discuss the development of children with different visual abili-

development of children with different visual abili-ties, common educational models, a suggested daily routine and classroom structure, adaptation of cur-riculum materials for children with other disabili-ties, and integration of related and special services such as augmentative communication, Braille read-ing, and orientation and mobility skills. The following section presents 44 instructional units. These units are organized to correspond to the most com-mon progression of preschool and kindergarten themes; most include patterns for craft projects and a sample communication symbol page. Typically provided for each unit is information on its purpose, emphasis on vocabulary/skills/concepts, a schedule of activities, reteaching activities, extension activities, parent activities, and ways to integrate the unit across the curriculum. The 44 units are grouped into across the curriculum. The 44 units are grouped into the following themes: (1) Getting Started; (2) Hallowen; (3) Thankagiving; (4) Winter; (5) Food; (6) Shapes; (7) Springtime; (8) Household; (9) Creative Play; (10) Concepts; and (11) Community. Appendices include suggestions for behavior management, orientation and mobility, and music activities. An accompanying computer disk, not available from EDRS, offers letters to parents, helpful forms, and checklists. (Contains 82 recommended readings.)

Descriptors—Academic Achievement, \*Attention Deficit Disorders, Behavior Problems, \*Clinical Diagnosis, Disability Identification, Elementary Secondary Education, Etiology, "Hyperactivity, Interpersonal Competence, "Intervention, Perfor-mance Factors, Program Effectiveness, Self Esteem, Student Characteristics, Student Evaluation This policy brief describes attention deficit hyper-activity disorder (ADHD) as involving three char-

acteristics: inattention, impulsivity, and hyperactivity. The brief reviews the causes of ADHD, including the belief that it is primarily an inherited, neurobiological disorder. The effects of ADHD on children are discussed and may include: other learning, behavioral, emotional, and developother tearning, octavioral, emotional, and developmental problems; memory and organizational problems; poor self-esteem and poor social adjustment; and school failure. The diagnosis of ADHD is reviewed, including observed neurobiological differences in individuals with ADHD. The multiple methods used to diagnose ADHD are described, of the contract including: (1) interviews with the parents and child; (2) direct observation in various settings; (3) a bat-tery of achievement and psychometric tests; and (4) feedback from parents, teachers, and others about the child's behavior. The brief addresses how ADHD is treated and the determination that a mul-timodal approach is best. Recommendations for schools include: procedures for identifying a student with ADHD should allow enough time to gather adequate information; modifications and accommodations should be made to assist students with ADHD; and interventions need to be proactive and focus on the prevention of negative behavior. This policy brief discusses students with attention deficit hyperactivity disorder (ADHD) and their school performance. Reasons are presented to ex-plain why children with ADHD fail. The three main characteristics of ADHD (inattention, impulsivity, and hyperactivity) and their interference with academic performance are discussed. The brief describes the problems with traditional classroom scribes the problems with traditional classroom practices that make schooling an ordeal for many children with ADHD, including school demands for self-control and self-direction. The belief that many school problems experienced by children with ADHD do not result solely from biological factors but from a mismatch between the child and the environment is reviewed. The report evaluates achools' reprosesse to academic, failure, and schools' responses to academic failure and school-child relationships. A multimodal treatment for ADHD is recommended that includes a combi-nation of academic, behavior, and medical interven-

tions to help children succeed. The brief describes the necessity of the participation of parents, health-care professionals, and school personnel for effective treatment. Types of interventions are ex-plained, including: specific, individual accommodations; behavior management techniques; modification of test delivery; homework tailoring; reduction of class size; and comprehensive changes in the school environment. Questions for policy-makers and educators to ask when evaluating an education program are provided. (Contains 43 references.) (CR)

Assessment
This paper describes a practicum project that involved teaching 14 students (ages 8 through 13) with physical disabilities (cerebral palsy, spina bifida, and muscular dystrophy) to plan, organize, and complete projects and assignments independently. The paper explains the low expectations for the students and the students' lack of experience in plansing and evaluating their work or the work of ning and evaluating their work or the work of others. The interventions used by the teacher are others. The interventions used by the teacher are described. They include: (1) preparing students for working in the mainstream by giving them experience in developing rubrics to help organize and evaluate their work; (2) developing authentic activities designed to engage the students in real-life situations; and (3) giving students the experience and tools necessary for accomplishing projects independent. tools necessary for accompissing projects independently. A review of the literature on alternative assessment, work quality, and rubrics is provided. Among project outcomes reported are the following: an increase in the percentage of completed projects; a decrease in the number of recorded dissented to the projects of the projects o ruptive behavior incidents; and an increase in the positive attitude of students toward completing projects. Appendices include measures used in the practicum and sample rubrics developed. (Contains 13 references.) (CR)

This final poor! describe the exhibities of Posiect.

This final report describes the activities of Project LEEDS (Leadership Education to Empower Disabled Students), a federally supported project designed to create student/staff teams from colleges and universities to encourage undergraduate/graduate students with disabilities to become leaders, through development of self-identity and identity through development of self-identity and identity with one's peer group and learning to work with other individuals and groups. The report states that 178 students (with and without disabilities) and student affairs professionals representing 57 institutions participated in Project LEEDS. The activities and accomplishments of the project are identified. They include: (1) developed a leadership training

curriculum geared to students with disabilities; (2) held two national Institutes on Disability and Leadneid two national institutes on Disability and Lead-ership; (3) co-sponsored three regional conferences on disability and leadership; (4) provided technical assistance to institutions; (5) developed a leadership training manual; (6) provided 285 consultations on disability and leadership; (7) established a listsery to foster communication among Project LEEDS par-ticipants; (8) produced an annotated bibliography of leadership resources relevant to students with dis-abilities; and (9) disseminated information about the abilities; and (9) disseminated information about the project. The report also provides program evaluation material including participants' satisfaction information. The outcomes of the project are highlighted, and a list of recommendations for those replicating the project is included. Appendices include the projects' publications, specific information on the institutes and conferences, articles on Project LEEDS, and evaluation data summaries. (CR)

Descriptors—Cultural Awareness, \*Disabilities, \*Educational Strategies, Individual Development, Leaders, \*Leadership Qualities, \*Leadership Training, Student Empowerment
This paper reviews literature on leadership education, including empowerment of individuals with disabilities. The emphasis in early leadership research was on leadership "traits," reflecting the belief that leaders are born, not made. Subsequently research viewed leadership as the outcome of both situational and personal factors, and their interactions. Leadership actuation the began to assume that leaders are made, and currently focuses on factors that are amenable to development. Leadership training should focus on understanding one's inner abilities and dreams, conceptualizing what leaders actually do, and behavioral modeling. Other issues abilities and dreams, conceptualizing what leaders actually do, and behavioral modeling. Other issues actuary do, and behavioral modeling. Other issues that leadership training should deal with include the importance of understanding the power relations within educational institutions; the differences in institutional cultures and the barriers that student leaders may face; the way institutions view student leaders may race; the way institutions activism and the impact on leadership development; and the efforts of educational institutions to grapple and the efforts of educational institutions to grapple. with diversity, including students with disabilities. The paper concludes that leadership training for people with disabilities should address issues of culpeople with disabilities should address issues of cu-tural identity, to strengthen both the individual with the disability and the disability community. This report discusses the societal oppression of people with disabilitities and the growing awareness of a new group consciousness and an emerging disability culture. It examines social attitudes toward individuals with disabilities; the effects of using a individuals with disabilities; the effects of using a individuals with disabilities; the effects or using a medical model of disability, with its implications for the objectification and control of people with disabilities; the movement of people with disabilities toward a sociopolitical model as members of a distinct minority group; and the values of this emerging culture such as accepting a disability as a source of pride and viewing life with a disability as worth living and celebrating. The functions of a disability culture are presented, including: (1) providing symbols, rituals, and values that serve to strengthen personal and group identity; (2) uniting people with disabilities and experiences, facilitating group action; (3) empowering people with disabilities by providing a variety of ways to inform others about themselves; and (4) inspiring other people with disabilities to self-identify. The paper also discusses the need for greater societal access and for stronger implementation of the Americans with Disabilities Act. (Contains 23 references.) (CR)

This leaflet provides the parents of children with diabetes an overview of education legislation that affects the education of their child. The guide briefly affects the education of their child. The glade briefly explains the Individuals with Disabilities Education Act (IDEA) and Section 504 of the Rehabilitation Act 1973, the rights of the parent or legal guardian of a child with diabetes, such as the right to request that their child be found eligible for special services that their child be found eligible for special services and to have an Individualized Education Program (IEP) or an accommodation plan developed. An inset describes the difference between an I.E.P. and a Section 504 plan. The guide lists the accommodations that a written plan might include allowances for, such as eating whenever or wherever necessary, and being out sick more often than the traditional limit. The suide also notes how to address discriminations of the program of the limit. The guide also notes how to address discrimination through education, negotiation, and litigation. Three relevant organizations are listed. (CR)

Act, Proposed Legislation, Reauthorization Leg-

islation
This prospectus describes the U.S. Department of Education's legislative proposal for the reauthorization of the Individuals with Disabilities Education Act (IDEA), as reflected in two bills: H.R. 1986 and S. 1075. The report outlines the purposes of IDEA and its positive impact. The report then presents six principles of the Department's vision for IDEA: (1) align IDEA with state and local education improvement efforts, (2) improve results for students with ment efforts, (2) improve results for students with disabilities through higher expectations and access to the general curriculum, (3) address individual needs in the least restrictive environment for the student, (4) provide families and teachers with nec-essary knowledge and training to effectively support students' learning, (5) focus on teaching and learnstudents learning, (3) focus on teaching and rearing, and (6) strengthen early intervention to help ensure that every child starts school ready to learn. Specific proposals address the issues of assessment, individualized education programs, state performance goals, student evaluations, eligibility, federal and state funding formulas, record-keeping and parameters are interests tudents compressions. perwork, services for minority students, compre-hensive support programs, the connection between families and schools, and safe and disciplined classrooms. Appendices include information on parents' rights and due process. (Contains 68 references.)

An introduc-

ment of functional daily living skills. An introduc-tory chapter provides an overview of the functional curriculum and offers guidelines for developing in-structional plans for the four units of study which follow. Unit 1 is about self-care skills, including toileting, drinking and eating, dressing, undressing, personal cleanliness, and grooming. Unit 2 offers suggested interventions for gross motor skills in-cluding the use of assistive devices to aid ambulation, walking independently, and skills that enhance recreation and leisure activities. Unit 3 addresses fine motor skills including those involved in dress-ing, leisure time activities, vocational/work activiing, leisure time activities, vocational/work activities, and the operation of simple appliances. Unit 4 considers household management and living skills, such as planning meals, purchasing and preparing food, purchasing and maintaining clothes, and caring for one's living quarters. Each of the units presents general goals of the unit, sample lesson plans, lists of references and suggested readings, and a list of selected materials and resources. Suggested activities are grouped into teacher interventions and family interventions and then organized into four distinct age/grade levels: infant/toddler/preschool; primary: interprediate: and secondary. Attention is primary; intermediate; and secondary. Attention is also paid to the alternative settings in which services are provided. (Each chapter contains references and suggested readings.) (DB)

This second of three manuals providing a func-tional curriculum for students with disabilities focuses on the development of nonverbal and oral communication skills. An introductory chapter provides an overview of the curriculum and offers guidelines for developing instructional plans for the following two units of study. Unit 1 considers the development of nonverbal communication, includ-ing use of common gestures, use of vocal tones to communicate feelings, appropriate responses to fa-cial expressions and gestures, and use of augmenta-tive and alternative means of communication. Unit tive and alternative means of communication. Unit 2, on verbal communication development, covers the motor, auditory, vocal, play, and interactive skills developed during the preverbal stage, the one-word stage, and subsequent stages of linguistic development. The curriculum focuses on acquisi-tion of the necessary oral communication skills within the social context, in the following settings: within the social context, in the following settings, learning, interpersonal interactions, work situations, leisure time pursuits, family participation, commu-nity participation, financial transactions, and travel within the community. Each unit presents general goals, sample lesson plans, and suggested readings, and a list of selected materials and resources. Suggested activities are grouped into teacher interventions and family interventions, and then further specified into four distinct age/grade levels: infant/toddler/preschool; primary; intermediate; and sec-ondary. Each unit contains references. (DB)

This book provides a rationale for, discussion, and extensive examples of curriculum-based assess-ments (CBA) for students with disabilities in the regular classroom, in the context of the collabora-tive consultation model. The model stresses the tive consultation model. The model stresses the need for input from people with diverse expertise to generate creative solutions to mutually defined problems. An introductory chapter considers the factors that make CBA an important alternative to traditional testing practices and identifies the desired outcomes of skill acquisition by the learner and cooperation between special educators and classroom teachers. The following seven chapters then explain the use of CBA in specific subject areas and present examples of CBAs that have expelled. then explain the use of CBA in specific subject areas and present examples of CBAs that have actually been constructed and used in teaching the following subjects: (1) reading skills, (2) written expression, (3) history and social studies, (4) mathematics, (5) science, (6) dictionary skills, and (7) following discience, (6) discionary saints, and (7) ionowing directions and using study skills. An appendix lists basic rules of composition concerning capitalization, punctuation, abbreviations and contractions, italics, and numerals. (Contains 85 references.)

Windows, "National Council on Disability
This report investigates the use of the graphical
user interface (GUI) in computer programs, the
problems it creates for individuals with visual impairments or blindness, and advocacy efforts concerning this issue, which have been targeted
primarily at Microsoft, producer of Windows. The
report highlights the concerns of individuals with
visual impairments that they may lose convisual impairments that the visual impairments that they may lose employment opportunities because of GUI. The report discusses the advocacy of the National Council on Disability (NCD) and the actions that were taken to convince Microsoft to develop a screen reader applications programmer interface, so that screen readers could interpret information being sent to the screen. The report reviews the effectiveness of disability legislation and efforts to use civil rights provisions to prevent sales of Windows 95 by government agencies. The resulting shift in Microsoft's stance on GUI accessibility is noted, including Microsoft's decision to enable independent software vendors to develop third party accessibility aids to allow individuals with blindness to use Windows 95 by way of a screen reader. The role of the NCD in this issue is reviewed, and recommendations are offered for helping individuals with disabilities to benefit from advances in technology as much as others do. (CR)

Security

The National Council on Disability (NCD) held The National Council on Disability (NCD) held a National Summit on Disability Policy on April 27-29, 1996 at which 300 grassroots disability leaders gathered to discuss how to achieve independence in the next decade. Following an analysis of disability demographics and disability rights and culture, disability policy is assessed in 11 areas: policy coordination, civil rights, education, employment, social security and other, income ment, social security and other income maintenance, health insurance and health care, long-term services in the community, technology, housing, transportation, and international issues. Recommendations were made in each policy area. The overarching themes of the recommendations were: (1) existing laws should be enforced; (2) people with disabilities should direct policy when they are affected by the outcome; (3) outreach and awareness campaigns must be launched to educate the public; (4) incentives for the inclusion of people with disabilities must be further developed and imwith disabilities must be further developed and im-plemented; (5) principles of universal design should be universally applied; (6) systems, services, and supports for people with disabilities must be further developed as a part of the mainstream of community life; and (7) accurate data about people with disabili-ties should be regularly collected, analyzed, and re-ported. Appendices include recommendations for the NCD a description of emergins issues and rethe NCD, a description of emerging issues, and re-marks made by Marca Bristo, Chairperson of NCD, and Justin Dart at the national summit. Test Wisseness, Writing Strategies
This book presents an integrative model that
teachers at the middle school and high school levels
can use to encourage performance breakthroughs
for students with learning disabilities and attention
deficit disorders. Chapter I sets the stage by describing how learning difficulties, attention problems, and adolescence challenge students, and gives lems, and adolescence challenge students, and gives an overview of education legislation that affects the education of students with disabilities. Chapters 2 and 3 then present a framework for understanding the instructional process and systems affecting students with learning problems. The roles of various professionals and the components of an integrative approach are explained. Chapter 3 also presents two case studies to contrast the features of productive and unproductive systems. Chapter 4 reviews a systematic problem-solving process for crisis intervention. Chapter 5 presents an overview of assessment issues. Chapter 6 focuses on the individualized eduissues. Chapter 6 focuses on the individualized edu-cation program as a model for effective program planning. Self-management skills for students with learning difficulties and attention problems are eval-uated in Chapter 7. In chapters 8 through 12, infor-mation is provided to help students develop their skills in specific areas, including: reading, listening and note-taking, preparing for and taking tests, academic writing, and homework. Each chapter describes specific strategies teachers can use. Chapter 13 gives examples of performance breakthroughs and ways to foster performance breakthroughs. (Contains over 230 references.) (CR)

Foreign Language Exploratory or Foreign Language Experience (FLEX) programs offer one approach to initiating foreign language instruction for children. One survey reported that 41 percent of United States elementary schools offering language instruction had FLEX programs. Statistics on FLEX programs in middle schools are unavailable. Most FLEX programs aim simply to give students a foundation for foreign language study, and may help students decide which language to study later and boost school system language enrollment. Cultural awareness is often included. Programs offer frequent, regular classes in a short period or short, frequent, regular classes in a short period or short, less regular classes over a longer period, and are

usually not part of a sequence. Courses may be taught by itinerant language teachers or regular classroom teachers. Four broad FLEX program types include general language courses teaching batypes include general language courses teaching basic linguistic concepts, language potpourri or world language study courses sampling different languages, single language offerings with limited introductory exposure, and a combination of general and language potpourri offerings. Four program models include those of the Provo City (Utah) School District, Twin Falls (Idaho) School District 411, Prince George's County School District (Maryland), and Lovett School (Atlanta, Georgia). Information sources and a list of additional resources are pro-vided. Contains six references and eight resources.

A sociolinguistic analysis of English loan words in use in the 1990s in the discourse of young Japanese people is presented. The study drew data from a 1993 survey of undergraduate students at two Osaka (Japan) higher education institutions, one for men and one for women, which asked what loanmen and one for women, which asked what loan-words students used and heard often. The report first discusses the formation and phonetic and se-mantic aspects of the loan words, then analyzes the survey's results. Findings show that the most common loan words students used were nouns, with only a few verbs and adjectives found. Categories and distribution of loan words differed by institu-tion, therefore by gender group. Many coined words are constructed with English. Loan words are generare constructed with English. Loan words are generally adopted even when there is a Japanese equivalent, apparently when there is a need to distinguish between the functions of the English and Japanese words. Many of the adjectives used by males were coined words. Students reported hearing fewer loan words than they reported using, and the largest category that they heard referred to social phenomena. Not many of the loan words commonly found in commercial films, magazines, and books appeared in students' usage. Possible reasons for adoption of loan words are considered briefly. Contains 19 references. (MSE) erences. (MSE)

Identifiers—\*Slang, Word Games
American slang reflects diversity, imagination, self-confidence, and optimism of the American people. Its vitality is due in part to the guarantee of free speech and lack of a national academy of language or of any official attempt to purify American speech, in part to Americans' historic geographic mobility. Such "folksay" includes riddles and conundrums, puns and plays on words, various kinds of jokes, sayings, proverbs, and proverbial similes, folk vo-cabulary and all types of slang, children's rhymes and jingles, word games, tongue twisters, and more. Folk speech is powerful language that can be rude and violent, but more often is playful, humorous, creative, lively, and ever-changing. Activities effec tive in learning American language through folk speech include telling jokes, riddles, and stories or specta ficture terming joxes, radius, and stories or reading them aloud; activities using and discussing proverbe; active and passive vocabulary learning through question-and-answer dialogues; written ex-ercises using new vocabulary; dictionary practice and writing exercises focusing on a word and the environment it's used in; comparison of non-standard grammar or pronunciation; and humor and proverbs memorized, recited, and explained. Using folk speech in teaching is feasible for any group size or level, requires little preparation, and is stimulat-ing and entertaining. (MSE)

Practice Relationship Identifiers—Chomsky (Noam), \*Hymes (Dell) The evolution of the concept of communicative competence (CC) in language learning and teaching is traced since 1966, when D. H. Hymes first discussed it publicly. His concept of CC had its theoretical origins in the convergence of the convergence of the convergence of the convergence and the etherometers. retical origins in the convergence of transformational generative grammar and the eth-nography of communication, and was first discussed at a conference on language development among disadvantaged children with the implication that "sociolinguistic interference" might be more impor-tant for education than dialect differences. Hymes defines competence as capability located in individ-ual persons, and translates Noam Chomsky's concept of underlying shared knowledge as "systemic potential." He distinguished between what is not said because there is no need to say it and what is said because there is no need to say it and what is not said because the individual does not have a way to say it. Competence is viewed as an individual quality, including knowledge of a formal grammati-cal structure and also knowledge of form/function relationships (appropriateness). The issue of defin-ing appropriateness for pedagogical purposes has stimulated discussion, but in keeping with the con-temporary emphasis on the active role of the temporary emphasis on the active role of the learner, a definition focusing on the learner's grasp of language for use is gaining ground. sual Aids

A lesson plan for first-grade children beginning to learn English describes an activity using manipulatives and visual aids to develop recognition of three geometric shapes (circle, square, rectangle), their names, and a few additional words in English (e.g., "bag," "table," "door"). Students are grouped at tables of four to aix and provided with name-marked items of the appropriate shape. When directed by the teacher, students match the shape indicated with the corresponding item on the table, then practice pronunciation of the English word. Subsequently, students are instructed to bring the items to quently, students are instructed to bring the items to a central location, and are encouraged to find other similar shapes within the classroom. ing Instruction Identifiers—Taiwan

A study investigated university students' perceptions of the performance of peer evaluation groups in English-as-a-Foreign-Language (EFL) writing inin English-as-a-Foreign-Language (EFL) writing in-struction, and of their own performance within the group. Subjects were 45 Chinese freshmen in their first semester in the Mass Communications Depart-ment at a Taipei university (Taiwan), with 6 years of English instruction in high school. In groups of three, students responded to each other's first-draft compositions, read aloud by the writer. Communi-cation was at first mostly in Chinese, then increas-ingly in English. In logs, students wrote about their contribution to the group, other members' contribucontribution to the group, other members' contribu-tions, and feelings about the group session. Log con-tents were analyzed for general and specific positive comments on language issues, content, pronuncia-tion, and student participation in the group, and for negative comments on language-related and non-language-related issues. Results indicate that overall, students had a positive perception of how they and their peers performed in peer response sessions. Students had a more negative perception of their own participation than of others'. Grammar, word usees and mechanism of thers'. word usage, and mechanics were primary concerns in the discussions, with content a secondary consideration. Most liked and felt they benefitted from the activities. Pedagogical implications of the findings are discussed, particularly concerning teacher expectations. Contains 32 references. (MSE)

This book reviews pertinent theories about writing in English, English as a Second Language (ESL), and foreign languages for teachers at secondary and postsecondary levels, to provide insight into the teaching and learning processes. Five hypotheses about the nature of foreign language (FL) writing serve as points of departure for analyzing writing, developing classroom approaches, and identifying issues for further exploration: (1) writing competence is aeneral, not language-specific: (2) the FL developing classroom approaches, and identifying issues for further exploration: (1) writing competence is general, not language-specific; (2) the FL writing process differs from the native language writing process; (3) computer-aided writing enhances the FL writing experience; (4) correcting and evaluating FL writing are complex tasks that address the entire writing process; and (5) teaching FL writing is effective at all levels of language study, even the earliest, and should be conducted in all discourse models (narrative, descriptive, expository, argumentative). Case studies are included for illustration. The American Council on the Teaching illustration. The American Council on the Teaching of Foreign Languages (ACTFL) Proficiency Guide-lines are appended, and book contents are indexed. (MSE)

This collection of essays explores the diversity of
contemporary English language use, both spoken
and written, around the world. The first chapters focus on the use of English within various kinds of interpersonal communication, and later chapters at artistic and creative products of English speakers and writers, discussing the kinds of cultural achievement they represent. Some chapters address variation in terms of: accent, dialect, and other social and regional forms; written versus spoken cial and regional forms; written versus spoken forms; and adaptation of language use to serve particular purposes and conform to the conventions of particular kinds of cultural event. Chapters include: "Everyday Talk." (Janet Maybin); "Literacy Practices in English" (Mike Baynham, Maybin); "English at Work." (Neil Mercer); "Rhetoric in English" (Robin Wooffitt); "What Makes English Into Art?" (Lesley Jeffries); "Language Play in English" (Guy Cook); "An English Canon?" (Maybin); and "A Tongue, For Sighing" (Jane Miller). Contains 192 references. Contents are indexed. (MSE)

guage
Essays examine development of the English language from Old English to the present, characterisguage from Old English to the present, characteristics and use of contemporary varieties, and what the language means to speakers around the world. "English Voices" (Joan Swann) raises issues and questions about variation in English, to be addressed in later chapters. "English Manuscripts: The Emergence of a Visual Identity" (David Graddol) traces the visual history of English from early runic engravings to contemporary texts. "The Origins of English" (Dick Leith) provides an outline history of English within England to the Middle Ages. "Modernity and English as a National Language" (Leith, Graddol) examines processes of linguistic standardization since printing began. "English-Colonial to ization since printing began. "English-Colonial to Postcolonial" (Leith) traces the spread of English throughout the world in relation to colonialism. "Variation in English Grammar" (Linda Thomas) examines some grammatical characteristics of English varieties. "Accents of English" (Susan Wright) gish varieties. "Accents of English" (Susan Wright) asks what distinguishes one English accent from another, patterns of variation and change, and social meanings conveyed by accents. "Style Shifting, Codeswitching" (Swann) looks at how individual speakers routinely codeswitch to represent different aspects of their identity. "Good and Bad English" (Donald Mackinnon) examines aspects of diversity and change from a philosophical perspective. Contains 216 references, timeline, phonology chart, and index. (MSE)

"Student Attitudes, Uncommonly Laught Languages
Identifiers—\*Egyptian Languages
A study investigated the beliefs about language
learning held by eight university students enrolled
in a course in Ancient Egyptian (AE), drawing on
results of a larger study of eight languages. The
study identifies priorities in students' general beliefs, describes effects such beliefs may have on their

learning "dead" languages, and suggests beliefs that promote AE acquisition. Subjects were adminispromote AE acquisition. Subjects were admins-tered a Likert-type survey in which they indicated degree of agreement with 47 statements concerning language learning, including language characterissities, control over the curriculum, sense of progress, and concern for individual worth and personal prob-lems. Demographic data were also gathered. Results showed some differences in both demographics and snowed some culterences in both demographics and beliefs between students of AE and those of "living" African languages (n=8 students of Swahili, 9 of Arabic). The findings suggest that differences may exist between students of "living" and "dead" languages, making it possible for institutions, teachers, and instructional developers to create instruction meeting students' needs and goals. Contains 15 references and the survey instrument. (MSE)

A study explored the cognitive processes and social-situational influences underlying students' assessment of their own foreign language proficiency, focusing on process rather than result of self-evalua-The subjects, 28 college student learners of tion. The subjects, 28 college student learners of French at different course levels, were administered a self-assessment questionnaire on the four language skill areas (listening, speaking, reading, writing). Subsequently, two types of verbal report were elicited: a think-aloud protocol and an immediate, semi-structured retrospective interview. Data were analyzed for evidence of: (1) student orientation to the self-assessment task, (2) interpretation of ques-tions and rating scales, (3) possible influence of course level and previous language experience, and (4) students' basic level of comfort in speaking French. Six categories of factors influencing the self-assessment process were identified (question terpretation, language learning background/experi-ence, reference points, questionnaire-completion strategies, level of certainty about answers, self-confidence level). Results show students use a variety of reference points/benchmarks when evaluating their own language abilities, particularly social category, meaningful other, and autobiographical. Peda-gogical implications are discussed briefly. Contains 23 references. (MSE)

An analysis of subject placement in Italian argues that placement is not determined entirely by case.

An analysis of subject placement in Iranin argues that placement is not determined entirely by case, but also partly by interpretational considerations. The crucial step in the argument is that there are independent well-formedness conditions on discourse structures and that the apparent interpretational effects on preposed subjects of unaccusatives in Italian are actually effects that derive from judgments of felicity in discourse. The apparent optionality of syntactic movement is in fact conditioned by an interface constraint that requires each formed discourse representation structure to have a set of corresponding terminal syntactic structures. These considerations interact with a notion of global Economy to derive the correlation between subject placement, optionality, and interpretation. This conclusion actually reinforces rather than threatens the autonomy of syntax. It removes any features from the syntax that have purely interpretational motivation and leaves a simple theory of argument licensing that is purely structural. Contains 23 references. (MSE)

Drawing data from audiotaped lessons with 10 native-speaker English-as-a-Foreign-Language (EFL) teachers and 12 EFL learners of varied linguistic backgrounds, a study explored some of the

(EFL) teachers and 12 EFL learners of varied in-guistic backgrounds, a study explored some of the ways in which classroom talk by learners is col-laboratively built to repair errors, misunderstand-ings, and non-communication. Focus is on both explicit and embedded other-correction, the least preferred form of repair in everyday talk, and the ways in which the recurrent features of repair in everyday conversation between native speakers are everyday conversation between native speakers are everyday conversation between native speakers are used in a different way in the EFL classroom, and how the forms of repair used by teachers reflect the nature and agenda of the teaching activity. A conversational analysis approach is adopted, emphasizing the negotiated nature of repair rather than segmenting conversation for analysis. Repair strategies are shown to impose different costs on the les-

son agenda and the learners. Teacher approaches to son agenda and the learners. Teacher approaches to repair include (1) restraining themselves from other-correction, (2) pursuing repair initiation to increase opportunities for self-repair, and (3) packaging other-correction in a "camouflaged" form, which tones down unmodulated other-correction and removes the focus from the activity of repair. Forms of correction are shown to orient to the pedagogical goal of the type of EFL lesson or activity that entails conscious attention to aspects of the target language. Contains 11 references. "Syllables

A three-tiered statistical model for predicting the temporal structure of French, as produced by a single, highly fluent subject at a fast speech rate, is outlined. The first tier models segmental influences due to phoneme type and contextual interactions between phoneme types. The second tier models syllable-level influences of lexical versus grammatical status of the containing word, presence of schwa, and the position within the word. The third tier models utterance-final lengthening. The output of the complete model correlates with the original corpus of 1204 syllables at an overall r=0.846. However, an examination of subsets of the complete data set revealed considerable variation in the closeness of fit of the model. Residuals have a normal distribution. Contains 33 references. (MSE)

Uncommony laught Languages
The Kalenjin Languages
The Kalenjin group of languages, spoken mainly
in western Kenya, displays a harmony system involving the phonological feature Advanced Tongue
Root ([ATR]). The study reported here addresses
issues of the phonological representation of the
[ATR] in Kalenjin and its phonetic interpretation.
Specifically, it is shown that (1) the harmony system
encompasses the consonant system as well as the
vowel system; (2) [ATR] is best characterized as a
phonological unit that has a syllabic domain; (3)
there are harmony constraints on the constituents of
monomorphemic polysyllables; and (4) the phonetic
exponents of [ATR] harmony provide evidence for
the need to maintain a strict demarcation between
an abstract, relational phonology and interpretive
phonetic exponents. It is argued that a straightforward way of handling the [ATR] harmony system is
in terms of underspecification, and it is proposed
that a formal implementation of the analysis can be
constructed in terms of constraints on structured that a formal implementation of the analysis can be constructed in terms of constraints on structured hierarchies of features that permit partial specifica-tion and structure sharing, combined with a pho-netic interpretation function. Identifiers—Resonance (Physics)
A study investigated the nature of clear and dark
sounds (resonance) in English, focusing on the features associated with the lateral consonant /1/. Subtures associated with the lateral consonant /1/. Subjects were three male undergraduate students and
one male university faculty member, all native
speakers of different English varieties. Each subject
read aloud 27 short phrases or sentences. Using
computerized sound spectrography, resonance patterns (clear or dark), tempo, and duration were analyzed for initial and final /1/. Results support the hypothesis that darker tokens of /1/ have a greater duration than clear tokens. This appears to be the case for individual speakers and also between speakers with different resonance distribution patterns. Contains 22 references. (MSE)

A study describing Finnish phonetics and analyzing prosodic properties is reported. Subjects were two female 17-year-olds, speakers of standard Finnish and well acquainted with each other. Data were drawn from two sources: a conversation between the two, in which one described a picture so the

drawn from two sources: a conversation between the two, in which one described a picture so the other could draw it, and one a set of stories narrated by the informants based on a series of connected pictures. The report first describes phonetically the informants' speech, including consonants with com-plete oral closure, velic opening and oral closure, lateral airflow, tapped and trilled articulations, open approximation, friction with and without voicing,

voicelessness/breathy voice, glottal stop and creaky voice, resonance features, vowels, diphthongs, velic opening and vocalic articulations, variability of vowel quality, voiceless vowels, and quantity and duration. It then outlines a prosodic analysis of six features of inter-word junctions. It is concluded that a phonological statement can be made that takes into consideration phonetic characteristics that are considered irrelevant in most phonologies. Contains 31 references. (MSE)

Evidence is provided that the change

OV to VO is offered, based on an analysis of 16 Old English texts. Evidence is provided that the change does not involve abrupt reanalysis but rather synchronic competition between two grammars, beginning in the Old English period and continuing into Middle English. Background assumptions and terminology are outlined first. The standard analysis of Old English and the change from OV to VO is then described, and three predictions of the standard analysis are presented and shown to be unfulfilled. It is shown that (1) clauses unambiguously derived from a VO grammar are used productively during the Old English period, before the change is supposed to have taken place, (2) clauses unambiguously derived from an OV grammar are used productively during the Middle English period, after the change is supposed to have taken place, and (3) the increase in VO surface word order during the Old English period and the trigger for change at that Old English period and the trigger for change at that period's end can not be linked directly to an inperiod's end can not be inseed directly to an in-creased rate of either postposition rules or verb-sec-ond constraint. The proposed hypothesis of grammatical competition accounting for the word order variation is then presented. Contains 41 refer-ences and an appendix of abbreviations. (MSE)

Identifiers—Chomsky (Noam), \*Questions, \*Wh
Ouestions

**Ouestions** A study of French "wh" questions, particularly questions using "que" and "quoi," looks at conventional syntactic explanations and presents a new analysis. Relevant facts and pertinent claims about these questions are reviewed, the researcher's assumptions about the working of Wh questions are explained, the new analysis is presented, and theoretical implications are discussed. It is concluded that French questions possess a number of peculiarities that have major implications for understanding Wh movement and how it is motivated within cur-Wh movement and how it is motivated within current syntactic theory. A number of revisions to one theory are made to bring it into line with Chomskian theory that checking is a one-way mechanism, helping to explain in part the restrictions on "que" questions widely discussed in the literature on French syntax. A further constraint on the position of "que" is proposed, accounting for the impossibility of "quoi" subject questions. This analysis is seen as supporting, not invalidating, the Minimal Approach. Much earlier controversy surrounding the Chin-ie "ba" construction stems from dissention over whether or not "ba" has any independent semantic content. "Ba" was assumed either to be a purely formal particle whose function was to assign case, or torman particle whose function was to assign case, or to have semantic content translating into thematic content. However, under the hypothesis that ab-stract case does not play a role in Chinese, "ba" can not be a case marker. It is also argued that thematic content can not be assumed. Instead, a second kind of thematic information that plays a role in syntactic description, namely event structure, is hypothesized. It is shown that the affected interpretation of "ha" dependent phrase is the consequence not of a particular thematic role but of the a-role assigned by "ba." Thus the constraints on "ba" are captured and shown to be intrinsically linked. It is concluded that this provides further evidence for a model of syntax in which there is considerable interaction between the syntactic representation and the level of event structure. Early explanations of sound change were often sought in extralinguistic factors such as climate or

the speakers' physiology. More recently, scholars have been reluctant to explain changes this way, but the most widely accepted extralinguistic explana-tion is the substratum theory. Other linguists, nota-bly the Prague group, looked to the linguistic system itself for causes of sound change. Skepticism at ever finding explanations was expressed by generative grammarians. A landmark in this discussion came when R. Lass (1980) suggested that to explain change was to predict it, which is impossible. Subsequently, an approach that looks at both internal and quenty, an approach that fooks at both internal and external factors has gained favor. Four uses of the term "explanation" exist: a general historical one; an approach suggesting the universal nature of sound change; explanation having predictive power; and, most commonly, explanation of specific changes. The fact that language is subject to varia-tion does not explain sound change, but does point to its possible origin. Variants may be idioayncratic to its possible origin. Variants may be thought and not spread, or may find their way into the linguistic system. Language-specific explanations entail other issues. Explanations of sound change can be given as long as it is realized that they merely connect phenomena to their effects. Contains 57 references. (MSE)

Identifiers-African Americans, \*Perfect Verb

An analysis of perfect verb forms in African American Vernacular English (AAVE) looks at the distribution of forms by semantic function and co-occurrence patterns in Samana English and ex-slave recordings. Results suggest that despite the overall rarity of this category in the general realm of past time, the most frequent forms used to mark it ('have" + past participle and bare past participles) are not at all marginal in contexts "licensed" for the present perfect in standard English. Co-occurrence present perfect in standard English. Co-occurrence patterns with temporal distance, adverbs, and conjunctions also mirror those of the present perfect in standard English, while differing from those pro-posed for creoles. This suggests that the form "have" actually functions as a productive marker of perfect in these data. Bare past participles, with the exception of "seen" and "done," are probably the result of "have" deletion since their occurrence is highly restricted to the same perfect context. It is argued that the origins of these perfect forms and their functions must be traced to the original source in Britain, not to the influence of creoles. (MSE)

A study investigated the realization of voicing

contrasts ('breathiness'') in plosive consonants pro-duced by young French adults, particularly as they differ in males and females. Data came from acousdiffer in maies and females. Data came from acous-tic analysis of recordings of nine informants reading lists of monosyllabic words with initial plosive con-sonants in isolation and in the content, "Jean avaid dit..." The six plosive phonemes of French occurred several times before each of three vowels, but only tokens with the vowel /a/ were measured for this purpose. Results show consistent differences between males and females in the closure period of prevoiced stops. Methodological issues raised in this analysis were then examined in light of subsequent research, including measurement of spectral tilt, statistical comparability, and interrater reliability on perceptual experiments. Contains 24 references. (MSE)

Identifiers—"Gerunds
An analysis of the structure and functioning of Modern Greek gerundival constructions is presented. First, it is argued that there are clear differences between gerunds and participles. Issues

ences between gerunds and participles. Issues concerning the temporal interpretation of gerunds are considered, and an account is given that postulates the existence of a covert temporal operator like one used for temporal prepositions in English, whose movement determines the clause with which the gerund will be associated. A theory of adjunc-tion that does not distinguish configurationally between adjunct phrases and specifiers is assumed, to avoid potential violation of the adjunct constraint. An examination of control issues with gerunds concludes that although apparently restricted to ad-joined positions, gerunds can also be arguments, and by virtue of their indefinite nature, permit excep-tional case marking. It is concluded that this evi-dence supports the Definite/Indefinite distinction at the clausal level. Contains 42 references. (MSE)

Descriptors—Age Differences, College Students, Cultural Education, \*English (Second Language), Foreign Countries, Higher Education, High Schools, \*Language Maintenance, \*Language Skills, Listening Comprehension, Secondary School Students, Second Language Learning, Self Esteem, Self Evaluation (Individuals), Speech Skills, \*Study Abroad, Vocabulary Development Identifiers—\*Cultural Reentry, \*Japanese People Two groups of Japanese students, 40 university students (aged 18-25) and 34 high school students (aged 18-15), assessed their own English language skills (listening, speaking, reading, and writing) after having lived in an English-speaking country for at least a year before returning to Japan. This evalua-

having lived in an English-speaking country for a least a year before returning to Japan. This evalua-tion was compared with objective listening test re-sults and teachers' assessments of oral skills. Influence of such variables as age, sex, attitude toward English, English use patterns overseas, length of stay overseas, and time since return from overseas was also examined. Results show the col-lege students felt their skills had deteriorated, and this was confirmed in listening and speaking tests results, particularly the longer the time since return. High school students' results show a correlation be-tween self-assessment and language environment tween self-assessment and language environment after return to Japan. Both groups found their class-room learning about English-speaking cultures most useful and their vocabulary study least useful. Issues in self-evaluation arising from the findings, particu-larly as they relate to age differences, and follow-up support after return from overseas are discussed. Contains 15 references. (MSE)

A study investigated language alternation (LA) between the native language (L1) and second language (L2) in the lessons of four teachers of English as a Second Language in Hong Kong secondary

as a Second Language in Hong Kong secondary schools. Qualitative analysis of classroom discourse revealed that LA is often used as an effective marker of boundaries in discourse and changes in frame. The act of code-switching and direction of switch were both found meaningful, rendering possible the effective communication and negotiation of meaning otherwise difficult to express explicitly. In addition, teachers may use L1 when teaching vocabulary and grammar, and in highly ordered patterns of LA and grammar, and in highly ordered patterns of LA reflecting the teacher's response to conflicting demands: ensuring limited English speakers' comprehension of the teaching points and fulfilling L2 teaching requirements. Findings suggest that the principle of using only L2 in the second language classroom should not be translated into rigid classroom practice that is not sensitive to the needs and constraints of individual classroom situations but constraints of individual classroom situations, but rather that the value of LA in discourse structuring, frame marking, teacher-student negotiation, and vo-cabulary teaching should be recognized. Speaking, Public Policy, School Districts, School Responsibility, Secondary School Students Identifiers—\*Civil Rights Act 1964

This federal policy statement outlines policy on provision of education to limited-English-speaking ool children. First, it describes briefly the dem school children. First, it describes briefly the demographics of this population and the academic difficulties faced by them, and the recent federal initiative for broadened educational opportunity, America 2000: An Education Strategy. Then, relevant requirements of Title VI of the Civil Rights Act of 1964 are summarized, and the Department of Education's Office of Civil Rights (OCR) policy on language minority students is chronicled, beginning with a 1970 memorandum and concluding with 1985 and 1991 statements. The final section discusses two general issues of compliance with Title VI provisions: (1) whether there is a need for the district to provide a special language service pro-VI provisions: (1) whether there is a need for the district to provide a special language service program to meet the educational needs of all language minority students (an alternative program); and (2) whether the district's alternative program is likely be effective in meeting the educational needs of its language minority students. Procedures for school districts to use to ensure that their programs are serving this population effectively, and areas that OCR examines to evaluate program effectiveness are outlined. (MSE)

The future of endangered languages is discussed, drawing on experiences in development of an atlas of language. Issues in the debate over language of language. Issues in the debate over language maintenance are examined, including the emotion-laden concept of ethnicity and relative youth of the concepts of human rights and linguistic geography. The fact that the atlas in question indicates only indigenous language use is also discussed, and carrographic reasons are noted. Description of the process used to create the atlas' first edition exemption. plifies the difficulty of indicating languages with small or widely dispersed populations. The case of Canada is used for illustration of the occasional conflict between synchronic and dischronic perspec-tives in atlas development, including the tives in atlas development, including the French/English situation in Quebec, shrinking indigenous language groups, widely varying population densities and composition, difficulties in gathering accurate and timely information, and extralinguistic factors outside the researcher's expertise or prediction. The case of the Livonian language is offered as an example of an endangered language affected by international politics. Issues in language use prediction are then addressed, including difficulties in monitoring change and creating an adventigation. use premeuon are then addressed, including dim-culties in monitoring change and creating an ade-quate corpus for reference. Criteria for assessing language health are listed, and a brief conti-nent-by-continent survey of languages is outlined. (MSE)

Identifiers—Consensus, Taiwan
Observation of 16 university students of writing in English as a Second Language in Taiwan focused on the nature of interactions during three peer response sessions and one consensus exercise. It examined the kinds of comments made by a writing group in responding to peer writing and the characteristics of the verbal interaction in a consensus exercise. Peer response was used in this context to revise compositions, and consensus exercises to cultivate negotia-tion and critical thinking skills. Analysis of audiotape recordings of the interactions over two months showed that the students tended to restate the ideas in their peers' writing half of the time, and only one-third of the time were able to challenge or make suggestions to others. There were few evaluative statements, suggesting inability or reluctance to critique peers' work. During the consensus exercise, students showed substantial lack of skills needed to negotiate and synthesize ideas. Deficient in critical thinking skills, they were unable to present arguments with support. Contains 25 references. (Au-

Journals, Study Skills, Test Wiseness, Textbooks, Time Management
A study investigated the studying and reading processes of limited-English-speaking Hmong university students, using think-aloud protocols, reading journals, and study skills portfolios. Think-alouds were conducted in four areas: reading a content-area textbook chapter; taking lecture a content-area textbook chapter; taking lecture notes; test studying strategies; and test-taking strat-egies. Reading journal entries focused on student perceptions of the reading strategies they used to increase reading rate and improve comprehension. In the portfolios, the students gathered essays in which they identified their initial learning strategies and reported results of direct application of alterna-tive strategies. Strategies included those for reading textbooks taking lecture notes; time management tive strategies. Strategies included those for reading textbooks, taking lecture notes, time management, test studying, and test taking. It was found that students memorized formulas in mathematics and vocabulary words from textbook glossaries, parroted text in answer to questions, and re-read material repeatedly until they understood it, often hesitating over vocabulary not identical to textbook wording. over vocabulary not identical to textbook wording. In note-taking, students made no margin notes or annotations, focusing on understanding the lecturer. Study was generally done alone, and language prob-lems were frequently a barrier in test-taking. Infor-mation drawn from these sources provided the teacher with valuable information with which to personalize study strategies to be taught. (MSE)

Note—18p.; In: Pragmatics and Language Learning. Monograph Series Volume 6; see FL 024 134. Pub Type— Reports - Evaluative (142) — Speeches/Meeting Papers (150) EDRS Price - MP01/PC01 Plus Postage. Descriptors—"Data Collection, "Discourse Analysis, Language Patterns, "Language Research, Language, Linguistic Theory, "Natural Language Processing, "Pragmatics, "Research Methodology."

A variety of techniques for collecting and analyzing information about the natural use of natural lan-guages is surveyed, emphasizing the importance of recognizing the properties of a research task that make a given technique more or less suitable to it rather than comparing techniques globally and ranking them absolutely. An initial goal is to characterize the sorts of tasks that are involved in research on language use. Language use is viewed as a comon language use. Language use is viewed as a com-plex interplay of: (1) properties of the linguistic sys-tem; (2) properties of the language users; and (3) properties of the society within which a speaker elects to use a particular language on a particular occasion. These factors then determine the kinds of constituers to be select about language use. Advanquestions to be asked about language use. Advan-tages and disadvantages of different sources of language for analysis are considered, including large corpora, audio recordings, and interactive techniques for eliciting language use. It is concluded that in most cases, the best way to test a hypothesis about natural language use is to test it in every relevant way possible. Contains 32 references. (MSE)

Identifiers—\*Turn Taking
A study examined global- and local-allocational
preselection mechanisms for turn-taking in the language classroom, using two corpuses of classroom
discourse illustrating both accuracy- and fluency-based modes of language teaching. It was
found that teacher-directed accuracy work yielded
Initiation-Response-Feedback patterns governed by
local-allocational projection mechanisms for local-allocational projection mechanisms for turn-taking, while the fluency-based work was characterized by global-allocational preselection mechanisms for turn-taking, which allow learners to produce multiple-utterance responses. The two cor-puses of data display typical discourse features that are related to restricting or facilitating learner initiative, single-utterance versus multiple-utterance learner response, and form versus content feedback. It is shown that these typical discourse features may be used as evidence to confirm or invalidate teacher claims about their modes of language teaching. It is suggested that teachers who are aware of theses features may generate and test specific predictions about their interactions with learners. A set of if-then predictions is generated for each corpus. Data excerpts are appended. Contains 27 references. (Author/MSE)

sty, in terms of its locus, cause, and effect. SPA is characteristic of whole-discourse features rather than of lexical items or phrases. The ambiguity is one of social rather than ideational or semantic meaning. It is claimed that SPA arises through an identifiable interaction between two maxims (confluence), in which two maxims enjoin the same speaker behavior. Two examples are discussed. The first, choice of code in intercultural conversation represents a situation where more than one choice of maxim is available; when it is not obvious to the hearer which maxim lies behind that choice, SPA results. The second instance is the choice of second person pronoun (e.g., "tu/vous"), a well-known example of SPA that can also be explained as arising through maxim confluence. A study examined pragmatic routine and indirec-

tion as regularly-used strategies for accomplishing linguistic action that, while conventional, can pose problems for non-native speakers. Two kinds of conventionalities are distinguished: conventionality of means (kinds of semantic structure that have acquired a standard illocutionary force, such as, in English, an ability question functioning as a request), and conventions of form (standardized linguistic formulations associated with a particular illocution). The two types of conventions are each envisioned as a continuum representing degrees of envisioned as a continuum representing degrees of conventionality. Literature relating to each is reviewed. It is argued that on these continua, indirectness is context-sensitive and routine serves to ness is context-sensitive and routine serves to promote fluency. It is concluded that closer atten-tion must be paid to the social context of second language learning and to the learning opportunities provided by different environments of second lan-guage acquisition. A study investigated the linguistic behavior of A study investigated the linguistic behavior of three groups of speakers in reacting to accusatory complaints: (1) native speakers of Italian residing in Italy (SI); (2) native speakers of Canadian English residing in Toronto (CE); and (3) speakers of Italian residing in Toronto, first-generation immigrants, defined as speakers of Italian as a community language (ICL). The resulting description of linguistic and pragmatic behavior of the SI and CE was then used to explain the ICL speakers' possible patterns of divergence from the native norms of Italy, and of divergence from the native norms of Italy, and possible patterns of convergence toward the norms of their adopted country. Speakers' performance was analyzed in terms of positive or negative faccorientation, as well as a number of variables, including social distance and dominance and weak or strong face threat of the complaint. Implications for strong face threat of the complaint. Implications for research on speech act behavior are examined, and new procedures for collecting and analyzing speech act data are suggested, with the goal of understanding the relationship between the preferred or dispered or dispered to the second components of an adjacency pair, and the face-orientation of a given speech community. In studying the role of context in speech act per-

In studying the role of context in speech act per-formance, the tradition has been to use controlled elicitation instruments that allow for manipulation of social dimensions. The assumption is that by con-trolling social context, all respondents will assess social relations very similarly, although little re-search has dealt with the validity of this assumption. The current study explores the relationship between situational and cultural factors in producing requests and in assessing social dimensions in interaction. Data are drawn from a larger study of request performance by native and non-native speakers

English where two measures were used: an open-ended questionnaire that elicited responses according to contextually controlled situations and an assessment questionnaire that triggered the sub-jects' evaluation of social parameters. Results indi-cate that the perception of social dimensions in interaction, and their interrelationship, definitely have a significant role in verbal behavior. Further, a correlation was found between the subjects' as-sessment of social factors and their requesting behavior, such as in the level of directness shown in subjects' request responses. dentifiers—\*Politeness, Requests, \*Zulu
A case is made for a broader approach to the study
of politeness strategies, as has been demanded increasingly by linguists working on non-Western languages. Using data from a role-played dialogue
to the Southern Bannu language. involving a request in the Southern Bantu language Zulu, speakers are first located culturally, then the sequence of vrebal utterances as a whole is dis-cussed and integration of verbal and nonverbal channels of communication is examined. It is con-cluded that status plays a crucial role in negotiating interactions in Zulu, and that posture, gesture, and gaze contribute substantially to marking status. This raises the question of whether, by ignoring nonverbal channels in the consideration of Western politeness strategies, linguists have not inadvertently neglected an important additional dimension of ver-bal interaction. A study compared the topical structure (TS) of Arabic and English in order to determine whether Arab learners of English as a Second Language (ESL) transfer potential differences between Arabic and English in their English writing, or whether they use an altogether different TS indicative of developmental factors. Four sets of data were com-

they use an altogether different TS indicative of developmental factors. Four sets of data were compared directly: Arabic texts; English texts; English essays by Arab ESL learners; and English essays by non-Arab ESL learners. Results show no significant differences between the TS of Arabic, English, and the English writing of Arab subjects. It is then argued that textual features of expository prose may have masked potential differences in the data considered, and that TS analysis alone is not sufficient for explaning the Arab subjects' deficiencies in developing topics. A study investigated the use of negative polarity items (NPIs) in child language, and in particular, how children acquire the restrictions on these items. Data are drawn from studies of NPIs in the spontaneous speech of Dutch- and English-speaking children. Results show the first NPIs to appear in Dutch and English are widely different expressions; one of and English are widely different expressions, one of the first used by Dutch children is a verb, "hoeven," while in English it is a quantifier, "any." However, there are remarkable similarities in the way in which these expressions appear in the children's speech, both correctly and incorrectly. It is argued that these cross-linguistic similarities in NPI use stem from the development of negation, which interrelates with the acquisition of NPIs. Contains 17 references. (Author/MSE)

\*Teacher Supervision
A discussion of the use of portfolios for teacher evaluation reviews common uses of portfolios in higher education and offers suggestions for portfolio construction. It is noted that portfolios are frequently used for evaluation of both learner and teacher performance, as a means of documenting an individual's capabilities and skills. Some applications include: student and professional use of collections of work in the fine structure of the first part of the first performance of the first p tions of work in the fine arts; student use to document learning in subject areas at all educational levels and in teacher education; as a means of assessment, in lieu of traditional comprehensive examinament, in lieu of traditional comprehensive examina-tions, at the end of a master's degree program; for assessment of language majors' accomplishment of specific educational objectives; and as an alternative to conventional supervision of teachers. When used by teachers, portfolios promote reflective thinking on teaching practice. Despite initial skepticism, teachers and administrators often find them useful. Use of mentors is strongly recommended to suide Use of mentors is strongly recommended to guide teachers in portfolio construction. Other desirable teachers in portfolio construction. Other desirable factors include administrative support, collaboration among teachers experienced with portfolios, teacher workshops in their use, communication, availability of a variety of examples of portfolio types, implementation without pressure, and clearly defined guidelines. Six steps in portfolio construction and use are outlined. (MSE)

guage Instruction, \*Second Languages, \*Socio-cultural Patterns
The relationship between language and culture is examined briefly, and instructional approaches to developing cultural awareness in language students, particularly Chinese students of English as a Second Language (ESL), are discussed. It is noted that ef-fective cross-cultural communication requires an understanding of culture's role in governing appro-priate language use, and that cultural errors can have more serious results than linguistic ones. Cul-tural knowledge affects listening comprehension, oral production, reading, and the accuracy of trans-lation. Major causes of cultural errors are inade-quate knowledge of and insufficient exposure to the quate knowledge of and insufficient exposure to the target culture, and lack of comparative studies of cultures, and cultural awareness must be made a cultures, and cultural awareness must be made a goal of the language curriculum and testing. While traditional second language instructional materials focused on grammar and other linguistic elements, a more culture-based approach to their construction is needed, particularly one reflecting contemporary social and language changes and social language usage. Teachers can promote cultural awareness through cultural comparison explanation of cultural age. Teachers can promote cultural awareness through cultural comparison, explanation of cultural context for language use, incorporation of cultural topics, visual aids, and use of cultural readings. Teacher familiarity with the target culture is also recommended. (MSE)

Usage, Second Language Instruction, \*Vocabulary Development Identifiers—\*Cognates

A discussion of cognates in second language teaching, particularly in English as a Second Language (ESL), looks at reasons and methods for teaching both true and false cognates (friends)". A definition of cognates is offered, and a distinction is made between a cognate and a borrowed word, with examples from several languages. Textbooks' treat-ment of cognates is examined, and some problems arising from overemphasis on use of true cognates are noted, including potential for stilted language use and the danger of adopting false cognates. It is recommended that the teaching of false cognates be included in ESL instruction, to promote vocabula development. Techniques include the teacher's development and incorporation into instruction of a collection of false cognates, using standard language exercises and games for identifying false cognates. Examples are offered. Contains six references. (MSE)

Evaluation of teacher Promotion
A discussion of teacher evaluation offers a defini-

A discussion of teacher evaluation offers a defini-tion and rationale, and explains a few of its traditional forms. Common uses of teacher evaluation for personnel management, accountability, and im-provement of teaching are described, and a distinction is made between formative and summative types of evaluation. Teacher evaluation, often based on observation with little discussion, and student ratings, often provided in the last few minutes of a class, may both gather useful information but may be more useful when combined. Tension between teachers and administration may also affect evaluation, sometimes alienating one or both parties. Tra-ditional methods of teacher evaluation include classroom observation, peer observation, self-evalu-ation, and student ratings. The last of these has grown in popularity, but can be abused and have potential for bias or inadequacy. Increasingly, port-folios are used to document teaching skills and strengths, use of materials, professional growth, and reflections on teaching. It is concluded that no single method is adequate to evaluate a teacher, and that a holistic method is needed. Contains 15 reference. (MSE)

This description of the policy framework for Oregon's distance education program gives an overview of the progress to date, outlines five areas in which policy must be developed, and identifies a number of priorities among those areas. Progress is reported in the following areas: several initiatives that incorporate new telecommunications and computing technologies into teaching and learning off-campus; development of 237 distance courses for 1995-96; and, in the Portland area, direct broadcasting of courses into high-technology businesses. Extra at-tention is recommended for the following five major tention is recommended for the following five major areas: (1) planning, quality, and program/courses (statewide inter-sector plan for distance education, local and regional needs assessments, resource shar-ing, quality assurance, articulation); (2) student ser-vices (access to and efficiency of services provided off campus); (3) faculty issues (incentives and reoff campus); (3) faculty issues (incentives and re-wards for participation, training opportunities, intel-lectual property considerations, copyrights); (4) tuition/fees and student enrollments (comparable fees for distance and traditional-delivery education, extra funding to support off-campus delivery, fund-ing establishment of distance education infrastruc-ture, registration); and (5) technical standards (consistent and compatible technologies, services, and procedures across the state). Priorities are iden-tified from among these task areas. A list of contribtified from among these task areas. A list of contrib-utors is appended. (MSE)

The source document is intended to inform college and university faculty and administrators about the kinds of accelerated courses and programs cur-rently offered in the United States and Canada. Data were drawn primarily from a survey of 424 schools, 217 of which were using accelerated courses and programs at the time. Contents of the document include: an overview of survey results and the questionnaire used; an introduction to the philosophy and strategy of accelerated courses; a reprint of "Teaching on Weekends" (James R. East), an overview of weekend courses; notes on the East), an overview or weezend courses, notes on the history, development, and implementation of accel-erated courses at Pima Community College (Ari-zona); a general discussion of survey responses, zona); a general discussion of survey responses, including comments on the advantages and disad-vantages of accelerated courses and learning; a di-rectory of two- and four-year accredited postsecondary institutions offering accelerated courses; a comparison of student outcomes in two similar courses, one taught in the accelerated mode over two consecutive weekends and one taught traditionally over 16 weeks; statistical analysis of the survey data; a review of recent literature on accelerated courses, programs, and learning; and a geo-graphic listing of the two- and four-year schools selected for the survey. The report provides an update on racial and ethnic distribution in student enrollment and faculty employment for 1995-96 within the Oregon state system of higher education. A Faculty Diversity Initiative is highlighted, focusing on campus efforts to implement plans to achieve greater faculty diversity with the use of supplemental funds. Of the total student enrollment, minority groups represented 11.5 percent in 1995, compared to 12.0 percent in 1994. Hispanic enrollment has increased most since 1981; Asian Americans graduate study enrollment declined slightly, while the number of Asian American undergraduates increased by 15 percent. Eurocan undergraduates increased by 15 percent. Euro-pean American enrollments declined 15 percent, although non-resident enrollment increased in this group. First-time resident freshman enrollment shows a 104 percent increase in minority groups. Hispanic non-resident first-time enrollment grew by 242 percent. It is recommended that policy be reviewed in light of these changes, that procedures for assessing impact of recruitment and retention be established, including an external review process. Among faculty, currently 7.6 percent are minorities, most Asian American (4.2 percent) and Hispanic (2.2 percent). African Americans and American Indians continue to be underrepresented. Highest minority group representation is among assistant professors (13.6 percent). Most of the increases in minority faculty are attributed to the Faculty Diversity Initiative. Attachments include tables that show student enrollment data, full-time instructional faculty data, and faculty diversity initiatives. (MSE) First-time resident freshman enrollment

ulty data, and faculty diversity initiatives. (MSE)

Identifiers—Michigan State University
A study investigated the job placement success of
Michigan State University students using the campus career services and placement office in obtaining a job. Data were drawn from office records and
a survey of 445 graduates in 1991-92 who requested and were granted an on-campus employer interview. In that year, the 2,685 students (35 percent of graduates) requesting on-campus employer interviews averaged 14 interview requests per student. Engineering students had the highest request and interview rate. Second interviews or plant visits were afforded to 63 percent of students interviewing on-campus. Business students had the highest success rate at this stage. Of students interviewed on cess rate at this stage. Of students interviewed or campus, 44 percent received a job offer, represent-ing 14 percent of the graduating class. Business, engineering, and communication majors had the highest job offer rates. It took an average of four on-campus interviews to obtain a second interview or plant visit, and two plant visits/second interviews to obtain a job offer. Invited on-campus interviews reduced, by nearly half, the effort required to obtain a job offer. Students invited by companies to interview were more likely to be women and to have higher grade point averages than those not invited. Students who did not receive job offers through Career Services and Placement used two job search methods to find employment: mailing resumes to and contacting employers, and responding to news-paper classifieds. These methods were rated as "not very helpful" in finding employment opportunities. (Author/MSE)

University 1 N
In higher education, there is an increasing emphasis on development of discipline-specific pedagogical knowledge among faculty, whose central precept is the interconnectedness of content and teaching method. Some college and university faculty devel-opment centers have begun providing services in this area. The University of Washington's Center for Instructional Development and Research assigns in-structional consultants to discipline-related quality structional consultants to discipline-related quality management teams to facilitate individual and group faculty development efforts within the discipline's distinctive culture. The University of Oregon's Teaching Effectiveness Program provides individualized services to faculty members based on specific teaching needs, and is linked to departments through designated faculty contacts. At Vandebil I Lieuwerite, Creanesco, it he Center for ments infough designated aculty contacts. At vaniderbilt University (Tennessee), the Center for Teaching facilitates faculty mentoring of novice teachers, particularly graduate teaching assistants, in discipline clusters problem-solving, lab science, social sciences, humanities, religion). Successful programs assess and respond to the discipline-specific teaching concerns of faculty. Research programs on teaching within the discipline are also needed (MSE)

is reviewedd, focusing on five delivery strategies: (1) workshops; (2) instructional consulta-tion; (3) grants for instructional improvement; (4) colleague collaboration; and (5) print resources. In each case, the strategy is described, its effectiveness in improving instruction is assessed, and some specific issues and considerations are briefly discussed. It is concluded that while there is not adequate research on outcomes of any of the five intervention types, there are some indications of the probable types, there are some indications of the probability of the ceffectiveness of each. Results suggest that instructional consultation is very effective, workshops somewhat effective, and the remaining strategies may be effective but lack adequate research. It is suggested that faculty and administrators can help change this situation by examining campus use of and assumptions about traditional instructional development activities, funding evaluations of instructional development interventions, requesting assistance of faculty development offices, rewarding faculty for participation in instructional develop-ment programs, publishing success stories, and pioneering innovative interventions. Identifiers—Age Discrimination in Employment
Act Amend 1986, National Research Council
Until the beginning of 1994, federal law permitted
mandatory retirement of tenured faculty at age 70.
The Committee on Mandatory Retirement in
Higher Education, formed by the National Research Council, was charged by Congress to examine potential effects on colleges, universities, and ine potential effects on colleges, universities, and faculty members of ending the exemption for ten-ured faculty under the Age Discrimination in Employment Act. The committee concluded that at most colleges, few faculty would work beyond age 70 but that a proportion at research institutions would continue, and that pension design could help institutions cope with this situation. The committee strongly recommended that institutions consider re-designing pension plans, institute a range of in-come replacement ratios and benefits related to service, and address the issues of benefit portability and normal retirement age. The committee stressed the importance of maintaining the purchasing

power of retirement income, possible through a variety of annuity payment methods such as graded payment and variable annuity accounts. In response to administrator concerns about rising costs, placing limits on benefits was proposed. Voluntary retirement incentives that reduce overstaffing, control costs, and offer flexibility for partial or phased retirement were suggested. The role of health insurance availability and cost in retirement decisions was also considered, and institutional assistance to feather in place in the control of faculty in planning retirement and maintaining links with the academic community were recommended. Security

The baby boom generation faces added uncertainty on their investments and perhaps lower realized rates of return on all components of their retirement savings, primarily because of their large number. Effects will be felt in the Social Security system and by pension plans and private investors. Individuals, employers, pension fund managers, and Individuals, employers, pension fund managers, and public policy makers should consider these factors in planning now. Policy makers should consider easing the regulations limiting pension contributions, structure Social Security more viably, and inform the public about the advantages of saving. Employers with defined benefit plans should examine their programs' funding status and assumptions about future return rates on assets. Employers sponsoring defined contribution plans should examine the ade-quacy of their contribution rates and those of employees. All tax-preferred savings opportunities that the government allows should be made available by employers. Individual baby boomers must become better informed about the uncertainties ahead, preferably increasing savings and diversifying investments. (MSE)

Identifiers—Employee Retirement Income Security
Act, \*Retirement Planning, \*Savings
Following the passage of the Employee Retirement Income Security Act of 1974 and the increased regulatory burden placed on defined benefit
pension plans, the less complex fully funded defined
contribution plan emerged as a more attractive and
increasingly popular alternative. Traditionally the
standard approach to pensions in the educational
community, defined contribution plans are now
growing in other sectors. They give individuals an community, detrined contribution plans are now growing in other sectors. They give individuals an active role in investment of plan contributions, since responsibility for investment decisions rests with in-dividual participants. Personal financial responsibility also extends to arrangements for supplemental annuity support and additional personal savings.

Good decisions depend on relevant and reliable information. Current consumption needs and future savings needs often conflict. Individuals may erect barriers to savings that make it difficult to achieve adequate retirement security. Service providers, employers, and individuals can work together to understand the barriers better and devise ways to overcome them. Vested-interest theory can be particularly useful in helping communicators convince people to translate their high regard for future retirement security into actions to achieve it. (MSE)

Identifiers—\*Longevity
A study in 1987-92 assessed the effects of changes in life course on work and careers. Interviews with 150 individuals who remained active or continued 130 individuals who remained active or continued to work beyond age 65 showed lifetimes differing greatly from the traditional model. The combination of longer lifetimes and postponement of old age has created a new stage in adult life, a second middle age, and new opportunities. Almost half the group became their period of greater creativity and produce. began their period of greatest creativity and productivity at about age 50. Some had three or more career peaks, at about 15-year intervals; others experienced a steady upward progression. None expected such a creative period at this age, but remained active because they enjoyed it. There was no single pattern to finding the most satisfying work; some began early in life and some much later. The study concluded that the urge to develop one's abilities is fundamentally biological, with a number of distinct patterns. This longevity revolution has re-vealed powerful contradictions in American attitudes about aging. In higher education the impact may be greater faculty persistence, or use of tradimay be greater latenty personal interests. Fac-uity longevity may come to be regarded as an asset. Continued faculty affiliation with an institution af-ter retirement is recommended. (MSE)

The graded payment method of receiving traditional annuity benefits was introduced by the Teachers Insurance and Annuity Association (TIAA) in 1982 to introduce an inflation-fighting factor into the annuity program. Under the graded method, in contrast to the standard method, a part of current annuity dividend income is withheld each year to increase annuity income for the following year. The starting income is smaller, but the method has a superior capacity for growth and for maintenance of purchasing power, as reflected in the Con-sumer Price Index (CPI). Comparative data on the annuity payments under the two methods, assuming retirement in 1970, 1975, 1980, 1985, and 1990, are charted. The increasing ratio of graded to standard payments is indicated in each case. (MSE)

Identifiers-Bern Sex Role Inventory, Study of Val-

ues
A study of 66 female and 56 male nurses employed in central Florida investigated the relationship between nursing experience and sex-role orientation and values. Nursing experience and degrees were similarly distributed across genders in the sample of nurses. The Bem Sex Role Inventory, a checklist of stereotypically feminine and masculine adjectives, and the Study of Values, an inventory of interest in and valuing of six areas (theoretical, economic, aesthetic, social, political. (theoretical, economic, aesthetic, social, political, religious) were administered to each subject. Rereligious) were administered to each subject. Results indicated the male nurses scored significantly higher on Bem masculine items than the female nurses, and the female nurses scored higher on Bem feminine items than the men. Males were distributed across sex-role categories in about the same proportions as females. More female nurses were cross-typed than males. On the Study of Values, males scored slightly higher than females on economic and political values and slightly lower on social and religious values, just as non-nurse adult males do. Further analysis of the data for influence of career progression and specialty and comparison with another, similar study supported the finding of a lack of stereotypically feminine traits in male nurses. Implications for nursing student recruitment are considered. Contains 15 references. (MSE)

Identifiers—African Americans, \*People of Color,
\*University of Minnesota Minneapolis

This paper summarizes a research study on women in three programs designed to recruit, retain, and graduate persons of color at the University of Minnesota. The literature on mentoring is reviewed in terms of social integration, academic inte-gration, a supportive institutional climate, and quality mentoring. The study used qualitative case study methodology in interviews with students, fac-ulty mentors, and administrators in the three mentoring programs, two of which (biological sciences and business administration) had limited minority participation and one (education) with relatively greater minority student and faculty representation. American Indian students were the focus of the program within the graduate school of business administration; all minorities and females within an intensive summer undergraduate workshop in bio-logical sciences; and African Americans within the graduate program in education. Interviews examined how students, faculty, and administrators perceived the mentoring process, the climate at the University for persons of color, and how mentoring enriched students' experiences. Specific recommendations are offered to the regents; to the University president; to the vice presidents/administrators, deans, and departments; to the graduate school; to the faculty; and to graduate students. This document contains focus statements, priori-This document contains focus statements, priorities statements, and lists of priority actions planned in the 1996 fiscal year and of projected actions planned for the next 1-year to 5-year periods from each of 12 public universities in Illinois. Focus statements are brief and typically address the type of student population served, the type of campus, and major areas in which degrees are offered. Priorities major areas in which degrees are offered. Priorities statements are longer and usually identify such goals as improvement of educational quality, recruitment of highly qualified and diverse faculty and students, technological advancement, and research and development initiatives. Some priorities statements also identify specific actions related to priority areas with resincted dates for their transfer of their statements. ments also identify specific actions related to priority areas with projected dates for their accomplishment. Included are submissions from: (1) Chicago State University; (2) Eastern Illinois University; (3) Governors State University; (4) Illinois State University; (5) Northeastern Illinois University; (6) Northern Illinois University; (7) Western Illinois University at Carbondale; (9) Southern Illinois University at Edwardsville; (10) University of Illinois at University at Edwardsville; (10) University of Illinois at University at (11) University of Illinois at Urbana-Champaign. This booklet is intended to help high school students approaching graduation identify sources of fi-nancial assistance for postsecondary education. A question-and-answer format is used in the 10 sec-tions which address the following topics: (1) general information (what is available from the Department of Education, criteria for applying, how to apply); (2) telephone numbers (sources of assistance in filing out applications for financial aid); (3) Federal Pell Grants (how much one can receive, how the grants are paid; (4) loans for students (how to apply for a Stafford Loan, how the funds are provided, interest accumulation, financial limits, repayment procedures); (5) loans for parents (application pro-cedures, criteria, financial limits to the loans, who receives the funds, interest rate, repayment procedures); (6) common loan questions (charges other than interest, repayment schedules, cancellations); (7) campus-based aid (Federal Supplemental Educational Opportunity Grants, Federal Work-Study, Federal Perkins Loans); and (8) general questions (how to avoid borrowing too much, what to do next). This paper reviews the literature pertaining to Total Quality Management (TQM) and its application in educational settings, especially at institutions of higher education. The review is organized into the higher education. The review is organized into the following topical areas: the concept of "quality" (usually involving customer satisfaction, executive-level leadership, and employee involvement); TQM philosophy (including use of cross-functional teams), the Baldridge Educational Pilot Program (with 11 criteria for quality education programs); the Muhlenberg College Project (which has been applying TQM to every facet of campus life since 1992); elementary and secondary school renewal; school severnance renewal; vocational school reschool governance renewal; vocational school re-newal (at the George Westinghouse Vocational & Technical High School in New York City); college/university business curriculum renewal (with applications in eight areas of the business curriculum); and TQM in the university. The following implications of TQM for higher education are presimplications of 1QM for higher education are presented as recommendations: (1) clearly define the concept of quality; (2) recognize the four interlocking assumptions of TQM (quality, people, organizations, and the role of senior management); (3) develop and use cross-functional teams; (4) develop and use a conceptual framework; (5) emphasize ex-ecutive leadership; and (6) have schools of business lead the way in curriculum improvement. Hermeneutics is the study of interpretation as a

Hermeneutics is the study of interpretation as a fundamental human experience and activity. It is also the interpretation of meaning, the realization that human expression contains a meaningful com-ponent which must be recognized as such and transposed into one's own system of values and meanings. It describes what seems to happen in conversation, discussion, reading, and writing, all of the versation, discussion, reading, and writing, all of the activities that teachers participate in, foster, encourage, and assign. Hermeneutics can be used to confront misunderstanding, prejudice, and ideology, and help individuals to step outside their assumptions and examine what they or others know. In hermeneutics the exemplary practice is the conversation, the confrontation with another's thought with the possibility of thus going beyond the limits of one's present horizons. The paper uses examples from college literature classes and concludes that teachers can help use concepts of hermeneutics to create the environment for conversational learning. create the environment for conversational learning. This report discusses the increase in college tuition and related fees at 4-year public colleges and

universities from school year 1980-81 through 1994-95 and schools' expenditures over the same period. The report also discusses variations in tui-tion charges among states, factors contributing to increased school expenditures, and initiatives un-dertaken to help lower student costs. Principal findings include: (1) tuition during this period increased 234 percent whereas median household incomes have risen 82 percent and the Consumer Price Index 74 percent; (2) the two factors most responsible for tuition increases were the rise in schools' expenditures and schools' greater dependency on tuition as a revenue source; (3) schools' expenditures increased 121 percent over this period; (4) the share of schools' revenue provided by tuition rose from 16 to 23 percent and the share of revenue provided by state appropriations declined by 14 percentage points; and (5) states average tuition charges for in-state students varied from a low of \$1,524 to a high of \$5,521 in 1994-95. Colleges have undertaken a variety of initiatives to deal with students increasing financial burdens including holding down increasing iman-random deviation increasing down tuition increases, making paying for college easier, and streamlining students' progress to graduation. Under the Master Plan of 1960, California was the first state to provide universal access to higher edu-cation for all high school graduates. Despite great success at all levels, higher education in California is now facing a crisis. National and state-wide recessions have reduced resources while potential enroll-ment is sharply increasing from three sources: first, "tidal wave II" as the grandchildren of World War II veterans reach college-age; second, the increasing number of adults entering or returning to college; and, third, increasing minority group participation. Demand continues to increase, resources continue bemand continues to increase, resources continues to decline, and the per student cost is still rising. A response to the immediate needs is not enough, a new Master Plan is needed. As the Plan of 1960 looked ahead to 1975, a new Resource Master Plan must be developed now for the future. Issues to be addressed include: (1) the highest priorities for higher education; (2) the best mechanisms for implementation; (3) greater access to state resources; (4) more effective use of student time; (5) fairer competition for higher education in obtaining state resources, and more control by the governor and legislature over all state expenditures; (6) redistribution of resources among segments; (7) better use of resources within segments, under leadership by the segments; and (8) careful study of new facilities. This report identifies and discusses some key findings of a data base project that analyzed public fi-nance of public education over 35 years in California. It seeks to understand the relationship Detween state policy, as expressed in the Master Plan for Higher Education, and financial support of higher education. Among findings highlighted are the following: the share of state appropriations for the state institutions are similar in 1990 as in 1960; state funding per student kept pace with funding in other states but increased substantially when compared with other sectors of the economy; enrollment levels have been decoupled from funding; faculty salaries lag behind those at comparable insti-tutions; and student fees have increased at very high rates. Unlike earlier crises in public higher educa-tion finance, the crisis of the 1990's appears not to be cyclical and it is not likely that an economic be cyclical and it is not likely that an economic recovery will relieve pressure on state and higher education budgets. Facing continuing fiscal strin-gency, a new world economy, rapidly changing technologies, and a larger and more diverse popula-tion, the state must reestablish the link between the budget and new policies but new policies must be addressed first. This report presents data on the student composition.

This report presents data on the student composi-tion of California higher education in graphs and text. The information focuses on the period from text. The information focuses on the period from 1989 to 1993 though trends going back to 1980 are also displayed. The data are from a variety of sources including the Educational Testing Service, the California Postsecondary Education Commission, the California Department of Education, the California Student Aid Commission, and the College Board. The information is organized into five sections which cover: (1) eligibility for higher edu-cation; (2) first-time freshmen; (3) undergraduates cation; (2) tirst-time freshmen; (3) undergraduates in California higher education; (4) financial profile of undergraduates; and (5) student outcomes. Among highlights shown by the data are the following: while the number of eligible high school students increased from 1989 to 1993, the number of dents increased from 1989 to 1993, the number of first-time freshmen decreased; the decrease was greatest at the California State University while the California Community Colleges continued to ac-count for the majority of high school graduates con-tinuing on to higher education; during this period, the amount and distribution of student financial aid changed dramatically as more students received both grants and loans, the number of students re-ceiving need-based aid increased, and the amount of loaned to each student rose; students took an average of 5 years to graduate; and 2 of every 5 California freshmen did graduate. Supporting tables of data are appended. (JLS)

This paper provides recent information concerning policies in other states relevant to California's efforts to direct undergraduate students toward in-state private colleges and universities or out-of-state institutions, thus relieving the enrollment burden on the state's publicly supported institu-tions. The primary database for the analysis is a data file compiled in 1995 on 60 programs in 28 states that provide financial assistance to private colleges and universities or their students. Half the states have one or more programs that provide state funds directly to independent colleges and universities. Programs in Washington, Virginia, Florida, and Ari-zona for upper division students are highlighted and the provision of just over \$1 billion in need-based state grant aid to undergraduates attending private institutions within their home states in 1994-95 is noted. The 500,000 additional qualified undergrad-uates predicted by the year 2005, combined with severely constrained financial resources, suggests the need for California to better utilize the 100 plus endent institutions in the state. A program of need-based grants to California undergraduates at-tending independent institutions in addition to the Cal Grant program which currently provides grants to students in both public and private institutions is suggested. This report describes and analyses state support for higher education in fiscal year 1996. The report provides an analysis of funding trends nationwide; a national map showing percentages of 2-year gains for all states; a table showing appropriations amounts by state for the most recent 3 years as well as percentage changes; a table showing state tax appropriations per capita and per \$1,000 of personal income, local tax appropriations, and national rankings; and individual state tables showing total state ings; and individual state tables showing total state tax appropriations for higher education. The report finds that growth of the national economy has favored state budgets. For the third year, state funding grew with an increase of \$1.4 billion in state support in fiscal year 1996. The total amount of state support for higher education now exceeds \$44 billion. Regionally, there was a north-south split, with northern states outpaced by gains made by southern states. Increasing tuition continues to be a concern sinstitutions use this as a means to moderate the as institutions use this as a means to moderate the impact of declining state support from earlier in the decade. Identifiers-\*Canada Canadian university infrastructures have eroded as seen in aging equipment, deteriorating facilities, and fewer skilled personnel to maintain and operate research equipment. Research infrastructure inresearch equipment. Research intrastructure in-cludes administrative overhead, facilities and equip-ment, and research personnel including faculty, technicians, and students. The biggest erosion of infrastructure has occurred in professional time. As universities have reduced the size of their work force, professors spend more time on clerical tasks and teaching loads have also increased. Deferred maintenance of existing facilities is common and the costs of new equipment and facilities have increased. The average equipment cost for a new ulty member in the natural sciences is \$300,000 with similar costs in other disciplines. As funds are further reduced, there will be less time to provide the individual attention needed for a genuine research experience for undergraduate students. Fu-ture generations of researchers are also part of the infrastructure. Unless that element represented by undergraduates, graduate students, and post-doctoral fellows is maintained now, the future capacity to undertake research in universities will be com promised. The greatest threat to the research infrastructure is represented by restructuring occurring in the face of reduced financial support. (JLS)

Identifiers-\*Florida

This paper discusses the implications of the enact-ment of legislation in Florida in 1995 mandating the ment of legislation in Florida in 1995 mandating the standardization of requirements for baccalaureate degree programs within the state university system. The paper also describes the tools and methodology created by that state's university system for address-ing the tasks of implementing the new requirements. These requirements mandate that all baccalaureate degree programs be reduced to 120 credit hours, that general education requirements be reduced at all state institutions to 36 hours, and that common all state institutions to 36 hours, and that common degree program prerequisites be standardized, of fered, and accepted by all of Florida's 9 public universities and 28 community colleges within 1 calendar year of enactment. A consequence of the new law is that course offerings, which may differ among state institutions, must be acceptable to all institutions with respect to transferability. This reduction in coursewerk and a pending tuition reinstitutions with respect to transferability. This reduction in coursework and a pending tuition surcharge on hours taken beyond the degree requirements has met with generally negative assessments from students. The ultimate outcome of these changes is presently unclear. Appendices provide an inventory of bachelor's degree programs by credit hours to degree and a list of work templates for standardizing prerequisites. (CK)

This report presents selected findings from the 
1993/94 Baccalaureate and Beyond Longitudinal 
Study First Followup survey. The report found that 
only 36 percent of 1992-93 bachelor's degree recipients completed their degree within 4 years of beginonly 36 percent of 1992-93 bachelor's degree recipients completed their degree within 4 years of beginning postsecondary education. Students who delayed their entry into postsecondary education took longer to complete their degree, as did those who began postsecondary education at a less-than-4-year institution. The first section presents a than-a-year institution. The first section presents a brief profile of the study's nationally representative sample of 10,080 recipients of bachelor's degrees at 648 institutions in 1992-93, including gender and race, age at degree receipt, degree-granting institu-tion, and point of entry into postsecondary educa-tion. The second section presents an analysis of the amount of time taken to complete the degree and includes such data as sample definition and outcome includes such data as sample definition and outcome measures, timing of entry into postsecondary education, time between high school graduation and bachelor's degree completion, interruptions in enrollment, time between entry into postsecondary education and bachelor's degree completion, gender and race, timing of entry and preparation for col-lege, institutions attended, major field of study, and debt. The compendium provides detailed tables and describes the employment and enrollment experi-ences of this population in the year after graduation. Appended are a glossary of terms and technical notes on the study methodology. (CK)

Programs, State Universities, Tables (Data), \*Undergraduate Study Identifiers—Baseline Statistics, \*California This report investigates whether the state of California can return to the levels of access to higher education envisioned in its Master Plan adopted in education envisioned in its Master Plan adopted in 1960. Chapter I is an introduction which discusses the state's commitment to access, the structure of the educational sector under the Master plan, the effects of the recession of the early 1990s on state finances, and the approach and organization of this report. Chapter 2 focuses on the decrease in the number of students served, the demand for public undergraduate education, and estimation of baseline demand. Chapter 3 discusses the deficit in available demand. Chapter 3 discusses the deficit in available spaces for applicants to state institutions of higher education and labels this gap the "access deficit." The chapter also presents projections of the supply and demand implications of the state's expected and optimistic supply scenarios. Chapter 4 discusses the prospects for closing the access deficit, focusing on economic growth, improved efficiency, higher fees and tuition, and the three-year degree. Chapter 5 presents the conclusion that the state of California will not be able to close the access deficits and must reconsider the relationship between the people of the state and the public education enterprise detailed in the Master Plan. Seven appendices present various modeling scenarios to deal with the problems of supply and demand in public higher education as well as an analysis of total public enrollments. This report presents the results of case studies of
14 institutions of higher education regarding the
challenges presented by the increase in immigration
and the ways in which these institutions respond to
the needs of immigrant students. Chapter 1 dis-

the needs of immigrant students. Chapter 1 disthe needs of immigrant students. Chapter 1 dis-cusses study goals, access to education, student re-tention, and academic achievement. Chapter 2 overviews the higher education context, discusses maintaining a balance between access and academic standards, and notes the lack of data about immi-grant students. Chapter 3 examines strategies in-volved in recruiting immigrants, financial aid, and institutional responsibility and policy. Chapter 4 fo-cuses on academic support and retention, including testing, the faculty respective, language compre-

cuses on academic support and retention, including testing, the faculty perspective, language competency, and cultural barriers. Chapter 5 reviews programs of instruction in English as a second language. Chapter 6 discusses extracurricular programs and support services. Chapter 7 presents the following major findings: (1) immigrants were not a targeted population on the 14 campuses studied; (2) respondents believed that immigrants do better than

native-born students; (3) there was consistent opposition to the introduction of special support pro-grams targeting immigrants; (4) inadequate language skills were reported as the most outstanding problem of immigrants; and (5) eligibility re-quirements for admissions and financial aid were often misunderstood and unevenly implemented. Institutions are urged to focus greater attention on immigrant students. (Contains approximately 100 references.) (CK)

This report summarizes the highlights of a national survey, part of the Cooperative Institutional Research Program, which examined college faculty demographic and biographic information, how faculty members spend their time, how they interact with students, their preferred methods of teaching and examining students, their preceptions of the institutional climate, their primary sources of stress stitutional climate, their primary sources of stress and satisfaction, and community service. The sur-vey obtained responses from 59,933 faculty mem-bers at 384 institutions of higher education broken oers at 384 institutions of nigner coucation process down into 12 different normative groups: all institu-tions, all four-year institutions, public universities, private universities, public four-year colleges, pri-vate four-year colleges (combined and broken down by three subgroupings: nonsectarian, Roman Catho-tics and Processes). by three subgroupings: nonsecturian, koman cambic, and Protestant), and public and private two-year colleges. Results indicate a general trend toward faculty aging and a decrease in earnings; a commitment to being a good teacher and colleague and a declining interest in research; a concern with preparing students for employment and graduate school; a decreasing interest in personally improving society; the experience of "extreme" stress, pos-sibly from greater interaction with students; and an increased commitment to diversity and multiculturalism. Numerous tables present supporting data. Three appendices contain the survey instrument, information about the accuracy of the data, and a list of participating institutions. (CK)

This report summarizes what occurred in Austra-lian education from 1983-89. This compilation of updated information is designed for use by U.S. col-lege admissions officers who review Australian credentials at both the secondary and tertiary levels. Findings are based on letters, interviews, bulletins, handbooks, and actual credentials. At the secondary level, the trend is to depend less on external exami-nations at the end of Years 10 and 12, and more on nations at the end of Years 10 and 12, and more on school results and continuing standardization of grading across subject areas. A proposal to intro-duce a course to lead to the Diploma of Tertiary Studies, presented in 1988, is expected to attract Year 12 and higher education school leavers interreat 12 and ageneral course with a vocational component. This course, consisting of 2 years of coursework and 1 year of work experience, aims to provide a broadly based education in science and technology, business and vocational studies, or so-cial science and humanities. Sample educational certificates at the secondary and tertiary level from various Australian states and territories are in-cluded. A list of additions and corrections to the list of Australian professional boards and associations appearing in the 1983 volume is attached. (CK)

From 1992-94, a working group appointed by the
United Nations Educational, Scientific, and Cultural Organization's (UNESCO's) European Centre
for Higher Education (CEPES) reviewed the perceived and actual recognition of studies completed
by students from Europe and the United States at
institution on both continents. This report reviews
that working group's terms of reference, memberthat working group's terms of reference, membership, and proceedings. It frames the issues, describes the European and U.S. educational systems, and discusses the fundamental differences between them. It then examines in more detail three specific issues in recognition across systems, using a classification of European countries by general system type, into four groups (Anglophone countries, Nordic countries, Central and Eastern European countries, and Western European continental countries). The three recognition issues are: (1) access to higher education; (2) intermediate qualifications and partially completed degrees; and (3) access to doctoral studies. In each of these areas, the issues are defined and the recommendations of the that working group's terms of reference, mem access to doctoral studies. In each of these areas, the issues are defined and the recommendations of the working group are presented. General guidelines and recommendations of the working group are summarized in the final section. A list of working group members is appended. (Contains 10 references.) (MSE)

The guide describes the educational system of
Norway, primarily to assist in placement of Norwegian students in U.S. schools and for transfer of gian students in U.S. schools and for transfer of credits. An introductory chapter gives background about Norway and its people, educational governance, and language of instruction. The second chapter outlines the system of preschool, primary, and lower secondary education, including curriculum design and grading practices, and the third chapter describes aspects of the secondary system, its curriculum, grading, college matriculation requirements, apprenticeship training, and international baccalaureate. The bulk of the report is devoted to higher education including information on the academic year, financial aid, student services, governance, and the dual university/college system listing the requirements and institutional characteristics of each. The curriculum and degrees of each major field of study are also detailed. Additional chapters provide information on adult and tional chapters provide information on adult and correspondence education, international exchange programs and study abroad opportunities, and advice for admissions officers concerning transfer of credits and evaluation of credentials, and place-ment. Sample records and forms are presented within the text. Lists of trades in which apprenticeships are offered, with program length, and institu-tions in the formal higher education system are ap-pended. A Norwegian-English glossary is also included. (MSE)

The report presented here, the result of a workshop in Bulgaria with the cooperation of Bulgarian educators, provides information on the educational system of that country, primarily for use in student placement in U.S. schools. A brief introductory chapter gives background information on the country, its geography, resources, population, and history. The second chapter outlines the country's tory. The second chapter outlines the country's educational history, with emphasis on changes since 1990. Chapter 3 describes preschool and elementary, and in more detail, secondary education. Chapter 4, on higher education, provides some recent history and information on administration, financing, faculty, institution types, admission, academic year, credentials awarded, examinations, grading, credits, transfer, student records, foreign graung, treats, trainer, student records, toreats, and adult and continuing education. A chapter is devoted to specialized and professional curricula in a number of disciplines. Guidelines for United States college admissions officers concerning placement and recognition of credentials are of-fered in Chapter 6. Appended materials include a list of higher education institutions, sample record forms and documents, notes on the National Council on the Evaluation of Foreign Educational Credentials, a Bulgarian-English glossary, key to Cyrillic transliteration, and a brief bibliography. ontains 14 references). Descriptors—"Administrative Policy, "Admission Criteria, \*College Admission, College Freshmen, Colleges, College Students, Educational Policy, \*Enrollment Rate, Higher Education, Marketing, National Surveys, School Policy, Student Finan-cial Aid, \*Student Recruitment, Trend Analysis, Two Year Colleges, Undergraduate Study, Uni-

versities The report summarizes undergraduate admissions policies, practices, and procedures at two- and four-year colleges and universities as of 1992. Information was drawn from a national survey, the third of a series conducted since 1979. A total of 2,024 institutions responded to the survey. An introductory chapter describes the surveys, their methodology, and some summary results. Subsequent chapters detail findings concerning: selectivity in admissions (general admissions practices, selectivadmissions (general admissions practices, selectivity categories, overall acceptance rates, rates for different student subgroups, and acceptance in relationship application rates); general admission procedures for two- and four-year institutions (locus of responsibility, policies and requirements, two-year degree candidacy criteria, and new or alternative approaches to admissions); policies, practices, and procedures specific to four-year institutions (academic requirements and exceptions, admissions tests, importance of various factors in admissions tests, importance of various factors in admissions decisions, role of personal qualities, trends in acadecisions, role of personal quanties, trends in acidemic qualifications); first-time and other enrollment rates at different institution types; and recruitment, marketing, and financial aid (recruitment practices, two-year transfer policies and practices, market research, enrollment planning, relationship between financial aid and recruitment-/admissions decisions, cost and college choice, no-need aid awards, acceptance and yield rates, freshman financial needs). Appended materials include the survey questionnaires for two- and four-year institutions, the cover letter, and notes on

throughout U.S. history. At first, fund-raising was the responsibility of the president, and later also of trustees and regents. The term "development" came throughout of the president, and later also of trustees and regents. The term "development" came into use in the 1920s, when private donations were solicited to supplement public funding. Fund-raising offices became part of college administrations in the late 1940s, and comprehensive and systematic fund-raising has evolved in more recent years. Little research on public college fund-raising has been conducted, most since the 1960s. Fund-raising methods appear to differ little from those used in other non-profit organizations, particularly in cultivation of donors and donor involvement in the institution. Although the fund-raising professional has traditionally been recruited based on experience in higher education, many skills are transferable from other non-profit settings. Desirable characteristics other non-profit settings. Desirable characteristics include integrity, enthusiasm, creativity, and capac-ity to inspire donor confidence. The public univer-sity fund-raiser of the future must be able to build work well with the institution's public relations professional, perhaps within one office, for purposes of both planning and administration. Compared with other fields of study, engineering
at the higher education level has the lowest proportion of women students. A review of the literature
concerning models of retention and female identity formation indicates that increased mentorship, curriculum revision, enrichment programs, and career workshops have been tried in efforts to increase workshops have been tried in efforts to increase integration of women engineering students into their professional communities. The University of Maryland at College Park used focus groups to evaluate programs designed to retain women in engineering. Meeting other women to share experiences and excess only one in a supportive atmosphere. and express opinions in a supportive atmosphere was cited by participants as a highly beneficial result of the group sessions. In addition, administrators, staff, and faculty can use such information to design effective and supportive programs for women in en-gineering and to cultivate connections and support among engineering students. It was hoped that the resulting sense of community and positive interac-tions with faculty and administrators within engi-neering schools will help to increase retention of women students. The transition between high school and college is a crucial point where many young women engaged in the applied sciences and engineering cease their participation. To help retain young women's interest and help bridge the gap between secondary school and higher education, The University of Maryland, College Park, held a six-week live-in academic women consequences. maryann, College rark, neito a six-week live-in aca-demic summer program to expose 30 young women to college-level engineering study. The young women, who had completed their junior year in high school, were enrolled in two college-level introducschool, were enined in two college-level introductory engineering courses. The program also included hands-on team design projects; field trips; laboratory work; computer classes; problem solving working with others; and presentations by female role models. Parents were invited to participate through visits to the campus and attendance at selected orientation and student design presentations. At a focus group in the fourth week of the program, students discussed their level of interest in engineering compared with their interest at the beginning of the program, what they found most valuable about the program, and suggested improvements. Upon successful completion of the program, students earned six credits towards a college degree. (MAH)

The transition from undergraduate to graduate school is a point when female students may lose school is a point when female students may lose interest in pursuing engineering degrees, and the percentage of women enrolled in engineering graduate programs is small in comparison to that of males. To attempt to mitigate the potential isolation of women graduate engineering students, the Women in Engineering Program at the University of Maryland, College Park, has established a Graduate Committee for Women Engineers to mentor and assist women graduate students in their professional assist women graduate students in their professional development. To learn how best to facilitate and support this group, a survey was distributed to all women enrolled in engineering graduate studies during the spring semester 1995 and a 90-minute focus group was conducted 2 weeks after the survey data were analyzed. Respondents to the survey were data were analyzed. Respondents to the survey were interested in attending workshops on career issues, receiving support from female faculty and other graduate women students, and developing net-works. The focus group discussions identified in-coming first-year Master's and doctoral students and international students as groups needing special attention. (MAH)

Graduate schools have responded to the problem
of graduate student attrition by placing greater emphasis on selection, assuming that better, more informed admission decisions would result in
declining attrition. Yet the problem persists, and the question arises as to whether attrition is due to indi-vidual characteristics of graduate students or to factors inherent in the structure and process of graduate education. This paper argues that attrition has less to do with what students bring to the univerhas less to do with what students bring to the university than with what happens to them after they have been admitted. It develops a social-structural explanation for persistent high attrition rates and why graduate schools have not developed effective solutions by bringing together attribution theory from social psychology (Jones & Nisbet, 1971; Ross, 1978); exit, voice, loyalty, and neglect theory from political economy (Hirschman, 1970); and the theory of greedy institutions from sociology (Coser, 1974). Graduate schools need to focus on the social forces which lead to atomism and pluralistic ignorance among students, forces which divide and isolate them from each other and from faculty, and late them from each other and from faculty, and which stifle voice and allow students to exist in silence. Tenure, Tenured Facuity, Writing for Publication
This book presents 52 essays by individuals in higher education on their own personal career paths and experiences. Part 1 contains essays focusing on suggestions for optimizing career success including one woman's journey to becoming a scholar, personal and cultural factors and cross-cultural influences, the transition to academic life from another profession, and observations regarding creating a career. Part 2 discusses becoming a teacher at a research university with essays on: the motivation to teach; research / teaching boundaries; teaching as an act of scholarship; programmatic research; the publishing process; the development of doctoral students; mentoring relationships; tenure; and the integration of work and personal life. Part 3 focuses on traditional career paths with sub-sections on: professional relationships and collaboration; a reviewer's experiences; the role of a journal editor; reflections on the role of department chairman; a professor's on the role of department chairman; a professor's role; and stress management. Part 4 is on nontradi-tional career paths such as: working as a consultant; developing innovative teaching materials; and working inside the university and with policy mak-ers. Part 5 focuses on the importance of renewal with accounts of sabbatical experiences. Part 6 looks at rhythms of the field with essays on future trends

such as the role of business schools in higher educa-tion and coping with change in the school environ-ment. Many of the essays contain references. (CK)

This report, based on a series of interviews and document analyses, presents a case study of one new college faculty member showing the relationships between a department chair, program head, and the new faculty member concerning research expectations and development. The report argues that to be successful in the contemporary research university, a new faculty member must be equipped and able to assume directed lines of inquiry. It maintains that, considering issues of tenure, promotion, and career satisfaction, this research agenda is heightened in importance and becomes an issue for the employing department as well as the faculty member. Analysis suggests that the department member. Analysis suggests that the department chair can aid a new faculty member in establishing a research agenda by providing mentoring opportu-nities, allowing for open communication, providing peer support, and allowing for concentration on content knowledge. This report documents five objectives for the Canadian post-secondary education system: (1) qual ity; (2) access for all qualified applicants; (3) differentiation (diversity of educational opportunity); (4) accountability; and (5) responsiveness to changing student and labor market requirements. The report also discusses the changing political cli-mate in Ontario and current cuts in funding for universities. It suggests strategies for the Council of Ontario Universities (COU) to implement in dealing with the altered educational climate while maintaining the educational quality and developing new sources of revenue, such as partnerships with private companies and market pricing of postgraduate and professional programs. The report emphasizes that the COU is ideally positioned to provide leadership in this arean regarding its mandate to concentrate on issues management (including equity and gender issues), policy research (such as collaboration among Ontario universities), and general operations (such as policy research support). A financial overview of COU is included. (CK)

This report discusses the use of faculty mentoring programs to empower faculty and ultimately benefit the institution and improve the quality of higher education. It synthesizes the literature on mentoring in terms of conceptual frameworks, mentoring arenas, and roles and functions of mentors and pro-

teges. The first section provides a general history and background of mentoring and a synopsis of mentoring in the field of education. The second section focuses on corporate mentoring, differences be-tween mentoring in business/industry and academic tween mentoring in business/industry and academic settings, and the benefits of mentoring in the work-place. Section 3 discusses primary mentoring frameworks and theories and offers a comparison of mentoring concepts and functions. It is followed by a discussion of mentoring and faculty development. The next two sections offer specific information on the mentoring of female and minority faculty members. A restriction of the sections of the section of the sections of the sections of the section o bers. A section on the application of mentoring presents recommendations, guidelines, suggested qualifications for mentors and proteges, and models of mentoring. The final section provides conclusions and recommendations. Recommendations include and recommendations. Recommendations include raising campus awareness about the importance of mentoring, establishing a mentoring program with faculty assistance and input, providing recognition to those who participate, and providing support through institutional resources. An appendix lists 17 faculty mentoring programs. (Contains approxi-mately 150 references.) (DB)

Descriptors—Allegory, Case Studies, Court Litigation, Fables, Higher Education, Humor, \*Lawyers, Role Perception
This paper offers a humorous parable showing the trials and problems facing a chief lawyer for an institution of higher education. The lawyer, who happens to be a pit bull, faces such issues as deciding whether to take this new position at the university, his orientation to the university setting, his experience dealing with the workload and lack of staff, his experiences at university events and functions, conflicts with administration, and his relationship with flicts with administration, and his relationship with his "wizard" mentor. Extensive footnotes cite popular literature and are intended to add to the paper's pedantic (and entertaining) tone. (DB)

This guide, in a workbook

This guide, in a workbook format, presents information on how a manager at an institution of higher education can plan, present, and follow up on training programs designed to yield competent employees. Stressed throughout are the four steps of training: (1) defining the job (position analysis); (2) planning the training; (3) presenting the training; and (4) evaluating the training. Other topics covered include determining program objectives, selecting qualified trainers, designing an orientation checklist, the reasons why training is important, the value of training to managers, and employee benefits from training. Many worksheets allow the trainee to actively evaluate him/herself, identify objectives, and develop programs. (Contains a list of This guide, in a workbook format, presents inforjectives, and develop programs. (Contains a list of 10 suggested resources.) (DB)

Student Loan Program

Tables, graphs, and text summarize the most re-cent statistics available on financial aid available to students in postsecondary education including vir-tually all federal aid and the vast majority of state and institutional assistance. It revises earlier 1990s data and provides estimates for the academic year 1995-96. Study highlights include: (1) federal and state aid topped \$50 billion in 1995-96, with federal loans being the largest single source; (2) total loan volume has increased 65 percent since 1992-93, but annual growth has slowed with the 1995-96 volume annual growth has slowed with the 1995-90 volumes as percent higher than in 1994-95; (3) student borrowing has increased (after inflation) by 6 percent, but parent borrowing through the PLUS program (Parent Loans for Undergraduate Students) in-(Parent Loans for Undergraums Students) in-creased during the same period by 29 percent; (4) the expansion in federal programs resulted from an increased number of loans rather than growth in loan amount; (5) the Stafford Unsubsidized program loan amount; (5) the Stafford Unsubsidized program and the Ford Direct Loan Program have been the fastest growing programs; (6) federal grant aid has decreased substantially; (7) tuition increases continue to outpace growth in personal and family income. Seven tables provide data for the period 1986-87 through 1995-96; two appendix tables cover all years in the database (back to 1963-64).

This report presents a statistical overview of trends in the development of historically black colleges and universities (HBCUs). An introductory leges and universities (HBCUs). An introductory chapter reviews the history of HBCUs and discusses the current status in terms of enrollment, degrees conferred, staff, salaries, and finances. Nine text fig-ures and 54 summary tables provide detailed data organized into the same categories. Supplemental information is given for all public and private institutions to allow comparative evaluations with all institutions. The report finds that: (1) as a group, HBCUs entered a period of growth during the late 1980s, with some of the increase due to a larger proportion of black students choosing HBCUs; (2) proportion of black students choosing HBCUs; (2) over the 1976-1994 period the student racial/ethnic mix became more diversified, especially for degree recipients; (3) the number of degrees conferred has also risen since 1990, due mainly to increased enrollments; (4) financial and faculty resources at public HBCUs are stronger than those at private institutions; (6) faculty salaries at all HBCUs have increased at about the same rate as at all institutions, but nevertheless remain at a lower level than institubut nevertheless remain at a lower level than institu-tions of higher education in general; (7) educational expenditures at all HBCUs have increased, but at a lesser rate than at comparable institutions. Appen-dixes include a guide to the sources used and the comparability of data, information on methodology, and a glossary. (CH)

nal Study (NCES)

This study used data from the ongoing Baccalaureate and Beyond Longitudinal Study to examine college graduates' preparation for and entry into teaching, as well as their movement into and out of the profession over time. Text, seven figures, and 15 tables detail the data on the "teacher pipeline"; ex-amine who enters it (such as race/ethnicity and genamine who enters it (such as race/ethnicity and gen-der); provide data on undergraduate academic experiences of teachers including major field of study, type of postsecondary institution attended, college entrance examination scores and grade point averages, and undergraduate and advanced course taking; and also look at early teaching experiences. The report reaches the conclusion that graduates who enter the teacher pipeline differ both demographically and academically from those not in the pipeline, and notes that these differences have tended to overshadow differences among types of teachers. The report lays the groundwork for future teachers. The report lays the groundwork for future studies analyzing persistence in teaching, and voices the hope that further development of empirical cri-teria will allow better evaluation of teacher post-secondary education and teacher professional development. Statistical data are presented in 27 compendium tables. Also included are two appen-dixes: one a glossary that defines the variables, and the other containing technical notes and explaining the other containing technical notes and explaining the methodology. The purpose of this applied research project at the
College of Ostcopathic Medicine of the Pacific (California) was to develop a new curriculum for the
Master of Science in Education for Health Profesmaster of Science in Education for realth Professionals program. Seven areas were explored in this study: (1) the learning needs of educators of health professionals; (2) proposed curriculum components; (3) barriers to pursuit of a graduate degree in education; (4) instructional alternatives; (5) available defining the professional structure in the component of the professional structure in the component of the professional structure in the component of the professional structure in the professional structure i livery systems to increase program accessibility; (6) an implementation plan; and (7) an evaluation plan. A review of the literature provided a foundation for the study. Methodology included telephone interviews, focus groups, reviews of course offerings and degree requirements, and use of external and inter-nal expert information. The final product, a model curriculum for the Master of Science in Education, was developed following the validation process. In-cluded in the appendixes are the criteria for the study and the model curriculum. (Contains approximately 150 references.) (CH)

This annual report describes activities and accom-

This annual report describes activities and accomplishments during fiscal year 1995 of the Alaska Commission on Postsecondary Education (ACPE) which, among other activities, oversees the Alaska Student Loan Programs (ASLP). The report also reports on the ASLP's administration of a Loan Fund to provide lower-interest loans to Alaska resirund to provide lower-interest loans to Alaska residents. It describes the following ACPE programs: Alaska Student Loans; Family Education Loans; Paul Douglas Teacher Scholarship Loans; the Professional Student Exchange Program; State Education Incentive Grants; Teacher Scholarship Loans; the WAMI (Washington, Alaska, Montana, Idaho)
Medical Education Program; the Western Regional
Graduate Program; the Western Undergraduate Exchange Program; and the Winn Brindle Memorial
Scholarship Loans. The text of the report describes each program, defines eligibility criteria, and summarizes current program participation data and costs. Also reported are the year's activities in the areas of institutional authorization, institutional pliance, activities of the Alaska State Approving Agency (which reviews programs for veterans benefit eligibility), a review of Finance Division re-sponsibilities, and information about support ser-vices. Thirteen appendix tables provide additional data on attendance; number, amount, and average size of loans; longitudinal data on total borrowing; most frequently attended institutions; distribution data for the State Education Incentive Grants; and historical data on participation rates for the Western Interstate Commission on Higher Education program. This Congressional hearing report is intended to
provide a broad overview of the current state of
higher education and establish a foundation for future hearings on more specific topics concerned ture nearings on more specific topics concerned with the reauthorization of the Higher Education Act. Issues addressed in the report include: costs of going to college; characteristics of those who go to college; kinds of financial available; characteristics of financial aid recipients; distribution of financial aid among private versus public colleges and among dependent versus independent students; types of programs eligible for federal aid; and the role of the college financial aid officer. Included are the transcripts of the testimonies of: David A. Longanecker, Assistant Secretary for Postsecondary Education, who reviewed Title IV eligibility and certification requirements; John B. Childers, of The College Board, who reported on the Board's experiences with financing postsecondary education; Margot Schenet, of the Congressional Research Service, who gave testimony about who gets student aid and where they go to school; Michael T. Nettles, of the United Negro College Fund, who addressed enrollment trends for minority students; and Thomas M. Rutter. Director of Financial Aid at San Francisco State University, who talked about the role of the financial aid administrator. Also included is the transcript of the question-and-answer period which followed the oral testimony and the supporting doc-umentation provided by each respondent. (CH)

 Crime Awareness and Campus Security Act 1990, Proposed Legislation, S Right to Know and Campus Security Act

This Congressional hearing report covers testi-mony given to the Subcommittee on Postsecondary Education, Training and Life-Long Learning relat-ing to the issue of crime on college campuses. Spe-cifically the testimony addressed a proposed bill before the House of Representatives, the Open

Campus Police Logs Act, which would amend the Higher Education Act of 1965. Testimony also addressed the effectiveness of the existing Crime Awareness and Campus Security Act of 1990, which was included as part of the Student Right to Know Campus Security Act, enacted to provide re-liable information to parents and students about criminal activity on college campuses. Transcripts are provided of the testimony of witnesses concerning: the effectiveness of the existing law, how the law is being administered by the Department of Ed-ucation, whether schools and the Department have ucation, whether schools and the Department have been abiding by both the spirit and requirements of the law, what suggestions witnesses have for further changes to the law, and views of proposed Open Campus Police Logs Act. Transcripts are included of statements offered by five concerned private indi-siduals two school definishments and David Logviduals, two school administrators, and David Longanecker, Assistant Secretary for Postsecondary Education. In addition to the oral testimony, prepared statements, letters, and supplementary materials are included in the report. (CH)

Program The purpose of this hearing was to probe a pattern of fraud and abuse in the Pell Grant Program for econdary students, focusing specifically on the postsecondary students, focusing specifically on the IADE American Schools, a for-profit vocational school with campuses in the Los Angeles (California) area and serving primarily Hispanic students. In his opening remarks Senator Roth detailed a history of prior abuses of the program and lax oversight by the Department of Education. Senator Nunn, after marizing a five-year series of hearings, reports, and recommendations, testified that a year-long in-vestigation of the IADE schools had uncovered serious misconduct, abuses, and possibly fraudulent practices. He charged that the Department was not only incapable of preventing a fraudulent institution from participating in student aid programs but was also unable to detect or pursue such fraudulent activities. Following the senators' opening statements, the Subcommittee team investigating IADE schools the Subcommittee team investigating IADE schools reported its findings. David Longanecker, Assistant Secretary for Postsecondary Education, then reviewed the Department's procedures and policies stating that oversight was being improved. The final testimony was a report from the U.S. General Accounting Office assessing the Department's effectiveness in using student aid data to ensure compliance and prevent abuses. An appendix contains the texts of the witnesses' prepared statements. 56 exhibit statements are listed separately. (CH)

This report of the Committee on Resources recommends House of Representatives approval of (H.R. 1179), the Historically Black Colleges and Universities Historic Building Restoration and Preservation Act, as amended, to ensure the preserva-tion of buildings eligible for funding under the Historic Preservation Act on the campuses of his-torically black colleges and universities. A total of \$29 million is authorized, of which \$22.9 million is earmarked in various amounts for grants to the fol-lowing 12 institutions: Fisk University and Knoxlowing 12 institutions: Fisk University and Knox-ville College in Tennessee; Miles College, Talladega College, Selma University, Stillman College, and Concordia College in Alabama; Allen University, Claffin College, and Voorhees College in South Car-olina; and Rust College and Tougaloos University in Mississippi. The report outlines the background and need for the legislation, lists prior Committee ac-tions, provides a section-by-section analysis of the bill, addresses cost and compliance matters, and in-cludes an inflationary impact statement. A commu-nication from the Congressional Budget Office estimates the budgetary implications of the bill. (CH)

Teacher Role, Teacher Student Relationship Identifiers—California, \*Generation X, Postmod-

This book describes how a journalist turned col-lege professor faces the students of Generation X at munity college in California. He discovers a culture war between generations—a culture wave be-tween college teachers, typically Baby Boomers and members of Generation X. This cultural divide is between the modern and postmodern worlds and the problems seen stem from educators, who reared under the tenets of the modern age, are confronted under the tenets of the modern age, are controlled by a new reality: a generation of young people who have emerged from a radically changed, postmode-ern society. The system errs on the side of medico-rity and makes too much allowance for consumerism. Instead, the new roles of the educator in postmodern society should be recognized: (1) guiding students in the use of information-gathering tools; and (2) helping students imagine new ways of looking at knowledge. The educational establishment needs to understand and fully articulate, to itself and to the public, that it is trying to teach people of a new sort. Academic standards, however, should not be lowered, even in the face of consumer snouid not be lowered, even in the face of consumer pressure. Colleges must end grade inflation and work to make grades again mean what they purport to mean. Colleges are adapting to the poor habits of the students, rather than students adapting to the requirements of the institutions. (Contains 185 references) (JLS)

Strategic planning in higher education is seen in this book as an essential element in the life of a successful college or university. This book begins by defining strategic planning and explains how to identify the core problems a college or university wants to address and solve through the planning process. It continues with advice on how to begin process. It continues with advice on how to begin the process, define the role of budgeting, plan for "rightsizing" the work force, and plan for management of faculty and staff benefits during difficult financial times. The book concludes with the relationship of strategic planning to the total quality management process and how to keep the strategic planning process alive. The chapters are: (1) "What Is Strategic Planning?" (G. Gregory Lozier); (2) "What Is the Problem You Are Trying to Solve?" (John A. Dunn, Jr.); (3) "Begin at the Beginning" (Felice D. Billups); (4) "What about Budgeting?" (James H. Manifold); (5) "Rightsizing" (Kathleen M. Alvino); (6) "Faculty and Staff Benefits: Meeting the Challenge of Difficult Financial Times" (Roett M. Development, "Teacher Morale, Universities The purpose of this book is to explore ways for campuses to maintain morale during the tough times facing higher education in the 1990s. Its message is based on two assumptions: (1) the very process of assessing morale can enhance morale; and (2) there are ways to enhance morale that do not require large infusions of new dollars. Chapters cover the following tonics: (1) the nature of morale and is imporinfusions of new dollars. Chapters cover the following topics: (1) the nature of morale and its importance (including a summary of research findings); (2) campus morale in the 1990s (noting reduced resources, public disaffection, and internal conflict); (3) the role of the institution in building morale (stressing the need for institutionally based assessment and the institutional commitment to act); (4) the administrative staff work life (a review of the literature on characteristics, activities, and concerns of administrative staff); (5) faculty work life (a review of faculty characteristics, issues, and special groups); (6) assessment of morale (describing the groups); (6) assessment of morale (describing the steps of a successful assessment from project leadership, to assessment design, to data analysis); (7) as-sessment issues (such as sampling, coding, data analysis and dissemination); (8) a case study of a 10-campus midlevel administrator morale assessment; (9) a case study of a university faculty morale ment; (9) a case study of a university security moral assessment; and (10) use of the assessment data to develop recommendations and an action plan. Ap-pendices contain sample letters and surveys. (Indi-vidual chapters contain references.) (JLS)

The centerpiece of this book are four cases which The centerpiece of this book are four cases which illustrate classroom research in the context of various learning issues in college classrooms. The cases are intended for discussion by readers of: (1) how the students in the hypothesized situation perceive what is going on; (2) possible hypotheses about what is interfering with student learning; (3) possible information available from research on learning; (4) and coveres of more informatic about healths. and sources of more information about the relevant learning issues. Chapter 1 provides an introduction to classroom research in the context of four approaches to instructional improvement: the assess-ment movement, traditional educational research, ment movement, traditional educational research, faculty development, and the scholarship of teaching. The first three cases then address the following learning issues: prerequisite knowledge; metacognition and learning strategies; self-confidence and motivation; learning goals; deep and surface learning; student ratings of instruction; peer learning; intellectual development; and critical thinking. The fourth case study is offered as an exercise illustrating all the previously covered learning issues. Each case study, plus attendant hypotheses and synopses of relevant research, is followed by examples of how case study, plus attendant hypotheses and synopses of relevant research, is followed by examples of hoc classroom research techniques might be used to in-vestigate the hypotheses and to collect further infor-mation. enrollments by 2020 with lower-division growth
maintaining the current participation rate. From
1997-2010, the enrollment plan proposes to increase enrollments at the main campuses to physical capacity, build branch campuses, and expand centers in high-demand or underserved areas. Community and technical colleges and independent institutions will also maintain their current participations. pation rates. These actions will increase enrollment by nearly 57,000 students. More than 27,000 full-time-equivalent students will still need to be served by 2010. To serve these additional students, a variety of solutions are proposed. (1) state funding of new enrollments, new technology, and a study of costs and benefits of diverse delivery options; (2) provision by public two- and four-year institutions of increased access, better responses to changes in the workplace, reports of outcomes, achievement of state-wide goals regarding diversity issues, the forging of new partnerships, and preparation of an in-creased proportion of community college students creased proportion of community college students for baccalaureate education; (3) provision by independent institutions of increased access; (4) better preparation of students in K-12 schools for additional education; and (5) acceptance by the Higher Education Coordinating Board of its leadership role with such actions as convening of a "Blue Ribbon Committee" on financial aid. Statistical tables are provided. (JLS)

An annual study of physical acience graduate students' background characteristics and degree recipients' employment outcomes was conducted for 1995. The total pool of 1994-95 physics graduate students was 13,285 with non-U.S. citizens making up 43 percent. Among U.S. citizens, 18 percent entered graduate school 2 or more years after earning a Bachelor's degree. Over half of the non-U.S. citizens entered graduate school in the United States 2 or more years after earning their Bachelor's degree. The number of years taken to obtain a Ph.D. has risen with over 20 percent taking 8 years or more and fewer than 5 percent earning their degrees in 4 years. The number of women has continued to increase: from 8 percent in 1995 to 16 percent in 1995. Tables provide data on employment of physics graduate students including country of origin, racial/ethnic background of graduate students with U.S. citizenship, financial support, academic background, subfield of study, time taken between Bachelor's degree and physics graduate study, and time taken between Bachelor's degree and physics graduate study, and time elor's degree and physics graduate study, and time taken between Bachelor's degree and physics gradu-ate study, postdoctoral positions, annual salaries,

and overall Master's degree recipient characteristics. (JLS)

Student Needs
Identifiers—\*Ursinus College PA

This document discusses the objectives, advan-tages, and disadvantages of internships provided by colleges and universities to their students. The advantages of internships are listed as: (1) enhancement of student goals of career development; (2) promotion of favorable public relations for colleges; (3) provision of valuable services to alumni and the community; and (4) research opportunities for the students. The disadvantages are listed as: (1) expo-sure to litigation; (2) increased workload; (3) dilusure to litigation; (2) increased workload; (3) dilution of educational program; and (4) a fueling of student worship of the practical and preprofessional. The report emphasizes that while the concept of applied learning is supported at most colleges, disagreement surrounds the semantics of internship programs and the tension between faculty vs. student-centered perspectives increases. The paper emphasizes the importance of viewing these programs as a means of facilitating student growth, accommodating student needs, and achieving a balance between perfectionism and creativity. The report concludes with a discussion of some examples of undergraduate service learning at Ursinus College, Pennsylvania; a list of specific community service projects at the college; and a summary of service projects at the college; and a summary of optimal student learning experiences in the field. An outline of a conference of Ursinus College faculty on the internship experience is attached. (CK)

Identifiers-Diversity (Student), \*United Kingdom This report presents an analysis of data on student trends in higher education (HE) in the United Kingdom for the Committee of Vice Chancellors and Principals (CVCP) of UK universities. It is based on research including a review of the literature, inter-research including a review of the literature, inter-views in a sample of 14 universities to investigate individual institutional trends, consultations with policy and professional bodies on student participa-tion and demand for graduates; and an assessment of likely future changes in student numbers over the next decade. Among findings highlighted are: (1) a 54 percent increase in the number of students between 1989 and 1994; (2) underrepresentation of women in science and engineering, of students from low socioeconomic backgrounds, of some ethnic groups, and of students with a disability; (3) increased diversity in HE institutions as demonstrated by growth of the further education sector and greater regional focus of many institutions; (4) an ambiguous picture of employers' demands for graduates; (5) wide support from employers and ed-ucational and professional bodies for expansion of student intake; and an increasing demand for higher education by a more diverse population. This report reviews the literature on minority nursing students including the identification of high risk students, admission policies, evaluation meth-ods and prediction of success of nursing students since the mid-1980s. The review finds that many variables have been used in research studies to identify at-risk students, to predict nursing program suc-cess as well as to predict success on the National Council Licensure Examination for Registered Nurses (NCLEX-RN). Results revealed that: (1) school rank and biology and English scores predicted success best for associate degree students;
(2) that the number of science courses taken and (2) that the number of science courses taken and language skills predicted academic success best for students in a diploma program; and (3) that the Mosby Assess Test and grade point average in clinical nursing courses best predicted baccalaureate student success. Specific strategies are suggested to improve the academic processor for the strategies. improve the academic success of at-risk and minority nursing students and address test taking strategies, learning styles, relaxation techniques, advising, counseling and NCLEX-RN reviews. The report concludes that no single instrument or set of variables have been recognized as a predictor of success in the nursing courses or for any specific group of students. This book chronicles, from the point of view of

students who are unwilling participants in the pro-cess, the transformation of Stanford University from an institution committed to preserving the values of Western civilization to one intent on engineering social change on campus to promote the dogmas of multiculturalism. The book is an insider's tour of the world of speech codes, the dumbing down of admisworld of speech codes, the cambing down of admis-sions standards and curricula, the campus witch hunts, and the anti-Western zealotry that masquer-ades as "multiculturalism." Part 1, "The New Acad-emy", discusses the rejection of Western values; multiculturalism from the vantage points of student diversity, moral relativism, political and social ide-ology, and enforcement of conformity in behavior and attitudes; the education of Generation X, with and attitudes; the education of Generation X, with details about grade inflation, curriculum content, courses characterizing Westerners as oppressors, and courses inculating radicalism. Part 2, "The New Culture", discusses the stages of oppression, including "institutional racism," "homophobia," "sexism," and resentment compounded by frustation; campus similarities with the witch-hunting tendencies of social Solutions. dencies of colonial Salem, Massachusetta; the ethos of the egalitarian elite; and the culture of blame and other problems. Finally, the book details the changes necessary to reverse the disintegration of American colleges and universities and to restore academic excellence. (Individual chapters contain references.) (CK)

This study presents the results of the 29th annual

This study presents the results of the 29th annual inventory and utilization study concerning space in North Carolina institutions of higher education during the 1995 fall term. The study provides informa-tion on 113 institutions of higher education tion on 113 institutions of higher education including the 16 public senior institutions which comprise the University of North Carolina (UNC), 39 private nonprofit colleges and universities, the 58 public 2-year institutions which comprise the community college system, and the UNC hospitals at Chapel Hill. The study indicates the uses being made of space and provides, where possible, norms and historical information for the past 5 years. Statistics for private institutions are shown by group rather than by institution. The study is divided into four sections. The first section provides ratios, per-centages, and indices which relate the amount of instructional activity at an institution to various catinstructional activity at an institution to various cat-egories of campus space utilization. The second sec-tion provides tables on interior space characteristics such as assignable square feet per student station for classrooms and laboratories and student service and physical plant operations; The third section, on building characteristics, contains data on building are condition and replacement cut. The final secage, condition, and replacement cost. The final section reports on accessibility to persons with mobility impairments. An institutional index and subject index are included. Australia has played a very active role in promoting and developing school librarianship on an international basis. Most aid projects in school library development have been in the Asia/Pacific region, but programs have been implemented in other areas as well. The largest school library development project that has been carried out by Australians is the UNESCO School Libraries in Oceania Project the UNESCO School Libraries in Oceania Project that was launched by UNESCO in 1978 and has continued since then. Australians are active participants in international library organizations such as the International Federation of Library Associations and Institutions (IFLA) and the International Association (IFLA). tions and Institutions (IFLA) and the International Association of School Librarianship (IASL). The paper describes Australians' participation in those organizations, the UNESCO School Library Project in Vanuatu, and literacy programs for public libraries in the Southwest Pacific-the Cook Islands public and school library services. The interaction between Australian school library educators and their overses colleagues has rouge; to be of mutual heapfit seas colleagues has proven to be of mutual benefit. While Australians have been able to share their expertise with others, they have also become richer by developing an understanding of library and educa-tion systems in other countries and have been able to develop a deeper appreciation of other cultures.

Identifiers—Financial Analysis, \*Teacher Librarians, Worth

ans, Worth
This paper addresses the financial value of the teacher librarian, outlines areas in which this value can be identified, and indicates measures that can be used to demonstrate this value. The four major financial areas in which the value of the teacher librarian can be assessed are: (1) capital investment, made up of the building, stock, and equipment-the teacher librarian maximizes capital investment by organizing the physical facility and resources to gain the maximum use by the school community; (2) recurrent operating costs, including site (cleaning, power, and telephone), acquisition of new library materials, maintenance of equipment, and staff salary costs; (3) cost benefit, the benefit derived by the school by hiring a teacher librarian, as determined by the teacher librarian's ability to save the school time and therefore money through their knowledge of the curriculum, the teachers' requirements and style. the students' learning patterns, and the reof the curriculum, the teachers requirements as style, the students' learning patterns, and the resources in the library, other areas of the school, and the wider community; and (4) cost effectiveness, demonstrated by the teacher librarian showing that demonstrated by the teacher instrana showing max-the cost of the current means of provision is more effective than an alternate model or source. As schools are forced to examine the possible alterna-tives for allocation of their funds, teacher librarians must be prepared to demonstrate the value of the cost of operating the library and the contribution that is made to the educational program. Identifiers—American Association of School Libraries, Expertise

brarians, Expertise

brarians, Expertise
This paper discusses changes at the American Association of School Librarians (AASL) and suggests changes in the role of the school librarian, by way of a shift from a traditional helping role to a leader-ship role. Because librarians have knowledge of the whole curriculum, they are in a unique position to lead the way for teachers and to help them integrate learning across the curriculum. Librarians must begin to change from merely offering suggestions of

materials to supplementing classroom teaching, and directing the collaborative experiences teachers offer their students, so that teachers will adjust their activities to combine isolated lessons and design them to meet different learning styles. It is only in this way that all students will be well prepared to be contributing members of a global society. Librarians must know the teachers and the curriculum, as well as exactly what and when teachers teach specific units, whom they teach, and how they teach. To find the answers to some of these questions, librarians are advised to predict teaching styles; discuss teaching strategies and resource based teaching; point out materials available in the library; record planning sessions and the actual outcome of the unit; base any suggestions on existing research; keep the students as the primary focus; and help teachers adapt lesson plans into multicultural experiences. Because violence is an inescapable reality of the Because violence is an inescapable reality of the world, this paper asks the question, "Does violence have any place in children's literature?" For centuries, children's literature has encompassed stories in which the virtuous were rewarded and evildoers suffered retribution. Historically, violence was frequently part of punishment. Children of the past were directly confronted with their responsibility for their choices and actions and the likelihood of for their choices and actions and the likelihood of severe punishments following closely upon wrong-doing. Violence in juvenile literature has also been praiseworthy and even glamorous, expressed as peo-ple "doing their duty," for example, in a wartime situation. Stories that did not concern war often incited children to demonstrate physical courage. Females as well as males were forced to face danger or be ready to sacrifice themselves. It is only in recent decades that the place of violence in chil-dren's books has been so vigorously questioned. Some current viewpoints take the position that children's books may encompass violence and conflict, but it is essential that they do so in ways that show the suffering caused, and offer solutions other than retaliatory violence. Once one has accepted that there is a place for violence in children's literature, it is still difficult to judge which books are acceptable. It is important to find books that pose the issues for children in terms meaningful to them in their world. (Contains 17 references.) (SWC)

Politics and children's literature would seem to be Politics and children's interature would seem to be two areas of thought which are incompatible; poli-tics being the administration of power, control, gov-ernment, and regulation, and children's literature embodying the freedom of the imagination at a per-iod in life described as "literary innocence." Em-bedded political perspectives, whether religious, social, or gender based, affect the selection and

availability of children's literature. The paper dis-cusses the following issues and their political effects on children's literature: the nature of the publishing on children's literature: the nature of the publishing industry; opportunities for new writers; marketing trends; foreign children's books and related language and cultural translation issues; matching of illustrations with text; independent book production units; book selection; government reading lists; school library funding and quality of maintenance; and the lack of ability for children to make their own reading selections. The paper also describes a pilot research study which looked at the way 5- to 6-year-old and 10- to 11-year-old children select books, their knowledge about books, and what qualbooks, their knowledge about books, and what qualities they value and like in books. The dream is a democratic approach to book selection, and giving children a voice in the complex world of children's literature. (SWC)

Identifiers—Barriers to Implementation, \*Malaysia Storytelling, a powerful means of providing chil-dren and adults with life-enhancing mental images, has been a tradition practiced by most cultures throughout the world. Passed on from one generation to another, the stories freed the imagi and stretched the capacity for such feelings of joy, sorrow, sympathy, and hope. The stories usually have a universal message, especially in their aim to cultivate positive norms in societies. The characters or settings might be different but the plots, themes, and genres are identical. The paper describes the history of storytelling in Malaysia, with emphasis on Malay storytelling, and describes current storytelling activities for children in libraries. Methods of storytelling, storytelling contests, professional storytelling groups, and examples of three libraries' storytelling programs are also discussed. Storytelling activities are facing challenges from the technological developments of television, computers, and video arcades. Despite lack of staff, budget and other constraints, libraries are working diligently to carry on storytelling activities. Puppets, drama, television, and video-discs are among the methods used everywhere by storytellers today to reach their au-diences. The motive of storytelling will always be the same, to entertain and educate the audience. Appendices contain a list of storytelliers by state and method of presentation, tables of libraries and library activities, libraries and storytelling information, and methods used in storytelling at each

Identifiers—South Africa

Responsibility for media services in secondary schools has received little attention in discussions of media use in those schools. If education authorities agree that the media center is indispensable and it has a philosophy and policy to this effect, then at-tention must be paid to who should take responsibility for media services. The education authority functions on a macro management level, but must delegate specialized services to an organization which can take care of them. Educational media services function primarily as an ancillary service directed toward rendering service to education. The departmental library, concerned with information needs of administrators and teachers, finds a natural home within the media services department. Media advisors, who possess qualifications in teaching, li-brary and information science, or educational technology, offer guidance on library matters as well as curricular and extra-curricular media use. Profes-sional and technical services include making recomsional and technical services include making recom-mendations about purchasing media materials and developing lists of materials which can be used broadly within the school system. Ancillary service outside the education department, usually with community libraries, is sometimes a part of the me-dia services offered. Micro management of media services departments generally falls within the scope of the media teacher. The paper also discusses media services in South Africa, and managing media centers in the future, as such services become more centers in the future, as such services become mor comprehensive. A library training program was developed in the
Pacific Islands by the University of the South Pa-

cific. During the early years of library training (1972-1980), the professional library staff at the university provided a semi-formal training program for non-professionals in the form of a series of one-week workshops. A total of 72 people completed this program. By 1981, a Certificate in Librarianship congram. By 1981, a Certificate in Librarianship consisting of six required courses was offered through distance education. By the mid-1980s, the need for a diploma in library information studies was recognized, and extensive outside expert involvement in the program has strengthened the curriculum substantially. Authors of the curriculum and the course materials now come from a broad range of the world's professional and academic library community. Admission to the new university program requires a specific academic/experiential background, and six out of the nine library information courses are required to complete a degree. Some of the course and details about their implementation are described. Three appendices include geographic size and population of the Pacific Islands, number of graduates by country and by year, and a description of courses for the diploma in library science. (SWC)

This paper describes the status of library services

This paper describes the status of library services in Natal, South Africa. Fragmented services dominate the area, with public, urban, and school librar-ies existing in complete autonomy from each other and ambivalent about each other's existence. Within school libraries, provision of services varies widely and reflects the wider apartheid structure of privilege that is racially defined. This difference is found in all elements of a school library service-materials, staff, accommodation, organization, and funding. Provincial libraries, purportedly open now to all citizens of the province, have not provided equal access for blacks, and some town councils have invoked a variety of measures as a means to exclude black users. Urban libraries and provincial libraries both are organized around central libraries which coordiare organized around central libraries which coordi-nate services in branches and other service points, and provide all training, materials, and funding through their central administration. This structure has contributed to limiting access to library services for many citizens. A number of arguments are pres-ented which support improved distribution of li-brary funds and services to the schools and to public libraries. There is becaute library services will be libraries. There is hope that library services will be-come more coordinated and more equitably distributed. The University of Natal's Durban School Library conference established a historic collaborative group, dedicated to annual meetings to discuss and enhance education and media issues. The Infant, Junior and Secondary lierate in the Chinese International School in Hong Kong.

braries, with a staff of three professional librarians, one library assistant, and one audiovisual techni-cian, needed an automated system which could sup-port their bilingual curriculum. Two computer port their bilingual curriculum. Two computer systems were evaluated which could input both Chinese and English language materials, and the V-LIB system was selected. This system consisted of six modules: (1) cataloguing and enquiry; (2) serials; (3) acquisitions; (4) item control; (5) loans and circulation; and (6) MARC interface. Three other options were an online public access catalog (OPAC); ideographic capability that allows handling of Chinese, Japanese, Korean, and Portuguese scripts; and an image interface. Special features of dling of Chinese, Japanese, Autenia, and Proceedings of Chinese, Japanese, Noteshi, Special features of V-LIB include customization; user friendliness; security; local support; training; enhancements; and CJK capability-the ability to input and display Chinese, Japanese, and Korean characters. In the Secondary school, implementation of the cataloging module for both English and Chinese language materials took six months, and adding the OPAC and circulation modules required the rest of the year. Computerization of the Infant and Junior libraries will follow. (SWC)

Identifiers—\*Japan
"Bunko" are local mini-libraries for children in

Japan, operated voluntarily by individuals or groups of parents, intended to nurture children's reading of parents, intended to nurture children's reading interest by offering them an inviting reading environment. In 1993, there were an estimated 4,000 bunko in Japan, with approximately 32,000 adult bunko members (90% female). Bunko members cooperate with other bunko and public librarians to exchange experiences, study children's books, and promote the development of local children's reading interests. More than 80% of bunko do not charge any membership fee for child members. Individual any membership fee for child members. Individual bunko collections vary from less than 100 books to more than 3,000 books. To encourage children to read, adult bunko members carefully select books for the bunko by considering the content of the books and children's reading interests; read aloud; conduct book talks; tell stories; display books; and have children and adults take turns reading to each have children and adults take turns reading to each other. The joy of reading is shared indirectly by other activities: storyboard theater, origami, top making, puppet shows, and outdoor activities. Problems at bunko include finding a location for the bunko, finding good volunteers, lack of funding for book purchases and other activities, a decreasing number of child members due to a declining birth rate, demands on children to prepare for school entrance examinations, a change in children's reading tastes, and the unsympathetic attitudes of local peo-ple and authorities who feel that developing literacy is best left to formal education. Two lists of guide-lines for and benefits of "Sharing the Joys of Read-ing by Parents and Children," and a table of facts on Japan, Japanese schools and libraries are provided.

Identifiers—\*Teacher Enthusiasm
To belie children and adolescents learn to read.

To help children and adolescents learn to read, school librarians and teachers must learn to read with confidence for pleasure and satisfaction and to draw on their experience of the world and their experience with other texts. Having personal enthusiasm, the skills to analyze how a literary work func-tions, and an understanding of what "succeeds" or 'fails" in literary works are critical for communicating enthusiasm and skill to young readers. These qualities also help teachers assist students in finding books that will keep them reading. Librarians and teachers must be practitioners of reading, not simply enablers of reading or transparent conduits for books. The paper describes a course in which under-graduate and graduate education and library stu-dents are taught to think, speak, and write about how they read, to clarify the nature of reading, the nature of the book, and the way it should be pres-ented to children. The class requires students to assess their reading experiences with books, particu-larly exploring whether their reactions to the book larly exploring whether their reactions to the book are caused by the book-as-object, the reader's personal history, the reader's history as a reader, or the text alone. This discussion of factors influencing youth literacy in Ukraine highlights information on availability and content of reading material in the Soviet Union

acy in Ukraine highlights information on availability and content of reading material in the Soviet Union and Ukraine. The population of Ukraine is 100% literate. Regional children's libraries and separate libraries for youth are located in the cities and larger towns, are funded by the Ministry of Culture, and have impressive children's collections. The libraries for youth (defined as children from ages 14 to 24) offer a basic selection of all classics—their own and foreign, some adventure, and some science fictors at the way that the tion-although the selections are not always what the young people really want to read. In the Ukraine, there is a lack of a middle level entertainment or escapist literature for youth. There are many levels of fiction, non-fiction, biography, and travelogue that would interest and entertain Ukrainian youth. Ukrainian youth are curious about themselves and the outside world. They read a lot, which helps them to search for a synthesis of diametrically opposed influences of their sheltered past and the modern Western world. Writers, poets, and bards were of great importance to Ukrainian youth in the past, and will continue to be important in the future. (Contains 10 references.) (Author/SWC)

Enthusiasm for and a commitment to literature are the essential tools needed to successfully promote the enriching, challenging, and thought-provoking world of books. This paper focuses on the promotion of literature inside the classroom, inside the library, and in the wider community. Programs at Methodist Ladies' College (Australia), a boarding at Methodist Ladies' College (Australia), a boarding and day school for grades kindergarten to year 13, include (1) student literature clubs; (2) staff book clubs; (3) "Literature for Life," an elective course that teaches year 9 and year 10 students about the world of literature and books and develops them as readers, rather than focusing on a set text and reader response; (4) "Reading for Pleasure" classes, semi-nars in which the teacher-librarian introduces 10-15 new high-interest titles, giving a brief review of each, and then allowing students to select and bor-row the book they want to read; (5) involvement of

the teacher-librarian with the English curriculum through specialized literature-related program top-ics such as book of the year, illustration, publishing, folk tales, and author study; and (6) activities con-ducted by the Methodist Ladies' College library for the students, school community, parents, and wider community. Identifiers-Interactive Teaching, \*South Africa In a developing country such as South Africa, many teachers enter initial teacher education with little or no experience of libraries and information sources. These students need to become information literate during their initial teacher education, otherwise they will not have the knowledge of information sources and skills which they will need if they are going to be role models for their pupils and help them to become information literate. The paper neign them to eccume information increase. The paper describes a project to improve the media and infor-mation skills of under-qualified teachers through in-service workshops. The process could also be used as a model for initial teacher education with students from disadvantaged or more privileged backgrounds. It is important for pupils to become information literate, but before this can happen, information iterate, but detroit this can happen, their teachers must themselves become information literate. Teaching style influences student learning, and must follow a clearly formulated process, lite the one described. This is one way to help transform the prevailing teacher-centered and textbook-centered teaching style to an interactive teaching and learning process based on available information sources. This paper defines visual literacy, provides a synopsis of the current research on political awareness among today's youth, and shows how using political cartoons with children and adolescents will enhance their political coartion. It introduces the political their political cognition. It introduces the political cartoon, defining and describing what makes a polit-ical cartoon particularly effective in terms of teaching visual literacy. The political cartoon may be one means by which politics can be more relevant to the young. It is a visual editorial, an interpretive picture which makes use of symbolism and bold and humorwhich makes use of symbolism and bold and humorous exaggeration to present a message or point of view concerning people, events, or situations. The political cartoon can be used with young people to teach visual literacy by: (1) training the right hemisphere of the brain; (2) training for familiarity of conventions; (3) teaching abstractness and symbolism, decoding strategies, ridicule, satire, and parody; (4) helping children learn to glean abstract meaning from visual literacy; (5) training children to communicate in nonverbal ways; (6) helping children operate at higher cognitive levels through cre-

ative and critical thinking; (7) enhancing the political cognition of the young; teaching concepts of conflict, dissent, and criticism in politics; and (8) beliping make the young more realistic consumers of U.S. politics. Appendices describing the editorial cartoon and a model for interpreting editorial cartoons are provided. (Author/SWC)

The U.S. National Education Goals were enacted into federal law in 1994 as the "Goals 2000: Educate America Act." The Graduate School of Library and Information Science at the University of Texas at Austin is addressing the first of these goals, which states that by the year 2000 all children will enter states that by the year 2000 an Children will enhance school ready to learn. This paper describes the need for quality services to preschool children in order to achieve the first national education goal and identi-fies ways in which school and public libraries can work together to provide such services. The five dimensions that define school readiness are: physical well-being and motor development; social and emotional development; approaches toward learning; language usage; and cognition and general knowledge. The paper provides a summary report of a prototype that was developed to achieve the goal of school readiness, and then considers the prototype in light of the mission and services of school libraries, highlighting areas where cooperation between school and public libraries can further enhance the achievement of school readiness. Early childhood is a time of tremendous growth and development, and, therefore, potential. The work that libraries can do with young children, with families, with each other, and with other child advocates, can assist in maximizing that potential. (SWC)

Information literacy is an set of acquired skills and strategies which encompass the abilities to recognize a need for information, to retrieve the required information, and to evaluate and utilize it effectively. Teaching students how to structure, acquire, analyze, and synthesize information must start much earlier than at the post-secondary level. The paper provides a brief review of the history and development of the information literacy project, and describes the resource-based approach that the model utilizes. The information literacy model strives to be an effective tool designed to help students and teacher-librarians in elaborating their research paths. A fundamental assumption upon which the model is based is that the presentation of a rich variety of information resources as well as information, and to evaluate and utilize it effeca rich variety of information resources as well as suggested paths to retrieve these resources will im-prove the quality of search strategies used and, as a

consequence, the research produced. The model is comprised of two major components: an inventory and analysis of identified categories of resources, and the individual research paths designed for each category which outline the process which one might follow in order to rapidly and efficiently utilize a resource. The process fosters independent, cooperative, and resource-based learning. (Author/SWC)

Users of school libraries and teacher resource cen-Users of school libraries and teacher resource centers have had significant problems in accessing curriculum materials in card catalogs as well as in online catalogs. Curriculum-Enhanced [Machine Readable Cataloging] (CEMARC) addresses these problems by: (1) offering data entry guidelines for a minimum USMARC standard (in order to clarify inconsistencies in application) and (2) suggesting enhancements that go beyond the USMARC standard. The Northwest Ohio Educational Technology Enventaging (NYMOET) is the aringst reserved. dard. The Northwest Ohio Educational Technology Foundation (NWOET) is the primary agency responsible for developing the CEMARC format. The NWOET office developed interim guidelines for school library media specialists submitting catalog records to the InfoOhio database which contain recndations for a minimum format for "Brief US-MARC" records in a union catalog database. The required tags for the minimum record concern: fixed required tags for the minimum record concern: fixed data elements; cataloging source; title; publisher/producer/pagination; descriptive tag; and library name. Curriculum-related information is essentially accommodated in three tags. A new tag has been designated for curriculum objectives. CE-MARC records can be developed at the national as well as the state level if the curriculum-related descriptive test are included in LC and Catalogies in scriptive tags are included in LC and Cataloging in Publication (CIP). Local school systems can enhance catalog records with local curriculum objec-tives and special learner needs. School librarians need to encourage publishers of textbook and non-print materials to participate in the CIP program.

It is essential for all students to become life long information users in order to become quality citi-

information users in order to become quality citizens in today's information world. In this paper, a zens in today's information world. In this paper, a school library media specialist illustrates how she and other school district librarians planned and implemented a redesign of the school library facility and a change in the library program. The school librarians discussed issues, conducted research, and attended workshops, conferences, and meetings all concerned with planning and promoting a program. The design group collaboratively designed a workshole, flexible program meeting the needs of the school. The development process at the library at Bellevue Elementary School (Syracuse, New York) began with assuring that resources and services will always be accessible to all patrons. One way to guarantee access is by providing technology such as circulation and online catalog systems. Next, the new library program was presented to the staff. In the new library program, teachers and the school library media specialist planned research projects, booktalks, story time, and thematic units together. The most difficult part of any library program is evaluamost difficult part of any library program is evaluamediate. The program must now be monitored on an ongoing basis to assure continuous improvement in order to provide the best service for patrons. (AEF)

This review focuses on characteristics of effective school library programs which significantly affect student achievement and which have the support of educational decision-makers. In schools with good resource centers and the services of a teacher-librarian, students perform significantly better on tests for basic research skills. The evidence is similarly clear that more reading is done where there is a school library and a teacher-librarian. School resource centers with full-time teacher-librarians even contrib ute to the development of positive self-concepts. The role of the teacher-librarian requires clarification if there is to be any improvement in existing programs. Teacher-librarians must have teaching qualifications and classroom experience prior to fur-ther education and training. The development of student competence is most effective when integrated with classroom instruction through coopera-tive program planning and team teaching by two equal partners—the classroom teacher and the teacher-librarian—yet communication is often lack-ing. There is also evidence that there are benefits to students when school and public libraries cooperate, yet public librarians and school librarians communicate very little. The research literature provides considerable evidence and guidance as to what constitutes effectiveness in the implementation of any desired change. A district policy to guide and sup-port implementation and a district plan for a structured process can prove helpful. The implementation of change requires persistent advocacy and continual leadership and school support. With successful programs in place, teacher librarians can then assume more responsibility for writing about their role and about collaboratively planned programs for professional journals read by teachers and administrators. It is the responsibility of school librarians to provide the specialized assistance necessary to serve inner city children. Although there have been new titles depicting the life of the inner city child, these are not abundant in the library collection. School are not abundant in the inerary collection. School librarians must understand how children learn to read so that they can provide proper instruction. Another significant factor in the literacy development of children is modeling behaviors. Negative attitude toward reading may develop in children in the control of the co who come from home environments where reading is not nurtured or reinforced. Some strategies for developing literacy in inner city children include understanding their background and interests; pres-enting the children with a comfortable environment in which to listen and read; capturing their interests and imagination through story telling; organizing a literacy group which involves parents; encouraging them to set up a reading routine; presenting them with a variety of literature; and incorporating liter-acy instruction with other subject matter. Education, Standardized Tests Identifiers—\*England (Surrey), English Literacy In 1989, England implemented the National Cur-In 1989, England implemented the National Cur-riculum for state schools, which made prescriptive demands on teaching content and approach. This study discusses the requirements of and the contro-versies surrounding the National Curriculum, and the titles of books being promoted for student read-ing which reflect long-established children's fiction and stories from a variety of cultures and traditions. and stories from a variety of cultures and traditions. Library holdings were checked, observations made, and school staff interviewed at two schools in Guildford, Surrey (England). With the National Curriculum, students are offered a comprehensive reading list through all the school years. National standardized tests are given at four key stages and there are assessment and attainment targets for all required subjects at 10 levels. Reading also includes library and information skills to be taught through the grades. The Library Association has summarized certain information skills which form the basis of the new curricula. The two schools that were observed are well respected secondary schools, but both are short on library materials. Since funding is tied to the number of students at a school, schools both are short on intrary materiats. Since runding is tied to the number of students at a school, schools need to spend money on promotional materials in order to gain more students. The biggest problems include the lack of time and resources for meeting all the requirements and the lack of an established school policy. (Contains 16 references.) (AEF)

Distance education strategies offer the potential to overcome barriers of time and distance. The University of Nebraska-Lincoln Libraries have been providing an array of services to distant learners perrolled in UNL graduate degree programs. This paper reviews the services that the UNL Libraries have developed, describes current objectives, and discusses the role of the Libraries in the University's

planning process for distance education. The three components of the University Libraries' distance education program are: (1) remote access to electronic resources; (2) liaison librarian for reference assistance and instruction; and (3) delivery of mateassistance and instruction; and (3) delivery of materials to distance education students, mainly through interlibrary loan. Technological changes are affecting librarians, teaching faculty, and distant students. As the UNL Libraries partner with other units within the University and the state, they are within the University and the state, they are well-positioned to respond to technological change and deliver high quality service to distance educa-tion students. Three appendices include two flyers on library services to UNL distance education students, and a list of handouts distributed to distance education students for the 1996 summer session. The staff of the Creighton University (Omaha, Nebraska) Health Sciences Library has been able to improve not only the library's public relations but also the image of the library by presenting weekly "Lunch-and-Learn" workshops. Since 1990, approximately 15 workshops have been presented each semester with topics ranging from cancer generated. netics and health care reform to surfing the Internet. In addition to library staff members serving as work-shop leaders, Creighton University faculty members have also shared their fields of expertise. Attendance at these workshops has gradually increased as topics have been revised, more avenues of publicity have been devised, and the workshops have been kept to a length of under one hour. Evaluation forms and interest questionnaires are distributed at all workshops to gauge the interests of the library cliworkshops. The highly successful "Lunch-and-Learn" workshops are increasing clients' awareness of the library's services and activities, and will therefore be continued. (Author/SWC)

Omaha, User Preferences

The problem of food and drink in libraries and the potential damage to library materials that may occur have always been troublesome issues. Most at-tempts to totally eliminate food and drink have produced mixed results at best and libraries have expended precious staff time trying to enforce such rules. The food and drink issue is particularly difficult for academic libraries because students and fac-ulty members often spend long hours studying or doing research in the library. Students with little time to spare have found the need to carry nourishment with them and consume it while doing their work in the library. Traditional bans on food and drink consumption in academic libraries are gradually giving way in some institutions to more tolerant policies and practices. Factors influencing this change include changing expectations of library patrons, new customer service and quality philoso-phies, new pest control technologies and continuing pressures to maximize the productivity of library staff. The University Library at the University of Nebraska at Omaha modified its policy toward food and drink with positive results. The Library's experiences demonstrate the pressures leading to change and the practical aspects of communicating, implementing, and enforcing a less restrictive food and drink policy. (Author)

Electronic Text, Higher Education, Information Retrieval, Information Systems, Interlibrary Loans, \*Journal Articles, Library Cooperation, Library Funding, \*Library Services, Online Searching, \*Optical Data Disks, Scientific and Technical Information, Shared Library Resources Identifiers—Creighton University NE Academic libraries have traditionally used interlibrary leading to facilitate document delivery. The

brary lending to facilitate document delivery. The trend of stagnating or dwindling serials budgets in libraries, coupled with increased journal costs, has libraries, coupled with increased journal costs, has served to increase libraries' reliance on the benefits of consortium pricing and shared costs, by utilizing interlibrary lending of journals. ADONIS is a CD-ROM based document delivery system that contains articles from scientific journals which cover a wide area in the biomedical fields, including biochemistry, bioengineering, biotechnology, and chemistry. ADONIS has over 680 journal titles, from more than 70 publishers. The Creighton University Health Sciences Library (CUHSL) in Omaha (Nebraska) began using ADONIS in July 1995. A 486/DX computer with 16Mb of RAM, a 500 Mb hard drive, and SVGA monitor comprise the viewing station. The CD-ROMs are managed by a 500-disk, quadruple-speed jukebox. Articles are a 500-disk, quadruple-speed jukebox. Articles are printed on a Hewlett-Packard Laserjet 4 Plus printer, and incur a charge varying from \$1.50 to \$32.00 per article. Although the text of documents in ADONIS is not searchable, the ADONIS index in ADONIS is not searchable, the ADONIS index is searchable via numerous familiar search techniques. Use of ADONIS has grown since it began operation, and the ADONIS holdings have been loaded into SERHOLD, which noticeably increased interlibrary loan requests for ADONIS materials. Four appendices show ADONIS contact information, original publisher-members of ADONIS, symbols used in ADONIS software, and examples used for an ADONIS presentation. (Author/SWC)

Identifiers—Learning Environments,

Higher education has traditionally been defined as a two dimensional affair concerned with content (curriculum) and pedagogy (instructional design).
Information technologies are transforming the educational enterprise into a three-dimensional universe through the diversification of instructional verse inrough the diversification or instructional delivery systems. The success of higher education in the virtual universe will depend upon the intelligent and creative application of these technologies. The resulting "Virtual University" will foster an emergent reality that will transform the learning experience, while making higher education more accessible, relevant, and affordable. A variety of societal factors-demographic, political, corporate, and technological-are converging to accelerate the creation of virtual universities. Existing efforts by enation of virtual universities. Existing efforts by en-trepreneurs, educators, corporations, and politicians to create virtual learning environments are exam-itive marketplace in which universities must be prepared to deliver their unique educational experi-ence. The components needed to ensure that higher education institutions continue to promote the high-est standards of intellectual exhibit exement. est standards of intellectual achievement, freedom and responsibility in the virtual environment are identified. A variety of roles and contributions librarians can fulfill in transforming institutions of higher education into virtual learning environments are outlined. Reproductions of visual aids are ap-pended. (Contains 32 references.) (Author)

Identifiers-\*Home Pages, HTML

Identifiers—\*Home Pages, HTML
Designing a web home page involves many decisions that affect how the page will look, the kind of technology required to use the page, the links the page will provide, and kinds of patrons who can use the page. The theme of information literacy needs to be built into every web page; users need to be taught the skills of sorting and applying information to their individual needs. Web page design should involve: (1) planning ahead and writing a style sheet to define the who, what, and how of the pages; (2)

keeping the pages simple; (3) designing the pages for fast use and allowing the user to have a choice between text and graphics; (4) making the pages readable; (5) showing the interdisciplinary and hierarchical nature of information and knowledge; and (6) keeping the links up-to-date. While HTML programming does not define the document structure as desktop publishing, the time is quickly coming when the principles of desktop publishing will be used in web publishing. The web designer who wants to design a web page that all browsers can use will use the HTML2 standard. There are resources designed to help with a home page and to evaluate information on the Internet for use when designing web pages. Two such resources are highlighted, as web pages. Two such resources are highlighted, as well as a sample of the Peru State College Library (Nebraska) home page. (AEF)

Developed by the Iowa Department of Education, North Iowa Area Community College, and Hawk-eye Community College (Iowa), this booklet presents the tech prep model for articulation efforts among all educational entities, business, industry, labor, and communities in Iowa. Following a list of committee members working on the model and committee members working on the model and graphs of the model's components, the mission of lowa's Tech Prep program is presented. Descriptions are then provided of the following components of the tech prep model: collaboration; school-to-work transition; articulation; life-long learning and providing students with adaptive skills; integration of technical and academic curricula; increased educational and career octions; butiness, industry. educational and career options; business, industry, and labor involvement; worksite-based learning; life and job skills; applied and contextual learning; technical and academic competence; staff development; career education, cultural diversity, and gender equity; special populations and preparatory services; commitment from all organizational levels; market-ing; the autonomy of different areas of the state; the development of a common vocabulary; and evalua-tion methods. For each component, information is provided on the issue that the component addresses and on recommended patterns of evidence for site-based program design, implementation, and evaluation. Finally, recommendations and strategies for resolution are presented for the following issues affecting the implementation of tech prep-limited financial resources, the need to accept credit for applied course work, licensure and certification requirements that do not allow for the optimum use of qualified faculty, the need for statewide leader-ship, and the need to develop the national tech prep technical core curriculum. Despite recession, economic displacement, and

Despite recession, economic displacement, and corporate downsizing, the demand for higher education in the United States continues to grow. In 1995, there were 14.5 million people seeking higher education, compared to 11.5 million in 1980 and 3.5 million in 1960. Moreover, the relationship between million in 1960. Moreover, the relationship between educational attainment and gaining employment has never been stronger. In 1979, for example, a male college graduate earned 49% more than a similar man with only a high school education, while in 1992 he earned 83% more. In the current political climate, however, cuts in federal student aid are likely. With respect to educational funding in the state of Ohio, cuts in staff of the House of Representatives have eliminated subcommittees and staff familiar with existing educational programs, making it easier to defund programs. According to national

surveys, there is near universal agreement on the importance of a college education for finding a good job, but a growing sense that opportunities to attend college are declining and will get worse. In this climate of uncertainty, the quantitative, numerically-based assessment movement has taken hold, with the determination of program need often reduced to the terms of "too much duplication." The battle to preserve program funding, however, is a battle for access, and educators must remember that access of opportunity is the purpose of public institutions of higher education. (HAA)

The Eisenhower Pre-Service Teacher Education Project was developed by the University of Central Florida, the five community colleges in Region III of the Higher Education Consortium, and the private college and universities in the same region to design curriculum changes to improve the prepara-tion of elementary and secondary math and science teachers. Faculty members at participating institu-tions developed projects designed to both improve the math and science content knowledge of pre-ser-vice teachers, as well as teaching methods in undervice teachers, as well as teaching methods in undergraduate math and science courses. Funded projects included the following: (1) the introduction of "hands-on" activities into college Astronomy and Oceanography courses; (2) the identification of potential K-12 pre-service teachers during their freshman and sophomore years to improve their math and science backgrounds; (3) the development of a field study guide for a college arboretum; (4) regional meetings of two-year college physics teachers to increase communication; (5) the implementation of a professional development speaker series of workshops and discussions focusing on teaching strategies; (6) the development of a statistics activity to let student teachers collect and analyze data ity to let student teachers collect and analyze data ity to let student teachers collect and analyze data from local elementary schools; and (7) an effort to provide methods training to four mathematics ma-jors and allow them to teach classes at local high achools. A sample project and end-of-project evalu-ation are included. (HAA)

lege System
In August 1996, the Washington State Board for Community and Technical Colleges conducted a study of the characteristics of workers enrolled in state and federally funded job skills enhancement training programs from 1990 to 1995 to determine related needs for the state's community and technical colleges. Data sources included a survey of 1,151 upgrading students at 8 representative colleges in November 1990; spring 1990 focus group interviews with upgrading students at 6 community col-

leges; data from college records and state unemployment records for all 13,200 upgrading students who left college during 1991-92; and System enrollment records from fail 1990 to fail 1995. Study findings included the following: (1) in fall 1995, workers enrolled to improve job skills represented 12% (n=26,721) of enrollments, down from 16% in fall 1990; (2) since the pool of 20-39 year olds most likely to enroll in uprade programs has remained likely to enroll in upgrade programs has remained constant since 1990, the enrollment decline would constant since 1990, the enrollment decline would seem to be due to shifting college priorities; (3) for all workers, the median age for college-level classes was 31, while for basic skills classes it was 28; (4) the median wage was 510.81 for workers in college-level programs and 57.93 for those in basic skills; and (6) wage differentials before and after upgrade training were not related to the extent of training received. A discussion of the November 1990 survey and the survey instrument are appended. (HAA)

In April 1995, Lexington Community College
(LCC), in Kentucky, conducted a survey to gather
information about employment trends and educa-

information about employment trends and educational needs in the environmental technician field. The researchers defined environmental technicians as those who implement federal or state environmental technicians, as those who implement federal or state environmental requirements, monitor or sample the environment, audit workplaces for potential hazards, implement appropriate controls, or complete related technical writing and computer applications. Questionnaires were mailed to 332 area firms, requesting information about job requirements and willingness to send employees to LCC for training in environmental technology. Study findings, based on responses from 146 firms, included the following: (1) 33% (n=48) of the firms employed personnel in the environmental field, employing an average of four environmental employees; (2) of 44 firms employing environmental technicians, 22 required only high school completion, 11 required a bachelor's degree, and 9 an associate's degree; (3) 48% of these firms required 1 to 2 years of experience for entry-level technicians; (4) 53% estimated increasing needs for environmental technicians over the next 5 years; and (5) 41 of the 48 firms employing environmental personnel indicated that they would send employees to LCC for one-day training sessions, while 31 would send them for multiple-day training. Data tables are included. The survey instrument is appended. (AJL) information about employment trends and educa-tional needs in the environmental technician field.

This handbook describes the Community Con-nections '95 project, undertaken by members of Washington state's Whatcom County Tech Prep

Consortium to help teachers bring workplace relevance to their classrooms, and provides lesson activities developed by the participants. The first part reviews the project, indicating that 53 educators were placed with 50 businesses, spending 1 day at the worksites to discuss and develop lesson activities. This part also provides a list of participants. the worksites to discuss and develop lesson activities. This part also provides a list of participants; strategies for using the handbook; sample brochures, handouts, agenda, and evaluation instruments; and comments from business and educator evaluations of the project. The second part presents 43 workplace applications lesson plans developed in the project organized into the following five career pathways: arts and communication, business and marketing, health and human services, technology and industry, and science and natural resources. For and moustry, and science and natural resources. To each lesson plan, the handbook provides a profile of the business involved; the title, preparing instructor, and suggested grade level of the lesson; a descrip-tion of the skills applied; the state learning goals covered; the specific goals for student learning; the amount of time needed to complete the lesson; a list of materials needed; an overview of activities and directions for completing them; and suggested as-sessment methods. Burnout affects all professions but tends to be
more pervasive in the human service occupations
such as education. Symptoms include dissatisfac-

such as education. Symptoms include dissatisfac tion, negativism, boredom, unpreparedness, testi-ness, frequent illness, forgetfulness, depression, and iredness, request miness, to gettainess, expression, and it iredness. The wellness approach can lessen or prevent burnout in a community college setting. Centered upon the idea of individuals taking responsibility for their own health status, the approach encompasses the management of time, peo-ple, space and physical well-being. Instructors have the responsibility to determine if their teaching is being affected by burnout through regularly com-pleting self-assessments of personal and professional strengths, limitations, and skill areas and recognizing sources of excessive stress. Once nega-tive conditions are identified, faculty should seek ways to prevent or diminish them by achieving and ways to prevent or diminish them by achieving and maintaining a balance among their spiritual, social, emotional, intellectual, and physical well-being. Fi-nally, specific suggestions for managing time, space, people, and health include keeping weekly sched-ules of things to do, organizing classroom space and materials to reflect a stress-free environment, developing a cooperative spirit in personal interactions through the sharing of ideas and decisions, and eating well and exercising regularly. Time management and strategy charts for avoiding burnout are in-cluded. Diet and exercise tips for avoiding burnout are appended. (HAA)

The purpose of this booklet is to help teachers

prepare students to live and work harmoniously in a society where diversity is the norm. Following background information on the development of the

booklet, strategies are described for increasing harmony and learning in the classroom, such as creat-ing diverse collaborative learning groups to bind members to a common goal. Next, a discussion is provided of the stages involved in creating a more inclusive curriculum and a glossary of terms related to race, gender, and class is presented. Common myths related to social class are then presented, along with statistical data to help dispel the myths, and 1985 data are presented on wage gaps between men and women and between whites and minorities. Finally, eight suggested classroom activities and ex-ercises designed to sensitize students to the effects of gender, race, and social class roles are briefly described. Appendixes provide a description of four first-day classroom exercises to encourage student interaction; a bibliography of 73 books, 75 newspaper and magazine articles, 11 films, and 21 videotapes dealing with race issues; and a bibliography of 44 books, 21 articles, and 40 films and videos reto gender issues. Contains 26 references. (AJL)

Transfer Students, Community Colleges, Educational Cooperation, Educational Mobility, Higher
Education, Intercollegistic Comparation Program Education, Intercollegiate Cooperation, Program Improvement, \*Transfer Policy, \*Transfer Programs, Two Year Colleges Community colleges have been criticized with respect to both the low numbers of students who

transfer to four-year institutions and the inadequate preparation of the students who do transfer. Howthere is no uniform method for calculating transfer students and the data that do exist on their performance indicate that they do as well as native students. Clearly, articulation between two- an four-year colleges is about more than the numbers of students transferring; it involves admission, exclusion, readmission, counseling, curriculum plan-ning, and course and credit evaluation. Differences in academic cultures and attitudes between two- and four-year institutions and their faculty do create barriers for two-year college transfer students, while establishing transfer criteria and the authority for transfer decisions are also problems. Three styles of articulation agreements currently operate: formal and legal policies, state-system policies, and voluntary agreements among institutions. As part of an effort to examine articulation practices and problems and investigate the feasibility of an approval service for two wear college chemistry transfer prolems and investigate the feasibility of an approval service for two-year college chemistry transfer pro-grams, the American Chemical Society's Commit-tee on Education sponsored a conference on two-year college programs in November 1995. While the 15 participants decided that such a service would be too expensive, they did develop recommendations for improving articulation related to developing a literature base, promoting a consensus on articulation among all concerned parties, and establishing mechanisms to promote collegiality and trust. A chart of proposed data elements for improving the articulation of chemistry programs is appended. (TGI)

A study was undertaken to determine the effectiveness of reading comprehension strategies in im-proving the reading skills of underprepared students at a community college. The instructional strategies, which included determining main ideas of passages, drawing inferences and conclusions, and building vocabulary within the context of readings, were implemented in a college-prep reading class of 28 students. Outcomes were measured by students' performance on Nelson-Denny and departmental reading tests administered at the beginning and end of the course. In addition, changes in students' attitudes toward reading were determined through responses on a teacher-prepared self-awareness survey distributed during the first and twelfth weeks of the class. Results included the following: (1) of the class. Results included the following: (1) while only 4 of the 28 students received passing scores (i.e., 62% or higher) in reading comprehension on the departmental pre-test, 24 did so on the post-test; (2) although there was an average increase of 2.8% between the Nelson-Denny pre- and of 2.8% between the Nelson-Denny pre- and post-tests, the results were not significant; and (3) with respect to the frequency with which they practiced 10 effective reading behaviors on the self-awareness survey, only 4 students responded "often" on at least 80% of the questions at the beginning of the class, compared to 22 students at the end of the class. Contains 15 references. The survey instruments, reading suides describing the three stratuments. struments, reading guides describing the three strat-egies, and sample exercises are appended. (HAA)

Despite the costs of implementing technology at community colleges, the benefits gained include increased instructor creativity, increased student interest and learning, and greater flexibility of instructional delivery. Instructional technology may be implemented in two ways: first, the use of technology as a simple add-on to enhance current instructional methods by integrating text material with sound, photos, full-motion video, and graphics; and second, the use of technology to transform both the teaching and learning function by providing stu-dents with access to multimedia computers stations dents with access to multimedia computers stations equipped allowing them to work on course content at their own pace. Due to the high costs of system maintenance and training and the potential redefinition of the role of faculty in the educational process, colleges should try to find the right balance of technology-based and faculty-based instruction. Although new technology may provide access to more individuals to instruction or communication, it may also create more disadvantages for those students in exceptionally depressed area, so at those they have economically depressed areas and those who have never been exposed to computer technology prior to entering college. Innovative solutions to the issues presented by the adoption of new technologies in-clude the creation of committees to oversee technology spending and instituting a student technology fee to cover costs associated with continual upgrading. This document provides an accountability report
for New Jersey's Atlantic Community College
(ACC) for fiscal year (FY) 1995. Following ACC's
mission statement, 11 institutional goals are presented for FY 1995, with each goal including a list of
specific institutional objectives to be undertaken or
completed during the year. Next, benchmarks of
achievement are provided for each institutional
goal, describing specific activities completed by individual departments or units. Indicators of institutional effectiveness for FY 1995 are then presented,
including data on the following: (1) student goal including data on the following: (1) student goal attainment, related to access to postsecondary edu-cation, completion, transfer, participation in the stu-dent activities, and access for ethnic minorities and dent activities and females; (2) ACC faculty characteristics and vitality; (3) affordability and financial aid received by students; (4) student satisfaction with academic areas, student services, and institutional resources; (5) the measure that ACC meets New Jersey's educational needs, including initiatives related to continu-ing and career education and partnerships with educational institutions and business; (6) graduate placement; (7) alumni satisfaction; (8) the degree to which ACC provides a return on investment placement; (7) alumni satisfaction; (8) the degree to which ACC provides a return on investment through workforce development, charitable events, and improvement projects; (9) degree and program offerings; and (10) ACC's Board of Trustees. Appendixes provide data on the number and percentages of the provided data on the number and percentages. age of degrees awarded by academic discipline, FY 1992 to FY 1996; a list of ACC cultural events, July 1994 to June 1995; and articulation agreements for 1995. This report provides data on institutional out-comes as of 1996 for Tyler Junior College (TJC), in comes as of 1996 for 1918 Junior College (17C), in Texas. The first part provides background informa-tion on the college, including a list of the Board of Trustees, the TJC mission and philosophy state-ments, a brief history, and a map of the campus. The second part provides data on student characteristics in terms of age, ethnicity, gender, and class level for fall 1989 to summer 1996, while the third describes student enrollment, including data on headcount enrollment, 1988-96; in-state, out-of-state, and in-ternational enrollment for fall 1995 and spring 1996; first-time enrolled high school graduates by county, 1990-95; semester hours in credit classes by student residence, 1988-96; early admissions by high school students, 1992-96; class sections formed, 1989-96; grades awarded, 1990-96; enrollment in instructional television programs, 1990-96, and by modem connection, 1994-95; college-wide and by modem connection, 1994-95; college-wide semester grade point average, 1988-96; students on academic suspension and probation, 1989-96; continuing education enrollment and funding, 1990-95; graduates by degree or certificate, 1992-96; and graduate age, ethnicity, and gender, 1990-95. The fourth part provides information on TJC faculty, including full- and part-time status for 1992-95 and the ethnicity, age, years of service, and advancement of full-time faculty for 1994-95. The fifth part provides 1996 data on revenues and expenditures. provides 1996 data on revenues and expenditures, including salaries, costs by program, and aid re-ceived by students, while the sixth describes the operations of the TJC Learning Resources Center. The final three parts provide statistics on computer services, student services, and the Ornelas Health and Physical Education Center. (HAA)

Two Year Colleges
Identifiers—"Peer Coaching
Peer coaching is a method for improving instructor effectiveness in which educators work together
to implement experiential strategies or achieve indi-

tor effectiveness in which education work together to implement experiential strategies or achieve indi-vidual educational goals through a systematic pro-cess of classroom observation and feedback. Peer coaching has two main goals: the improvement of experiential education and the development of an atmosphere of collegiality and experimentation. An effective coaching team consists of two to four educators, not necessarily from the same discipline, who are familiar with group strategies, have access to one another's classrooms for observation, are open to experimentation, and trust and accept one another as peers. The peer coaching process consists of the following three steps: (1) a pre-observation conference, in which the coaching team meets to plan for a classroom observation; (2) classroom ob-servation, in which the coaches observe the instrucclasses, taking notes or creating a videotape; tor's classes, taking notes or creating a videotape; and (3) a post-observation conference, in which the coaching partners meet to discuss the data gathered during the observations, as well as the instructor's perceptions of the group session. Four types of feedback are used in post-observation conferences: praise comments, clarifying comments, eliciting questions, and leading questions. Contains 13 references. Appendixes provide a group work assessment form, a 16-item reading list, and conference work-sheets. (HAA)

As the world has moved from the industrial age to a technology-based society in which individual and

a technology-based society in which individual and a technology-based society in which in the focus of edu-cational systems must shift from the basic ABC's to Competency-Based Education (CBE). Educational priorities must be continually revised to meet competitive and ever-changing workplace demands and student performance must be assessed on specific, employer-determined competencies. The new paraemployer-determined competencies. The new para-digm for CBE comes, in part, from the Secretary's Commission on Achieving Necessary Skills (SCANS), which identified five necessary skill com-petencies for effective workers (i.e., allocating re-sources, interpersonal skills, acquiring and using information, understanding social and organiza-tional systems, and being able to select and apply technology) and the following three foundation skills: (1) basic skills, such as reading, writing, and arithmetic; (2) thinking skills, including creative thinking, reasoning, and problem-solving; and (3) personal qualities related to responsibility, self-es-teem, and sociability. For the past few years, technipersonal qualities related to responsibility, self-es-teem, and sociability. For the past few years, techni-cal and community colleges have been cooperatively defining what needs to be learned to perform specific jobs or tasks and to what level for specific job titles based on the CBE paradigm. To ensure that specific competencies are imparted to all students, teachers should improve their understand-ing of the learning recess and such theories of ining of the learning process and such theories of in-structional effectiveness as learning styles theory, learning domains theory, and Bloom's Taxonomy of learning and evaluation modes. grated Curriculum, Interdisciplinary Approach, Liberal Arts, Pilot Projects, State Programs, Teacher Participation, \*Technical Education, Two Year Colleges, Vocational Education Identifiers—Michigan
Beginning in 1995, the Michigan Department of Education sponsored pilot projects at the state's community colleges to develop curricular learning models and/or courses that integrate liberal arts or general education into vocational programs, identify and document faculty collaboration between liberal arts and occupational programs, and determine barriers interfering with the integration process. Throughout 1995, workshops and seminars were held with project teams and by fall 1995 at least four colleges had completed pilot projects. Delta College developed a nursing project integrating an introduction to health care, a health care thics, and a writing class into a learning community model. At Henry Ford Community College, a technical physics course was developed that frames course modules within industrial situations. Macomb County Community College implemented a

business and technical writing course designed by faculty from the English, Technology, and Account-ing Departments, while at Northwestern Michigan College, a multidisciplinary course was developed focusing on the necessary skills for entry-level workers in high-performance manufacturing organiactions. Common themes arising from the projects included the use of innovative pedagogical approaches, the lack of articulation between the new models and existing high school and college curricmodels and existing high school and college curricula, a focus on communication skills, the existence of clear target audiences for each project, the need to overcome existing institutional climates resistant to change, and the importance placed on assessment. A directory of participants is appended.

Descriptors— \*Academic Education, Community Colleges, \*Curriculum Development, Educational Change, Educational Improvement, \*Educational Strategies, Education Work Relationship, \*Integrated Curriculum, Program Development, State Programs, \*Tech Prep, Two Year Colleges, \*Vocational Education Identifiers—Michigan Prompted by requirements of the 1990 Perkins Act and a growing dissatisfaction among employers with college graduates' skill levels, many schools have undertaken curricular reform through tech prep and school-to-work, with most of the efforts

prep and school-to-work, with most of the efforts working toward the integration of academic content into vocational programs. In general, however, tech prep implementation has been more active at the K-12 level than at community colleges. Research on curriculum integration in community colleges has revealed eight main approaches: general education requirements; applied academic courses; the incor-poration of academic skills into occupational programs; the incorporation of academic modules into occupational courses; multidisciplinary courses combining academic and occupational concerns; combining academic and occupational concerns; tandem courses or learning communities; col-leges-within-colleges, where students take all of their classes together; and remedial programs with an occupational focus Benefits of curriculum inte-gration include an improved ability to meet the needs of occupational and transfer students; bridge isolated sectors of the college; and form industry partnerships; while the considerable barriers include roblems in articulating courses; faculty reluctance partnerships; while the considerable barriers include problems in articulating courses; faculty reluctance to change; and lack of expertise, leadership, and resources. In Michigan, a statewide curriculum integration project was undertaken to develop new courses and identify barriers to integration. Pilot projects were funded at four colleges, with the Wisconsin Instructional Designs Systems (WIDS) framework being used for curriculum writing. Lists of future directions and recommendations for further integration are included. Contains 17 references. (AJL)

The StudentPal program is a student tracking system developed jointly by the Multicultural Affairs
program and High Technology Center at Glendale
Community College, in Arizona. The program uses
computer-assisted tracking to target students and

various student characteristics and identify at-risk factors to improve the retention and success of mul-ticultural/minority students. StudentPal also helps offset potential risks, as students can be targeted for tive intervention services. The system pro-active intervention services. The system was de-signed to provide data on subsets of specific student groups to fulfill the needs of administrators, aca-demic departments, faculty, multicultural student coordinators, and institutional researchers, making available analyses of stopout patterns, student course load trends, program enrollment fluctua-tions, retention rates, and dropout patterns. Specific factors that can be tracked with StudentPal include students who have low grade point averages and are older than a given age or are from certain zip code areas, as well as those who withdraw, have incomplete financial aid files, or have not attained their goals. The program has significantly enhanced the fulfillment of the objectives and initiatives of the Multicultural Affairs Program. In addition, once the program was in place, an early warning and reten-tion system was developed to facilitate faculty refer-rals of potential at-risk students. StudentPal hardware and software requirements and a sample early warning form are included. (AJL)

Two Year Colleges
The community college movement has been well-documented since the organization of the first junior colleges. This documentation has been maintained by six groups: scholars and professors, the popular media, institutional research, state agencies, faculty organizations, and national organizations. Currently, approximately 100 scholars and professors employed in prestigious university or college settings research, teach, and write about community colleges. Written by recognized experts in the field, this research is generally influential, but is usually this research is generally influential, but is usually published in scholarly journals with limited reader-ships. In contrast, writings produced by the popular media have the potential for a vast readership, which makes it the second most influential category of documents. Institutional researchers produce re-ports on preset topics to meet mandates from many sources and directed at a small, select audience.
State agencies, for their part, make specific fact and figure requests from individual community colleges and publish information on demographics, student progress and success, and course offerings. Although faculty in community colleges do not usually experience the same pressure to publish as university faculty, they do produce materials in the form of reports by faculty groups, updates on research projects, current trends, and practical application. Finally, national organizations can produce influential works since they often enjoy a solid financial base from dues-paying members and strong net-works and affiliations. Contains 68 references.

Providing a case study of instructional organization and evaluation processes in Quebec's "Colleges
d'enseignement general et professionnel"
(CEGEPs), this report describes the provincial
Commission on the Evaluation of Collegiate Teachtion and a 1994 evaluation of "Techniques d'education en services de garde" (TESG), or child care
education, programs at CEGEP Saint-Jerome. Following introductory materials, the first part reviews lowing introductory materials, the first part reviews the creation of the Commission in 1993, describes its mission and general activities, and discusses the organization of program evaluations, including their legal context, objectives, criteria, and stages. The second part describes the general characteristics and academic organization of CEGEP Saint-Jerome and provides a case study of issues and actions taken related to the 1994 evaluation of TESG programs. The case study examines the college's methods for evaluating programs before and after the creation of the Commission, the history of TESG programs at the college, steps taken and committees formed to prepare for the evaluation, the distribution of responsibilities in the process, the adoption of self-evaluation reports, the Commission's site visit self-evaluation reports, the Commission's site visit and preliminary report, the college's response to the report, and the preparation of the Commission's largely positive final report. Finally, the third part focuses on the impact of the TESG evaluation from both the college's and the Commission's point of view. A graph comparing pre-university instruc-tional systems in Canadian provinces, the United States, and France and an organizational chart of program evaluation in Quebec are appended. Contains 14 references. (BCY)

Although data on sexual harassment in the community college is limited, it is clear that it does exist and that it runs counter to the colleges' educational mission. Sexual harassment has been defined as verbal or physical conduct of a sexual nature, imposed

bal or physical conduct of a sexual nature, imposed on the basis of sex, that denies, limits, or provides different treatment. Recent legal developments, such as Title IX of the 1972 Educational Amendments, dictate that colleges and universities create clear policies and procedures to deal with alleged incidents of sexual harassment. As such, colleges should be aware of the behaviors that can lead to should be aware of the behaviors that can lead to sexual harassment, such as situations where power held by virtue of gender, rank, or role create an unequal relationship. For example, behaviors based on a "quid pro quo" relationship represent harassment, as does the creation of a hostile environment for an individual. In working to prevent sexual harassment, five elements have been proposed by the American Council on Education, including a definition of sexual harassment, a string policy statement indicating intolerance of such behavior, effective communication with those involved or subject to communication with those involved or subject to related provisions, education for everyone, and an accessible grievance procedure. Research has shown that the implementation of a policy including these elements can have a noticeable effect on the incidence of sexual harassment. (TOI)

Identifiers-ERIC Digests There are clear advantages as well as disadvan-tages in encouraging greater mission convergence between community colleges and proprietary schools, such as for-profit vocational schools and career colleges. Proprietary schools have long at-tracted controversy related to their financial aid and fundraising practices, while at the same time fulfillfundraising practices, while at the same time fulfiling a clear community need by providing vocational programs promising quick preparation and transition to work. Similarities do exist between community colleges and proprietary schools, including curricula that emphasize post-graduate employment preparation and general education for traditional degrees and the diversity of their student populations. Strong differences are found however, in now tions. Strong differences are found, however, in governance and the distinction of public versus private status. Moreover, questions remain regarding differ-ences in accreditation standards and the acceptance of proprietary school credits by other postsecondary institutions. When discussing the convergence of the two institutions, a distinction must be made bethe two institutions, a distinction must be made between "organic" approaches (i.e., a result of the natural evolution of the institutions) and "forced" approaches (i.e., influenced by outside forces, such as the federal government through financial aid awards). The market-driven orientation of propriate the control of awards). The market-driven orientation of propri-etary schools and the more diverse goals of commu-nity colleges present a formidable barrier to organic convergence, while low graduation and transfer rates of community colleges, a shifting focus in the community college curriculum, and increased pub-lic funding for students at proprietary schools indi-cate a movement towards a forced convergence.

As part of a project to develop an instructional
model that integrates ideas, readings, and discussion
about pluralism and identity across disciplines,
Lakeland Community College (LCC), in Ohio, undertook a survey of college faculty to determine
their perceptions of multiculturalism and diversity,
as well as the methods that they used to incorporate
these lagester into the classroom. Becomes were those elements into the classroom. Responses were received from 54 faculty members, representing 13% of the questionnaires distributed. Study find-

ings included the following: (1) 46% of the respondents indicated that there were course requirements in their disciplines addressing cultural diversity is-sues, and 70% thought that multicultural issues were relevant to their discipline; (2) 55% said that they relevant to their discipline; (2) 55% said that they cited examples related to multicultural issues during class, but only 33% indicated that they evaluated students using a multicultural approach; (3) 46% were satisfied with the way that LCC addressed multicultural issues, while 38% were not; and (4) challenges to instituting multiculturalism education cited by respondents included the difficulty of incited by respondents included the difficulty of in-corporating the vast spectrum of perspectives that exist, the homogeneity of the student body, and lack of awareness regarding how to incorporate it into courses. The survey instrument, with response tallies, and selected answers to open-ended ques-tions are appended. (HAA)

Based on statistical research and interviews with

Based on statistical research and interviews with students, educators, and employers, this book offers a comprehensive overview of the education and training of the mid-skilled labor force comprised of individuals having at least a high school diploma but less than a baccalaureate degree. Following prefactory materials, chapter 1 highlights the importance of the mid-skilled labor market to the U.S. economy and describes distinctive characteristics of its members. Chapter 2 discusses the educational pathways into the mid-skilled labor market, focusing on the role of two-year colleges in preparing this group, while chapter 3 presents data on the economic efwhile chapter 3 presents data on the economic effects of sub-baccalaureate education, suggesting that individuals completing credentials can benefit substantially. Chapter 4 examines non-college, shorter term job training programs, suggesting that the benefits gained from these programs are small, and advocates a unified system of job training and educational programs. Chapter 5 reviews implications of the characteristics of mid-level workers for the integers. tions of the characteristics of mid-sever workers for two-year college curricula, arguing for the integra-tion of occupational, academic, and remedial in-struction, while chapter 6 discusses possibilities for enhancing connections between community col-leges and employers. Chapter 7 examines implicaleges and employers. Chapter 7 examines implica-tions for public policy, arguing that the needs of the mid-level workforce have been neglected at the fed-eral, state, and local levels. Finally, chapter 8 con-siders trends in student characteristics, institutional structures, and the labor market to clarify future needs. Contains 233 references and an (HAA)

College This document provides the strategic plan for Delaware Technical and Community College for 1996-2000, reviewing trends, college goals, and outcome measures for five key areas of college operation. The first section addresses college resources, projecting a 3% average increase in funding over the next 5 years and highlighting college goals related to preparing a 5-year revenue and expenditure forecast and developing an institutional advancement plan. Next, educational programs are addressed, indicating that jobs are becoming increasingly technical and service-oriented and describing such goals as updating technology programs to include skills needed by employers and establishing curricular linkages between corporate and community training. Trends, goals, and outcomes related to educational innovations in telecommunications and fiber-optic networks will change society and educathat innovations in telecommunications and fi-ber-optic networks will change society and educa-tion and reviewing goals related to developing student skills in accessing, retrieving, and integrat-ing information electronically; developing a new distance education plan; and establishing an ade-quate distance education infrastructure. The next section focuses on a supportive college services. quate distance education infrastructure. The next section focuses on a supportive college environment, as the student body becomes more diverse. Goals described for this area include diversifying instructional methods and integrating multicultural and global awareness into the curriculum. Finally, issues related to college partnerships are reviewed, since lifelong learning and the attainment of higher education are increasingly necessary to maintain worker employability. Goals described for this area include developing 4+2 programs with high schools and expanding articulation programs with senior institutions. (HAA)

tem
This instructional booklet presents an overview of
the Developmental Education Student Retention
Tracking System (DESRTS), developed by the
South Carolina State Board for Technical and Comprehensive Education to make information availprehensive Education to make information available on the retention and graduation of developmental students in the state's technical colleges. Following an overview of the purposes of DESRTS, the elements of the tracking system are described, indicating that it contains data related to student identification, program identification, course information, and determining student status. The process undertaken to develop the System is then described and methods for identifying cohorts are detailed, revealing that first-time freshmen are tracked for approximately 5 years, with cohorts formed of students' who score high enough on assessment tests to take college-level courses but need some developmental classes (Cohort I) and those who need prerequisite assistance (Cohort II). The following six reports generated by the System are then reviewed: (1) headcounts and percentages of students who began in developmental courses; (2) Cohort I students who completed their development work; (3) Cohort I students who did not complete their developmental work; (4) first-time freshman with associate degree majors; (5) Cohort Itsudents' activities after prerequisite courses; and (6) Cohort II students' changes in majors. Samples and explanations are then presented for each report. Finally, discussions are provided of the reliability of data generated by DESRTS, the uses of the data, and plans for further study. Descriptors—\*Collective Bargaining, Community Colleges, Contract Salaries, Educational History, Faculty College Relationship, Governing Boards, \*Negotiation Agreements, Negotiation Impasses, Scope of Bargaining, \*Teacher Militancy, \*Teacher Strikes, Two Year Colleges, \*Unions Identifiers—\*City Colleges of Chicago IL Written by a negotiator for the Chicago City College Board approximately a year after the signing of the first faculty collective bargaining agreement at the college on May 2, 1967, this paper reviews the climate and key elements of the collective bargaining process. First, an overview is provided of the negotiation process, indicating the agreement was reached only after countless hours of effort, 35 negotiating sessions, and 2 strikes. The contract is then described, indicating that it provided faculty with salary increases, health benefits, reductions in class load, and tax-sheltered annuity provisions. The contract was considered a victory for the teachers' union. Key procedures, pledges, and pre-conditions are then reviewed which could have reduced construct was considered a victory for the teachers' union. Key procedures, pledges, and pre-conditions are then reviewed which could have reduced constructions. tract was considered a victory for the teachers' un-ion. Key procedures, pledges, and pre-conditions are then reviewed which could have reduced con-flict and shortened the lengthy negotiations, such as agreement on transcribing proceedings, the location of negotiations, the time and frequency of meetings, and the establishment of a "no strike" pledge upon initially entering negotiations. The Board's failure to adequately prepare a precific set of proposals is then initially entering negotiations. The Board's failure to adequately prepare a specific set of proposals is then described, indicating that it let the union set the terms and language of the proposals under discussion and hindered the Board's ability to evaluate the proposals. The time and money spent during the process, the make-up of the negotiating teams, the role of publicity in the process, and the militant tactics of the union are then discussed. Concluding remarks detail the virtues of the process, including the benefits afforded to teachers and the development of clear-cut college-wide policies and procedures. (AJL)

Descriptors—Academic Achievement, \*College Mathematics, Community Colleges, \*Counselor Performance, Educational Counseling, Predictive Validity, Program Effectiveness, \*School Counselors, \*Student Placement, Two Year Colleges Identifiers—Rochester Community College, in Minnesota, to compare pass rates in a college-level mathematics class for mathematically

college-level mathematics class for mathematically underprepared students who enrolled in developmental courses and those who did not. The study population consisted of 73 students enrolled in Math 103, while data were collected on the student's final grade, math placement level, whether or not they had enrolled in the prerequisite math class, and the grade they received in the prerequisite course. The study found that 35 of the 73 students were appropriately placed, following a counselor's advice, and passed Math 103, while 15 students had also followed a counselor's advice but did not pass. In addition, of those who disregarded placement advice, 13 did not pass and 10 did. The results of the study showed a statistically significant relationship between passing the course and following placement advice given by counselors based on math skill as-sessment scores. Three conclusions were drawn from the results: students should heed their counselor's advice; the advice does make a difference if students are to pass college math; and counselors at the college can feel confident that their mathematics placement recommendations are valid. Contains 21 references. Graphs and tables are appended. (HAA)

Two Year Colleges
Identifiers—Rochester Community College MN
In winter 1995, a study was conducted at Rochester Community College (RCC), in Minnesota, to examine the effectiveness of a study skills class (SS198). Specifically, the study sought to determine if the course met established criteria of retaining 50% of completers in good academic standing for l year, to compare retention rates to non-enrolled developmental students, and to gather feedback on the best and worst aspects of the class. Data were gathered from a literature review, a survey of students enrolled in winter 1995, and enrollment and grade point average (GPA) records from RCC's student information system. Study findings included the folinformation system. Study findings included the fol-lowing: (1) 9 of the 20 developmental students en-rolled in SS198 were still attending RCC 1 year later, less than the desired 50%; (2) these 9 students had an average GPA of 2.5; (2) of a sample of 20 developmental student who did not take SS198, only 4 were enrolled 1 year later; (3) these 4 stu-dents had an average GPA of 2.6, not significantly different from that of SS198 completers; (4) the ele-ments of the course receiving the most favorable exponence were the Internet tonics, the variety of responses were the Internet topics, the variety of topics addressed, and the outside activities; and (6) the elements receiving the most negative responses were the Internet topics and the fact that the class met only once a week. Contains 25 references. The survey instrument and data tables are appended.

nel Services, Two Year Colleges Identifiers—Rochester Community College MN In 1995, this project was undertaken at Rochester Community College (RCC), in Minnesota, to develop a guide to services for students with disabilities to improve the provision of legally-required services and information. To determine both the special services needed by students with disabilities for college success and the topics that should be included in the guide, six activities were undertaken. First, a literature review was conducted, with results grouped by the special services needed by results grouped by the special services needed by students with disabilities. Formative and summative committees were then established to review and validate the topics gathered in the review. Next, the formative committee provided input on design and format requirements for the handbook, and a draft version was prepared of the handbook. The summa-tive committee reviewed the draft and a final copy was developed and submitted to the Dean of Stuwas developed and submitted to the Dean of Stu-dents. It was recommended that all new students with disabilities be given a copy of the handbook to help them adjust to college. The resulting handbook is attached, providing information related to getting started at RCC; the college's program of services, including a list of available services; creating an edu-cational plan, including recommendations for initial

courses; successfully implementing the educational plan, highlighting study strategies and requirements for college success; definitions of learning disabilifor college success; definitions of learning disabilities and eligibility for related services; local, state, and national polices pertaining to students with disabilities; and local service agencies. \*College Planning, Community Colleges, \*Educational Finance, Educational Improvement, \*Educational Strategies, Higher Education, Needs Assessment, Organizational Objectives, Outcomes of Education, \*School Effectiveness, Self Evaluation (Groups), \*Statewide Planning, Two Year Colleges, Universities
Identifiers—\*Montana University System
Prepared as part of a review of outcomes assessment programs at the six universities and three community colleges of the Montana University System this report reviews existing or planned assessment

munity colleges of the Montana University System, this report reviews existing or planned assessment initiatives and provides recommendations. Following an introduction, the historical context of outcomes assessment is described, highlighting developments at the national and local levels and related national legislation. Next, the current status of outcomes assessment in the System is discussed, focusing on the following elements: (1) the role and responsibilities of each unit of the System; (2) existing activities at individual campuses, including proficiency assessment for students pursuing education degrees, student-tracking systems, and early academic intervention; (3) recently developed activities, including the development at one campus of an ties, including the development at one campus of an Assessment Committee; (4) planned activities, such as analyses of graduate placement and satisfaction and an economic impact study; and (5) current and anticipated fiscal needs. A review of specific issues anticipated fiscal needs. A review of specific issues associated with the implementation and consequences of assessment is then presented. Finally, specific recommendations for encouraging assessment activities on campuses are provided, emphasizing the need to develop and implement specific student and teaching assessment activities to achieve institutional improvements and allocating fiscal resources for practices designed to improve learning. Identifiers-New Mexico State University Carls-

Prepared for a site visit by the North Central Association (NCA), this report describes the goals and

vision of New Mexico State University's two-year branch campus at Carlsbad (NMSU-C) through the year 2000. The first section states the mission, goals, and purposes of NMSU-C, while the second de-scribes six campus-wide initiatives to be completed by the year 2000 and related implementation strategies. The next section provides the vision statements and college planning model for academic affairs, while the fourth section reviews a proposal to organize academic programs into related clusters to allow greater faculty input into decision making and make it easier for students to obtain faculty expertise and sponsorship outside of the classroom. The next four sections describe the resulting four academic program clusters: (1) communication arts, business studies, teaching, and developmental stud-ies in language arts; (2) nursing, allied health, and wellness; (3) science, mathematics, computer sys-tems, and engineering, environmental, and manufacturing technologies; and (4) social sciences, international relations, and special studies. For each cluster, a mission statement, projected number of cluster, a mission statement, projected minister of students for the year 2000, program strategies, the role and scope of the cluster, and a budget for 1994-95 are provided. The final sections present a travel budget for professional faculty development a for 1994-95 and an overview of student services at the college, including a flow-chart of student suc-cess. (AJL)

since the economic difficulties of the 1980s and 1990s, community colleges have had to reconcile limited resources with open door admissions policies and a broad institutional mission. College bud-gets have not generally increased sufficiently to compensate for rising costs, with state-level finan-cial support for higher education falling by 9.5% to 30% in various states between 1990 and 1991. In 30% in various states between 1990 and 1991. In California, a 1992 study revealed that the revenue sources supporting the state's community colleges provided \$2.8 million per year, but that \$5.1 billion were needed for the colleges to meet the standards advocated by the state Board of Governors. This funding gap has had many consequences in the state, such as a larger student/faculty ratios, larger class sizes, and higher course loads taught by inclass sizes, and higher course loads taught by in-structors each academic term. Some of the methods utilized by California's community colleges for working around the budget limitations have inworking around the budget limitations have in-cluded increasing business ventures, such as licens-ing college logos and accepting corporate sponsorship for athletics; cutting course sections; reducing personnel; and transferring costs by defer-ring planned maintenance or moving employees to alternately-funded programs. Although many of these activities have had serious effects on the abil-ity of the colleges to fulfill their mission, similar ity of the colleges to fulfill their mission, similar measures will have to be taken to balance commu-nity needs, institutional mission, and state resources in the future. At community colleges, women currently com-prise approximately 20% of all chief executive offi-cer (CEO) positions. The single most important source from which new community college CEO candidates are selected, however, is the pool of deans of instruction and since 21% of current deans are women, it is likely that these numbers will rise. Moreover, there is evidence that the way in which college presidents approach leadership is changing from "take charge" approaches often associated approaches often associated with male leaders to approaches emphasizing participatory and shared decision-making. A 1990 study of executives in business and management con-cluded that female executives tended to be more interested than male executives in transforming tional gender stereotypes; (2) redefine power and the power structure of the institution; (3) enact genrelated policies and procedures; (4) raise colle gial consciousness and initiate collegial dialogue on gender and related issues; and (5) take a proactive stance on public policy and debate beyond the local campus. prepared as Book Two of a focused evaluation report submitted to the North Central Association (NCA), this document describes the characteristics and activities of New Mexico State University's two-year branch campus at Carlsbad (NMSU-C) that fulfill the NCA's general institutional requirements and five criteria for accreditation. First, descriptions and supporting data are provided showing NMSU-C's fulfillment of 24 general requirements in the areas of mission, authorization, governance, faculty, educational programs, finances, and the public dissemination of information. Next, narratives are presented describing the college's fulfillment of the following five criteria: (1) a clear and publicly stated institutional purpose consistent with the institutional mission and appropriate to an institution of higher education; (2) the effective organization of human, financial, and physical resources; (3) evidence of the accomplishment of the institution's educational and other purposes; (4) evidence that the institution can continue to accomplish its purposes and strengthen its effectiveness; and (5) demonstra-tion of integrity in institutional practices and rela-tionships. Information on institutional progress since a 1992 NCA report is then presented as of 1995, detailing improvements made in the areas of student services, NMSU-C's library and media central students with the control of the students of the studen ter, the bookstore, the operations of NMSU-C's Learning Assistance Center, and community service and continuing education programs. Six initiatives to improve academic administration are then reviewed and changes in academic programs since 1992 are highlighted. NCA Basic Institutional Data forms A through G, providing data for 1992-93 to 1994-95, are attached. (AJL)

Counseling mothers of small children in effective

Counseling mothers of small children in effective growth monitoring and promotion is both an art and a science. Virtually all primary health care programs contain a Growth Monitoring and Promotion com-

ponent (GMP). It is vital that supervisors and com-munity health workers of GMP programs have a clear understanding of why communication skills are necessary to make GMP work for mothers. This manual is designed to train field supervisors of GMP programs, along with community health workers, in the art of effective listening and communication with mothers. Trainers can use this manual to plan and conduct a workshop on interpersonal communication for growth promotion. Part 1 of the manual provides an introduction to and preparation manual provides an introduction to and preparation for conducting workshops. Part 2 details the following workshop sessions: (1) "Opening the Two-Day Workshop"; (2) "Communication in Growth Promotion: Making it Better; (3) "Mothers and Health Promoters Learn from Each Other"; (4) "Steps toward Good Communication"; (5) "Practice Using Steps toward Good Communication"; and (6) "Review, Evaluation, and Follow-Up." Part 3 of the manual includes resources for participatory training activities, a sample invitation to participants, and activities, a sample invitation to participants, sample questionnaire and observation forms. The causes and consequences of homelesaness have been the subject of considerable social science research. This report details recovery from homelesaness, or "exits from homelesaness," through analysis of descriptive demographic data and correlation of success rates with participant behavior and intervention context. The 2-year evaluation exam-ined the results of a transitional housing program ined the results of a transitional nousing program designed to promote self-sufficiency through a fam-ily-centered approach. Data were provided by 217 Hawkeye Area Community Action Program (HACAP) families. A parallel evaluation of the Homeless Head Start Project (HHSP) was also conducted. The evaluation found that clients who completed the program realized greater gains in income netted the program realized greater gains in income and were more likely to maintain stable housing than those who did not. Successful intervention strategies included a strong relationship between case manager and client, and intervention of a sus-tained nature. Critical to a sustained exit from homelessness was the resolution of causal issues of homelessness, such as lack of income, lack of affordable housing, and domestic violence. The study concluded that improvements in intervention strategies are important to ensure program success. (Appendi ces provide verbatim comments from the program termination and follow-up surveys. of Basic Skills

The search for the best educational environment. especially in terms of class size, is an important educational issue for parents, teachers, administra-tors, and government officials. Parents and educators argue that smaller class size leads to more effective teaching and improved learning for stu-dents. Government officials argue that substantial reductions in class size are too costly and not effec-tive. A review of the literature regarding small class size, defined as 14-25 students per class, found that researchers disagree on the findings of these studies, and that evidence regarding the benefits of small class size was inconclusive. This study sought to determine the effect of small class size on the reading achievement of first grade participating stu-dents. The population studied consisted of 88 first grade students at a Chicago public school, in-structed in either a small class of 17 students or a large class of 27 students. The Iowa Test of Basic Skills was used to assess reading achievement of the students in each class. Results indicated that those students in the small class made greater gains in reading achievement compared to those in the larger class Contains 14 references. (SD)

This longitudinal study of eight London families used rational choice theory to explore the extent to

Instruments study or eight Condon families used rational choice theory to explore the extent to which parents behaved rationally while seeking a secondary school for their children, according to rights given them by England's Education Reform Act (1988). Families were recruited at two London continuous schools assertion predominantly low accions the contract of the condon services predominantly low accions. primary schools serving predominantly low accio-economic areas. Parents were interviewed five times and maintained diaries over the 18 month school and maintained quartes over the 16 month school choice process. Interview questions concerned cri-teria used when choosing schools, processes used to seek information, and strategies used to create a preference order. Findings suggested that parents

did not act rationally when investigating and selecting schools. Rational choice theory predictions were more useful in explaining the tactics parents used in more useful in explaining the factors parents used in deciding what schools to list and the order in which to list them. Most parents tried to quantify uncertainty in the process by applying information they had gained earlier. The number of places available, number of potential applicants, and range of the whool's exchange a text parent level of risk school's catchment area determined level of risk involved in a choice or priority order. Parents tried to obtain accurate information but some did not trust the local authorities, could not obtain the needed information, or did not recall the needed information so could not realistically assess the amount of risk. The report concluded that rational amount of risk. The report concluded that rational choice theory was not satisfactory for an analysis of the choice because choice under uncertainty was not rational; attitudes, values, and personality also influenced behavior. Two appendices describe the families and the schools involved. (Contains 31 references.) (KDFB)

Identifiers—\*Preschool Effects

This longitudinal study examined the effects on children of three kindergarten schedules: half day, alternate day, and full day. A secondary purpose was to examine the relationship between preschool attendance and subsequent school performance. Two additional variables thought to be related to school success were also explored: children's gender, and age at initial kindergarten entry. The study conducted and combined results of three different specific assessments. The first of those studies initial. conducted and combined results of three different specific assessments. The first of those studies, initiated in May 1986, a statewide survey of beliefs and practices concerning kindergarten and preschool, obtained data from kindergarten teachers, school superintendents, school district records, and parents of independent of the control of the contr superintendents, school district records, and parents of kindergarten children. The second study, initiated in the summer of 1986, was a retrospective analysis of the cumulative records of 8,290 elementary school pupils. The third study, initiated in the fall of 1986, was a prospective longitudinal study of two groups of aimost 6,000 elementary school students. The results indicate that children who attended weedpool prict to kindergarten expressions. tended preschool prior to kindergarten experience greater subsequent success in elementary school than those who do not attend. The child who is most likely to succeed in the elementary grades is a girl who attended preschool, turned five in January before kindergarten entrance and attended a full-day kindergarten program. Identifiers-Child Care Costs, Developmentally Appropriate Programs, Learning Environment

As a practicum project, a developmentally appro-priate training model was designed and implemented in a day care facility with 6 staff members, serving 40 children. Following documentation of the problem areas that inhibited application of dethe protein area that immotes approach to the velopmentally appropriate practices in the particular day care setting, appropriate actions were implemented. The investigator modeled developmentally appropriate practices, provided teachers with constructive criticism, noted the use of developmentally appropriate practices, and conducted opmentally appropriate practices, and conducted workshops. At the end of the program, adherence of the agency and its staff members to developmentally appropriate practices rose from a pre-interven-tion rate of 52 percent to a post-intervention rate of 88 percent. The outcomes of the project suggest that with appropriate training, commitment, and re-sources, a child care agency can be transformed from one which merely monitors or baby-sits chilfrom one which merely monitors or baby-sits chi-dren to one that recognizes the child as an individ-ual. (Fifteen appendices include a copy of the calendar plan for implementation activities, budget drafts, the training schedule, a list of the characteris-tics of a developmentally based early childhood pro-gram, as well as questionnaires and assessment forms, and an outline used for the child development training/workshop. This article presents gender perspectives on the formation of the preschool teacher and the formation of a domain for education and child rearing of young children, commenting on the designation of the professional field of education as "female territory." The report uses the results from two Swedish studies: the first dealing with the period from 1900-1945 and the development of the new profession for caring and education along with its significance as a starting point for redistribution of responsibility for child care; the follow-up study on 1945-1972, a period in Swedish preschool history characterized by the integration of the field into state and municipal structures and by resistance toward the development of a professional domain for early childhood education. Methods used in the studies were quantitative and qualitative extual analysis of the Swedish magazine, "Kindergarten (The Pre-School)," official reports and legislation, interviews, and archival materials. The article addresses political implications for child care and early childhood education, asserting that the development of the preschool field shows the relationship between men and women as more important in deciding roles and behaviors than the gender definition itself. Other issues discussed include the

societal and spiritual mother models, sex segrega-tion, patriarchal ideas, paternal protection, and Fro-ebelian theories. Contains 49 references. (BGC)

How quickly can new staff members who come with minimal qualifications in early childhood education be trained? Is there a way to develop a sense of history and community in child care programs, honoring diversity while documenting the learning process and engagement individuals have with each other? In an age of fast-paced electronic media and print overload, visual images supported by briefly written narratives can capture attention and raise awareness. "Documentation panels" is the term used to describe this method for communication. This monograph offers concrete ideas about using visual displays to enhance early childhood training and programs. It is designed to show the many uses of this bulletin board-based concept, the skills and the likely results. In addition to guidelines, the monograph includes illustrations of completed panels on various topics. (WJC)

This guide describes a program that turns ordinary show-and-tell time into a theme-related sharing time, or "sharing circle." In this program, each child is assigned a special sharing day once a month, with the sharing days evenly distributed throughout the month and with no more than three children sharing on a particular day. Monthly themes are the conceptual organizers around which the program is based, themes of intrinsic interest to children, yet broad enough for children to have many choices for sharing. The monthly theme is integrated into all areas of the curriculum, with special attention given to quality literature, art and music, math, science, and social studies, and experiences are provided that stimulate learning in all developmental areas. and social studies, and experiences are provided that stimulate learning in all developmental areas. Since many children attend the same early child-Since many children attend the same early childhood program for consecutive years, the guide contains 2 years of monthly programs, for September through May, with one special summer sharing theme. Each monthly section includes objectives, a monthly commentary, two letters to parents that may be used as models, suggested activities, such as arts and crafts ideas and cooking projects, and songs and rhymes. Bibliographies of poems and picture books related to each theme are also included. Some of the themes include: autumn days; family traditions; friendship; the earth; and animals. Five appendices contain: suggestions for birthday time activities and exploring fruit using the five senses; arts and crafts recipes; and indexes of songs and recipes. (TJQ)

Identifiers—Birthright Citizenship, Congress 104th, Fourteenth Amendment, Immigration and Nationality Act 1965, United States Constitution

This hearing transcript presents testimony on sev eral House resolutions regarding immigration and citizenship. Two bills propose amending the Immigration and Nationality Act to limit birthright citizenship to persons with citizen or legal resident mothers (HR 705) or to deny such citizenship to children of parents who are not citizens or perma-nent resident aliens (HR 363). Five joint resolutions ropose to amend the Constitution to restrict birthright citizenship to persons with legal resident mothers or fathers (HJ Res 56 and 87); citizen or legal resident mothers (HJ Res 64); a citizen parent at the birth (HJ Res 88); or a citizen parent, lawfully in the United States, or with a lawful immigration status at the birth (HJ Res 93). Witnesses included: (1) several Representatives from the state of California; (2) Representatives from the states of Florida, Hawaii, and Illinois; (3) A former reporter from the "El Paso Times"; (4) university law professors; (5) Barbara Jordan, chair of the U.S. Commission on Barbara Jordan, chair of the U.S. Commission on Immigration Reform; (6) Assistant U.S. Attorney General Walter Dellinger; and (7) a deputy director, Income Maintenance Bureau, San Diego County Department of Social Services. Witnesses testified that smugglers bring pregnant women into the country to give birth so their children are citizens; educational and social welfare benefits for children of illegal slices were sited as removed. illegal aliens were cited as causes. Others argued that because the 14th Amendment grant of birthright citizenship was not meant to apply to children of illegal aliens, a federal statute could end birthright citizenship; others argued that a Constitutional amendment is required to modify birthright citizenship. Appendices contain additional statements, let-ters, or materials submitted by witnesses. (KDFB)

Resilience is the ability to thrive, mature, and increase competence in the face of adverse circumstances. Recent research has uncovered personal and environmental characteristics that contribute to

and environmental characteristics that contribute to resilience during infancy and toddlerhood, as well as characteristics that predict resilience in later years. Resilient infants and toddlers are energetic, socially responsive, autonomous, demonstrative, tolerant of frustration, cooperative, and androgynous, among rrustration, cooperative, and androgynous, among other characteristics. Their environment includes a strong caregiver-child bond, nurturance, responsiveness, and ample exploration time. Two longitudinal statistical studies, one on the prediction of future resilience from infant and toddler charac-

teristes, and the other on the prediction of adult-hood resilience from earlier life phases, indicate that an internal locus of control and strong social skills during infancy relate to later resiliency, as do social support of the mother, and caregiver characteristics such as education level, self confidence, and coping style. These findings are important for policy mak-ers and caregivers alike. Suggestions for policies and practices that encourage resilience development include providing social support for the family (such as on-site day care, flexible leave-time, and volunas on-sue cay care, riextoic leave-time, and volun-teer efforts), fostering an internal locus of control and sense of autonomy, modeling androgyny, and improving caregiver education. Mobility, "Inaster Students Identifiers—Illinois (Chicago Metropolitan Area), \*Iowa Tests of Basic Skills

The impact of mobility on academic achievement has been the focus of many studies. The findings are generally consistent and suggest that mobility lowers student achievement, particularly when the students achievement, particularly when the students achievements. dents are from low-income, less educated families. For this study, 30 students, classified as either mobile or stable, were randomly selected from a population of 110 sixth graders at a public school on the southwest side of Chicago (Illinois), a predominantly low and low-middle socioeconomic community. Reading and math scores from the annually administered lowa Tests of Basic Skills were comadministered lowal resis of lassic Skins were com-pared for the two groups. Results showed that stu-dents who remained at the school from first grade through sixth grade did not obtain significantly higher reading and math achievement scores than nigher reading and math achievement scores than sixth grade students who had transferred one or more times since first grade. Analysis did show slight gains for students who had attended the school 5-6 or 3-4 years versus 1-2 years. These re-sults contradicted those expected after a review of the literature. Continued study with a larger sample is necessary, and stratified sampling is recom-mended to control for extraneous variables. Recom-mendations to assist transfer students and their mentations to assist trainers students and their teachers include: (1) allowing students who move to continue to attend their original school, if reason-able; (2) implementing orientation programs for transfer students; and (3) maintaining portfolios of classwork that transferring students can take with them to a new school. Descriptors—\*Accident Prevention, Accidents, Alarm Systems, Child Health, Children, \*Consumer Protection, \*Safety, \*Safety Education, Safety Equipment, \*Swimming Pools Identifiers—Child Safety, \*Water Safety Each year, hundreds of young children die and thousands come close to death due to submersion in residential swimming pools. The United States Consumer Products Safety Commission studied data on drownings and child behavior, as well as information on pool and pool barrier construction, and concluded that the best way to reduce child drownings in residential pools was for pool owners to construct and maintain barriers that would prevent young children from gaining access to pools. The Commission developed this handbook to make it easier for pool owners, purchasers, builders, technicians, and others to understand and apply guidelines. The handbook details guidelines that cover aboveground and inground pools, hot tubs, and spas. The handbook also includes information on fence and gate

construction, door alarms, and general safety rules for pools. (SD)

Identifiers—"Developmentally Appropriate Programs, Maryland
Research concerning the effects of television violence on children-particularly young children under

lence on children-particularly young children under the age of six-has found that it tends to desensitize them to aggressive behavior and, in some children, promotes aggressive behavior in their play and other interactions with children and adults. This guide is designed to assist early childhood educators in dealing with the aggressive and destructive actions that children imitate from observing violence on televi-sion. The guide is focused on young children two through five years old, and on how educators can help children move away from violent play stimu-lated by television to the healthy, fun, and safe ac-tivities that promote growth and development. The introduction provides a general overview of televiintroduction provides a general overview of televi-sion violence and its effects. Chapter one provides age-appropriate assistance in helping children un-derstand the difference between "real" and "pre-tend." Chapter two provides age-appropriate activities to teach young children to pretend. Chap-ter three provides activities for creative play on an age-appropriate level. Chapter four provides infor-matical provides activities for creative play on an age-appropriate level. Chapter four provides intor-mation on helping children gain self control and manage feelings. Chapter five provides guidance to educators in communicating with parents about the effects of television violence. Five appendices in-clude book suggestions, professional resources, research summaries, survey results, and advising panel resources. (Author/SD)

Identifiers—\*Virginia, Virginia Department of Education

Virginia's Department of Education and Department of Health are concerned with the health of children and youth, and with the implementation of comprehensive school health programs. These guidelines provide a basis for developing a model school health program or for enriching an existing school health program or for enriching an existing program, focusing on health services and school environment. Following a foreword noting that local autonomy, the presence of professional personnel, and availability of resources will influence the way the guidelines are adapted for local use, the sections of the guidelines are: (1) "Administrative Aspects of School Health," including interagency agreements and delineation of roles and responsibilities; (2) "School Health Environment," including mechanical operations and school food service; (3) "School "School Health Environment," including mechanical operations and school food service; (3) "School Health Services," including special education medical assessment, school procedures for child protective services, and special health services; (4) "Risk Management," on legal liability issues and record-keeping; (5) "Students with Special Needs," including related public laws and sections of the Rehabilitation Act; (6) "Code of Virginia: Sections Relating to School Health," including attendance requirement, vision and hearing screening, and substance abuse; (7) "Evaluation of School Health Services," with specific guidelines: and (8) "Virginia stance abuse; (7) "Evaluation of School Health Services," with specific guidelines; and (8) "Virginia
School Health Forms," including certificate of religious exemption, scoliosis report, nutrition worksheet and referral form, and cumulative health
record. Six appendices include recommendations
from Virginia House and Senate, school nurse performance evaluations, and communicable disease
reference chart. (WJC)

Identifiers-\*French Language Schools, \*Yukon Based on the author's experience working with the French minority in the Yukon, this study investigated the contributions of the school and of the family to the success at Ecole Emilie-Tremblay, a school of children from exogamous families (th with parents from different language groups). Three areas of parental involvement were defined-academic, sociocultural, and political-and interviews with parents and questionnaires for students were designed to explore the parents' influence within each of these areas. The contributions of the school were investigated in terms of adaptation to its clientele, through interviews with the principal, teachers, and trustees of the school board. Findings revealed four main issues that determine the level and influence of exogamous parents' involvement in their children's schooling: (1) parents' recognition that they are the primary and most important educators; (2) parents' understanding of the school's mission; (3) school adaptation to its unique exogamous clien-tele; and (4) the willingness of Anglophone parents to embrace the French language and culture. Exogamous parents appear to contribute to their child's education in light of their own first language, and lack of parental support raises the danger of children becoming semi-lingual adults, strong in neither French nor English. Identifiers—Adolescent Attitudes
Young people are concerned with making and
keeping friends, and they invest a great deal of energy in group social life to do so. This book charts
the interactions of young people both in and out of
school and the role of peers and friends in strengthening social attachments and in establishing social
identities. It describes how social identities are
worked out in different settlines which compromise worked out in different settings which compromise the adolescent's world and how these experiences differ for those who are shy, popular, aggressive or antisocial. The book consists of three parts. Part one describes how the social ties between friends link young people to various kinds of peer group struc-tures, including friendship cliques, the peer crowd and classroom groups, and antisocial groups and gangs. Part two explores young people's behavior in the wider social environment and the implications of social acceptance or rejection for academic moti-vation, aggression and health-risk behavior. Part three describes how professionals can support young adolescents in building social attachments, giving practical examples of how this strategy is carried out in various communities. (WJC)

Methods
Identifiers—Creativity Training Research
The 25 strategies described in this book can be
used to develop personal creativity, student creativity, and creativity in colleagues and staff members.
The strategies are based on investment theory, a
psychological theory of creativity, but any one strategy is consistent with many other theories. The investment theory of creativity asserts that creative
thinkers are like good investors: They buy low and
sell high. Whereas investors do so in the world of ideas
finance, creative people do so in the world of ideas sell high. Whereas investors do so in the world of finance, creative people do so in the world of ideas by taking a unique, typically undervalued idea and convincing other people of its worth. The 25 ways to develop creativity; (2) building self-efficacy; (3) modeling creativity; (2) building self-efficacy; (3) questioning assumptions; (4) defining and redefining problems; (5) encouraging idea generation; (6) cross-fertilizing ideas; (7) allowing time for creative thinking; (8) instructing and assessing creativity; (9) rewarding creative ideas and products; (10) encouraging sensible risks; (11) tolerating ambiguity; (12) allowing mistakes; (13) identifying and surmounting obstacles; (14) teaching self-responsibility; (15) promoting self-regulation; (16) delaying gratification; (17) using profiles of creative people; (18) encouraging creative collaboration; (19) imagining other viewpoints; (20) recognizing environmental fit; (21) finding excitement; (22) seeking stimulating environments; (23) playing to strengths; (24) growing creatively; and (25) proselytizing for creativity. ter Children, Foster Family, \*Kinship, Placement, \*Public Policy Identifiers—Historical Background, \*Kinship Foster Care, \*Placement (Foster Care) During the past few years, there has been a notable increase in the number of children in foster care, with foster care that is provided by relatives as counting for a substantial part of the increase. At the same time, there has been a shift in thinking in the field of child welfare, from viewing placement with a relative as a last resort to favoring placement with a relative. Despite the growth in relative-provided foster care, child welfare systems seem not to have addressed systematically such questions as whether kin caregivers should or should not be considered in the same category as unrelated foster caregivers. the same category as unrelated foster caregivers. This paper summarizes research on kinship care and the same category as unreased on kinship care and explores child welfare policy at is relates to this type of foster care. The paper begins with an overview of the topic, including a consideration of possible advantages and disadvantages of putting kinship caregivers into the same category as unrelated foster parents. Section two contains a brief history of foster care, including ethnic differences in that history Section three focuses on several aspects of the present day foster care system that are pertinent to the topic of kinship foster care, including the over-loaded child welfare system. Section four considers the ramifications of kinship foster care for children,

while the ramifications of kinship foster care for the relatives involved are considered in section five. Section six illustrates the lack of consensus about who should be included in the term "kinship foster who should be included in the term "kinship foster parents" and how those parents ought to be categorized. Finally, the paper offers recommendations for promoting the well-being of kinship foster parents and the children for whom they care. Three appendices include discussion of concepts, terms, and policies related to kinship care in the areas of licensure and monitoring, custody and legal rights, and funding sources for foster care. Identifiers—Health Surveys, \*Risk Taking Behavior This report presents the preliminary findings from WHO's (World Health Organization) fourth Health Behaviour in School-Aged Children (HBSC) Study. The study has two main objectives: (1) to monitor health-risk behavior in youth over time in order to provide the necessary background and clear targets for health promotion initiatives; and (2) to provide information to researchers that will enable them to understand and explain the development of health attitudes and behaviors through early adolescence.

Addresses and Schausers and the second of a gage and the second of the second of a gage and the second of a gage and the second of the second of a gage and the second of the secon attitudes and behaviors through early adolescence. Approximately 1300 respondents in each of 3 age groups-11, 13, and 15 years—were targeted in 24 countries during the 1993-94 school year. The findcountries during the 1993-94 school year. The findings of the survey include: (1) in every country surveyed, the use of tobacco and alcohol increased with age; (2) in most countries, as young people progress from age 11 to 15, they exercise less frequently; (3) there is evidence to suggest that the diet of a significant number of young people in all countries does not conform to current nutritional advice; (4) in only one country, Sweden, did the majority of 11, 13, and 15 year olds rate themselves as very healthy; (5) in nearly all countries, only a small minority of students regularly felt lonely, helpless, or left out, while the majority thought they made friends easily, had at least two close friends, and found it easy to talk to their mother; (6) nearly 30 percent of the had at least two close friends, and found it easy to talk to their mother; (6) nearly 30 percent of the respondents reported an injury requiring medical attention during the previous year; this reaffirmed other research findings that unintentional injuries may be the most serious health problem to face school children in western societies, and (7) schools with a hospitable environment and caring teachers appear to contribute positively to students' emotional well-being and social development. Several implications for policy are included. Appendixes include: characteristics of countries, sample design and sampling error, a list of the principal investigators, and a list of HBSC publications. Contains 123 references. (AA)

son Tests of Cognitive Ability

Home environments have been linked to cognitive development and academic performance, with suggestions that family factors exert more influence on language and literacy learning than on mathematics achievement. This study's purpose was to learn how selected family factors might be differentially related to primary grade achievement in read-ing and mathematics in children from low-income families. Family factors were contrasted in first graders who scored in the highest and lowest quar-tile on Woodcock-Johnson tests of reading and mathematics. Participants were 167 children from low-income families (80% were African American) in a Head Start Transition Demonstration program, in a Head Start Transition Demonstration program, which provides low-income families with elementary school children the same support as received in Head Start. Children who did well in reading were from homes with higher scores on the Home Screening Questionnaire, were from smaller families, had better educated mothers, and were rated as more healthy. Children who did better in math were from families who scored high on the questionnaire. from families who scored high on the questionnaire and tended to have more contact with their fathers. Regression analyses indicated that transition treat-ment interacted with family size and showed a trend toward interacting with the questionnaire scores to predict reading scores summed across kindergarten and first grade. Treatment interacted with maternal education to predict similarly summed mathematics scores. Quality of the home environment independently predicted math scores. The conclusion was that children's learning is heavily influenced by home environment. Contains 26 references. (Author/BGC)

This study examined the relationship between age This study examined the relationship between age at school entry and reading readiness in kindergarten. Subjects included 30 kindergarten students selected randomly from a population of 56 students at a parochial school in a predominantly low socioeconomic status neighborhood in Chicago, Illinois. All students were African American and ranged in age from 5.5 years to 6.5 years. The Prereading Composite score from the Metropolitan Readiness Test Station even in April 1000 was used as the Sixth Edition given in April 1996 was used as the achievement measure. Findings indicated that mean age at school entry was 64.39 months and the mean Prereading Composite raw score was 52.53. The correlation between age at school entry and reading readiness was .96. In 1993, the State Legislative Leaders Foundation launched a research project, "State Legislative

launched a research project, "State Legislative Leaders: Keys To Effective Legislation for Children and Families." This report documents the findings and Families." This report documents the findings of the project involving 177 of the most influential Republican and Democratic state legislature leaders from all 50 states. For more than a year, these leaders were interviewed by a bi-partisan team of poll-sters on a wider range of issues relating to children and families. Also surveyed, by detailed written questionnaire, were 167 child and family organizations that participate in state-based legislative activity. The responses and comments of these organizations have served as a frame of reference against which to compare and contrast the views of the state legislative leaders. The key findings were: (1) legislative leaders' primary focus is managing the legislative process and the state budget, but they are increasingly speaking out on major policy issues; (2) child and family issues are generally important to state legislative leaders, however their importance varies from state to state; (3) state legislative leaders learn anecdotally about issues, not systematically, so their knowledge is often limited to their own stricts and what others draw to their attention. Most leaders are unfamiliar with the current status of children and families in their districts or states and with effective policies and programs; (4) leaders see numerous individuals and organizations advocating different, often conflicting, legislative agen-das for children and families; (5) child/family advocates are perceived as liberal and Democratic, whereas increasingly the leadership in state legisla-tures is moderate or conservative and Republican; (6) leaders are unaware of any cohesive, effective grassroots constituency for children in their states; (7) most leaders are unclear about child/family advocates' roles and are not predisposed to work

closely with them; (8) some strategies promoted by closely with them; (8) some strategies promoted by child/family advocates are viewed by legislative leaders as irrelevant or counterproductive; (9) child/family advocate groups do not have the training, funding, and flexibility to develop and implement effective strategies; and (10) state legislative leaders need to become more pro-active in seeking out information on child and family issues. Identifiers—Brand Names, Department of Agriculture, \*Fast Foods, Healthy Meals for Healthy Americans Act 1994, \*School Lunch Program In the Healthy Meals for Healthy Americans Act of 1994, Congress directed the Government Accounting Office (GAO) to examine the use of private food establishments and caterers by schools participating in federal programs for school meals. In conducting its review, the GAO relied primarily on questionnaires returned by food authorities that had contracts with food service companies during the 1994-95 school year. Specific areas addressed included: (1) the extent to which schools use private companies to operate their lunch program and the companies to operate their lunch program a impacts that the use of these companies has on the National School Lunch Program; (2) terms and conditions in contracts between schools and food service companies; and (3) extent to which fast foods and vending machines are available in schools and the types, brands, and nutritional content of the fast foods offered. This report details the GAO's findings. Chapter 1 of the report provides an introduction to the National School Lunch program, food service management companies, and "fast foods." Chapter 2 addresses the finding that the use of food service companies to manage school food services is increasing. Chapter 3 addresses the finding that food service contracts vary in content and in comimpacts that the use of these companies has on the food service contracts vary in content and in com-pliance with selected federal requirements. Chapter

4 addresses the finding that the percentage of schools offering brand-name fast foods has in-creased. Four appendices include the survey meth-odology, federal lunch pattern requirements, nutritional content of four brand-name fast food items, and major contributors to the report. Twenty-eight tables and figures augment the re-search findings. (SD)

Identifiers—"Adolescent Attitudes, Adolescent Suicide
Arguing that adolescence is a syndrome to be managed rather than a stage to be outgrown, this book offers suggestions from a high school principal as an insider's guide to today's teenage world. The book contends that the major task of adolescence is to gain mastery over emotion, and that a partnership between parents and educators is imperative if the modern American teenager is to survive. The intention of the book is not only to help parents cope with their teens, but to also shed light on what parents can learn about themselves in the process. The book presents timely issues with helpful tips for parenting teens. The chapters of the book are: (1) "Adolescence is a unavoidable though temporary departure from normalcy; (2) "Let's Get Cranky," examining how adolescence is full of contradictions; (3) "Let's Get Hysterical," dealing with authoritative vs. authoritarian or permissive parenting styles; (4) "Let's Get Physical," providing tips for discussing sexuality, sexual abuse, rape and AIDS; (5) "Let's Get Moral," examining temporary moral insanity and issues of moral education; (6) "Lying, Cheating, and Stealing," explaining the reactions of authoritative parents to these behaviors; (7) "Crossing the Line," addressing drugs, runaways, suicide, depression and eating disorders; (8) "Young Women," dealing with feminine identity; (9) "Difference in the 1990s," urging education for and acceptance of diversity; (10) "Let's Get Educated," calling for education reform that fosters a relationship between teachers and students; and (11) "Let's Get Motivated," discussing factors which foster or block motivation. The conclusion of the book portrays the isolation that many teens feel and emphasizes the importance of contact with caring adults. Contains an annotated list of 42 suggested readings and a bibliography of 190 references. (AMC) Arguing that adolescence is a syndrome to be

The goal of this action research project goal was

to improve students' taking responsibility for their own learning. The targeted population consisted of 120 intermediate and middle school students in 5 classes from 2 middle-class communities in northern Illinois. The lack of student responsibility in the learning process was documented through teachers' anecdotal records, interviews of randomly selected students, and a survey of students' study habits recorded over a 5-month period. Analysis of the recorded over a 5-month period. Analysis of the recorded over a 5-month period. anecdotal records, interviews of randomly selected students, and a survey of students' study habits recorded over a 5-month period. Analysis of the probable causes of students' lack of responsibility for their own learning indicated that lack of higher-order thinking skills, lack of ability to transfer learning, and lack of self-motivation were responsible. To address these problems, four major categories of intervention were used in this 3-month program: (1) graphic organizers to sid in visualizing the thinking process; (2) problem-solving strategies; (3) higher-order thinking skills to promote gathering, processing, and applying information; and (4) portfolios to show ownership of their learning. Post-intervention data obtained during cooperative learning activities indicated an increase in students' taking responsibility for learning and an improvement in responsibility for learning and an improvement in students' higher-order and critical thinking skills, problem-solving strategies, and self-evaluation. (Ten appendices detail data collection methods, Bloom's Taxonomy, and intervention procedures Contains 29 references.) (KDFB)

Identifiers—"Heterogeneous Classrooms
This master's project analyzed the implementation of a program designed to address the academic
needs of all students in a heterogeneous classroom.
The targeted population consisted of secondary parochial school students from working and middle
class backgrounds in or around a large midwestern rochial school students from working and middle class backgrounds in or around a large midwestern metropolitan area. Problems of underachievement were documented through surveys, interviews, and teacher observations. Analysis of probable cause data revealed that teachers tend to teach to average students and do not sufficiently address the special needs of the upper and lower ability ranges, resulting in students not being actively engaged in the learning process and failing to take responsibility for their learning. Three major categories of intervention were selected to incorporate higher-order thinking skills into students' daily activities: the integrated use of cooperative grouping techniques, the implementation and monitoring of student goals, and the development of student awareness of the intelligent behaviors concept. Results showed that students of all classes improved at the low end of the ability range, and three of the four classes improved at the average and high ends of the ability range. This seemed to indicate that using project-based learning to implement cooperative grouping, goal lating the seemed to indicate that using project-based learning to implement cooperative grouping, goal setting, and intelligent behaviors was beneficial to most students. (Appendices include funding sources, administrative study, teacher survey, sample lessons and projects, and an intelligent behaviors self-assessment survey. Contains 21 references.) (Author/EV)

Students, Family Problems, Interpersonal Com-

munication, Interpersonal Competence, \*Intervention, Mass Media Effects, Obedience, Perspective Taking, \*Primary Education, Problem Solving, Social Cognition, Violence Identifiers—\*Peer Mediation

This Master's project was designed to implement and evaluate classroom intervention and training in conflict resolution for elementary school students. Subjects were first and third graders from a rural community in north central Illinois. To document the extent of existing student conflict, a teacher survey and journal, playground behavior checklist, and referral to the principal checklist were completed. Analysis of probable cause data revealed that students lacked communication skills, lacked understanding of others' perspectives and cultures, felt the need for power and control, showed evidence of family dysfunction, exhibited influence of media and video games, and were affected by changing demographics. A review of curricula content also showed a lack of instructional strategies related to conflict resolution and cooperative learning. Three categories of intervention were chosen after a review of the educational literature and an analysis of the problem setting: peer mediation, cooperative learning, and children's literature. Effects of these intervention strategies were assessed with the same methods used to assess pre-intervention conflict be-havior. Results showed an improvement in students' use of communication skills, an understanding of others' perspectives, an awareness of needs and feelings, and the development of negotiation and medi-ation skills. There was also an overall decrease in the frequency of most recorded inappropriate behaviors. (Contains 33 references.) (Author/EV)

Relationship, Parents, Separation Anxiety, Transitional Programs, \*Young Adults Identifiers—\*Security of Attachment
This study examined the relationship between attachment security to both parents and feelings of loneliness throughout the transition to college, and the impact of the presence or absence of a physical separation from parents. A total of 125 adolescents completed two measures of attachment-Mother-Father-Peer Scale and Inventory of Parent and Peer Attachment (IPPA)-and one measure of loneliness Attachment (IPPA)—and one measure of loneliness (UCLA Loneliness Scale-Revised) at the end of high school, during their first semester at college, and 1 1/2 years later. Seventy-one students lived with their parents during the first semester at college, and 54 had left home to attend college. The IPPA showed good construct validity and test-retest reliability. Feelings of loneliness tended to increase during the transition and decrease after the crease during the transition and decrease after the transition only for adolescents who had left their parents. Adolescents who remained home while at-tending college did not experience significant changes in loneliness during or after transition. For adolescents who stayed home, attachment to mother was stable during the transition, but attachment to father decreased during the second year in college. For adolescents separated from their parents, attachment increased during the transition, then remained stable for father or decreased for mother after the transition. Hierarchical regression analyses revealed that only insecure attachment to father predicted loneliness in the second year of college beyond that of the high school level. (KDFB)

The goal of this action research project was to actively involve elementary schools in their learning. The program was implemented at three learning responses to extense in contens.

learning. The program was implemented at three elementary schools in northern Illinois serving multicultural populations; special education students, some in a Regular Education Initiative (REI) pro-gram; and students from a wide range of socioeconomic levels. Targeted classrooms at the three schools were a first-grade REI class at School 1, a fifth-grade class at School 2, and two multiage special education classes at School 3. Lack of student chal education classes at control of the engagement was documented through student interviews, surveys, and teacher journal entries. Children lacked interest in school, felt no responsibility for their own education, or had a poor view of them-selves as learners. Parents and students had unreal-istic expectations that, in combination with socioeconomic and cultural considerations, a static curriculum, lack of student empowerment, and ineffective teaching methods permitted students to be passive learners. The program involved cooperative learning in mathematics, science, and language arts; goal setting taught through modeling and guided practice; and the alternative assessment technique of teacher-student conferences and self-assessn The program was implemented in the 1995-96 school year. To assess the effects of the intervention, anecdotal records of teacher observations, surveys, questionnaires, student journals, and portfolios were maintained. Post intervention data indicated increased student engagement, goal-setting, and reflectivity. (Sixteen appendices detail data collection forms, evaluation forms, and sample lessons. This report is part of a multi-year project con-ducted by the Institute for Resonaive Education

ducted by the Institute for Responsive Education (IRE) and Boston University components of the Center on Families, Communities, Schools and Children's Learning. The report draws on results of a series of focus groups and interviews conducted in 1994 and 1995 to explore how policymakers and parents, teachers, and students in local schools view school reform and family-community collaboration. Policymakers view school reform as necessary to maintain a competitive economic advantage and think parental involvement is crucial to reform efforts, but some are skeptical about parents' desire to be involved in their children's education. Policy-makers from both the Democratic and Republican political parties are interested in and supportive of family-community-school partnerships. Parents express a sense of urgency about the need for fundamental changes primarily because of a perceived lack of student motivation and values. They are also concerned about offerings for non-college-bound students, enrichment opportunities, uncaring teachers, and high school structure. Practitioners are con-cerned about students' stress level and lack of motivation, scarce resources, and changes imposed by out-of-touch bureaucracies. Teachers hesitate to recommend major reform because of previous failed programs, but many see strong parental advocacy as a key to changing conditions. Students are cona key to changing columns. Students are con-cerned about boring classes but their major priori-ties are safety, the need for engaging school and extracurricular activities, and teachers' lack of re-spect for them. By examining the views of the four groups, an understanding of what must change in U.S. schools can be achieved. The practice of community partnership for school change must become a matter of both regular practice and policy. The report concludes with descriptions of promising new approaches to school reform, including IRE's Responsive Schools Project. (KDFB)

This review of current research on parents," onin-

This review of current research on parents' opin-ions about public schools provides information of interest to school boards, administrators, and parent leaders who wish to develop parent-community-school partnerships. This article discusses research done by organizations like the Public Agenda Foundation, the Gallup Poll, Phi Delta Kappa, and the Parent Teacher Association (PTA), based on surresearchers and educators experienced in working with parents. Parents want children to learn acawith parents. Parents want children to learn academic content, but are equally concerned with work habits, preparation for the workplace, maintaining discipline, and citizenship skills. They support community use of school buildings, including locating social services in the schools. They are willing to invest increased financial resources to improve education and increasingly support lengthening the school year but not the school day. Parents also strongly support extracurricular activities, with a majority favoring community service requirements for graduation. Although parents believe that public schools are superior in supporting diversity and proschools are superior in supporting diversity and prividing special education, they rate private schools higher for promoting religious and social values; maintaining discipline, safety, and higher academic standards; and having smaller class sizes. Parents recommend higher standards and more difficult work at all levels to improve adventional overcomes. work at all levels to improve educational outcomes They favor administrative reductions and user fees for athletic and band programs, and oppose cutting extracurricular activities, salaries, or teaching staff. Favored reform strategies include school choice, site-based management, and charter schools. The views of conservative parents are less extreme than those of the groups who claim to represent them, and a large number of parents are actively involved in their children's education, holding high expectations, monitoring them, and helping them with homework. Most say they need better information to remain involved across the school years. (Contains 35 references.) (KDFB)

tional Objectives

The culture of Catholic education is based on profoundly human qualities animated by freedom and by faith. Because all aspects of Catholic education are intrinsically religious acts, teachers are free to teach all subjects for their own sake. Educators h the freedom to insist that everything in Catholic education be first rate, including equipment and ex-tracurricular programs, and they are free to work longer than 40 hours each week to ensure such qual-Students are free to admit to themselves and to others that school is interesting and that they would rather be there than elsewhere. Nevertheless, Catholic educators have an obligation to make Catholic schools worth the cost difference as well as reflect the faith which makes that difference. Some disappointing trends create challenges: (1) there are fewer areas of agreement between Catholics and other citizens; (2) Catholic families increasingly use public higher education; (3) there is a declining number of religious men and women as virtually free labor for school systems; (4) class discipline and the inability to expel students with behavior problems is concern; and (5) it is difficult to reconcile the Catholic school system's aims with the teachers' unions' aims. Catholic educators should be assertive on the school voucher issue and on the need for religion in public life, and should insist that Catholic education be valued for its convictions, not just its discipline and uniforms. Catholic educators face challenges in their freedom to do their job well and to animate it by faith. The American Catholic educational experience has been one of the glories of the Church for more than two centuries. (KDFB)

This study compared the impact of an international educational program with that of a multicultural educational kindergarten program. A convenience sample of 13 children participated in a university-based full day international education kindergarten program. Sixteen children from a medium-size seacoast center participated in a multiculdium-size seacoast center participated in a multicul-tural educational kindergarten program. The project-developed picture-based Inventory of Cul-tural Information and Attitudes was used to measure culturally accurate information, culturally sensitive information, overgeneralized information, culturally insensitive information, and ethoocentric responses. Parents completed a questionnaire re-garding cultural influences present in the child's en-vironment, the extent of the child's travel, and if there were international influences in the child's heritage. Results indicated that there was no significant difference on overall culturally accurate information by site or by sex. However, children gave more culturally accurate information for cultures they had studied. Children in the international program used phrases that were more culturally sensi-tive than children in the multicultural program. All the children overgeneralized information, with in-ternational program children overgeneralizing slightly more often. Very few culturally insensitive remarks were made by either group. Boys were more likely to respond in ethnocentric ways than girls. Parent questionnaire scores correlated with children's overall culturally accurate score and their sensitivity score. This study compared the social adjustment of abused and nonabused children, ages 4 to 11 years, and examined whether sociometric status and friendship quality differentially predict children's loneliness and teacher ratings of peer behavior. Thirty-five abused children from a structured resi-Intry-five abused children from a structured residential treatment center and 43 nonabused children from the elementary school in which the abused children were enrolled were compared on sociometric status, loneliness as measured by the Child Loneliness Scale, teacher ratings of social behaviors, and observational and self-report measures of friendship quality (Friendship Observation Scale and Friendship Quality Questionnaire, respectively). Children with friends, based on reciprocal nominations during sociometric assessments, were assessed on friendship quality during free play and games

playing, and were given the Friendship Quality Questionnaire. The Peabody Picture Vocabulary Test-Revised (PPVT-R) was given to all children. Results indicated that abused children and children without friends scored lower than nonabused and children with friends on the PPVT-R, respectively. Abused children were not rated lower sociometri-cally than nonabused children. Abused children did not differ from nonabused on several measures of friendship quality, resolving conflicts and helping each other. However, abused children were obeach other. However, abused children were ob-served to be more negative and less proactive in interactions. Abused children rated their friendships as being more prone to conflict, higher on betrayal, and lower on caring. Friendless abused children scored highest on loneliness; nonabused children with friends scored lowest. Several cinitates with intends accounted for significant variance in teacher ratings and loneliness, beyond that accounted for by sociometric status. Contains 13 references. (KDFB)

This longitudinal study examined consistency and change in human personality. Rather than studying the consistency of individual differences over time, an approach which considers only the stability of a variable at the group level and ignores differences in stability at an individual level, this study used a stability at an individual level, this study used a person-centered approach to study consistency over time of an individual's personality profile. Subjects were 100 individuals who participated in an experimental study in 1975, at 1 year of age. Personality descriptions were obtained at age 7, 10, 12 and 20 years. Measures included the California Child Q Set (California Q Set for age 20), the Symptom Checklist, the National Youth Survey, and a peer acceptance measure using sociometric procedures or a social network interview (age 20). Findings indicated that consistency of personality is related to cated that consistency of personality is re ego resiliency and to supportive relationships with peers. Resiliency and peer acceptance predicted later consistency of personality, and personality consistency predicted later resiliency and perceived peer support. Personality consistency as perceived by peers predicts later externalizing problems, espe-cially violent behavior and excessive use of alcohol. oy peers predicts sace externations problems, especially violent behavior and excessive use of alcohol. Self-reported personality consistency predicted later internalizing problems, especially in the area of sensitivity and distrust in personal relations and in feelings of hostility towards others. From a transfer of the experience of actional perspective, results suggested that person-ality consistency from childhood to young adulthood is accompanied by social competence and by adequate social relationships. The Prosocial Attitude Blank (PAB) was designed
to assess interpersonal values and ethical awareness
of elementary school children. PAB was administered to 405 elementary students as one component
of the evaluation of an intervention program designed to reduce interpersonal conflicts, increase literacy skills, and enhance children's ethical
behaviors. PAB's conceptual model synthesized
contemporary thinking on social helping behaviors.
The instrument contained five "pretend" situations
involving varying relationships to persons-in-dis-The instrument contained five "pretend" situations involving varying relationships to persons-in-distress, self, sibling, friend, unknown peer, and unseen other of nonspecific age. Students were asked what they would do, and their reason for the action, in an open-ended format. Potential costs of ameliorating distress were not stated in the instrument's items; instead, students were allowed to project costs as reasons for their actions. Pilot findings suggested that prosocial development might be more complex than previously believed. Rather than considering children's ethical awareness and behaviors in terms of developmental sequences across situations, it might be more appropriate to consider them in terms of changing contextual factors in children's understanding of their world and relationships therein. Sick Child Care, Surveys
Identifiers—Elder Care
Work and family programs are becoming increasingly important in the commercial banking industry.
The objective of this survey was to collect information and prepare a commercial banking industry profile on work and family programs. Fifty-nine top American commercial banks from the Fortune 500 list were invited to participate. Twenty-two participated in the research. The results indicated that over 90 percent of the banks surveyed offer a wide variety of work and family programs. Programs of over 90 percent of the banks surveyed offer a wide variety of work and family programs. Programs offered most often include leave for childbirth, sick-child days, and pre-tax set-asides. Programs considered the most valuable include alternative work arrangements such as flextime and part-time schedules. Programs being considered for implementation in the longer term are resource and referral, financial support for child care, emergency back-up care, elder care, and work at home. This back-up care, ender care, and work at nome. And report also provides criteria for child care center vendor selection and information on programs available for children and their parents, as well as advantages and disadvantages of child care centers. This report concludes with information about the Bright Horizons Children's Centers and an appendix of questions that were included in the survey. (MOK)

Longitudinal Studies, Mathematics Achievement, Secondary Education, \*Self Concept, \*Single Sex Schools

Identifiers—Australia (Sydney), Marsh Self Report Questionnaire

A 10-year study examined the relationship between type of school and student self-concept and academic achievement. The study was conducted at two coeducational high schools in Australia, one of which had been an all-girls' school and the other an all-boys' school. Subjects were approximately 1,300 students from grades 7 to 11 in the two schools. Findings indicated that after the first 5 years of rindings indicated that after the first 5 years of coeducation, both girls' and boys' self-concept, measured multi-dimensionally by the Marsh Self-Description Questionnaire II, increased sub-stantially to a level above that which was measured stantially to a level above that which was measured when the students were in single-sex classrooms, after an initial decline associated with the transition to coeducation in the first year of the changeover. Student achievement in grade 10 English and Mathematics remained stable over the five years of the evaluation. Follow-up research after 10 years of co-education at the two schools indicated that student self-concept remained at the high levels reported after 5 years. However, enrollments at the former girls' high school declined after an initial increase in enrollment immediately after initiating coeduca-tion. A similar decline at the former boys' school was reversed when it changed from a comprehensive to an academically selective coeducational school. Patterns of enrollments in senior high school English and Mathematics varied yearly in the former girls' school, with a trend toward less demanding choices. School achievement in the public examinations at the end of grade 12 tended to de-cline at the former girls' school. (KDFB)

School Readers School Research, Student Characteristics, Teacher Attitudes Identifiers— Minnesota (Saint Paul), Project Head Start, Social Skills Rating System, Woodcock Johnson Revised Tests of Achievement

This study compared the academic performance and classroom behavior of Hmong-refugee first and second graders to those of classmates from other ethnic backgrounds. Two cohorts of children and families from six inner-city Saint Paul (Minnesota) elementary schools participated in this ongoing lon-gitudinal study, for a total of 528 children entering kindergarten in 1992-1994. Half attended Head Start, with the remainder drawn from the same classrooms. Nearly half the children in each cohort were Hmong; others were Caucasian, African-American, Hispanic, or American Indian. Findings indicated that compared to other ethnic groups, Hmong children are more likely to live with both biological parents, have more siblings, and move less often. Hmong parents are more likely to be older and married and less likely to have a high school diploma. There was no significant ethnic group difference in reading achievement as assessed on the Woodcock Johnson Tests of Achievement-Revised (WJTA-R). Hmong children entered kindergarten with lower mathematics achievement scores as assessed on the WJTA-R, but these differences disappeared by spring of first grade. Teachers rated Hmong children as more cooperative, more self-controlled, and with fewer problem classroom behaviors. There was no difference in teacher ratings on assertiveness. Hmong children had higher school attendance rates than other ethnic groups. Stepwise regression analyses indicated that p pation in the Transition Project and Head Start, smaller family size, and older parents predicted

higher reading achievement. Higher school atten-dance and parent involvement predicted higher mathematics achievement. (Contains 11 refer-

Two studies examined people's ideas about con-flicts between the morality of friendship and the flicts between the morality of friendship and the morality of individual autonomy. Study 1 included 144 subjects of 15, 18, and 21 years of age. In individual interviews, subjects were asked (1) what they would do in dilemmas in which friendship expectations conflicted with individual autonomy; (2) the reason for their decision; and (3) whether meeting a friend's expectations would be breaking friendship where which expectations would be breaking friendship. a triend's expectations would be breaking friends in rules. Subjects also completed a questionnaire on the quality of friendship with their best friend, and another on their acceptance of individualistic val-ues. Findings indicated that older students emphasized the morality of individual autonomy less than younger students but were no more likely to make individualistic decisions. Younger students resolved friendship-individualism conflicts by asserting their individual rights; older students resolved these con-flicts by setting boundaries on friendship obliga-tions. Students' decisions about dilemmas were unrelated to their endorsement of individualistic values but were related to the quality of their values out were related to the quality of the friendships; friendships with more negative features were associated with less compliance to friendship expectations. Study 2 used the same methodology as Study 1, but included adult graduate students-79 from the United States and 69 from India. More Indian than American adults resolved conflicts by Indian than American adults resolved conflicts by complying with friendship expectations. However, Indian adults endorsed individualism more often than American adults. The differences between American and Indian adults' decisions about the dilemmas were not related to differences in friendship quality. In both studies, decisions showed little consistency across dilemmas. Two tables list the dilemmas used in the studies. (KDFB)

Childhood Project, Singapore This paper describes the impact of three early

childhood education research programs in Austra-lia, Singapore, and Malaysia, and funded by the Ber-nard van Leer Foundation. The Mount Druitt Project in Australia has implemented institution-Project in Australia has implemented institution and home-based educational programs, which also monitor children's physical development and work closely with parents. One of the most important outcomes has been the spread of preschools into the Government system, especially in disadvantaged areas. There has been little short-term effect on school performance; lasting effects are more closely related to social and attitudinal development than to cognitive variables. The Singapore Project is a 9-year longitudinal study investigating cognitive and social development in preschoolers in three 3-year phases: (1) collecting baseline data on the normative development of 3,000 preschoolers; (2) providing center-based intervention focusing on English language skills; and (3) developing a closer home-school-society relationship. This project provided the first comprehensive data on social and cognitive development of Singapore children, provided intensive training programs for practitioners in approximately 40 preschools, and developed effective parent and community involvement strategies. The Malaysian study investigated the development of over 3,000 preschoolers from various sections of Malaysian society. Findings indicated that urban advantaged children were more advanced in physical, cognitive, language, and socio-emotional develcal, cognitive, language, and socio-emotional devel-opment than were children from other groups. Estate children were the least advanced and rural children and urban disadvantaged did not differ from each other. Changes in child-rearing practices and preschool education were recommended to alle-viate some of the differences among the groups.

Teachers are challenged by contradictory de-mands on curricular time. The social needs children bring to school sometimes collide with basic literacy instruction priorities. This research addressed coninstruction professes into research addressed con-cerns about television violence via a project that encouraged children to log their television viewing and write in daily journals their perceptions of those viewing experiences. The goal was to integrate so-cial content issues of educational concern with the academic demands of teachers to enhance the writing competency of their pupils. The study participants were 70 students from grade 6 who were asked to respond to 8 questionnaire items on their attitudes toward violence on television. Results in-dicate that heavy viewers reported more favorable attitudes toward television violence, and boys had higher percentages of positive or neutral evaluations of violent content than girls. Results also shoo lower than expected viewing rates and that journal entries involved more discussion of comedy and sports than any other topic, including violence. Us-ing children's out-of-school interests as the content in-school literacy instruction was found to be an effective way to reconcile two potentially conflict-ing educational priorities. (SD)

Motor Coordination, \*Young Children
Identifiers—Human Figure Drawing
This study examined characteristics of human fig-

ures representing the self as drawn by 3-, 4-, and 5-year-olds and the presence of age or gender differences. A total of 150 children who were selected randomly from day care centers drew themselves on paper with crayons. There were equal numbers of

boys and girls in each age group. Human figure drawings were analyzed on a 5-point scale using Saastamoinen's (1993) test battery. Results suggested that there were developmental changes and marked gender differences in the drawings. Over 40 percent of 3-year-old boys' drawing were not recognizable as human; all others had a circle for the head. Eyes appeared as large dots among 4-year-olds and as small dots or lines among 5. year-olds and as small dots or lines among 5-year-olds. A mouth appeared as a curved line in 3-year-olds, but was a curved line or "smiling" mouth in 4- and 5-year-olds. Almost all the children omitted ears in their figures. Only 16 percent of the 3-year-olds added a body to their figure; 95 percent of the older girls and 36 percent of the older boys did so. Arms were added to figures at 5 years, with girls more likely to add arms symmetrically and to add fingers. Girls added hair and clothing to their figures at a younger age than did boys. Identifiers-Evaluation Standards, \*Evaluative

Cues
Research indicates that the goals and evaluative
standards held by young children are influenced by
developmental factors and the classroom context.
This study investigated the goals held by first grade
students as they undertake classroom activities and
the criteria by which they evaluate their work. The
larger purpose was to explore the specificity of goals
and standards in classrooms for young children and
the ways in which teachers help students construct
functional views of classrooms appreciations. The the ways in which teachers help students construct functional views of classroom expectations. The subjects were 19 students attending a pre-K and first grade school located on a southeastern military base. Data were collected through weekly observa-tions and through individual student interviews in which subjects were asked why they chose to com-plete certain learning centers within the classroom piete certain learning centers within the classroom and also to evaluate work from their portfolio. The results indicated that classroom practices and teacher statements were influential in students perception of goals and standards in their classroom. In addition, different students described different critical that the standards in their classroom in addition, different students described different critical that the standards in their classroom in the standards and the standards are standards and their class and their class and their contents are standards and their class and their class and their class and their class are standards and their class are standards and their class and their class are standards and their class are standards and their classroom practices are classroom practices. addition, different students described different cri-teria, suggesting that there was not uniformity in the class's understanding of standards. High schievers were more likely than low achievers to make evalua-tive differentiations among subject areas such as math, writing, and art. It appeared that many stan-dards were inferred by the students on the basis of teacher feedback and whether or not work (for ex-ample, math versus art) was checked for accuracy. Research has supported the idea that the use of computers in the education of young children promotes social interaction and academic achievement. This resource booklet provides an introduction to computers in early childhood settings to enrich learning opportunities and provides guidance to teachers to find developmentally appropriate software and hardware. The first section of the booklet ware and hardware. The first section of the booklet focuses on learning with computers and the roles of computers in early childhood programs. The second section provides information on getting started and creating a computer-active classroom. Specific guidelines on computer configurations and setting up the classroom are included. The third section provides guidance in choosing and using software and in evaluating educational software. This section

advocates the use of software that builds concepts and skills, and provides classification of software as follows: (1) thinking and problem solving; (2) "Logo"; (3) educational adventure games; (4) communication; (5) painting and drawing; (6) writing and reading; (7) electronic and interactive story books; and (8) keyboard skills. Specific brand name software processes are electricated in the property of the electronic classification and contractive story books; and (8) keyboard skills. software packages are listed in many of these classification areas. The fourth section of the booklet provides a definition of the Internet and information on its use. The final section provides resource informa-tion on educational software distributors, profes-sional journals, monographs, and journals. (SD)

Identifiers-Learning Communities, \*Story Telling

by Children
Good storytellers possess polished presentation
skills, own a fundamental tool for understanding the
world, and are well prepared to learn to read and
write, all of which are important in school. This study systematically documented and analyzed the ementation of a storytelling program in a preschool classroom at a cooperative day care center in Cambridge, Massachusetts. The program had three parts: children listening to adults tell stories, chil-dren performing stories in front of their peers, and children meeting with the teacher/researcher to plan out their story performances. The adult stories, children stories, and child-teacher conferences were taped and transcribed, and relevant observations about the children's behavior and parental com-ments were recorded. The data were coded to de-scribe child-teacher interactions and to discover imilarities among stories told during the program. (Results of that analysis were presented in a separate paper.) Interpretation of the program implementation from a teacher's perspective yielded four guiding principles for helping children tell better stories: (1) creating a "community of storytellers" is essential in implementing a storytelling curriculum; essential in implementing a storytelling curriculum; (2) adult models of storytelling can be a powerful instructional tool; (3) teachers should take an active role in helping children tell their stories; and (4) there are limits to how much teachers should teach about storytelling. Descriptors—\*Budgeting, \*Budgets, \*Educational Finance, Models, \*Money Management, Organizational Effectiveness, Organizational Objectives, \*Program Budgeting, \*Program Improvement, Statewide Planning, \*Theory Practice Relation—10 Planning, \*Theory Planning, Statewide Planning, \*Theory Practice Relat ship, Total Quality Management Identifiers—Continuous Quality Improvement

Public financing for education and an array of other children's services has become a topic of sig-nificant interest and political concern. Elected officials and policymakers have sought to respond to public concern and dissatisfaction through a more explicit focus on results. To assist in this work of explicit focus on results. To assist in this work of achieving and measuring important outcomes for children and their families, the Finance Project created a Working Group on Results-based Planning, Budgeting, Management, and Accountability Systems. This paper is a result of the Working Group's efforts to design a strategic plan for those engaged in results-based budgeting. The first part of the paper provides definitions for some of the essential concents needed for discussing results-based deciconcepts needed for discussing results-based deci-sion-making and budgeting. The themes covered in-clude definitions for outcomes, indicators, and performance measures as well as a framework for choosing them. The second part suggests a strategy map, describing each element of the results-based budgeting strategy and proposing ideas about how to put these elements in place. In addition, the strategic map suggests how to build political and community support, how to reallocate resources and tie them to results, how to integrate results-based budgeting into the existing budget process, and how to avoid common pitfalls. The third part discusses lesons from state, local, and private initiatives to desons from state, local, and philosophic fine, measure, and achieve results, and summarizes what has been learned so far. The concluding part that has been learned so far. Changes in the public stresses the importance for changes in the public budgeting system and highlights the role of re-sults-based budgeting. (AA)

School-based nutrition programs can play an im-portant role in promoting lifetong healthy eating. Healthy eating patterns in childhood and adoles-cence improve childhood health and prevent health cence improve childhood health and prevent health problems. School health programs can help children attain full educational potential and good health by providing them with the skills, social support, and environmental reinforcement they need to adopt long-term, healthy eating behaviors. This report summarizes strategies most likely to be effective in promoting healthy eating among school-age youths and provides nutrition education guidelines for a comprehensive school health program. These guidelines, based on a review of research, theory, and lines, based on a review of research, theory, and current practices, were developed by Centers for Disease Control (CDC) in collaboration with ex-perts from universities and from national, federal,

and voluntary agencies. The guidelines include recand voluntary agencies. The guidelines include recommendations on seven aspects of a school-based program to promote healthy eating: (1) school nutrition policy; (2) nutrition education; (3) appropriate instruction for students; (4) integration of school food service and nutrition education; (5) staff training; (6) family and community involvement; and (7) program evaluation. tionship, Siblings
Sibling conflicts are formative opportunities for children to learn constructive conflict strategies such as negotiation and compromise; however, they also provide a forum for learning destructive strategies such as verbal and physical aggression. This study explored mothers' perceptions about how frequent, serious, and typical sibling aggression is; parental responses to aggression, including intervention strategies and emotional response; and links between parental response strategies, parents' evaluations of these strategies, and the frequency of sibling aggression. Open-ended home interviews were conducted with 30 mothers who have one preschool-age child and at least one older sibling. school-age child and at least one older sibling Mothers estimated that sibling aggression occurred an average of several times per week and that it was usually "not serious." The mothers' most common emotional response was anger, and they used a variety of strategies toward the eggression, including ety of strategies toward the eggression, including discussion, separation, simple commands, and pun-ishment. Mothers who described using more high-than low-power intervention reported more fre-quent sibling aggression; overall, mothers felt that calm discussion was most effective. They were also more optimistic that physical aggression rather than verbal aggression would decline over time. (Contains 12 references.) (Author/EV)

Cooperation

This study explored the potential for enhancing the effectiveness of young children's early learning experiences as a consequence of a genuine collaboration between researchers and teachers. An 18-month fieldwork period involved a critical analysis and evaluation of the relationship between 4-year-old children and teachers in effective early learning. The study took place in Birmingham, England, where all children are admitted to school at years of age. The fieldwork was compiled of two 4 years of age. The fieldwork was compiled of two independent yet interdependent components: (1) empirical research; and (2) action research. Empiri-cal data were gathered from four schools through practitioner (teacher) documentation, interviews and discussions with children, and systematic observation. Analysis of the empirical research provided an essential foundation for the collaborative action research period, which involved working with

teachers in examining early learning experiences, maximizing professional potential, and examining the teacher-researcher relationship. The study illus-trated the productive role of this relationship in entrated the productive role of this relationship in enhancing the effectiveness of the early learning and emotional well-being of young children. Results implied that the positive consequences of child development are dependent on the elevated learning and well-being experienced by the teachers and researchers. Interim analysis indicated that those teachers who strive toward their optimum level of learning and well-being are in the most appropriate position to provide children with the best possible experiences. This study explored the effects of family background variables on coping styles, and the contribution of coping styles and locus of control to the overall adjustment of older adolescents. The objectives of this study were to develop a Canadian adaptation of the Seiffge-Krenke Adolescent Coping station of the Settings-Arenke Adolescent Coping Style Scale; to explore the influences of family and personality variables on coping styles; to explore the influences of coping styles on overall adjustment; and to compare the influences of coping styles and locus of control. The subjects were 611 male and female Canadian university students between ages. 17 and 18, who were required to complete the cop-ing-styles scale along with other scales, some of which were consolidated into factor scores or averaged z-scores. The results suggest that family back-ground significantly influences adolescents' coping style and that coping style is a substantial contribu-tor to overall adjustment. (MOK)

Identifiers—\*Barriers to Participation, New York
(Upstate), \*Project Head Start
Head Start stresses the partnership between the
family and the early childhood program, a relationship that is becoming increasing important in a society where more women are entering the labor force
and the number of children receiving non-familial
child care continues to rise. This study sought to
answer two questions: (1) Are there parents who are answer two questions: (1) Are there parents who are not participating in the parent involvement opportunities provided by Head Start? and (2) What barriers might prevent such parents from becoming involved? The study explored which parents are less involved in the parent involvement opportunities provided by Head Start to determine why this involvement was not taking place. The subjects were 27 female and 2 male parents who were in their first answer two questions: (1) Are there parents who are Volvement was not taking place. The subjects were 27 female and 2 male parents who were in their first year with the Head Start Program. Subjects were interviewed twice, 6 months apart, to obtain infor-mation on barriers to and levels of involvement. Head Start's standard parent involvement form and participant observation were used to document amounts of involvement between interviews. The results indicated that high hours of employment, and the somewhat greater financial resources that accompany employment, may compete with spend-ing time on parent involvement. Changes in household composition accompanying program participa-tion, such as the birth of a baby or a divorce, were also determined to be potential barriers. (Contains 12 references.) (MOK)

I dentifiers—"Educare, New Zealand
This study examined the "educare" experiences
of infants and toddlers in New Zealand child care
centers to evaluate whether those experiences provided opportunities for learning. Subjects were 200
under-2-year-old children (99 boys and 101 girls)
from 100 childcare centers, 2 children from each
center. Subjects were each observed for 80 minutes
of structured time-sampled observations and 30
minutes require reserved of the children existing in minutes running records of the child's activity in context. The results showed that children initiated many interactions with adults, most commonly through vocalization. Crying, requesting, physical actions, and positive affect were much more infre-quent. Most of the children's initiations received quent. Most of the children's initiations received either positive or neutral responses from adults. Children were engaged more than three quarters of the time when they were observed but spent about 14 percent of the time wandering or waiting. Children were somewhat unlikely to be involved in joint play activities with an adult, which occurred only 7 percent of the time. A third of all children in the study participated in no joint attention at all. Qualitative data provided evidence of the overall responsiveness of high quality centers and the richness of joint attention episodes as contexts for learning. (Contains 33 references.) (Author/AA)

Identifiers-Australia

This study addressed the argument that early child care constitutes a risk to children's social adaptation, and that for high-risk samples this effect depends on the security of the infant-mother attach ment relationship. A longitudinal investigation of 135 first-born children in a low-risk sample was conducted to discern the contribution of child care experience and security of infant-mother attachment on child social competence at age 2.5 years. De-tailed descriptions of the families' use of parental and nonparental care from birth to 2.5 years were obtained through parent interviews at infant-age 4, 12, and 30 months. Security of attachment was assessed in the Strange Situation procedure (M. Ainsworth and others) at 12 months. Children's levels of social interaction with adult carers and profiles of social adaptability with peers were derived from observational measures of peer play and child initiations to adults and peers while at play with a familiar peer group. Results suggested that for a low-risk, representative sample, attachment security and early experience of child care are not predictors of child social adaptability. Social interaction patterns in the always and profiles a second care and profiles are not predictors of child social adaptability. Social interaction patterns social interaction with adult carers and profiles of in the play setting were most influenced by setting characteristics, including the quality of care, the presence or absence of the mother, the number of children, and by children's patterns of attendance. This study examined the relationship between varying patterns of maternal employment, the use of

varying patterns of maternal employment, the use of child care, and the infant's establishment of a reciprocal, responsive relationship with the mother. Parental and non-parental caregivers were located within a family system to examine attachment theory within an ecological framework. The subjects were 147 Australian mothers, selected while preg-nant with their first child, and interviewed about work and child care arrangements when the infants were 4 and 12 months of age to document the type, amount, and duration of parental and shared care experienced by each child in the first year of life. The results indicated that secure attachment was more likely to occur when mothers' employment and children's attendance at child care exceeded 10 hours per week. Maternal satisfaction with day care arrangements and maternal beliefs about the effects of employment on their child's well being are factors which are likely to moderate the impact of infant day care on the developing attachment relationship.

This year-long study explored toddler separation

Security of Attachment
This year-long study explored toddler separation
distress behaviors in a developmentally appropriate
classroom that used a gradual entry process, including a home visit. Four toddlers were selected for
study: two had overt separation distress behaviors at the beginning of the year, and two did not exhibit overt distress. The children were videotaped at the overt distress. The children were videotaped at the beginning of the year and throughout the year. Aneedotal records were kept, and parents were surveyed and informally interviewed whenever there was an incidence of separation distress behavior. The children exhibited individual differences in the intensity, frequency, and duration of separation dis-tress behaviors. Some separation behavior seemed to be low-key and easy to miss. Minor events influ-enced one child's separation distress while more un-usual family events seemed to have little influence on another child's behaviors. The results suggested that the entry process and caregiver responses to the child's behavior lessened the frequency, intensity, and duration of some separation distress. (A copy of the parent interview questionnaire and a list of observational references are appended. Contains 44 references.) (Author/AA)

Identifiers—Developmentally Appropriate Pro-

grams
Interest in assessment of young children increased
after readiness testing abuses in the 1980s. The pressure of demonstrating educational accountability
through children's standardized test performance
increased the use of skills-driven curricula. It also through children's standardized test performance increased the use of skills-driven curricula. It a'so created an inappropriate learning environment in which readiness tests were used to remove from the classroom children who could not meet the inappropriately high standards. Legitimate purposes for early childhood assessment include educational planning and communication with parents, identifying children with special needs, and program evaluation and accountability. Assessment instruments should be matched to the type of information needed. Portfolio assessment is gaining popularity among educators and appears to be well matched to developmentally appropriate early childhood programs. As a purposeful collection of student work illustrating effort and progress in given areas, portfolios allow teachers to observe development, evaluate the curriculum, determine efficacy of teaching practices, and facilitate faculty discussion. They provide an avenue for student self-evaluation, goal-setting, and learning opportunities. Establishing guidelines for portfolio inclusion highlights the learning goals. However, there are problems in using portfolios, including inconsistent reliability and validity of portfolio scores. Contents for a preschoolers' portfolio will vary from those used in elementary school. The portfolio is best organized chronologically according to developmental areas. Children should be allowed to examine work samples and contribute to portfolio selection. Evaluation criteria provide the framework for thinking about student performance and clarify instructional goals. Systematic observation is important for collecting information for preschoolers' portfolios. (KDFR)

It is widely accepted that within certain biological
limits, a child's development emerges out of a continuous and increasingly complex interaction with
significant people in his or her environment. Mothers and other significant adults, as experienced
members of the culture, may be viewed as mediators
and tutors who transmit cultural knowledge and
skills to children. This study is part of a larger investigation of cultural competence as a renewable reskills to children. This study is part of a larger investigation of cultural competence as a renewable resource in urban slums, and compared previous studies in Norway with the present Egyptian study. The subjects were 25 Egyptian mothers and their preschool children. The relationship between mothers' teaching styles and their children's educability and cognitive functioning was assessed by administering the Running Horse Game Test (which requires rule-understanding and planning) and the Raven Progressive Matrices intelligence tests separately to mother and child. The results indicated a significant relationship between mother's teaching and her child's educability. In addition, the mother's intelligence and education were related to her teaching, and less strongly to the child's educability. Her teaching strategy was, however, more predic-Her teaching strategy was, however, more predictive than intelligence and education were of the child's educability, and was a substantially more predictive factor of the child's intelligence. These findings are parallel to the previous Norway studies, suggesting that the effects of maternal teaching have some transcultural validity. (Contains 27 references.) (MOK)

Identifiers—Michigan
This study of 19 northern Michigan Ojibwa families examined antecedents to holding traditional values, and the relationship between mothers' and fathers' level of holding traditional values and their elementary school children's academic and social functioning. Participating families had a child between ages 3 and 11 years; the focal child of the study was the oldest attending elementary school. Interviews were held individually with the 15 mothers and 14 fathers comprising the sample. On the basis of interview information, the interviewers completed a scale measuring the extent to which

traditional values were held. Academic functioning was assessed through teacher assigned report card grades and two Adaptive Functioning items from Achenbach's Teacher's Report Form of the Child Behavior Check List (CBCL). Social functioning items from the CBCL; the Problem Behavior CBCL items; an American Indian Child Behavior Check List to assess personality traits important to American Indians; and an Index of Future Community Leadership, important in an American Indian population. Results indicated that identification with more traditional American Indian values in mothers had a beneficial impact on children's academic and social performance in school. Fathers' level of holding traditional values was not associated with his children's academic and social outcomes. Mothers' greater adherence to traditional values was associated and results and traditional values were held. Academic functioning greater adherence to traditional values was associated with higher levels of parental education and higher status parental occupation. (Contains 37 ref-erences.) (KDFB)

niques lentifiers—\*Sociometric Status

This study compared the sociometric status of boys and girls and investigated the role of various social behaviors in determining the peer status of boys and girls. Participants were 835 fourth graders

from eight elementary schools serving a lower- to lower middle-class population. An unlimited nomi-nations procedure was used in the fall and spring; children nominated peers in their grade for each of the following items: (1) liked most: (2) liked least; (3) starts fights; (4) gets in trouble; (5) someone you hang around with; (6) is a leader; and (7) plays alone and stays away from others. The number of nominations received for each child for each criterion was tions received for each child for each criterion was counted and standardized within grade. Results indicated that boys were twice as likely to be rejected and half as likely to be popular as girls. Girls were more likely to be neglected and less likely to be controversial than boys. Sixty percent of the children retained their peer status from fall to spring. Boys received higher scores for aggression and getting in trouble, and lower scores for being a prosocial leader and being withdrawn than girls. From fall to spring, antisocial behaviors increased for boys and prosocial behaviors increased for boys and prosocial behaviors increased for girls. Being a and prosocial behaviors increased for girls. Being a leader and staying away from peers were stronger determinants of social preference for boys than for girls, whereas low leadership and high stay-away scores were stronger determinants for low social preference for boys than for girls. (Six tables and 5 figures illustrate the findings.) (KDFB)

This study gathered information on general family
practices concerning allowances given to children, parental reasons for the provision of allowances, the bases for their administration, and the frequency of conflicts generated around them. The subjects were 81 parents of elementary school children in a mid-west Canadian city. Subjects completed questionmaires, and factor analyses of parent reasons for providing allowances were compared to the factors generated by Feather's Australian investigation. This study corroborated Feather's earlier findings on the factors influencing parents' decisions to give allowances: (1) family concerns (such as harmony); allowances: (1) family concerns (such as harmony); (2) child independence/monetary education; and (3) children's needs. Results also indicated that parents were consistent in their principles for allowances and rewards, since parents who did not increase allowance for good behavior were less likely than parents who did to decrease allowance for bad behavior. The same pattern of principles was apparent for grades. In addition, the parents perceived conflicts to be generated from children comparing allowances with their peers, or comparing their family practices of other their family practices with the practices of other families. Results suggest that although the relationship between income and allowances requires fur-ther investigation, the analysis of allowance practices per se is most effectively pursued in families who are able to provide beyond the bare necessities of life. Intended to foster communication among parents, teachers and school administrators, this presents lists of questions parents may ask concerning school programs and policies, particularly at the beginning of the school year. Questions are organized by different levels of schooling from pre-kindergarten to high school. Pre-kindergarten questions address issues including readiness, ac-creditation, and transitions. Elementary questions include parent involvement, curriculum and class size issues. Questions for middle schools cover issize issues. Questions for middle schools cover issues involving sex education, drug prevention, mentoring, counseling, and computer use. High school
questions cover issues including apprenticeships,
guidance and graduation procedures, and options
for transitions into the work force or higher education. General questions address school policy issues
including homework, testing, safety, absences, and
discipline (AMC) including homewo

Custody Using Bronfenbrenner's ecological model of human development, this study tested the hypothesis that family processes contribute more to adolescent adjustment than does family structure. Subjects for adjustment than does family structure. Subjects for the study were 234 adolescents between 12 and 16 years old living in a stepfamily on a regular basis. This sample is a sub-sample of a representative provincial survey (n=3,205) with adolescents from intact families (n=2,048), joint custodies (n=111), and others not considered in future analysis (n=22) were also a part of the survey. A mailed questionnaire available in French and English was completed by the adolescents. Findings indicated that the mean anxiety score was higher than other adjustment components and that 18.3 percent of the adolescents had made a suicide attempt. Girls had a lower personal well-being score and a higher anxia lower personal well-being score and a higher anxiety score than did boys. Younger adolescents wed fewer behavior problems than did older adolescents. Adolescents in stepfamilies estimated quite positively the quality of their family environment. They estimated the quality of their sibling relationship less positively than the quality of the relationship with their parents. Younger adolescents had lower decisional autonomy than did older adolescents. The quality of the family environment was related to adolescents' adjustment; however, there was no relationship between adolescents' decisional autonomy and adjustment. The quality of the relationship with the each parent individually was associated with adjustment, while the quality of the relationship with siblings was associated with per-sonal well-being. Adolescents from intact families showed the lowest adjustment difficulties, with adoshowed the lowest adjustment difficulties, with ado-lescents in joint custody rating second, adolescents in stepfamilies rating third, and adolescents living in single families, fourth. Family climate predicted 27 percent of the variance in adolescent adjustment.

Identifiers—ERIC Digests

Given the support for increased involvement of parents in their children's schooling and the positive contribution men can make to children's development, it is important to reach out specifically to fathers or other significant males in parent involvement efforts for pre-kindergarten and early child-hood programs. This digest discusses barriers to male involvement, including: (1) fathers' fears of exposing inadequacies; (2) ambivalence of program staff members about father involvement; (3) gatekeeping by mothers; and (4) inappropriate program design and delivery. The digest also offers the following suggestions for educators who are planning initiatives targeted at men: (1) be specific about goals; (2) acknowledge resistance to initiatives; (3) identify significant male role figures; (4) provide training and support services for staff; (5) train female facilitators to accept male involvement; (6) do not neglect mothers; (7) go slowly; and (8) do not reinvent the wheel. dent Expectations

Perfectionist students are not satisfied with merely doing well or even with doing better than their peers. They are satisfied only if they have done a job perfectly. Problems associated with forms of perfectionism that focus on seeking success are relatively minor, but problems associated with forms of

perfectionism that focus on avoiding failure can be destructive to achievement motivation. This digest lists the characteristics of student perfectionism, including: (1) performance standards that are impossi bly high and rigid; (2) motivation from fear of failure; (3) difficulty in taking credit or pleasure in accomplishments because such achievement is merely what is expected; and (4) procrastination in merely what is expected; and (4) procrastination in getting started on work that will be judged. The digest then discusses the performance norms and work expectations that perfectionist students need to relearn, including understanding that: (1) schools are places to learn knowledge and skills, not merely to demonstrate them; (2) errors are normal, ex to demonstrate them; (2) errors are normal, expected, and necessary aspects of the learning process; and (3) it is usually more helpful to measure progress by comparing where one is now with where one was, than by comparing oneself with peers or with ideals of perfection. The digest concludes with a list of strategies that effective teachers can use to help perfectionist students, including; (1) building a friendly, supportive learning environment; (2) establishing that mistakes are a normal part of the learning environment; and (3) articulating expectations. tablishing that mistakes are a normal part of the learning process; and (3) articulating expectations that stress learning and improvement over perfect performance on assignments. Through such strate-gies teachers can learn to support the success-seek-ing aspects of achievement motivation while working to reduce unrealistic goal setting. (LPP)

Identifiers—Fast Response Survey System, \*School Community Association, School Councils, \*School Effectiveness Indices, School Influence Recognizing the critical role of parent involve-ment for the success of their children in school, this report presents statistics which focus on various areas in which parents and schools can work together to develop partnerships. The report presents data collected from a survey of 810 public elementary schools serving kindergarten through grade 8. Results were weighted to produce national estimates of all public schools serving these grades. Data were collected on several kinds of activities which public elementary schools sponsor to encourage parent in-volvement, the amount of parent participation in those activities, and the extent to which parent in-put is considered in decisionmaking related to school issues. This report discusses results school issues. This report discusses results of school-sponsored activities to inform and involve parents, including: (1) "Parent Attendance at School Events"; (2) "Parent Attendance by School Characteristics"; (3) "Parent Participation in School Decisionmaking"; and (4) "Parent Input Through School Councils." The Brief concludes with a summary of findings and a section of technical notes describing how the survey was conducted. Includes five tables of descriptive statistics. (AMC)

ing Methods
The ANISA model of education (D. Streets and D. Jordan) classifies curriculum content into four areas-the physical environment, the human environment, the unknown environment, and the self-and encourages horizontal integration between content areas. The ANISA model holds that the process of learning consists of differentiation, integration, and generalization. The teacher's role is to help the learner achieve process as well as content goals, thus teaching the child to become a compegoals, thus teaching the child to become a compe-tent learner. While noting that the model is a care-fully thought out comprehensive theory, this critical review uses the area of language acquisition to ques-tion ANISA assumptions about how humans learn, and discusses another model of learning presented by Joseph Chilton Pearce which maintains that the learner creates an inner model of outer stimuli according to his or her developmental constraints. This inner model is successively refined as the learner gains experience. Pearce's model differs from the ANISA model in that the learner's working theory of "how it all works" provides the catego-ries for classifying incoming data. While the ANISA framework is a model of the linear sequential thinking prevalent in the Western world, the changing paradigms of modern science may be closing the door on scientism, and the capacity of the ANISA ador on scientism, and the capacity of the ANISA model to incorporate these changing paradigms will be the measure of its viability. The Alexander Indian Reserve, near Edmonton, Canada, has based its school philosophy on the ANISA model with dramatic results: attendance has doubled, vandalism has dropped, academic accorate have sizes. has dropped, academic scores have risen, and com-munity involvement has increased from 15 to 500 parents and friends attending home and school nights. As rural communities become more culturally di-

As rural communities become more culturally diverse, the institutions and organizations that serve them must assist this cultural transition by providing a framework for change. Such a framework includes a vision of healthy diverse communities that are conscious of changing demographics and willing are conscious of changing demographics and willing to reevaluate community self-image. Three projects in Wayne County, New York, have heightened this consciousness and encouraged participation of all groups. In these projects, migrant teenagers col-lected and recorded oral histories of their families and other farmworkers, resulting in a book that illuminates the rightful place of these families in the community; a multicultural arts series encourages inquiry and contact between diverse cultures and provides drama and dance training for African American and Latino youth; and a racial equality action group empowers citizens to confront discriminatory practices and has sponsored a job bank, a scholarship fund and mentoring project for students of color, a multicultural education packet for area schools, and local speakers for community educaschools, and local speakers for community educa-tion programs. The following key assumptions un-derlie these programs: (1) cultural differences are important and valuable; (2) the target of change is the whole community; (3) community restructuring and social action are necessary; and (4) programs must be participant driven. Essential skills for change agents and community leaders are intercultural relations skills, conflict resolution skills, and an understanding of power. Multicultural training

can encourage exploration of personal and profes-sional boundaries that inhibit effective intercultural communication. Contains 17 annotated cultural di-versity references and 6 multicultural resources.

Identifiers—Access to Services, \*Manitoba
With widespread implementation of mainstreaming in Manitoba, regular classroom teachers need
diagnostic information to plan modified programs
for special needs students. This report describes the
demand for and availability of diagnostic services
for special needs students in Agro-Manitoba, which
comprises 34 rural school divisions in the province's
arricultural area & literature receives arricultural area. comprises 34 rural school divisions in the province's agricultural area. A literature review examines use of formal versus informal assessment, stages in the referral process, and recent developments in reading diagnosis. A survey was developed and mailed to all special education administrators in Agro-Manitoba. Responses were received from 26 of the 34 school divisions. The survey covered the availability of var-ious clinical services, consultant services, and community services that provide diagnostic information; sharing of services with other school divisions; new programs or practices to improve ser-vices; the location of services; details of the referral vices; the location of services; details of the referral process; types of problems referred to the province's Diagnostic Support Centre (DSC), DSC services to districts, and related costs; and suggested changes. Interviews were also carried out at the DSC and at the Child Care and Development Branch of the provincial department of education. Results indicate that many rural divisions are sharing services; large caseloads and long waits for services are problems; and some school divisions need increased school and some school divisions need increased school support staff. Recommendations are offered based on survey results and comparisons with expert opin-ions on essential services. Appendices include the survey questionnaire, interview schedules, and a glossary. Contains 36 references, and 9 tables of glossary. (data. (SV)

Identifiers-Manitob

This report describes a preceptorship model that provides student nurses with clinical practice in rural health facilities. The development and implementation of a preceptorship model reflects a partnership between nursing education and nursing service-between the urban nursing school and the rural hospital. A five-stage preceptorship model is presented that includes development of guidelines, election of participants, orientation of participants, implementation, and evaluation. The model draws on a literature review plus feedback from nurse preceptors and graduating nursing students. The model emphasizes the importance of clearly stated purposes and objectives; guidelines outlining the roles and responsibilities of the student, the preceptor, and responsibilities of the student, the preceptor, and the faculty liaison; and careful selection and preparation of all participants. In spring 1992, 24 students completed their senior practicums in rural hospitals using the preceptorship model; all were satisfied with the experience, met their clinical objectives, and completed their learning contracts. Evaluations of the model by the faculty liaison person, preceptors, and students resulted in 18 recommendations to improve implementation of the model. The strongest preceptor recommendation was that students and preceptors work identical hours with identical patient assignments. Contains 53 references. Appendices include preceptor questionnaire, terminal nursing competencies, agree-

ment between nursing school and health care facility, form for assessing potential preceptors, and evaluation forms for students and preceptors. (Au-

Manitoba's secondary school system is under increasing pressure to respond to economic and social changes transforming the province. This report explores existing strategies related to curriculum development and adaptation, instruction, assessment, and leadership that could be used to restructure Manitoba secondary schools. A literature review examines the meaning of restructuring; restructuring rationale; history of high school reform; restructuring strategies for curriculum, instruction, assessment, and leadership; and special concerns of small rural secondary schools. Also reviewed are the structure and goals of secondary education in Manitoba, as well as current practices in curriculum, instruction, assessment, and leadership. Fiftee secondary schools in British Columbia, Manitoba, Ontario, and Alberta were identified as conducting restructuring experiments. Qualitative case studies revealed that 11 of the schools used one or more of the following strategies: (1) restructured curriculum (curriculum adaptation to achieve magnet school status, curriculum negotiation between teachers and students, interdisciplinary curriculum;) (2) restructured instruction (independent learning, project-centered learning, authentic learning as project-centered learning. students, interaction (independent learning, project-tured instruction (independent learning pased on a production process); (3) restructured student evalu-ation (performance assessment, alternative assessation (performance assessment, and ation (performance assessment); and (4) restructured leadership roles (transformational leadership, strategic planning).

Identifiers—\*Manitoba
An art course was adapted from the Manitoba
curriculum for grade 9 and delivered via teleconferencing to three small, geographically isolated
schools in Birdtail River School Division, Manitoba.
Participants included 1 adult planning to study art
at a community college and 38 students in grades
8-10 at a German-speaking Hutterian K-10 school,
Exercise Schools and a French-speaking K-11 school, and an English-

speaking college preparatory school. The course was based on previous experience with an experi-mental teleconference art course, a review of practices of teaching art by distance education, and consultation with 11 Manitoba teachers who had taught other subjects via teleconferencing. Course design involved writing workbook modules that could also be completed via independent study, selection of texts and art reproduction kits for purchase by participating schools, preparation of supplementary visual displays, and planning of strategies to increase interactions between teacher and students and among students from different sites. Implementation steps included preliminary visits to each site for classroom preparation and ori-entation of students and class proctors, preparation of detailed proctor guides, meetings with principals to gain their support, and arrangements to transport student art assignments. Course evaluations by the teacher, students, and proctors indicated that tele-conferencing, while no one's method of choice, was a viable delivery method producing results similar to those in regular classrooms. Recommendations relate to the status of teleconference courses in schools, provision of quality resources, and the search for appropriate models for teleconference courses. Contains 31 references. Appendices in-clude evaluation questionnaires and course materials. (SV)

in Canada and was applied to school classrooms and laboratories. Educators expressed concerns that diflaboratories. Educators expressed concerns that difficulties in implementation would negatively affect student laboratory activity. In 1994, a survey of 219 randomly selected Manitoba junior and senior high school science teachers (128 rural and 91 urban) examined issues related to implementation and effects of WHMIS regulations. Results show that while WHMIS knowledge and implementation were generally low, rural teachers scored signifi-cantly lower than urban teachers. Both rural and urban teachers scored higher on items that were part of their safety routines before WHMIS regulations. Urban and rural teachers reported few accidents, and accidents were not a result of noncompliance with WHMIS. WHMIS inspections were related positively to higher knowledge and implementation categories. Higher WHMIS knowledge and implementation scores were associated with the following teacher characteristics: more experience in subjects and grade levels currently assigned, teaching grades 11-12, more university science courses, more science methods and curriculum courses, and access to a laboratory assistant. Compared to rural teachers, urban teachers had a significant advantage in most of these areas. High percentages of both rural and urban teachers met or exceeded the number of science activities recommended by grade 11-12 vincial guides. The effect of WH implementation on student laboratory activity was inconclusive. Contains 33 references. (Author/SV)

Descriptors—"Child Caregivers, "Children, Child Welfare, "Day Care, Employed Women, Farmers, Farm Labor, Foreign Countries, "Parent Attitudes, Rural Areas, Rural Farmily, "Rural Farm Residents, Rural Women, "Safety, Surveys Identifiers—Access to Services, Family Farms, "Manitoba A Manitoba survey examined child care use, child safety concerns, and parents' on-farm and off-farm work to determine the needs of farm families for child care services. Of 972 questionnaires mailed to Manitoba farm residences, 121 were returned by respondents who were actively farming and living on a farm with at least one child younger than 16 years. Most husbands and wives were full-time farmers; 19 percent of husbands and 35 percent of wives were regularly employed off the farm. Farm farmers; 19 percent of husbands and 35 percent of wives were regularly employed off the farm. Farm help was hired by 55 percent of respondents, mostly on a seasonal basis. Responding families included 294 children under age 16 (76 percent under 13). Child care was used regularly by 21 percent of families and was used during peak farm times (such as seeding or harvest time) by 55 percent. Child care was provided mostly by relatives, followed by older siblings and nonrelatives, but was never provided by a day care center. Alternatives to child care for 64 percent of farm families were to take the children percent of farm families were to take the children along or to leave them alone while parents worked on the farm. In general, the greatest concerns for children's safety on farms related to augers, power take-off equipment, farm chemicals, and large ma-chinery. Safety concerns varied with the number of hours parents worked on the farm and children's ages. Parents indicated the youngest age at which children could participate in various farm activities. child care support preferred by farm families was either a caregiver in the farm home or hired farm help to free the wife for child care. Recommendations outline a model for rural child care services.

Appendices elaborate on the model and include the rvey questionnaire. (Author/SV)

This paper addresses philosophical and ethical is-sues regarding school-to-work issues in public education. The purpose of school-to-work programs is to help students obtain employment. This paper as-serts that schools should prepare students for work, but the concept of "work" entails much more than but the concept of "work" entails much more than just securing employment. School-to-work programs are designed for populations in metropolitan areas and are not geared for the needs of rural communities and rural populations. For instance, school-to-work programs prepare students for high-tech, high-paying jobs. In contrast, the future job market in rural West Virginia involves low-skill, low-water, and part-time employment. In a fourjob market in fural west virginia involves low-skii, low-wage, and part-time employment. In a four-county area experiencing rapid growth in West Virginia, the outlook for future jobs focuses mainly on food preparation, guard work, and home health care. In addition, it appears that there may not be enough job growth in West Virginia to sustain the employment of all high school and postsecondary graduates. The bottom line is that while job holding may be a defendable goal in urban areas, it may not be relevant to the differing nature of "work" in rural areas and can easily become another means for sortstudents into vocational and academic tracks. In addition, school-to-work programs encourage stu-dents to leave rural areas in search of high-tech, high-paying jobs. In order to preserve rural commu-nities, school-to-work programs need to promote community stewardship and a sense of community amone students. Such aims have to do with larger purposes and commitments that are worthy to be the object of true education. (LP)

Identifiers-\*Culturally Different Students, Diversity (Student), Student Support Services

Dropout rates at the college and university level are much higher for students of minority cultures than for their majority culture peers. This paper sug-gests that the "revolving door" scenario of minor-ity-culture college students can be stemmed by the proper use of mentoring. A combination of successful peers (interpreters), university professionals ful peers (interpreters), university professionals (go-betweens), and community members of the same cultural group (models) could aid these students in becoming bicultural and adept at survival in the majority setting without denying their cultural heritage. The paper also presents descriptions of CD-ROM based technology that would provide a delivery system for this support program. Multimedia mentoring could incorporate photographs target. dia mentoring could incorporate photographs, taped interviews, interactive scenarios, and video segments. This would alleviate the need for live interviews and enable a larger pool of mentors to be accessed, including mentors from other camp Remedies are suggested that could positively affect the ability of culturally diverse students to remain in nd university settings until graduation.

ment, \*Telecommunications
As of December 1995, at least 28 federal programs administered by 15 federal agencies provided funds that either were specifically designated for munications projects in rural areas or could be used for that purpose. Interviews with community leaders and rural development experts identified specific actions that must be taken to lay the foundation for establishing rural telecommunications projects. Communities should develop an understanding of telecommunications technologies and their potential benefits; engage in long-term planning to determine the feasibility of their project; and build partnerships among federal and state offi-cials, telephone carriers, utilities, Internet provid-

ers, and potential beneficiaries such as hospitals and ers, and potential beneficiaries such as hospitals and schools. Federal telecommunications programs need to change in several areas: (1) educating rural communities on the potential benefits of telecommunications technologies, (2) building in requirements for considering telecommunications technologies in long-range planning, and (3) making the multiple federal programs easier to use. The planning and coordination aspects of the Federal Agriculture Improvement and Reform Act of 1996, as well as changes to strategic planning suidelines. Agriculture improvement and ketom Act of 1990, as well as changes to strategic planning guidelines contemplated by the Economic Development Administration, should help address these problems. Appendices include the 28 federal programs that fund telecommunications projects, detailed descriptions of the communications projects, detailed descriptions. tions of 5 telecommunications projects in rural areas, and 5 national organizations representing rural areas (TD)

This collection of 14 folk drama scripts is drawn This collection of 14 folk drama scripts is drawn from the Hispanic culture and traditions of the American Southwest and designed for use in educational settings. The plays are short, simple, and easy to produce. A single play can fill a class period, while several plays grouped together would make a school assembly. Six plays, intended for grades 4-8, are based upon folktales of the Hispanic Southwest. Selected for their strong dramatic situations and characters, the stories are descended from classic European folktales. Three plays, intended for ele-mentary students, are animal fables that teach a moral lesson through the adventures of their animal moral lesson through the adventures of their animal characters. Four plays are related to religious holidays and enhance the experience and understanding of Mexican traditions associated with Christmas, the Feast Day of Our Lady of Guadalupe (December 12), and El Dia de loa Muertos (the Day of the Dead-November 1-2). The final play is a historical play based on events behind the battle of Puebla in 1862, when the undermanned and underequipped Mexicans defeated the French army in Napoleon's first attempt to extend his empire to the American Mexicans deteated the French army in Napoteon's first attempt to extend his empire to the Americas. Through the years, the holiday of Cinco de Mayo has evolved from a memorial of this battle into a more encompassing celebration of Mexican cultural pride and accomplishment. The book's introduction consider the contraction of the contra provides tips on casting, staging, costumes, and use of Spanish words, while introductions to individual plays give background information. Includes a glos-sary of Spanish words, a bibliography, costume illus-trations, and a short biographical note about the author. (TD)

Descriptors—Crime, Educational Attainment,
\*Employment Patterns, Foreign Countries, Income, Migration, Population Distribution, Population Growth, "Population Trends, Rural Areas, "Rural Population, "Rural Urban Differences, "Small Towns, "Social Indicators, Trend Analysis, Urbanization Identifiers—\*Canada

This report summarizes demographic, economic, and social statistics on Canada's rural and small towns through 1989. Rural and small towns include areas with populations of less than 10,000 persons or a population density of less than 400 per square to a population density of less than 400 per square kilometer. The first section examines rural-urban differences in population trends and age structures as well as migration patterns between rural and ur-ban areas. The second section focuses on the labor market and compares rural and urban Canada in terms of labor force participation, employment by industry, and unemployment rates. The last section focuses on social indicators, including rural and ur-ban trends in family income, income inequality, education, literacy levels, and crime rates. Data indicate that while the urbanization of the Canadian ulation has continued virtually unabated since population has continued virtually 1851, the rural population has exhibited steady growth in absolute terms. Although the service sector of rural and small towns has grown in both abso-lute and relative terms since 1976, primary employment remains concentrated in rural areas. However, the decline in agricultural employment and primary industry employment has led to a de-cline in the rural share of employment growth. As to social indicators, the lowest average incomes

were found in rural areas and small towns with pop-ulations less than 30,000. However, rural Canada had the lowest incidence of low-income families, the least extreme income inequality rates, and the low-est crime rates. Educational levels were directly related to population size. For example, the share of the relevant population with some postsecondary education increased with the degree of urbanizaeducation increased with the degree of urbaniza-tion. In addition, rural and small towns with popula-tions of less than 5,000 had a higher proportion of individuals over 15 years old with less than a ninth-grade education, when compared to large ur-ban centers. Includes 71 figures, references, and ru-ral population statistics for Canada and its provinces during 1931-86. (LP)

Identifiers-\*Manitoba

This curriculum guide was developed to give a Native American perspective to the social studies curriculum for Native students in Manitoba (Canada). The curriculum is appropriate for students in grades K-4 and is based on Native values such as respect, caring, sharing, honesty, kindness, and faith. The first section of the guide outlines three units of study for each grade level that focus on the incorporation of Native language, literature, and cultural knowledge and activities. Topics include career awareness, understanding self and others, seasonal activities, food, clothing, shelter, health and safety, communications, transportation, recreation, traditional roles of men and women, child rearing, survival in the environment, leadership, Native languages, and the lifestyles and cultures of other indigenous peoples. Each unit includes teacher information, topics, materials needed, and learning activities. The second section includes a conceptual framework for using the curriculudes a conceptual activities. The second section includes a conceptual framework for using the curriculum and identifies learner outcomes for each grade level based on First Nations and Metis cultures. The framework is intended to assist schools in integrating Native perspectives into curricula, enable students to learn the history of Manitoba and Canada before European settlement, and give the perspectives of Native people since that time. Also includes a bibliography, a glossary, and information on assessment of student achievement (I.P.) ement (LP)

Identifiers—"Antibias Practices, ERIC Digests, Native Americans, Webbing (Thematic)
Teaching from an antibias perspective means going beyond conventional multicultural education and introducing students to a working concept of diversity that challenges social stereotypes and discrimination. This digest describes current inadequacies in teaching about Native Americans, suggests ways to avoid common pitfalls, and provides guide-lines for detecting anti-Indian bias in instructional materials. Three obstacles to providing better in-struction about American Indians and Alaska Natives are lack of training in teacher education programs, ongoing racist portrayals of Native Americans in the larger society, and difficulties in locating sources of trustworthy materials. When teaching about Native Americans, teachers often favor approaches that portray Native Americans as extinct, or that allow students to experience only the exotic components of a Native culture. Both approaches teach simplistic generalizations about other peoples and lead to stereotyping rather than understanding. Teachers must begin by examining their own underlying beliefs about Native Americans and by critically questioning cultural images in books and the mass media, then use this knowledge books and the mass media, then use this knowledge to develop an antibias curriculum. Antibias learning may be integrated into the entire curriculum through a technique called webbing. Types of in-structional materials to avoid are those that make sweeping generalizations about Native Americans, present only colonizers' perspectives, exploit Na-tive American cultural and spiritual traditions for tree American Cultural and Spiritural traditions for profit, or lack respect for Native intellectual prop-erty rights and indigenous knowledge. Contains 15 references and resources. (SV)

An experimental project was implemented to test
the effectiveness of full inclusion of students with
learning and behavioral disorders at a rural middle
school within the Appalachian region of Kentucky.
Thirteen students with behavioral disorders or
learning disabilities were placed in four regular
classrooms for 3 months. Five teachers participated
in the project and received training prior to the in the project and received training prior to the project. Adapted curriculum and instructional procedures, and classroom behavior management strategies were applied. Routine collaborative activities were organized during the process. It was found that students with behavioral disorders or severe learning disabilities could not benefit academically and behaviorally from the full inclusion service provided in the project, and the learning of students without disabilities was affected because instructional plans could not be accomplished. However, full inclusion could not be accomplished. However, full inclusion appears to be appropriate for students with mild learning disabilities. This study addresses a basic issue: the necessity for schools to provide quality educational services to students with and without disabilities in inclusion practice. \*Reform Strategies, Social Justice, Social Move-

Kerala, a state in southwestern India, has implemented radical reform as a development strategy. As a result, Kerala now has some of the Third As a result, Kerala now has some of the Third World's highest levels of health, education, and so-cial justice. Originally published in 1989, this book traces the role that movements of social justice played in Kerala's successful struggle to redistribute wealth and power. A 21-page introduction updates the earlier edition. This book underlines the following positive lessons that the Kerala experience offers to developing countries: Radical reforms deliver benefits to the poor even when per capita incomes remain low. Popular movements and militant progressive organizations with dedicated leaders are necessary to initiate and sustain reform. Despite their other benefits, radical reforms cannot necessarily create employment or raise per capita income. Local reformers are restricted by national politics. Public distribution of food is a highly effective policy in poor agrarian economies. Devoting significant resources to public health can bring about low infant mortality, high life expectancy, and low birth rates

even when incomes are low. Widespread literacy and educational opportunities can help create a more just and open social order. Meaningful land reform can reduce inequalities and give resources to the poor. Wage and working-condition laws can the poor. Wage and working-condition have can help effect more equitable resource distribution even in a poor economy. Greater socioeconomic equality can lead to lower levels of violence and healthier social and political environment. Women can benefit from radical reforms not aimed at them, but special attention must eventually be given to their needs. Progressive forces, including Communist parties, can play a major positive role in benefit-ing very poor Third World citizens. Radical reforms can shield the poor against recessions. This paper addresses issues relevant to international development programming, particularly with reference to distance education programming in indigenous communities of the Canadian north. A major issue in international programming is the role of the community. Without the participation of indigenous peoples as partners in program design and implementation, conventional management models will not succeed. Partnerships in the development will not succeed. Partnerships in the development and management of international projects allow each partner to contribute to the project's value and sustainability and broaden the knowledge base on which techniques, process, and results are built. The points are the same for distance-education teacher education in remote communities: the participation of local indigenous people ensures respect for their knowledge systems and promotes the sustainability of the educational endeavor. A community focus increases understanding of situational realities at different levels in a distance-education system. Community interactions at local, regional, national, and international levels must be analyzed, accommodated, and incorporated into planning and implementation. A focus on community will also ensure flexibility in delivery methods to suit local circum-stances. Examples of distance education projects in northern Canada and in Ghana illustrate the need to analyze community involvement and the levels and types of relationships within programs. (SV)

This paper explores the emerging relationship be-tween distance education and sustainable development. After ranging through the literature on sustainable community development, this essay concludes that above all it must be unified: it must combine the traditional economic criteria for suc-cess (profits and employment) with a fusing of community and corporate culture and a strong applied ethic of environmental stewardship. As well, successful sustainable community development must be mindful of the quest for the well-lived life. The most obvious link between such development and distance education is that distance education serves small communities, many of which are infused with traditional wisdom and struggling to recapture self-reliance in economic conditions of change and seit-renance in economic conditions of change and unpredictability. In many northern Canadian com-munities, people are also concerned with environ-mental stewardship issues, which typically are introduced from outside and appear beyond local control. Distance education can empower adults in small communities to undertake participatory ac-tion research to solve local problems. In the Arctic Institute's experience with Native communities, both locally developed curriculum materials and community-based adult education programs can nurture community empowerment, cultural and lan-guage maintenance, and entrepreneurship. Finally, we must recognize that the emerging environmental crisis is the end product of science and technology rooted in orthodox Christian arrogance toward na-ture. We need new values of environmental ethics

and stewardship. Contains 23 references. (SV)

This paper describes the characteristics of Bo-tswana's remote area dwellers (RADs) and the gov-ernment's related rural development policies. RADS live a nomadic lifestyle, live outside the traditional village structure far from basic services, rely heavily on hunting and gathering, have low levels of literacy and little access to education, and frequently speak a language other than the national language. In 1989, an estimated 24,800 RADs lived in approximately 131 small scattered settleme The government's Accelerated Remote Area Development Programme encourages RAD participation in various economic activities: agriculture, hunting and wildlife management, food processing, livestock production, beekeeping, salt production, and marketing of handicrafts and food products. All these activities require training. Only 33 schools and 24 health posts are located in RAD districts. A household survey in one village containing a primary school and an adult literacy program revealed that of a total population of 1,254 persons, 828 were enrolled in school or the National Literacy Programme (NLP) or had completed NLP. No secondary education was available, indicating the need for appropriate correspondence education or other distance education. In four other remote areas, 86 percent of respondents had no schooling or exposure to The government's Accelerated Remote Area Detance education. In four other remote areas, 86 percent of respondents had no schooling or exposure to
NLP. At present, the following educational programs are available via correspondence or radio
broadcast: primary, secondary, and higher education programming; farmers' broadcasts; health education; adult literacy; women's development
concerns; conservation of natural resources; and general economic and social issues. (SV)

The Wahsa Distance Education Centre is operated by the Northern Nishnawbe Education Council (NNEC) for Cree and Oji-Cree secondary students living in the 23 remote communities of Sioux Lookout District in northwestern Ontario.

Although most communities have locally controlled K-8 schools, very few communities offer secondary education. The NNEC, a Native-run organization, has been mandated by the 23 tribal leaders of Sioux Lookout District to serve the needs of secondary and postsecondary students. In 1990, Indian and Northern Affairs Canada agreed to fund a distance education program that would allow Native students to remain in their communities and attend high school. An advisory board composed of representatives from NNEC, Wawatay Native Communications Society, tribal councils, and four First Nations met regularly to work on program development. Wawatay Native Communications Society agreed to deliver Wahaa's distance education program over its radio network. Communities donated buildings to be used for learning centers, and community members offered to be distance education coordinators and tutors for the program. The program provides radio and correspondence courses for has been mandated by the 23 tribal leaders of Sioux gram provides radio and correspondence courses for students in grades 9-11, including required subjects and courses in Native culture and language. This and courses in Native culture and language. In spaper also discusses effective program delivery methods; areas for program improvement; and plans for program expansion to encompass educational television, increased programming for 12th-grade students, adult education classes, and teacher education cutters. cation courses. This paper overviews a proposal for implementing an adult literacy program in a small tribal commu-nity in northern Alberta (Canada). The program would enhance participants' ability to manage change affecting the community's economic, social, and educational circumstances. Recent data indiand educational circumstances. Recent data indi-cate that 24 percent of Native Americans in north-ern Alberta lack literacy skills, 31 percent of students leave school before completing the 9th grade, and 85-97 percent of students do not com-plete school. Nose Creek is a remote, tribal community of 25-30 Cree, half of whom are adults. Local services are minimal and include a two-room portaservices are minimal and include a two-room porta-ble public school, electric power (for some), and one mobile phone. Public schooling up to grade 9 is provided in English by one teacher and a local aide. Very few students leave their communities and fam-ilies to pursue a high school education. Recently, the community has been challenged by social changes that have eroded the traditional economic base and increased the community's dependence on government assistance. Community members real-ize the importance of literacy development in con-fronting their changing circumstances and have identified three primary uses for literacy: to improve their ability to effectively communicate with public agencies, to increase their understanding of commu-nity management and interaction with mainstream society, and to develop entrepreneurial and employsociety, and to evelop enterpreneuria and employment skills that promote economic independence.

Based on these needs, a proposed model for adult literacy education was developed by the Northland School Division, Alberta Vocational Center (AVC)-Lesser Slave Lake, Grande Prairie Regional College, and Nose Creek elders. Based on nontradicated transfer the Northland College, and Nose Creek elders. College, and Nose Creek clears. Based on Bontrast-tional premises, the proposal addresses objectives, learning strategies, curriculum development, in-structor role, learning resources, program and stu-dent evaluation, program administration, and dent evaluat funding. This paper addresses the role of distance education as a means for increasing curricular offerings of
small and rural secondary schools. Treating distance
education as a "technology" risks repeating the
same cycle of false hopes and expectations that has
historically accompanied the introduction of technology into education. Instead, efforts should focus nology into education. Instead, efforts should focus on identifying effective educational practices specifically for distance education programs. During 1987-89, two projects were implemented by the Alberta Department of Education (Canada) to examine different approaches to distance education in secondary schools. The Distance Learning in Small Schools (DLSS) Project allowed students in a consortium of 28 small high schools to take courses not available in their schools. Each school was equipped with a far weeking and teleconferencies courses. with a fax machine and teleconferencing equ with a fax machine and teleconferencing equipment. Assignments were faxed to teachers and results were faxed back. If students could not get help locally with a problem, they were free to phone or fax teachers. The Distance Learning Project North (DLPN) used a multi-class approach and computers to teach high school mathematic courses. Program evaluation identified distance education management issues related to teachers auroport staff facilievaluation identified distance education manage-ment issues related to teachers, support staff, facili-ties, equipment, finances, and program administration. Educational practices relevant to distance education that need further study include independent study, distributed classrooms, student support, and student motivation. (LP)

In 1985, the Department of Education in Alberta
(Canada) adopted policy that allows remote or rural
high schools to use distance education as a method
for increasing curriculum offerings and avoiding the
need for school consolidation. In 1987, the Alberta
Department of Education implemented the Distance Learning in Small Schools Project to address
educational equity of curriculum in rural and small
high schools. Participating school districts provided
teachers who agreed to complete tutoring and grading work at home for students enrolled in correspondence courses. By 1988, there were 28 schools and
approximately 1,000 students participating in the
project. In 1988, Distance Learning Project North
was implemented in 12 Alberta high schools. This
project used computers to teach mathematics and project used computers to teach mathematics and included print modules, videos, and computer software for student evaluation and tracking of student progress. Additionally, on-site teachers assessed student learning needs and provided individualized or small group instruction. A committee composed or small group instruction. A committee composed of teachers participating in the two projects examined the roles of teachers and administrators in program implementation, teacher evaluation procedures, and the effectiveness of computer learning programs. The committee recommended the following administration of the property of the program of the pr lowing policies, which were approved by the Alberta Teachers' Association: distance education should be restricted to the secondary level; school boards should demonstrate to parents that instruc-tion in conventional settings is not feasible prior to

adopting a distance education program; and school boards should recognize that distance education imposes unique responsibilities on teachers which must be considered part of their workload. (LP)

This report examines whether the economic well-being of male immigrants to the United States improves substantially over time, details differences in economic progress of immigrants from different countries of origin, and assesses the impact of educational attainment on immigrants' earnings. Anal-yses are based on Public Use Micro Samples of the 1970, 1980, and 1990 censuses. Since one in four California workers is an immigrant, findings for California are emphasized and compared to those for the nation. Immigrants to California are a heterogethe nation. Immigrants to California are a neterogeneous group. Most are poorly educated and have low English proficiency, but substantial proportions are highly skilled or were educated in the United States. The largest immigrant group (37 percent) was born in Mexico; followed by 12 percent in Japan, Korea, or China; 9 percent in the Philippines; and 8 percent in Central America. Earnings of im-migrant workers relative to native-born workers have declined substantially over the past 20 years, and immigrants have begun to dominate the lowest-skill jobs. Immigrants' economic progress over time varies considerably by country of origin. Japanese, Korean, and Chinese workers enter the U.S. nese, Korean, and Chinese workers enter the U.S. labor market with wages much lower than native-born workers but reach parity in 10-15 years. Europeans enter with wages similar to natives and continue at parity. Mexicans enter with very low wages and experience a persistent wage gap. Although education is a powerful predictor of earnings, substantial differences in earnings profiles persist after adjusting for education. Finally, the rate of wage growth relative to native-born workers has not changed over time for any immigrant group. not changed over time for any immigrant group. North Carolina This report of the Southern Highlands Environ-mental Project (SHEP) in North Carolina describes its initiation, needs assessment, teacher institute, classroom implementation, outcomes, and dissemination. The purpose of this project was to prepare and support Appalachian teachers in leading their students in investigations of local and regional environmental concerns. The project began with a needs assessment from which a five-day teacher institute was developed. Teachers they assisted their struwas developed. Teachers then assisted their stu-dents in investigating local environmental issues with students sharing their work through science with students sharing their work through science fair projects, parent-teacher meetings, or articles in local newspapers. Teachers submitted project re-ports and, as part of the project evaluation, partici-pated in a two-hour telephone interview. The evaluation documented the implementation and re-sults of the project and demonstrated that the project's basic goals were achieved. Contains 15 references. (DDR)

Identifiers—Ecological Assessment
Eco-Inquiry may be defined as a "whole science" curriculum that embeds hands-on science within thematic multi-dimensional learning experiences. Three modules for the upper elementary and middle grades focus on food webs, decomposition, and nurrient cycling. Each module lasts 4-7 weeks and may be used alone or in sequence. Student research teams plan and carry out investigations, complete peer reviews, and share ideas and findings. In the first module on food webs, students survey a plot of land such as a schoolyard or local park. They then devise a food web of animals feeding habits in their study site and trace how one change in the site could affect the entire food web. In the second module on decomposition, students explore decomposition outdoors and in the classroom to become familiar with microbes then research the best conditions for making plants decompose in a classroom decompowith microbes then research the best conditions for making plants decompose in a classroom decompo-sition chamber. Finally in the third module on nutri-ent cycling, students do research to test the effects of compost tea on radish growth. They also explore plant and soil nutrient connections in the schoolvard. This activity booklet was designed to accompany a floating barge exhibition entitled "Always a River" that brought together the experiences of the past, the opportunities of the present, and the hopes of the future afforded by the Ohio River. The interdisciplinary activities in this booklet aim at enriching the lives of young people and making them more disciplinary activities in time to the state of the cological and environmental impact that the Ohio River exerts on their lives. Topics include: the river and its tributaries, geology; prehistoric dwellers; surveying and mapping; hu man-made changes; settlement; environment and ecosystem; commerce, navigation, and industry; imagination; organizations; and local cities and towns. A list of resources and pictures of various types of boats are included. (JRH)

Education is the first step toward making changes in habits and practices that are currently threatening in habits and practices that are currently threatening.

in habits and practices that are currently threatening the environment. Across the country, evidence is abundant that people are willing to change their habits once they understand the consequences of their choices. Greater numbers of communities are their choices. Oreater numbers of communities are instituting recycling programs. This book is de-signed with an interdisciplinary approach for middle school students learning science and social studies. Language and math skills are also incorporated into many of the activities. The activities are designed to work in both traditional and non-traditional school settings. For example, in their study of trash dis-posal, students examine the scientific background of trash in order to better understand the social issues. The initial activities in the book give a general sense of the scope of today's trash disposal problem. Stu-dents learn about the amount of trash that is created and the methods by which it is disposed. Science activities include experiments in which disposal methods are tried in the classroom. Activities related to social studies include role-playing, readings, and discussions about the controversies concerning various methods of disposal and the use of re-sources. Later activities focus on hazardous waste, its disposal, and environmental safety. Each activity begins with a statement of its objective, the time required, vocabulary used, materials needed, and the activity procedure. (AIM)

This paper is the report of a year-long study of a mathematics teacher's attempts to document her observations of students. One goal of the project is to determine whether it is feasible for a teacher to keep a record of informal assessments such as observations and interviews. Another goal is to determine how useful such information could be to the teacher. Two classes of Algebra I students (N = 59) were part of this study which was a collaborative effort involvotation study which was a consodrative effort move-ing field notes, videotaping, survey results, audi-otaped interviews, teacher notes and records of student progress. Background information is instudent progress. Background information is in-cluded about the early development of the project, the logistics of documentation methods, and key instructional decisions made by the teacher throughout the project. Important findings of this study highlight the importance of being clear about what is being assessed and the links between that and instruction. The findings also provide a picture of the challenges from a teachery perspective of of the challenges, from a teachers perspective, of aggregating observation and interview data with er records of student progress. The goal of this curriculum is to teach children
and their parents to think about their daily habits
and to make environmentally responsible choices.
The lessons and activities are divided by grade levels: K-1, 2-3, 4-5, and 6-8. Lessons in each grade
level are designed to cover a range of student skills,
subject areas, and environmental issues. An extensive resource section includes background information on specific issues at the state and global level tion on specific issues at the state and global level and a glossary. Each lesson has a teacher's section which includes grade level, lesson focus, materials, teaching time, and vocabulary. Most lessons are inteaching time, and vocabulary. Most lessons are in-terdisciplinary and include extension activities and ideas for individual and group action for environ-mental causes. Topics covered in the lessons include litter control, waste disposal, recycling, water pollu-tion, and conservation of energy. (DDR)

Historical studies reveal that mathematics has

Historical studies reveal that mathematics has been claimed as a private domain by men, while studies of the popular press document that women and girls are considered incompetent in that field. The study of gender and mathematics as viewed through feminism can create a new reading which through femin sm can create a new reading which exposes hidden assumptions, unwarranted conclusions, and questionable practices. Today efforts are sions, and questionable practices. I oday efforts are underway to entice young women to study mathematics and to convince them that the discipline is not restricted to males. It may be more appropriate, however, to acknowledge reality and work to change it. Consciousness-raising could be invoked to help young women see how the media and traditions have helped promote the separation of women from mathematics. Mathematics education research must abandon the search for single solutions to com-plex multidimensional problems. The study of gen-der and mathematics can offer much information regarding the working and functions of sex and gen-der in society. Combining feminism with the knowledge created in two decades of mathematics education research into questions of sex differences and gender equity may yield many insights and new directions for educational research and change.

In a multicultural society such as Australia, it can be difficult to acquire a strong mathematics, it can be difficult to acquire a strong mathematics educa-tion because of language, locale, or other differences including access to technology. The widespread use of devices such as calculators and computers has changed the nature of work. It has become more mportant for students to have the confidence to use their mathematical knowledge and be able to apply mathematics throughout their lives. It is in the national interest that schools promote high levels of achievement with rigorous mathematics programs. achievement with ngorous mannematics programs.

All Australian citizens need a broad understanding of mathematics if they are to participate in decision-making about their social environment. This paper identifies a set of exit learnings for mathematics that should be built up through mathematical experiences during the students' school years. Basic concents include number space measurement. concepts include number, space, measurement, concepts include number, space, measurement, chance and statistics, the representation of mathematical ideas, and applying mathematics to solve problems. The understanding of these mathematics concepts—linked to personal, vocational and civic lives—underpin most other branches of human learning, such as the sciences, social sciences, arts, busi-ness, trades, design, and further mathematics itself. The curriculum framework for mathematics iden-

The curriculum framework for mathematics identifies beliefs about math, general and specific stu-dent outcomes, and illustrative examples agreed upon by the six jurisdictions of Western Canada (Manitoba, Saakatchewan, Alberta, British Colum-bia, Yukon Territory, and the Northwest Territories). The intent is to communicate clearly high expectations for students in mathematics education

and facilitate the development of common learning resources. The Alberta Program identifies student outcomes organized within four strands. The strands form the foundation of the common framestrands form the foundation of the common framework and serve as connections across the grades. The strands with their substrands are as follows: Number-Number Concepts, Number Operations; Patterns and Relations-Patterns, Variables and Equations, Relations and Functions; Shape and Space-Measurement, 3-D Objects and 2-D Shapes, Transformations; and Statistics and Probabilities. Transformations; and Statistics and Probability— Data Analysis, Chance and Uncertainty. The con-tent is stated in terms of student outcomes that are measurable and identify what students are expected to know and do. General outcomes identify what students are expected to know. Specific outcomes are given to identify the component knowledge, skills, and attitudes of a general outcome. Illustra-tive examples are given to demonstrate the general and specific outcomes. (AIM)

This humane education activity book is written

This humane education activity book is written for children with the goal of helping them learn to respect animals and the environment. Not only does the guide provide information, introduce new ideas, and encourage critical thinking, it also lets young people know that they can help save animals and the environment. Children are invited to join the Kid Animal Action Team (KAAT) and are then intro-

duced to an exploration of animals that are pets. Chapter Two has several activities that explore issues associated with animals that entertain in zoos, live in aquariums, perform on racetracks and in circuses, and those victimized in hunting. Animals that are worn is the topic of the third chapter with activi-ties focusing on fur, feathers, and leather. In subsequent chapters, issues that are discussed include those related to consumption of meat and animal products, animals in laboratories, animals such as snakes and mice which have been labeled as "pests," and wild animals. Each topic includes an overview, a list of pertinent facts, a description of some actions that kids can take; and specific activities related to each topic. The last chapter provides a number of ideas about how to learn from nature and how to

The goal of this project is to find effective wave to

Science Instruction
The goal of this project is to find effective ways to stimulate parent involvement in science and mathematics education and to spearhead a nationwide initiative putting these models to use. Parent focus groups were used to field test parent involvement strategies that had been identified in the initial research, and to gather feedback from parents on the effectiveness of these strategies. This report sumarizes the findings of focus groups in seven cities across the United States (Baltimore, Maryland; Bir-

mingham, Alabama; Chicago, Illinois; Houston, Texas; Los Angeles, California; and Seattle, Washington) and the Mississippi Delta Region. It in-cludes the key findings of the literature review on parent involvement, and key recommendations for involving parents in science education such as inform parents of the importance of science and mathematics; and introduce parents to science activities they can do at home with their children. One conclusion from the focus groups is that most parents can and want to become more involved in their children's education. Parents are interested in hands-on and ready-to-do science with their chil-dren at home. Results indicate that schools can become more welcoming by lowering cultural barriers, initiating parent involvement, and developing and maintaining communication with parents. source Materials, \*Thinking Skills Students better understand problem solving when Students better understand proteins solving when the basis for the problems are real-life situations. This book, geared for grades 4-8, offers multi-step, real-life problems to encourage students to think flexibly, creatively, and analytically about problem solving. It includes ideas for setting up a problem-solving classroom and assessment strategies. A comparison is included contrasting traditional textcomparison is included contrasting traditional text-book problems with real-world problems. It is em-phasized that problem-solving should be integrated into all math topics. A checklist for guiding problem solvers is provided, including setting the mood and modeling an approach, noticing and responding to students' work habits, and managing the work ses-sions. Another section contains suggestions for making room for problem-solving within your school schedule, how to set up your classroom, and how to plan a problem-solving unit. Learning styles of introverted and extroverted students are dis-cussed, as well as the importance of asking leading cussed, as well as the importance of asking leading questions and drawing upon what students already know. Techniques for offering help and suggestions for boosting self-esteem are presented. The book for boosting self-esteem are presented. The book also has 40 classroom-tested, real-life problems, followed by illustrated possible approaches to their so-lutions. (AIM)

A high school teacher's flexible and comprehensive mathematical content conceptions supported his implementation of an innovative curricular approach to functions. The teacher (Mr. Allen) was studied for 2 years, and this paper focuses primarily on year 2 findings about the subtle but meaningful changes which were noticeable in Mr. Allen's conchanges which were noticeable in Mr. Allen's con-ceptions and instruction as he gained comfort with the new curriculum. In particular, the paper illus-trates how Mr. Allen revised his pedagogical con-tent conceptions through a complex interaction of his mathematical content conceptions and classroom experiences with students. These results extend what it means for conceptions and instruction to be interrelated, particularly in the context of in-structional reform in mathematics. Contains 13 references. (Author)

\*Thinking Skills

The academic needs of gifted students are qualitatively different from those of regular students. This document describes a course that is differentiated for gifted students in the areas of content, process, learning environment, and product. Emphasis is placed on higher order thinking skills through inde-pendent study dealing with real world problems that add scope, depth, and acceleration to the course. The teacher-designed and student-designed activi-ties described are tied to curriculum objectives and various thinking and learning models. They allow for individualizing the curriculum and self-paced learning in the student's preferred learning style. (Author)

One of the challenges issued by the National Science Education Standards is for students to learn the content and process of modern scientific inquiry by engaging in research and entering science com-petitions. The Rockefeller University Precollege petitions. The Rockefeller University Precollege Science Education Outreach Programs (Science Outreach) provide access for about 70 students from diverse schools and for 12 teachers every summer. Researchers provide mentoring in the biomedi-cal and physical sciences and Science Outreach provides modest amounts of funding for a few stu-dents, for all teachers, and for their action plans to dents, for all teachers, and for their action plans to take their research experience back into their schools to stimulate active learning for their col-leagues and students. This paper focuses on prelimi-nary data from standardized tests for students of Outreach teachers as an indicator that Science Outreach is attaining its goal of improving science edu-cation at the local level through the professional development of teachers. Preliminary findings indi-cate that students benefit when their teachers become immersed in the Science Outreach Program.

This book provides a model for taking instruction from the traditional focus on content to a stufrom the traditional focus on content to a stu-dent-centered focus that aligns selected content with quality and context. The organization and alignment of curriculum, instruction, and assess-ment is based on practical classroom application. Numerous examples of performance-based mathe-matics are set in real-life contexts. Performance benchmarks are set for grades 3, 5, 8, and 12, which can be used as guides for customizing instruction.

The four sections of the book are: (1) Introduction to Performance-Based Curriculum (a question and answer format); (2) Content/Concept Standards and Performance Benchmarks (organized by major strands including Number Sense and Estimation, strands including Number Sense and Estimation, Numeration Systems, Patterns, Relationships, and Functions, Geometry and Spatial Sense, Measurement, Probability and Statistics, and Algebraic Concepts and Operations); (3) Technology Connections (strategies for students to use technology, i.e. computers, to access, interpret, produce, disseminate, and evaluate information); and (4) Performance Designers (a planning tool for teachers to design lessons specifically addressing learning actions). Based upon the National Council of Teachers of Mathematics Standards, the framework for a mathematics curriculum includes real-world applications and multiple problem-solving strategies, the purpose of which is to help students learn how to show what they know. The surveyer of this study, was to determine

The purpose of this study was to determine whether hemisphericity and learning type are related to concept mapping attributes of preservice and inservice teachers. In addition, differences in concept mapping by program (i.e., preservice ele-mentary/middle school and secondary science teachers and inservice elementary/middle school teachers), learning type, and hemisphericity were investigated. Hemisphericity and learning type were measured by the Hemispheric Mode Indicator and

4MAT Learning Type Measure respectively. Concept maps were constructed by the teachers and scored on a seven attribute rubric. Statistically sig-nificant intercorrelations were found between hemisphericity and learning type as well as between the attributes within the concept maps. However, concept mapping attributes did not correlate significantly with hemisphericity and learning type. The ANOVA (Analysis Of Variance) indicated that the inservice elementary/middle school teachers per-formed significantly better in concept mapping than the preservice elementary/middle school and secondary science teachers. Contains 21 references. (Author)

Twenty-seven Louisiana participants in the Mid-dle School Teachers Enhancement Project (MSTEP) were surveyed about the use of the Texas Instruments Math Explorer calculator. An assess-Instruments Math Explorer calculator. An assessment was made to determine the teachers' own existing knowledge of how to use the calculator and guide a program for calculator skill development. Of the 28 total function keys on the calculator, the teachers knew an average of 12 keys. Following participation in MSTEP, the teachers knew an average of 25 out of the 28 keys. The conclusion is that MSTEP provided the teachers with a substantial foundation for using calculators in the classroom. foundation for using calculators in the classroom, and that the techniques used to teach the teachers could be used with middle school students. Part of the project was to model instructional techniques that are to be used in a "reformed" math classroom, including appropriate calculator use beyond simple addition, subtraction, multiplication and division. Further, teachers showed changes in their ability to use calculators in the classroom and adopted a more positive attitude towards reformed mathematics. (AIM)

Physics has been reported to be the least popular
of the science subjects among high school students
in Nigeria. In fact the low enrollment and poor
grades even for majority students that enroll has
been a great concern to most science teachers and
curriculum planners. This study examined students'
attitudes on the teaching and learning of physics.
Particular attention was focused on students' views
on the influence of the knowledge of mathematics
on the learning of physics. The sample consisted of
104 high school students from 3 different schools in
Kaduna State, north of Nigeria. A 25-item instru-Kaduna State, north of Nigeria. A 25-item instru-ment based on the 4-point Likert scale of responses was administered to the students during their nor-mal class. The results obtained revealed that although students enjoy and are interested in studying physics, there are a number of problems encountered: too many facts/technical terms to learn, the textbooks are difficult to read, and the students would rather do without the mathematical aspect for it lowers their grades in the subject. The implica-tion of this to the curriculum developers is dis-cussed. Contains 21 references. (Author)

Storytelling is one of the oldest and most powerful teaching and learning methods known. It is the way

teaching and learning methods known. It is the way human beings have communicated information since before written language. In many cultures the storyteller was a wise man or shaman who was responsible for making sure every young person learned the community's knowledge. The story-teller was the teacher. This book stresses that classroom teachers can be storytellers and offers suggestions on how to be a good storyteller. Practi-cal suggestions are offered on how teachers can use storytelling for science and mathematics. Rationale on how storytelling benefits learning and how stu-dents can best benefit from storytelling exercises is presented. Included are traditional and original stories to get teachers started, as well as a list of resources and books of stories to adapt for classroom needs. Contains references. (AIM)

This book, a volume of the High/Scope Elemen-

tary Curriculum science books series, is designed to bring the essential features of plant and animal environments into focus. It contains activities that enable students to gain insights into the life histories of animals and plants, their habitats, and their place in the broader picture of life on earth and to provide students with opportunities to explore the world. The 14 parts are as follows: Part 1: The Environ-ment Is Where You Are; Part 2: Moving in an Environment; Part 3: Communication between Environments: Part 4: Your Environment-Beneath Your Feet; Part 5: Your Environment-Beneau Your Feet; Part 5: Your Environment-on the Walls; Part 6: Your Environment-above Your Head; Part 7: Taking Care of Our Environment; Part 8: Basic Materials for Supporting the Study of Living Things in the Environment; Part 9: Collecting, Collections, and the Environment; Part 10: Looking at Living Forms in the Environment; Part 11: Food for Life from Living Forms; Part 12: Animals in the Envifrom Living Forms; Part 12: Animais in the Environment-Invertebrates; Part 13: Animais in the Environment-Vertebrates; Part 14: Life and Environment Case Studies-Some Classroom Experiences. Included with each activity is a standard set of information designed to help teachers determine the activity's appropriateness for their students, plan its implementation, and help children focus on a range of exciting and relevant learning experi-ences. Following the specific activities is a section containing case studies drawn from personal experi-ences in implementing science activities with groups of students. Appendices include Teaching Aids and The Development of Problem-Solving Skills. (JRH)

\*Science Instruction, Teacher Education

The Nevada Department of Education has joined with the Council of Chief State School Officers' cooperative effort to develop and report a system of indicators to track progress toward the state and national goals of improving mathematics and scication. This report combines the data reence edu sulting from this cooperative effort with other information and with norm-referenced measures of student achievement in order to provide an initial glimpse of the condition of science and mathematics education in Nevada's public schools. Four broad categories of indicators derived from various sources are reviewed: (1) student achievement indi-cators; (2) proportion of students taking advanced cators; (2) proportion or students taking advanced placement examinations and the proportion receiving a passing score; (3) instructional time and student participation in science and mathematics courses; and (4) teacher preparation in mathematics and science subject areas. The indicators of the status of mathematics and science subject areas. tus of math and science education used in the pres-ent study suggest that Nevada has made progress over the last 4 years, but still has areas needing improvement. ary Education, Student Attnuces, Methods, Technology
Demonstration of chemical reactions is a tool used in the teaching of inorganic descriptive chemistry to enable students to understand the fundamental concepts of chemistry through the use of concrete examples. For maximum benefit, students need to learn through discovery to observe, interpret, hypothesize, and draw conclusions; however, chemical discovery labs are time consuming to prepare and present and may involve hazards. The purpose of this study was to design an effective audio-visual method for teaching descriptive inorganic chemistry and to investigate whether an au-dio-visual method could be a viable alternative to the live demonstration method. Data were collected for quantitative and qualitative analysis. Quantitative analysis indicated that the audio-visual method does not account for a statistically significant proportion of variance in students' achievement scores. Qualitative analysis of data indicated that there was an equal preference of students for each method. Students favored either method of presentation (audio-visual or live demonstration) over the traditional lecture method. It was concluded that audio-visual discovery lab experiments can be used in teaching descriptive inorganic chemistry, but further research needs to be done to improve the quality and methodological design of audio-visual presentations. Contains 12 references. (JRH)

Science Study
The Third International Mathematics and Science The Third International Mathematics and Science Study (TIMSS) is the largest, most comprehensive, and most rigorous international comparison of education ever undertaken. During the 1995 school year, the study tested the mathematics and science knowledge of a half-million students from 41 nations at five different grade levels. In addition to tests and questionnaires, the TIMSS included a curriculum analysis, videotaped observations of mathematics classrooms, and case studies of policy issues. This report on eighth-grade students is one of a This report on eighth-grade students is one of a series of reports that will also present findings on series of reports that will also present indings on student achievement at fourth-grade level, at the end of high school, as well as on various other top-ics. The report combines the major findings from each of the five parts of the study into a single story about U.S. eighth-grade mathematics and science achievement in a comparative perspective. Chapter 1 draws from the results of the student assessments to describe how U.S. students perform in mathematics and science. Succeeding chapters focus on factors which may have an important influence on achievement, and describe how our nation's schools, teachers, and students compare to those in other countries. Chapter 2 examines educational standards and the curriculum, based on data from the curriculum analysis, case studies, videotape study, and questionnaires. Chapter 3 focuses on how teachers actually teach the curriculum, drawing from results of the videotape study and question-naires. Chapter 4 examines the working life of teachers, based on findings from the case studies and questionnaires. Chapter 5 describes the lives of students, both in and out of school, based upon case students, both in and out of school, based upon case study and questionnaire data. The conclusions at the end of the report look across all of the findings for insights about factors associated with student performance and indicate questions for further study. (JRH)

Identifiers—\*Title IX Education Amendments 
1972

This booklet on gender equity challenges the old ways of thinking that limited expectations for girls and boys. Breaking the trap where gender deter-mines what is possible means recognizing the limits of mindsets, opening eyes to new options, and enor minacts, opening eyes to new options, and en-couraging young people to be all they can be. This booklet clarifies for educators and parents specific elements of federal legislation, Title IX of the Edu-cation Amendments of 1972, and helps teachers in-tegrate gender equity activities into the daily classroom. The activities at the end of the booklet classroom. The activities at the end of the booklet can be used by teachers, small groups, and individuals to increase gender equity awareness. Goals for teachers, parents, and administrators to attain are to encourage all young people to develop, achieve, and learn equally; place no limits on expectations due to gender; to provide an equal chance at learning for females and males; to open student options to learn subjects and prepare for future education, jobs, and careers; and to treat male and female students equitably. A 14-item bibliography concludes the booklet along with a 28-item supplement of additional read-ings and listings of related organizations. (JAG)

This study examines the importance of state

spending on education to equally distribute finances to each district. Current legislation is in the courts because some local districts claim unfair distribu-tion of state funds. This study's focus is on the im-pact of judicial and legislative branch discussions that attempt to equalize education finance. Four hypotheses are presented that explain the variation in state pupil education spending: judicial interven-tion, legislative institutional arrangements, political competition, and socioeconomic conditions. The study results are both intuitive and counter-intuitive in that political partisan arrangements matter in how education benefits are distributed. Ambiva-lence of the public's attitudes plays a part in finan-cial reform as well as in resistance to legislative policies. Contains 28 references. (JAG)

Secondary Education, Foreign Countries, Global Approach, International Education, Social Studies, Teaching Methods, \*Theater Arts Identifiers—Swaziland, \*Theater for Development This booklet is about training extension workers, adult educators, and theater artists for a program called Theatre-for-Development. It is designed for those interested in using, and training others to use theater as a tool for community education and mobilization. The contents primarily are based on the support of training extension workers in author's experience of training extension workers in Swaziland. Emphasis on training involves getting participants directly involved using relevant skills and ideas in a community situation during a work-shop. This booklet describes methods for trainers to adopt in particular situations. Six primary steps in training that are listed and described in detail are: setting-the-scene; information gathering; data analysis; story creation and improvisation; performance and discussion; and follow-up. Illustrated examples are provided throughout the book. Contains 12 references. (JAG)

This paper discusses the concept of character for-mation as it can be positively impacted by folk arts in education. A long-standing tradition in U.S. edu-cation is for the teacher to take a leading role in molding the character of young people, as outlined through the years by such scholars as Thomas Jef-ferson, Horace Mann, and Rachel Davis DuBois. The document compares what these scholars ex-horted with what intercultural programs in Florida horted with what intercultural programs in Florida and Arkansas have proposed, and asserts a prime opportunity exists by such scholars for intercultural education to take place within state guidelines. A function of intercultural education is explored that attempts to shape personality through curriculum, which ultimately enhances student self esteem while promoting the local community's ethics. The purpose of this project was to design and implement a visual art course parallel to the U.S. history course required of all 11th grade students at the John F. Kennedy High School in New York City, New York. The study also attempted to determine if a non-linguistic, instructional methodology, such as that used in visual arts instruction, could be such as that used in visual arts instruction, could be integrated with the traditional teaching approach in other disciplines. This project measured the effect of this parallel approach on students, as it determined the effect of the art instruction on the students' comprehension and retention of the social studies concepts and content. The same social studies curriculum was taught to three classes, but only one class was paired with an art course. The paper includes a description of methodology, statistical analysis, a sample test, and student evaluations and assessments. Contains 38 references. (DQE)

This book is a reaction to the general neglect of cultural behavior education within civic education. It points to the particular problems, in the European context, of civic education in Slovakia. Concentration is on the main ideas of the PHARE project "Education for Citizenship and European Studies." Key ideas from the Department of Ethic and Civic Education at the Faculty of Education, Comenius University, in Bratislava (Slovakia) and ideas about new concepts for civic education and teacher training also are presented here. The humanistic ideals of Carl R. Rogers and Wolfgang Welsch's postmodern perception of culture both influence this material. Chapter 1 discusses the importance of culture, priorities of contemporary Slovak culture, and the aims of cultural education of citizens. In chapter 2, the nature of aesthetics and a non-classical version of aesthetic education are explored. Chapter 3 looks at the nature of civic education and multiculturalism in civic education. Chapter 4 is about teaching aesthetics in civic education. The final chapter covers civics teacher training. References follow each chapter.

This document reports on the threat of HIV/ This document reports on the threat of HIV/ AIDS to young people in the United States and proposes ways in which the Federal government could further address the needs of adolescents. Analysis of data gathered from young people af-fected by the HIV/AIDS epidemic and from profes-sionals engaged in HIV research, prevention, and care revealed several trends: (1) one in four new HIV infections in the United States is estimated to occur among people under the age of 21: (2) HIVoccur among people under the age of 21; (2) HIV-/AIDS does not discriminate by gender, geography, or sexual orientation; (3) efforts must be made to communicate to young people that the decisions they make now can affect them for the rest of their lives; (4) unless education and prevention programs are made available and accessible to young people they will continue to be at risk for HIV; (5) the lack of access to HIV counseling and voluntary testing for young people is a major barrier to prevention and treatment. (6) addiscents must become a big. and treatment; (6) adolescents must become a bigger part of the research process; (7) young people are an important resource in the national resto this epidemic; and (8) the methods and established by the Federal government to address the HIV/AIDS epidemic can serve as an example for states, regions, and communities. Sections of the report discuss the AIDS epidemic: prevention; test-ing, treatment, and care; research; and suggested steps for the Federal government to take to combat the epidemic. (ND)

ship Identifiers—\*Goals 2000, \*National Education Goals 1990

This paper describes a project that examined the six national education goals established by the National Governor's Association in 1990 and then included in the Goals 2000 Educate America Act. As part of a graduate seminar, 20 classroom teachers and 1 student teacher undertook to determine if these goals were attainable and how they could best these goals were attainable and how they could best be achieved. Each teacher chose to examine a goal in which he or she possessed expertise, and then worked with colleagues to examine the goal and make it workable. The six goals are presented first in the form developed by the governors, then in the form proposed by the project participants. The pro-posals made by the teachers rejected what they con-sidered overgeneralized or unrealistic, such as the deadline of the year 2000. The teachers were willing to be held accountable for their students, recognized the need for and were involved in the educational to be held accountable for their students, recognized the need for and were involved in the educational change, had high expectations of themselves and their learners, and placed a high value on being con-tributing members of society. They stressed a desire to work with others to help their students achieve success in the classroom and in life, and they wanted to be included in decisions that had the potential to impact their classrooms. sity of missouri Saint Jouis
Utilizing a consensus decision-making strategy,
teachers and an administrator from Parkway Central Middle School (PCMS) (Missouri) selected a
two-part mission: (1) to establish an atmosphere where students demonstrate respect for themselves, their peers, and all adults; and (2) to evaluate. revise. develop, and implement a new discipline plan that would be more proactive than reactive. To achieve the mission, the Responsibility and Respect Program/Plan was implemented during 1993-1994. Proactive activities, disciplinary management techniques. Proactive activities, disciplinary management tech-niques designed to foster responsibility and respect, and new programs were added to existing disciplin-ary programs. Activities included: (1) Respect Week, during which the theme of respect for self, others, and the environment was integrated into various classes; (2) incentive programs to reward good behavior; (3) relevant extra curricular activigood behavior; (3) relevant extra curricular activities; (4) revamping behavioral management techniques; and (5) improving citizenship through parent involvement, case management, and better tracking of conduct. Two additional program elements (after school tutorials and data collection to document the program's outcomes) were facilitated by PCMS's professional development school collaborative agreement with University of Missouri-Saint Louis. Data collected on six disciplinary indicators indicated an overall decrease in the number of students involved in disciplinary actions from 1993-1994 to 1994-1995. Findings from surveys of students, teachers, and administrators indicated that respondents considered the Responsibility and Respect Plan's proactive approach and the consensus process effective. Recommendations for improvement in the plan are noted. Two survey questionnaires are included. (IAH)

Teacher Educators

Teacher Educators Identifiers—Experienced Teachers, \*Learning Communities, Professionalization of Teaching, \*Teacher Development An analysis of school-university collaborative efforts to establish partnerships and professional development schools (PDSs) suggests that most of these efforts focus on the induction of student teachers, interns, and beginning teachers. Little attention is devoted to helping university-based teacher educators or experienced school faculty study their own practice, improve their work, or study their own practice, improve their work, or reform what they do. Nor is there much attention to reform what they do. Nor is there much attention to rethinking or recreating schools as organizations, reconceptualizing student learning, or adding to the knowledge base for teaching. To a large extent, the partnerships that were studied perpetuated several ideas about schools, learning, teaching, and profes-sional development that have been challenged by many education scholars and reformers. Among these limiting conceptualizations are the view of these limiting conceptualizations are the view of teaching as a non-theoretically based craft and of schools as factories. Although current reform, restructuring, and partnership endeavors will not, for the most part, create the kinds of schools, learning, teaching, and teacher knowledge and competence

that are needed, these efforts can identify: (1) points of intrusion into practice; (2) places of departure from current practice to more meaningful visions of what schools, learning, and teaching should be; and (3) vehicles for reaching these visions. PDSs and comparable broad-scale reform efforts are appropriate starting places for creating learning community schools. (Contains 27 references.) (IAH)

Development, University of North Carolina Wil-

mington
This paper discusses a reform project (The Professional Development System: Collaboration for Quality Education) collaboratively developed by the University of North Carolina at Wilmington and the Brunswick and Duplin County (North Carolina) public school systems. The project takes a system approach to changing the way teachers are educated and draws upon theoretical frameworks from the areas of organizational reform adult learning, proareas of organizational reform, adult learning, pro-fessional development of educators, and clinical sufessional development of educators, and clinical su-pervision. Four goals guide program design and implementation: (1) to improve public school class-rooms; (2) to improve teacher education, particu-larly student teaching and field-based components of methods courses; (3) to improve school/school system and school of education practices; and (4) to change the student teaching supervision model to learner-centered supervision. Program activity is centered in elementary clinical sites. Narrative statements from program graduates, classroom centered in esementary clinical sites. Narrative statements from program graduates, classroom teachers, public school administrators, field-based teacher educators, and university faculty supply glimpses of program operations. Findings related to the impact on schools, teachers, preservice teachers, and teacher education programs are presented, and implications of the results are discussed. The professional development system incorporates formative and summative evaluation strategies, including in-terviews and a follow-up study of graduates that considered employability, licensure, and assessment of program graduates by employing principals. In general, results suggest that the program is working. (Contains 45 references.) (IAH)

Research-based reform continues to strike a balance between the academic theories and classroom realities. This handbook provides a set of guidelines for the preparation of skilled instructors at all levels and career stages of teaching; establishes a curricu-

lum for teacher education; and offers a forum for discussion in the field among teachers, teacher edu-cators, and administrators. The volume seeks to balance the transitory nature of a career in education the long-term commitment such a career entails, and examines the need for teacher education tails, and examines the need for teacher education programs that would not only prepare instructors for new challenges but would provide them with the knowledge and skills to develop their professional careers and adapt their educational philosophies to the latest scholastic trends. In 48 chapters, leading authorities in the field of teacher education provide an approach to research-based reform and a pivotal analysis of professional growth. The handbook is organized into the following seven sections: (1) teacher education as a field of study; (3) recruitment, selection and initial preparation; (3) contex-tual influences on teacher education: (4) teacher education curriculum; (5) continuing professional growth, development and assessment; (6) diversity and equity issues; and (7) emerging directions in teacher education. This study investigates the effectiveness of traditional and reform annuaches in teaching earth sciences

tional and reform approaches in teaching earth science to future elementary school teachers. The research team was interested in whether reform strategies produce more content knowledge and a more positive change in attitude toward earth science among elementary education students when compared to students receiving traditional instruc-tion. Study participants were 49 students at the Uni-versity of Southwestern Louisiana enrolled in an introductory earth science course for elementary school teachers, half in a traditional section and half in an experimental section taught using reform strategies, including small class size, integrated lecture and laboratory activities, and increased emphasis on group work and problem solving skills. Findings in-dicated that while there was not a statistically significant difference in actual content learning, students in the experimental section did tend to score slightly higher on the content test. Also, students in the experimental section showed a significant positive change in attitude. Data from student interviews indicated that additional project work outside of class would strengthen the overall course. If it is not possible to use the reform approach exclusively due to financial or other constraints, it is recommended that every effort be made to incorporate as many reform strategies as possible within the traditional organizational pattern. The survey instrument and the earth science content test are appended. (Contains 20 references.) (ND)

At present, teachers' inservice training assumes
an enormous importance in the realization of educational reforms in European countries. This paper

describes several descriptive models for teacher training. Then, the development of inservice training is examined according to the "change para-digm" and the "problem-solving paradigm" in such a way as to contribute to educational innovation and to the resolution of concrete problems that teachers face in their professional lives. Two specific do-mains on which inservice training should focus are discussed: teachers' motivation and teachers' group work. Both contribute to the personal and profes-sional development of teachers. Secondary Education, Secondary School Teachvice Teacher Education, Research Methodology, Secondary Education, Secondary School Teachers, "Teacher Motivation Identifiers—"Expectancy Theory, Portugal, Preservice Teachers, "Valence Theory Expectancy-valence models are used most in the

field of motivational psychology. However, teachers' motivation had not been studied by these models and only limited research exists assessing the expectancy and the valence constructs. This study's aim was to examine preservice teachers' and practicing teachers' motivation by the expectancy-va-lence models. First, the main professional goals of teachers and preservice teachers were obtained. Of these, 92 were students in the department of education at the University of Coimbra (Portugal) and 52 were practicing secondary school teachers. Then, the Jesus Professional Fulfillment Scale was elaborated in order to assess the expectancies and va-lences attached to these professional goals. The results give support to the construct validation of this scale concerning the distinction between the expectancy and the valence constructs. Some theoretical and practical implications are discussed, and ome topics for future research are presented. (Contains 36 references.) (Author/ND)

Identifiers-Portugal This research goes with a new tendency in the field of educational psychology-the study not only of students' motivation but also of teachers' motivation. However, the studies of teacher motivation had been only to acknowledge the factors to motivate teachers, without the analysis of motivation as a process that contains several cognitive variables. This research analyzed teacher's motivation to mo-tivate students using the Ajzen's Theory of Planned Behavior (1985). This is one of the most thorough theories of human motivation because it integrates variables from several other contemporary theories. By this theory, behavior is predicted, taking into account the personal attitudes, intentions, perceived control, and subjective norm concerning this behav-ior. These variables are assessed by a 7-point likert type scale. Factorial analysis resulted in four factors, each one corresponding to the group of items that assess one of the variables. The results obtained with a sample of teachers and preservice teachers (n=143) showed that, in general, the relationships between these motivational variables are as ex-pected by the theory, predicting behavioral expectations in what concerns personal implication in classroom tasks. Foundation
While African Americans, Hispanics, and American Indians constitute 30 percent of the U.S. K-12 school population, only about 11 percent of science and mathematics teachers come from these groups. This feasibility study examines the Alliance for Minority Participation (AMP) program as a mechanism for increasing the number of minorities in the science and mathematics teaching work force. The initiative would be articulated with teaching and research campbilities of colleges and universities and research capabilities of colleges and universities and coordinated with K-12 schools, business and industry, and other government and nongovernmental entities. Partnerships and collaboration are central to the AMP design, and new teacher preparation elements would be based upon expanded alliances that are highly feasible, advisable, and cost-effective. Several AMP alliances are participating in promising teacher preparation activities. Most share common elements that are consistent with: (1) strong disciplinary foundation for teacher preparastrong disciplinary foundation for teacher preparation; (2) collaborative initiatives that build upon the tion; (2) coincontaive iminatives that outh upon the established infrastructure of institutional partnerships; and (3) coordination with other National Science Foundation-funded initiatives to achieve systemic impact and efficiency. The chapters are: chapter 1, "Introduction: Diversifying the Science and Mathematics Teaching Work Force"; chapter

2, "The Need for Additional Qualified Minority Teachers in Science and Mathematics"; chapter 3, "Overview of the Alliances for Minority Participation"; chapter 4, "Teacher Preparation Through the Alliances for Minority Participation: A New Paradigm"; chapter 5: "Utilizing Programs of the Directorate for Education and Human Resources That Peaket Programs of the Control of the Paratical Control Relate to Teacher Preparation"; and chapter 6, "Opportunities for Significant Coordination and Efficiency." Appendices include: "Indicators of Mathematics and Science Teacher Qualifications and Shortages" (six figures and four tables) and "Minority Participation in the Mathematics and Science Teaching Work Force" (seven tables). Identifiers-National Education Longitudinal Study 1988

Data from the National Educational Longitudinal Study of 1988 are used to link students with particular teachers and classes to estimate the impact of observable and unobservable schooling characteristics on student outcomes. A variety of models show some schooling resources, particularly teacher qual-ifications, to be significant in influencing tenth grade mathematics test scores. Teachers who are certified in mathematics, and those with bachelors or masters degrees in math are identified with higher test scores. Unobservable school, teacher, and class characteristics are important in explaining student achievement but do not appear to be corre-lated with observable variables in this sample. The results suggest that the omission of unobservables does not cause biased estimates in standard educational production functions. Six statistical tables are included. (Contains 38 references.) The number of children who enter U.S. schools

without knowledge of English or whose first lan-guage is Spanish is growing and will continue to grow. Teachers will need to meet the challenge of educating students whose native language is not En-glish and whose lack of proficiency in the English language presents a barrier to learning. Hispanic culture is family-oriented and allocentric, with high values given to politeness and formality. To illustrate specific countries of origin of Hispanic immigrant students, the economic and political conditions of six Latin American countries are desortibed along with their literacy rates, educational systems, and unique customs. Differences between Spanish and English pronunciation and grammar are summarized to help the teacher understand why students are making specific errors how they can be helped to correct them. A brief classroom guide to Spanish for the teacher is provided with vocabulary and simple phrases. (Contains 17 references.) (JLS)

Handling of acculturation problems in multicultural classrooms requires the analysis of individual cognitive models of the process of cultural contacts. Culture contact is defined as individually oriented persons meeting socially oriented persons. Acculturation problems have no definite solutions, but through reconstruction of the pieces of knowledge involved the experiences of people undergoing cultural contact and conflict can be analyzed. Cognitural tural contact and conflict can be analyzed. Cogni-tive models can then be developed that serve as a didactic model for teaching how to handle these conflicts. A sample of 700 students, 50 percent with migrant family background, was used to character-ize attitudinal differences among students. Twenty beginning teachers in multicultural schools with 30 percent migrant enrollment each moderated a group of 8 students selected according to their individual or social orientation with respect to family context and their parents' cultures of origin. A critical inci-dent technique was used along with observation of conflict resolution. Findings showed that long-held beliefs are persistent and tend to reinforce avoidance of cross-cultural contacts, and that even with positive intervention, underlying figurative sche-mata are restructured in only a minority of instances. tionship

This paper reports on an element of a long term research project on the development of a conceptual framework for the training of mentors of beginning teachers. Three aspects are being investigated: (1) mentors' perceptions about mentoring; (2) the relation between mentors' perceptions and their actions in practice; and (3) the effect of mentoring as perceived by beginning teachers and other interested parties. This paper reports on a case study of the first aspect, with a focus on qualities mentors per-ceive as important for adequate mentoring and how mentors perceive their own mentoring style. An inventory was completed by 36 participants in two 1995-96 mentor training courses. It was found that the collaborative nondirective approach dominated, that mentors expected a development plan from their protegees, and that mentors supported pro-tegees only on request. The result was too little direction and guidance for beginning teachers. It is concluded that, especially in the beginning of the induction process, mentors need to take up their role of instructor more explicitly and work out strat-egies that will guide the beginning teachers in the process of planning and monitoring their own learning. The appendix contains the inventory instrument. (Contains 26 references.) (JLS)

of Scranton PA
This paper proposes an alternative approach to
the traditional education paradigm that has prepared students for the old health care environment.
In a changing health care environment, problem
based learning (PBL) is achieving popularity primarily because educational outcomes parallel the
skills and abilities desired of future clinicians and satus and administrators. It is proposed that PBL strategies be woven into a core curriculum to meet accreditation criteria and simultaneously increase students' self-directed learning. The PBL model, such as that sent-directed learning. The FBL model, such as that adopted by the graduate program in health adminis-tration at the University of Scranton (Pennsylva-nia), is an androgogical model that uses an understanding of the characteristics of the learner to: (1) construct opportunities for interactive and cooperative learning; (2) develop specific skills and competencies; and (3) create a realistic context within which new skills and abilities can be developed, implemented, reinforced, and refined. An ac-tion-oriented approach with feedback and greater student involvement leads to a self-directed program. This focus on the learner enables faculty, with a well designed curriculum, to foster life long learning and self-development while preparing students for a changing environment. (JLS)

Descriptors—\*Beginning Teacher Induction, \*Beginning Teachers, Elementary Education, Elementary School Science, Foreign Countries, Science Instruction, \*Science Teachers, \*Self Efficacy, \*Teacher Effectiveness, \*Teacher Motivations\*

Identifiers-\*Australia

The main objective of this study was to explore the experiences of two novice elementary school teachers for factors related to self-efficacy and motivation to teach science. The experiences were analyzed for evidence of: (1) successful performance, vicarious experience, verbal persuasion, and emovicarious experience, veroai persuasion, and emo-tional arousal as contributors to the development of science teaching self-efficacy; and (2) links between self-efficacy and the nature and style of science and other programs implemented by each novice teacher. The design was based on qualitative measures using semi-structured interviews conducted at the mid-point and at the end of each subject's first year of elementary school teaching. It was found that the subjects benefited from involvement in a cooperative teaching situation and from a small school environment with a supportive principal. In-duction programs that provide this kind of support enable novice teachers to implement worthwhile programs. Teachers who have experienced success have high levels of self-efficacy should be mentors for novice teachers. It is concluded that if teacher educators, experienced teachers, and school administrators combine their expertise and efforts to foster and develop novice teachers' sense of science teaching self-efficacy, the education system can operate more effectively for the betterment of science education. Empowerment, Teacher Behavior

Identifiers—America 2000, \*Freire (Paulo), Goals
2000.

This book presents a feminist pedagogy of multiculturalism developed from Paulo Freire's theories on the politics of literacy. Freire has argued that literacy is the precondition for not only forms of social and political agency, but also social transformation and emancipation. In his view, teachers and students must refuse to be either experts or simply learners. Tachers must learn how to listes to their learners. Teachers must learn how to listen to their students, be self-reflective, and allow students the opportunity to speak with responsibility for their own actions but without fear. Students need an envi-ronment in which they are willing to take chances and can learn to use and legitimate their own experi-ences without fear of ridicule. Developing successful multicultural educational environments requires respect for the diversity of students' experience. America 2000 and Goals 2000 are examined to provide an exemplary model of the dominant discourse on educational reform and to employ elements of a critical theory and feminist cultural criticism in order to reveal its view of literacy as a discourse impli-cated in the construction of a particular form of cated in the construction of a particular form of citizenty. The book is organized into the following chapters: (1) Critical Literacy as a Pedagogy of Empowerment; (2) Rethinking Literacy and Pedagogy; (3) The Politics of Difference; (4) A New Generation of American Schools; and (5) A Feminist Pedagogy; gogy of Multiculturalism. This report presents data about Catholic elementary school teachers, in light of the trend of the last

tary school teachers in light of the trend of the last 50 years, moving from teachers who were predominantly members of religious communities to the present when teachers are primarily laity. During the 1993-94 academic year, there were 112,199 teachers in Catholic elementary schools or which 89.5 percent were lay teachers. A systematic cluster sample of 10 percent was taken from this popula-tion. The issues investigated fell into four distinct areas: general Christian dogma; Catholic Church discipline (juridical and canonical issues); Catholic positions on morality; and Catholic dogma. It was found that generally lay teachers are well-informed in some areas of religious knowledge but not in others. Lay teachers generally believe as the Catholic crs. Lay teachers generally believe as the Catholic Church believes in certain issues, but in others they do not personally accept the Church's beliefs. If religious knowledge and religious belief are impor-tant factors in the hiring of lay teachers, then age, number of years of religious education, and kind of certification are the most important of hereitistics. certification are the most important characteristics to look for. Ten data tables are provided; the survey instrument is reproduced in the appendix. (Contains approximately 90 references.) (JLS)

Descriptors— Administrator Evaluation, Elementary Secondary Education, Evaluation Methods, Higher Education, Models, \*Portfolio Assessment, Portfolios (Background Materials), \*Princi-

pais In growing numbers of elementary and secondary classrooms, portfolios provide an alternative means of assessing both student and teacher progress. As students and teachers choose the components of the portfolio and become involved in their own learning and assessment, they become more reflective and more critical, thus facilitating self-assessment skills. Additionally, these portfolios enable others to evaluate the portfolio maker's work. It is proposed that administrators might also benefit from portfolio asssment. The administrative portfolio is a purpose ful, self-selected collection of artifacts and reflective entries which represent an administrator's growth. The portfolio emphasizes process rather than a final product. It is the process that gives the creator, peer coach, prospective administrator, evaluator, or interviewer the most valid data. The collection and subsequent analysis serve three functions: (1) reflection for improvement and data-driven decision-making; (2) an alternative evaluation tool combining both formative and summative evaluation; and (3) an avenue for career advancement. The model includes a five-step reflection cycle of selection, description, analysis, challenging, and reconstruction.

A graphic representation of the Administrative

Portfolio Model, an outline of the administrative portfolio reflection cycle, and a list of summaative evaluation questions for the portfolio are attached.

Descriptors—\*Administrator Evaluation, Elementary Secondary Education, Evaluation Methods,
Higher Education, Models, \*Portfolio Assessment, Portfolios (Background Materials), \*Principals

An administrative portfolio is a collection of thoughtfully selected exhibits or artifacts and reflections indicative of an individual's experiences and ability to lead and of the individual's progress toward and/or attainment of established goals. Development of a portfolio system for administrative evaluation should include: (1) considering the principles that address issues such as the purpose, rationale, and implementation of the system; (2) establishing the criteria using national and state-developed proficiencies within the cultural and socioeconomic context of the school district; and (3) establishing specific criteria for scoring. The advantages of the portfolio include: revealing more about the individual being evaluated than a specific score on an evaluative checklist; being personalized and on an evaluative checklist; being personalized and addressing district-specific or campus-specific proficiencies; encouraging self-reflection and renewal; enhancing future planning; and enhancing professional self-image. Disadvantages are that it is time-consuming, for the administrator and for the evaluators, and that concerns over objectivity in judging arise. Three tables provide: ten principles for implementation; sample of proficiencies and for implementation; sample of proficiencies and

suggested artifacts; and a sample rubric for scoring. (Contains 14 references.) (JLS)

In addition to the typical affective and social challenges faced by most learners with gifts and talents, African American students must negotiate additional challenges emanating from their unique cul-ture. The identification of the social skills and ture. The identification of the social skills and processes utilized by these learners to negotiate their "warring souls" has been unexplored. These identities are: (1) African American in African-rooted culture; (2) African American in mainstream culture; and (3) African American in gifted culture. It has been hypothesized that the challenges facing these students, their families, educators, and this society result from conflicts that emanate from their temporalization are considered. transcultural experience. A preliminary, qualitative research project was conducted. Focus groups were convened at a small high school in Richmond (Virginia) that serves primarily African American learners with gifts and talents and at a high school in Tampa (Florida) with a student population of 1,880. Students' responses revealed several patterns: (1) students reported rarely feeling that they had to hide their giftedness; (2) students did not feel they had to choose between the identity of African American and gifted; (3) students who were statisti-cal minorities in class expressed frustration with being forced to engage in activities typical of dominant culture youth; and (4) students asserted that adapting their behaviors to different settings was auto-matic. Given the tensions within and among the settings where these students spend significant amounts of time, it is proposed that culturally-affirming strategies are needed to prevent or reduce the inner turmoil the students experience. Cultural reciprocity refers to the dynamic and ma-Cultural reciprocity refers to the dynamic and material exchange of knowledge, values, and perspectives between two or more individuals of different cultural (e.g., racial, ethnic, socioeconomic, religious) backgrounds. In this paper, cultural reciprocity is discussed as it pertains to professors of education and their students, based on the history of their interactions and diversity of experiences in cross-cultural settings. The openior study is precross-cultural settings. The ongoing study is personal and collaborative as a Japanese-Canadian fesonai and collaborative as a Japanese-canadian te-male, and an Anglo-Saxon male engage in self-reflection with respect to their experiences in teaching Canadian College of Education students in a cross-cultural setting. After a substantial literature review, narratives taken from e-mail correspondence and personal notes are used to relate a spe-cific example in which the female teacher used her own experience to discuss the nature of prejudice, racism, and ethnicity in an educational foundations class. Reflection on responses from the male teacher and a discussion on reconstruction of reality in light of the female teacher's experiences in teaching in the Indian Teacher Education Program illustrated the use of cultural reciprocity in her classes and its positive effect on her students and her own personal and professional development. Identifiers—\*Pennsylvania State University In the early 1990s, Pennsylvania State University's IDP (Instructional Development Program)
Center for Excellence in Learning and Teaching Center for Excellence in Learning and reaching provided separate programs for training teaching assistants (TAs) and faculty development. Neither program appeared to meet the needs of its intended audience. In the fil of 1992, the Center began offeradultance. In the fit of 1992, the Center began offer-ing the "Penn State Course in College Teaching" to all faculty, TAs, and instructors. The program has evolved into a highly successful noncredit course that meets once a week to explore issues of pedagogy, share teaching experiences, and discuss some of the current literature on teaching. The goal of the course is not to teach how to teach, but rather to develop the analytical and problem-solving skills that would enable continued growth and develop-ment. The course combines elements of a teaching ment. The course combines elements of a teaching practicum with those of a seminar on pedagogy. Course materials include weekly session guides, assignment sheets and two texts. Each week the course focuses on one of the basic processes of teaching; the assignments are designed to promote self-reflection and practical application. Feedback from both new instructors and experienced faculty indicate the success of the program in encouraging teachers to bring their scholarly abilities to their roles as teachers. (ND)

The assumption that as teacher empowerment in-creases in restructuring schools teacher job satisfaction will increase was explored in a study using a large sample of classroom teachers working in schools initiating self-designed restructuring efforts. Study participants were 10,544 classroom teachers working in 307 Venture Capital Schools funded to implement restructuring by the state legislature in Ohio. Six dimensions of teacher empowerment were measured: decision-making, professional growth, status, self-efficacy, autonomy, and impact. Teacher job satisfaction measured teachers' satisfaction with salary, opportunities for advancement, degree of challenge of the job, autonomy, general working conditions, interaction with colleagues, and interac-tion with students. Analysis of the data revealed from for growth in both empowerment and job sat-isfaction. A high positive linear correlation was found between teacher empowerment and teacher job satisfaction; the common variance was 49 per-cent. Although a high correlation between the two constructs was found in this study, at least half of the variance in teacher job satisfaction was not explained by teacher empowerment. Results of the study suggested that in depth, within school, quali-tative studies of teachers' dissatisfaction with overall working conditions may be the best place for Venture Capital School planning teams to focus their restructuring efforts. mance Tests

The purpose of this document is to assist members

of the North Carolina Professional Practices Commission in the development of guidelines for teacher evaluation. The paper reviews the historical development of teacher performance appraisal and the implementation of the Teacher Performance Appraisal Instrument (TPAI) starting in the mid-1980s. Although implementation of TPAI brought a number of positive changes to the way teacher per-formance was evaluated and to the interaction among teachers, principals, and other evaluators in the school setting, a number of concerns have been raised. These include the difficulty of the process to raised. Inest include the climically of the process to be responsible for both formative and summative evaluation; the limited scope of TPAI performance indicators, the amount of time required on the part of the evaluator, linking TPAI to school improve-ment goals, and evaluator effectiveness. While many schools and school systems have imple-mented innovative alternative procedures, some issues have been difficult to resolve, including legal requirements for teacher evaluation, alternatives to TPAI, and autonomy for individual schools. A process for the development of guidelines and possible recommendations are presented, and four criteria for alternative evaluation plans are suggested (pro-cess, focus, research base, and simplicity and feasibility). Appendices provide: an outline of sample standards and procedures for developing alternative standards and procedures for developing alternative performance appraisal systems; and a copy of mate-rials for developing an alternative teacher evalua-tion program as developed by Allan A. Glatthorn.

This report presents the findings from the "Nutrition Education in Public Schools, K-12" survey that
was designed to provide data on the status of nutrition education in U.S. public schools. Questionnaires were sent to 1,000 school principals of a
nationally representative sample of U.S. elementary, middle, and high schools. The survey requested information on: placement of nutrition
education in the curriculum, and the content, coordination, and reasons for nutrition education. Survey findings are presented for all schools and common, and reasons for nutrition eucanion. Survey findings are presented for all schools and frequently by instructional level, enrollment size, metropolitan status, and geographic region. Highlights of the survey's findings include: (1) practically all public schools (99 percent) offer nutrition educations competers in the curriculum and many intetion somewhere in the curriculum, and many inte-grate it within the total curriculum (70 percent); (2) overall, schools focus on increasing students' knowledge about what is meant by good nutrition, with less emphasis on influencing students' motivation, attitudes, and eating behaviors; (3) the majority of schools (61 percent) have no nutrition education coordinator, so teachers are responsible for their own lessons; (4) over 90 percent of all schools offer nutrition through the school meals program; and (5) topics in nutrition covered by more than 90 percent topics in nutrition covered by more than 90 percent of all schools are: the relationship between diet and health; finding and choosing healthy foods; nutrients and their food courses; the Food Guide Pyramid, and Dietary Guidelines and goals. Four appendixes provide: Survey methodology and data reliability; tables of standard errors; the survey form; and Section 19(a) of U.S. Public Law 103-448, 103rd Concress. 2 November, 1994. Identifiers-\*Alcohol Wellness, Europe, \*Health

The European Alcohol Action Plan stresses that health care systems, traditionally involved in the management of alcohol problems, must play a greater role in the detection and prevention of alcohol-related harm. Primary health care is seen as an hol-related harm. Primary health care is seen as an important setting for identifying individuals at risk from heavy drinking and helping them to reduce consumption. It is also the major supporter of families and self-help groups, and acts as an advocate of public health for local communities. The book discusses strategies that can be adopted by primary health care providers in their everyday work with individuals and families, and examines the role of primary health care in providing interventions for hazardous and harmful alcohol consumption. The 14 chapters of the book cover: (1) the potential of primary health care: (2) the risk from alcohol: (3) primary health care; (2) the risk from alcohol; (3) effectiveness of brief interventions; (4) screening; (5) health education advice; (6) intervention; (7) barriers to implementation; (8) packages and protocols; (9) education and training; (10) family and friends; (11) community action; (12) alcohol policy; (13) targets; and (14) conclusion. Appendices include the "Alcohol Use Disorders Identification Test" (AUDIT) questionnaire and "Health Plan for Catalonia." (Contains 72 references.) (ND)

Meeting the demands of the public, policymakers, and the private sector have spurred Education School (Ed School) leaders to find ways of working "smarter" as well as harder. The American Associa-tion of Colleges for Teacher Education conducted a telephone survey of 32 Education School deans and directors to determine the catalyst and the rationale for change, nature of changes made, and current status. Fifteen schools reported that their reorgani-zation was internally instigated and 13 reported it was externally instigated; an additional 3 reported both types as primary factors. Among those schools reporting external initiative factors, "downsizing" and fiscal constraints were most prevalent. Among those schools reporting internal factors, the pre dominant rationale was program improvement. It appears that those schools citing external factors were more likely to focus initially on organizational structure rather than on program design, while those citing internal factors attested to program design as a starting point with structure following sut. A capsule description for each responding Ed School appears in tables, and a list of survey respondents is provided. (ND)

In recent years, professional development for pub-lic school educators has come to be seen as a key component of school improvement plans, particu-larly large-scale systemic change programs. This Di-gest outlines what research and best practice suggest about effective professional development for ele-mentary and secondary teachers working in restruc-tured, learner-centered schools. It considers the implications of traditional school scheduling pat-terns for implementing effective professional develterns for implementing effective professional development and shares some approaches that various schools and districts have taken to finding time for teacher development activities. An effective professional development program provides adequate time for teachers to acquire, practice, and reflect on new concepts and skills, as well as time to collaborate and interact with peers. In traditional school schedules, sufficient time for this kind of teacher schedules, sufficient time for this kind of teacher activity is not normally integrated into the school day. Schools and school districts have devised several approaches and strategies to making time for teacher development available during school hours. Restructuring the school day or school year, as well as other approaches to incorporating teacher devel-opment into regular school schedules, may provoke opposition from parents, financial managers, and community interests. Identifiers—"Bell Curve (Herrnstein and Murray)
Although British psychologist Francis Galton lost
the battle for the definition of intelligence in his own
the battle for the definition of intelligence in his own
the battle for the definition of the light of Richard Herrnstein and Charles Murray. They argue that the Intelligence Quotient (IQ) is an adequate measure of
intelligence, and that I Q is highly heritable. They
contend that there are racial and ethnic group differtences is intelligence, and that these matter for acciences in intelligence, and that these matter for soci-ety. They further believe that tests have been and should be a gating mechanism because they tell who will be better and who will be worse in a variety of will be better and who will be worse in a variety of pursuits. Their ideas, however, deserve more scrutiny than influence. Herrnstein and Murray ignore the large body of research that says IQ is not the be-all and end-all that they make it out to be. They imply that psychologists are in fundamental agreement on what intelligence really is, but, in fact, psychologists continue to debate the nature of intelligence. There are racial differences in IQ but intelligence. There are racial differences in IQ, but are these really differences in intelligence? Herrnstein and Murray vastly underestimate the social-ization effects of schooling, home, and community. Even if intelligence does have a degree of heritability, as it most likely does, this does not mean that it cannot be increased. It is regrettable that the main message of "The Bell Curve" is so intellectually corrupt, because there are points in the book that are worthy of discussion. These include society's underworthy of discussion. Insee include society sunder-valuing of the intellectually gifted, the degrading of textbooks as opposed to the raising of standards, and the failure of affirmative action to accomplish all it promised. Identifiers—\*Armed Services Vocational Aptitude Battery, National Longitudinal Survey of Youth The Department of Defense is developing norms for its Armed Services Vocational Aptitude Battery (ASVAB) and the newly created Interest Finder, a vocational interest inventory. The normative effort, called the 1997 Profile of American Youth (PAY97), will be undertaken as part of the Bureau of Labor Statistics' 1997 National Longitudinal Survey of Youth. The national norms that result from this cooperative project will be used for military personnel selection and placement purposes for enlistees and as the basis for career selection in high schools in the student testing program. The ASVAB schools in the student testing program. The ASVAB will be normed in its recently implemented comput-erized form, and Interest Finder norms will also be developed from its computer version. Methodological studies are being planned to address substantive issues related to procedures and materials for the interview, test administration, and data analysis interview, test administration, and data analysis stages. A participation incentive and performance bonus study has preceded pilot testing involving more than 1,500 examinees. Other studies that are being initiated are studies of the appropriateness of the tests with adolescents, a hardware and environment study, and a pretest of the longitudinal youth survey. The ASVAB and Interest Finder will be administered in the summer of 1997 to the 19000. administered in the summer of 1997 to the 19,000 subjects of the longitudinal study. Normative infor-mation will then be available for the planned uses of both measures. (Contains one figure, two tables, and eight references.) (SLD)

\*Rasch Model

Person fit statistics are generated when item response theory is used to construct measures. While person fit statistics are well grounded in theory, their utility in aggregate reporting of survey data has not been demonstrated. This study evaluated effects on reliability and validity of including and excluding misfitting person response patterns, using the Rasch model. The following mail survey data sets were used: (1) responses of 3,839 adults to a survey on the effects of the women's movement: (2) responses of effects of the women's movement; (2) responses of 271 people to a survey on self-health care attitudes; (3) responses of 555 teachers to a survey about test use; (4) responses of 410 teachers to a survey about attitudes toward research; and (5) responses of 213 college students and graduates to a survey about dissertations. Omission of misfitting persons served to increase reliability for all data sets, but had inconsistent effects on validity coefficients. All effects were small. (Contains 3 tables and 21 references.) Identifiers—\*Answer Changing (Tests), Item Dependence, Stakeholders

pendence, Stakeholders In recent years, a controversy has arisen about the advisability of allowing examinees to review their test items and possibly change answers. Arguments for and against allowing item review are discussed, and issues that a test designer should consider when designing a Computerized Adaptive Test (CAT) are identified. Most CATs do not allow examinees the opportunity to review their items. The reasons advanced for this position include: (1) the possibility of item dependence that might affect another answer; (2) a decrease in testing efficiency; (3) opening the test results to effects of test-taking strategies; (4) an increase in testing time; and (5) complications in test development. Arguments in favor of allowing review focus on legitimate score gain possibilities. The first usually advanced is that examinees prefer to be able to review, and the second is that review yields legitimately improved scores. Consideration of arguments for and against item review is complicated by the presence of multiple stakeholders in the measurement process. The question of allowing item review is one without a clear answer, but the interests of test takers and test givers should be protected, perhaps by the development of new types of CAT. Identifiers—Hierarchical Linear Modeling, Rasch Model, Second International Mathematics Study The controversy about ability grouping in educa-tion boils down to a conflict between the educa-tional goals of excellence and of equity. There is considerable evidence that ability grouping is effec-tive in producing learning, but not for all students. This study addresses substantive issues raised in previous research, exploring whether ability group-ing works, and for whom it works. The focus of the study is the use of one type of ability grouping, within class ability grouping, in eighth-grade mathematics instruction. Data from the Second Interna-

tional Mathematics Study were used, with a sample of 3,991 U.S. eighth graders from 127 schools. Stu-dent- and class-level data files were created, and Rasch measures were developed. The statistical model used was hierarchical linear modeling. Remodel used was herarchical linear modeling. Re-sults show that the use of within-class ability group-ing and instructional tailoring has no effect on average eighth-grade mathematics achievement. In addition, the use of within-class grouping has no effect on the link between previous and subsequent eighth-grade mathematics achievement and the ex-tent to which it varies across classes. It appears that instructional tailoring allows high achievers to perform to their maximum but does not have negative effects on low achievers. (Contains 2 tables, 6 figures, and 15 references.) Relationship
Identifiers—\*Kerlinger (Fred N)
A generation ago, Fred N. Kerlinger proposed that there were a number of myths that pervaded educational research. An overview of three specific myths is presented, followed by a discussion of the degree to which these myths have been overcome or still exist in educational research. The first of these myths, the "methods" myth, is centered about the naive misperception that research design is synony-mous with research methodology, and that merely mous with research methodology, and that merely gathering data constitutes research. A second myth is an excessive concern with practicality, a preocupation with the immediate "payoff" when designing, conducting, or evaluating research, rather than an interest in the advance of theory. A third myth, the "statistics" myth, was probably meant by Kerlinger to denote two distinct problems. One is a fundamental disregard for statistics as an informafundamental disregard for statistics as an informa-tional and methodological tool, and the other is a failure to understand that research design and statis-tical analysis are intimately related. Although some progress is being made in addressing each of these myths, they continue to persist and exert adverse effects on the quality of educational research. (Con-tains 60 references.) Test Format, Test Items Identifiers—American College Testing Program, Item Discrimination (Tests), T Test Two frequently cited guidelines for writing multiple choice test item stems are: (1) the stem can be written in either a question or statement-to-be-com-pleted format, and (2) only positively worded stems should be used. These guidelines were evaluated in a survey of the test item banks of 13 nationally a survey of the test item banks of 13 nationally administered examinations in the physician specialty and allied health professions prepared by the American College Testing program. These items had been written and reviewed by content specialists, and had been professionally edited. Mean item difficulty and discrimination were compared for each test using separate t-tests. Although a relatively strong case for the question format and for positively worded item stems may be made based on considerations related to grammar and reading comprehension, this study offered little research

support for these item writing rules. It must be rec-ognized that these examinations have been prepared for subjects at high educational levels; item stem characteristics may be more important for lower achievement levels and less carefully edited tests. Identifiers-Test Directors, Test Reporting

This paper presents strategies that address the needs of the school district assessment office for standardized procedures to support reliable and efficient test processing and reporting and that meet the needs of school staff for test administration guidelines. The key to test administration and processing quality is a knowledgeable test coordin at each site. The Building Test Coordinator (BTC) may be a teacher or administrator, but should not be the school's principal. It is essential for district test-ing personnel to meet with all BTCs before the test, to acknowledge their performances after the test through some appropriate reward or acknowledgment. Personal delivery and check-in of all testing materials will help ensure success. Communication, at all points in the process, is the key to effective test administration and processing. Total quality techniques in testing depend on procedures that involve the user throughout the entire process. Assessment offices need to design goals, processes, and procedures with the user in mind. As part of a graduate research course, nine students formed a research team to carry out all aspects of a multimethod research study, including design, data collection and analysis, interpretation, and pre-sentation of results in a final evaluation report to a local school corporation. Benefits and challenges were noted by both the instructor and students. The students benefited through increased communica-tion and collaborative skills, increased awareness of tion and collaborative skills, increased awareness of the complexities and complications of real-world research, involvement in all aspects of the research process, and the opportunity to follow the research through to its completion. Their research mentor benefited through observation of the increasing sophistication of his students' research skills, the establishment of a working relationship with the school corporation, and the opportunities for joint presentations and publications with his students. Logistical challenges noted by both mentor and apprentices related to the size of the research group, the amount of data collected, and the need to coordinate researchers' and public school schedules. dinate researchers' and public school schedules. Suggestions are given for those interested in implementing a similar approach with their students. (Contains 1 table, 1 figure, and 18 references.) (AuED 400 273 TM 025 461

Identifiers—\* - National Education Longitudinal

Study 1988
Data from the National Education Longitudinal
Survey (NELS) are used to examine the relationship
between minimum competency testing and dropout
rates. Proponents of such testing have argued that
minimum competency tests provide incentives for
schools and students, but opponents have argued
that such tests lead to a low-level basic skills currichum and increase dropout rates by discouracing ulum and increase dropout rates by discouraging uum and increase dropout rates by discouraging low-scoring students from continuing in school. The focus is on eighth-grade testing, specifically tests that students must pass to be promoted to the ninth grade. Students in urban schools and in schools with high concentrations of low-income and minority students are more likely to face minimum compe-tency test requirements. Longitudinal data from the 1988 and 1990 NELS show that in schools with high concentrations of low socioeconomic status students, minimum competency requirements are linked to sharply higher dropout rates. Once socio-economic composition is taken into account, schools with below average student grades, low at-tendance rates, and high concentrations of minority students and students who are above age for their grade display no further systematic relationship begrade display no further systematic relationship oc-tween minimum competency testing policies and dropout rates. More detailed analysis for students surveyed in 1988 and 1990, in a final sample of 720 schools, confirms the relationship of minimum competency testing and dropping out for low and mod-erately low socioeconomic status schools, although they do not give clear evidence of causality. Identifiers—\*Calibration, lentifiers— Calibration, Item Characteristic Function, Item Parameters, Linking Metrics, Marginal Maximum Likelihood Statistics

Applications of item response theory to practical testing problems including equating, differential item functioning, and computerized adaptive test-ing, require that item parameter estimates be placed onto a common metric. In this study, three methods for developing a common metric under item re-sponse theory are compared: (1) linking separate calibrations using equating coefficients from the characteristic curve method; (2) concurrent calibracharacteristic curve method; (2) concurrent calibra-tion via marginal maximum "a posteriori"; estima-tion; and (3) concurrent calibration via marginal maximum likelihood estimation. Linking using the characteristic curve method yielded smaller root mean square differences for both item discrimina-tion and difficulty parameters for smaller numbers of common items. For the larger number of common items, the three methods yielded essentially the same results. (Contains 4 figures, 18 tables, and 23 references.) (Author/SLD)

dent Engagement, T Mathematical Knowledge

By using ill-structured problems and examining By using ill-structured problems and examining problem-solving processes, this study was conducted to explore the nature of solving complex, multistep problems, focusing on how prior knowledge, problem-solving process utilization, and analogical problem solving are related to success. Twenty-four college students qualified to participate by virtue of 100% performance on the Test for Requisite Mathematical Knowledge. Stimulus problems were from "The Adventures of Jasper Woodneys," a video, based problem-solving series. bury," a video-based problem-solving series. Subjects worked independently to reach problem solutions and explained how they arrived at the solution. Two to four weeks later, subjects watched a second scenario with an analogous problem. Proto-cols were produced from the subjects audio and video taped responses. Prior mathematical knowlvideo taped responses. Prior mathematical knowledge as defined in this study was necessary, but not solely sufficient for solving the two problems. Highly successful subjects spent more time on the problems than subjects in other levels, and minimally successful subjects spent the most time setting long-range plans and the least time setting immediate plans. It appears that the experience of dealing with the initial problem may have shaped how problem-solving processes were used on the later analogous problem. Engagement in the initial problem also appears to increase success on the analogous also appears to increase success on the analogous problem. (Contains 16 references.) (SLD)

When running out of time on a multiple-choice test, some examinees are likely to respond rapidly to the remaining unanswered items in an attempt to get some items right by chance. Because these re-sponses will tend to be incorrect, the presence of "rapid-guessing behavior" could cause these items to appear to be more difficult than they really are. This study used simulated data from a normal distri-bution with a mean of 0 and a standard deviation of I for 5,000 examinees. It found that item response theory parameters are affected by rapid-guessing be-havior, and that the Item Characteristic Curves (ICCs) were generally lower than the true ICCs. Using response times, an attempt was made to remove responses that appeared to be the result of rapid-guessing behavior. Two methods of removing responses were used. After removing the fast responses (rapid guesses), the item parameters and ICCs are responsed to the result of the responses (rapid guesses), the item parameters and ICCs are responsed to the response to the result of the result of the response to the response t ICCs were recovered more accurately. The two methods of classifying responses as rapid guesses and removing them worked equally well in recover-ing the true parameters and ICCs. Much speculation abounds concerning how ex-pensive performance assessments are or are going to be. Recent projections indicate that in order to Recent projections indicate that, in order achieve an acceptably high generalizability coeffici-ent, many additional tasks may need to be added, which will enlarge costs. Such projections are, to some degree, correct, and to some degree simplistic. The current investigation uses two synthetic exam-ples, based on published costs and variance components, and a constrained optimization procedure to examine the complex relationships among reliabil-ity, cost, and sample size. The first example is a ity, cost, and sample size. The first example is a limited writing sample situation, and the second is a large-scale portfolio assessment. Results indicate that the optimal design changes as the number of subjects changes. Another set of results confirms what seems to be expected intuitively: as the numwhat seems to be expected intuitively, as the most ber of subjects grows, the relatively fixed develop-ment cost becomes a smaller and smaller percentage of the total cost. These two sets of results seem to be related directly. Since, for the smaller samples, development costs constitute the majority of total cost, the optimal design includes more raters than prompts. That is, the burden of reliability is shifted to the least expensive (in relative terms) part of the assessment. (Contains 2 figures, 4 tables, and 14 references.) (Author/SLD)

Stages of Concern Questionnaire D. B. Bailey and S. A. Palsha (1992) proposed two modified versions of the Stages of Concern Ques-tionnaire for measuring teacher concerns during a reform effort. Their analysis suggested the use of a 5-factor model with 35 items or 15 items rather than the original 7-stage, 35-item Concerns Based Adoption Model (CBAM). The present study was carried out in two phases. The first phase analyzed data out in two phases. The first phase analyzed data from 376 algebra teachers to evaluate reliability and validity issues of both the original Stages of Concern Questionnaire and the two proposed versions of Bailey and Pasha. Reliability estimates were lower for the 15-item revised version, but agreed with Bailey and Palsha for the original instrument and the 35-item, 5-factor version. A confirmatory factor analysis was conducted using the 5-factor, 35-item version. A less than optimal fit of the model to the version. A less than optimal fit of the model to the data indicated continued problems with validity. From factor loadings and modification indices, a 27-item 5-stage model was proposed that more closely matched the original CBAM without the Awareness and Refocusing Stages. The second phase of the study employed a confirmatory factor analysis of the 27-item 5-stage model to examine data from a new sample of 237 algebra teachers. Reliability estimates were consistently higher than Reliability estimates were consistently higher than for other versions, but validity continued to be prob-lematic. A broad range of issues arising from these results is discussed. (Contains 8 tables and 14 refer-ences.) (Author/SLD)

Prescriptive in the "Achilles heal" of alternative

Practicality is the "Achilles heel" of alternative assessment in middle school science. This 5-year study of an "early adopter" school explores factors that enable alternate assessment to thrive in spite of practical problems. Interviews with five seventhgrade life science teachers and five eighth-grade physical science teachers who initiated and continue to sustain new assessment methods indicate that in the early years they explored many ap-proaches, and were not blamed for problems. Since many aspects worked well, the teachers were convinced by their own experience of students' in-creased ability to understand and explain science concepts. A collegial atmosphere and administra-tive support in time and resources helped to sustain the innovation. (Contains 3 figures and 12 references.) (Author/SLD)

A method for comparing the cross-validated also

A method for comparing the cross-validated clas-sification accuracies of predictive discriminant analysis and logistic regression classification models is presented under varying data conditions for the two-group classification problem. With this method, separate-group, as well as total-sample proportions of the correct classifications, can be compared for the two models. The test for contrasting correlated proportions developed by Q. McNemar (1947) is used in the statistical comparisons of the separate-group data and total-sample proportions. The method is illustrated with 32 real data sets that varied in number of cases, relative group sizes, number of predictor variables, degree of group separation, and equality of group covariance matrices. A 1992 study by R. Gershon found discrepancies when comparing the theoretical Rasch item characteristic curve with the average empirical curve for 1,304 vocabulary items administered to 7,711 studies. dents. When person-item mismatches were deleted (for any person-item interaction where the ability of the person was much higher or much lower than the difficulty of the item), the difference between the theoretical and empirically produced curves was decreased. This paper describes a replication of that original study, using data obtained from an administration of the California Achievement Test to students, in the Minearchia (Minearchia, public dents in the Minneapolis (Minnesota) public schools. When person-item mismatches were deleted, item calibrations improved regardless of the grade level. The results are discussed with an emhasis on the importance of selectively deleting data when the primary goal of the analysis is to obtain the most accurate item difficulty estimates possible. This research is of particular importance for testing organizations that use item banks or computerized adaptive testing. (Contains one table, six figures, and eight references.) (Author/SLD)

The Johnson O'Connor Research Foundation, Inches Connor Research Foundation, Inches Connor Research Foundation, Inches Programme Connor Resear

which produces vocabulary instructional materials for test takers, is in the process of determining the difficulty values of nontechnical words in the English language. To this end, the Foundation writes test items for vocabulary words and tests them in schools. The items are then calibrated using the Rasch model. This procedure results in a significant number of items being labeled as misfitting and being rejected from the item bank. A mislead analysis technique was created to try to uncover the sources of problems in items with poor fit statistics. The dataset used contained test results for over 3,500 dataset used contained test results for over 3,500 tiems, each of which was administered to 400 to 600 persons, for a total of approximately 23,000 persons. General mislead curves were compared to the actual performance for items previously labeled as misfitting, and a mislead characteristic curve was established. A mislead table was constructed for each item. The mislead was considered to be significantly. item. The mislead was considered to be significantly flawed for a given ability group when the observed performance differed from the means by more than two standard deviations. Each cell in the mislead table was evaluated in this way, giving item writers a way to observe which item choices are not functioning as expected. Five appendixes give examples of the mislead profiles for specific words. (Contains one figure and one table.) (SLD)

In 1990 a routine study confirming the accuracy of the Rasch model in predicting item difficulties led to an in-depth analysis of the impact of guessing on

to an in-depth analysis of the impact of guessing on the Rasch model when used with multiple-choice items. This paper reviews the highlights of that research. Seventeen linked vocabulary tests of 110 items were each administered to groups of 400 to 600 elementary school students. The obtained data were then analyzed using the BIGSTEPS computer program (B. Wright and M. Linacre, 1992) in order to obtain item difficulties and person ability esti-mates for the 1,304 items and 7,711 students. The actual performance of each person-item interaction was compared to predicted performance at each interaction point in order to construct an empirical item characteristic curve. The empirical curve was compared to the theoretical Rasch based curve and the discrepancies noted. When restrictions were placed on the analysis, the differences between the empirically derived curve and the theoretical curve were decreased. (Contains two figures, two tables, and five references.) The relationship of several individual differences variables to Computer Adaptive Testing (CAT) as compared with traditional written tests are ex-plored. Seven hundred sixty-five examinees took a Computer Adaptive Test and two fixed-length writ-ten tests. Each examinee also answered a computer literacy inventory, a satisfaction questionnaire, and a test anxiety survey. Test anxiety was found to be a significant factor in performance on both of the written tests, but not on the CAT test. Anxiety was also found to be a significant factor on several of the items on the satisfaction questionnaire. Overall, sig-nificant factors that predict satisfaction with CAT testing included level of test anxiety, computer literacy, and test length (the CAT test varied in terms of the number of items administered). Results are discussed in terms of the political and practical imdiscussed in terms of the political and practical im-plications of administering CAT tests as compared to administering traditional written tests. The re-sults also indicate that some of the individual differences variables that have been found to affect performance on written tests are not significant in CAT. ping Rules, \*Target Populations
The most useful method of item selection for making pass-fail decisions with a Computerized Adaptive Test (CAT) was studied. Medical technology students (n = 86) took a computer adaptive test in which items were targeted to the ability of the examince. The adaptive algorithm that selected items and estimated person measures used the Rasch model and a version of maximum likelihood estimation. The stopping rule was based on confidence in the pass/fail decision. Results indicate that when test length is sufficient, targeting items at the ability of iengin is sumicient, targeting items at the ability of the examinee and using a confidence level stopping rule results in the most efficient computer adaptive test for making a pass/fail decision. Examinees whose ability is clearly above or below the pass/fail point then take a minimum number of items, but point then take a minimum number of items, but those whose ability is near the pass point take a test of precision comparable to a test of items targeted at the pass/fail point. An appendix contains an ex-aminee map for the test and a map key. (Contains two tables, three figures, and six references.) (SLD)

Examinee response times from a computerized adaptive test taken by 204 examinees taking a certification examination were analyzed using a hierar-chical linear model. Two equations were posed: a within-person model and a between-person model. Variance within persons was eight times greater than variance between persons. Several variables significantly predicted within-person variance. Response time increased with increasing items, test length, and increasing relative item difficulty. Item sequence was negatively related to response time, and some content areas required more time than others. Examinees spent more time on items they got wrong than on items they got right, and they took longer to respond when the correct answer was A, B, or C than when the correct answer was D. Only one variable, test anxiety, significantly predicted variance between examinees. Examinee age, sex, first language, and ethnicity did not predict between-person variance, and low-ability examinates. ees did not take longer to respond to items than high-ability examinees. Understanding how item characteristics impact on response time may allow test developers to allot total test time based on the response time history of the individual test items This study also suggests that examinee characteris-tics are generally not related to response time, but that more controllable factors such as item length, position of the keyed correct answer, and use of figures do contribute to response items. An appendix contains the anxiety survey. (Contains 1 figure, 5 tables, and 12 references.) (Author/SLD)

On-line performance assessment was developed to maximize the usefulness of performance assess-ment and to minimize the time and labor costs incurred. This paper reports on the development of an on-line performance assessment instrument, focus-ing on the establishment and validation of the scoring rubric and its implementation in the Rasch model, the training of raters, and technological implementation of the instrument. The instrument discussed is the Assessment of Motor and Process Skills (AMPS), a performance instrument used by occupational therapists to determine the effectiveness of a program of rehabilitative therapy for clients. Clients complete skills from the assessment and are rated for difficulty and level of challenge they can handle. A computerized scoring version was developed with software that depends on calibrations of task and skill items developed from pre-viously collected AMPS data. Approximately 3,300 clients were used in the initial study, and data from 4,766 clients were used in the final calibration. The 4,760 clients were used in the man canonal and resulting instrument is a highly portable and user-friendly program that helps therapists manage therapeutic regimes for their clients. Approximately two-thirds of the paper consists of appendixes containing the program user manual and sample re-ports. (Contains one table and five references.) (SLD)

This study investigates the content and coding systems of kindergarten and first grade report cards from 57 Connecticut school districts. Report cards differed among districts in number of items, emphasis on curriculum areas and learning dimensions, and coding systems. Kindergarten report cards were more likely to emphasize discrete skills and knowledge; first grade cards were more likely to empha-size processes and dispositions of learning. Kindergarten report cards were more likely to use coding systems emphasizing continuous progress; first grade coding systems were more likely to em-phasize competition and adherence to rigid expecta-tions. Report card content also related to other district practices. Districts in which kindergarten report cards emphasized skills in language arts were significantly more likely to retain children in kindergarten and first grade. Districts in which the first grade report card emphasized skills in mathematics were less likely to include handicapped children in their regular classes in both kindergarten and first grade. As is consistent with national trends, the Montgomery County (Maryland) Public School System is exploring the use of instruments other than multi-

thor/SLD)

ple-choice tests for high-stakes testing. This paper presents information on racial, ethnic, and gender differences in performance on the various types of tests being administered in the district. Sharing such information among school systems will help in the evaluation of new types of assessment. The six assessments used in the study were: (1) a mathematics seasments used in the study were: (1) a mathematics multiple choice test given to grades 3 to 8; (2) a mathematics short answer test for grades 3 to 8; (3) a locally developed mathematics extended answer test for grades 4, 6, and 7; (4) a reading multiple choice test for grades 3 to 8; (5) a language arts extended answer test for grades 4, 6, and 7; and (6) the Maryland School Performance Assessment program for grades 3, 5, and 8. There were no meaninggram for grades 3, 5, and 8. There were no meaning-ful differences in mathematics performance by racial and ethnic group across the different types of test studied. Nonmultiple-choice reading and guage arts assessments favored nonwhite students. Nonmultiple-choice tests, whether in mathematics or language arts and reading, favored females over males. The largest difference between students on reduced-cost or free meals and others was in reading and language arts, where lower income students had substantially larger gains when moving from multiple-choice to nonmultiple-choice assessments. Montgomery County (Maryland) public school system has started using assessments other than multiple-choice tests because it is felt that this will provide school staff with better information about the success of the instructional program. One about the success of the instructional program. One of the ways assessments can provide better information is by having teachers score student papers. This, however, can conflict with another goal of the assessment program, high-stakes accountability for schools. An immediate solution to this potential source of conflict has been to have teachers score the papers in a centralized setting with extensive training and control, including the random assignment of papers. The three tests that the system has scored in this way are mathematics short-answer, mathematics extended-answer, and language arts extended-answer tests. Scorers had intensive training and close monitoring. Scoring consistency was evaluated by correlations between scorers and the percent of large differences between scorers. Reli-ability results indicate that constant, active monitoring is required to achieve consistent scoring, and that it is more difficult to score language arts assessments consistently than mathematics assessments. Attachments present the mathematics scoring rubric and a sample scoring report a rater would receive. (Contains three tables.) (SLD)

Identifiers-FACETS Computer Program, FACETS Model, \*Minneapolis Public Schools MN, Rasch Model

This study presents psychometric characteristics of the mathematics problem solving performance assessment used in the Minneapolis Public Schools, focusing on the interrater reliability, scoring reliability, and validity of the assessment. The Minneapolis Math Problem Solving Assessment (MPSA) was established in 1991. Students are asked to solve two complex problems, and written communication is a strong component of the assessment. The problems are scored on strategy, quality of solution, math communication, mathematical reflection and connection, and sentence structure, spelling, and me-chanics. This study analyzed the 2,600 papers done by about 1,300 students in grade 5 using the FAC-ETS model. FACETS is an extension of the one-parameter item response theory, or Rasch model, which parameterizes each facet of performance assessment into a common scale and enables one to compare elements within one facet and to compare different facets. Using FACETS with classcial test theory allowed evaluators to examine in-terrater reliability, interrater agreement, and validity. Results support the validity and reliability of the MPSA and provide information that can be used to improve the assessment. (Contains 4 figures, 8 tables, and 14 references.) (SLD)

A humber of explanations have occur offered to the differences in test performance among various population subgroups. This paper begins with a discussion of these explanations including the psychometric explanation that group differences are due to bias in the test. An overview of bias research argues that results to date are inconclusive. A theory of bias is introduced that provides a definition of bias and a framework that explains why the issues are so

difficult to resolve. Bias is defined as the systematic over- or underestimation of the true abilities of a group of examinees formed according to some demographic variable such as sex or ethnicity. The framework also provides a connection between test bias and item bias. The concept of item bias is then distinguished from that of differential item functioning (DIF). DIF research is described as promising in many regards, but with major areas of uncertainty in the interpretation of its results. It has generally sup-ported the reliability and validity of standardized tests for minority groups, but as long as research is based on hypothetical scenarios instead of solid, research-based theory, the question of whether test bias accounts for some portion of the observed differences between groups is likely to remain unan-swered. Practical guidance is offered for those who ist make important decisions about individuals without knowing the answers about test bias. (Contains 26 references.) (Author/SLD)

Scores, riigh School Students, 'tem Response Theory, Norm Referenced Tests, 'Performance Based Assessment, 'Raw Scores Identifiers—Anchor Tests, 'Equipercentile Equat-ing, 'Graded Response Model, Partial Credit

Three methods of equating performance assessments are compared. Equipercentile equating, item response theory (IRT) partial credit model, and IRT graded response model methods were applied to the same data using an anchor test design. Comparisons are based primarily on the resulting raw score-to-raw score tables and the effects these tables have on the classification of students in terms of two cut scores. The design entailed administering the performance assessment and a norm-referenced test, the anchor test, to each student. Matched data from between 4,950 and 7,820 students were analyzed at grades 3, 5, 8, and 10 in 1993 and 1994. The norm-referenced tests were the lowa Tests of Basic norm-referenced tests were the lower sets of basics.

Skills at the lower grades, and the Tests of Achievement and Proficiency for grade 10. All three methods produced relatively consistent results. In examining the percentage of students classified into performance levels in 1993 versus 1994 with the three equating methods, the equipercentile method produced the most consistent results. Both the partial credit and graded response methods had m deviation in the classification rates with the graded response model being more inconsistent. (Contains two figures, three tables, and seven references.)

Progress

The extent to which National Assessment of Edurational Progress (NAEP) Executive Summary re-ports are intelligible to policy makers and educators was studied, and recommendations were offered for improving NAEP reporting practices. Detailed in-terviews were conducted with 59 policy makers and

educators. In general, these two groups had considerable difficulty with the presentation of results in the Executive Summary report they were given. Misunderstandings and mistakes in reading the NAEP report were common. Many of the people NAEP report were common. Many or the people interviewed had limited prior exposure to the NAEP, were unfamiliar with its reporting scale, and had a limited knowledge of statistics. These short-comings contributed substantially to the problems encountered in reading the Executive Summary re-ports. Several recommendations are offered for reports. Several recommendations are offered for re-port improvement. First, all displays of data should be field tested prior to their use in NAEP reports. A second recommendation is that NAEP reports for policy makers and educators should be simplified considerably. A third recommendation is that NAEP reports tailored to particular audiences may be needed to improve clarity, understandability, and usefulness. Appendixes display key tables and figusefulness. Appendixes display key tables and fig-ures from the executive summary of the NAEP 1992 mathematics report card, describe participant characteristics, and present the interview protocol. Workshops entifiers—California Achievement Tests, Ohio

University
The Lead Teacher Project at Ohio University included 84 teacher participants who represented 42
schools from 13 school districts in Appalachian schools from 1 school instricts in Appaischam Ohio. The project was designed to enhance the teaching and learning of science and mathematics at the elementary school level by helping the teacher participants develop skills, knowledge, attitudes, and leadership capabilities. The project, funded by federal, state, and local sources, used the resources of a range of experts at Ohio University in working partnerships for teacher training. The evaluation of the project was, in many ways, as diverse as the project itself. It was first necessary to evaluate the effectiveness of the teacher-education courses. This was done through a course evaluation questionnaire, weekly surveys, and informal discussions. Some analyses used the teacher as the unit of analy-sis and others used the teacher's students as the point of analysis. Student achievement was mea-sured through the California Achievement Test, a process skills instrument created for the evaluation, and a curriculum standards survey for teachers was designed and implemented. Student attitudes toward mathematics and science were recorded by a project-developed instrument. Growth in teacher leadership skills was assessed through still another project-developed instrument. In general, the project was evaluated with respect to student per-formance, teacher performance, school building changes, and leadership. These measurements demonstrate the effectiveness of the project. (SLD)

Descriptors—\*Class Size, College Students, Criterion Referenced Tests, \*Difficulty Level, \*Equated Scores, Grades (Scholastic), \*Grading, Higher Education, Scoring, \*Standards Identifiers—Absolute Values, \*Anchor Tests, Large Scale Assessment, \*Linear Equating Method, Number Right Scoring, Standard Setting Assigning letter grades in a consistent manner to

tests in large classes across semesters is problematic if absolute grading standards are used. It may be unreasonable to implement the usual standard-setting approaches recommended for large-scale crite-rion-referenced testing due to both time constraints and a desire to have criteria that appear uniform. However, percentage-correct grading standards cannot be fairly applied without adjustment to tests of differing difficulty. The suggestion is made that linear equating with an anchor test design may be an appropriate procedure for making the adjustment in many such circumstances. An example using real many such circumstances. An example using real data from final examinations of an introductory so-cial science course taken by 597 students in the winter and 609 students in the spring is examined. Apparently small differences in test difficulty are seen to yield large differences in the grades assigned when scores are put on a common scale. (Contains 2 tables and 10 references.) (Author/SLD)

Despite the existence of little empirical evidence for their effectiveness, many techniques have been suggested for writing multiple-choice items. The option "none of the above" (NA) has been widely used although a recent review of empirical studies of NA suggests that, while generally decreasing the diffi-culty index, NA also decreases discrimination and may decrease reliability. It is suggested that most of the studies of the effect of NA on these item param-eters have been flawed by methodological inconsistencies and by a disregard for the finding that discrimination is restricted when corresponding item difficulties have been extremely high or low values. By examining the effects of NA on difficulty values. By examining the effects of NA on difficulty and discrimination indices in light of optimal difficulty for a 100-item test taken by 300 undergraduates, this study found that when following reasonable guidelines: (1) difficulty tended to approach the optimal level; (2) discrimination tended to increase; and (3) reliability was unaffected. Teachers conducting a thematically organized literature-based reading program centered around stu-dent-led discussion groups wanted to explore ways dentified discussion groups wanted to explore ways in which the values they wanted to promote could be reflected in the ways they assessed their students. This study considers how valuing a broader scope of language and literacy abilities and making these values part of an assessment system played out in the case of one male student, a representative of a population of students for whom assessment has been a ally led to their removal from regular education classes to special education, isolated from regular education peers. The student was in his first year of mainstreamed education, in a class of 23 students, having previously been in special education. The Michigan English Language Arts Framework provided a model for describing students' progress. All

23 students participated in three assessment activities: (1) a criterion-referenced test consisting of tra-ditional comprehension and vocabulary tests; (2) a ditional comprehension and vocabulary tests; (2) a performance-based assessment test designed to parallel daily language and literacy events; and (3) a self-assessment activity in which students evaluated their book club participation and their reading log entries. The student's performance on the criterion-referenced test by itself probably would have prevented him from participating in regular fifth-grade reading activities, but the other assessments gave him better opportunities to demonstrate his understanding, as well as more experience in reading activities. Taking a broader perspective means he is more likely to avoid long-term tracking and to preserve his self-esteem. (Contains 1 figure, 3 tables, and 11 references.) (SLD) 3 tables, and 11 references.) Identifiers—\*Data Quality
Professionals responsible for educational research, evaluation, and statistics have sought to provide timely and useful information to decision makers. Regardless of the evaluation model, research design, or statistical methodology employed, informing the decision making process with quality, reliable data is a basic goal. The definition of quality for education data has not been adequately r addressed in the literature of educational research and evaluation. In the publications describing quality re-lated to general information systems, the concept is narrowly interpreted to mean accurately and reliably processed data. This paper ties together the foundations of data quality from the formal information systems literature with the practical data qualin the arena of public education decision making. ity in the arena of public education decision making. A hierarchy of data quality is described to assist both the understanding of quality and the requirements for achieving quality. The hierarchy ranges from the availability of dysfunctional, bad data to the quality level of data-based decisions made with confidence. For practitioners, a checklist is provided for use in determining the quality of their data courseer. Attachement, include the data quality to sources. Attachments include the data quality ty-pology, a list of ratings of data quality, and the checklist for rating and improving data quality. (Author/SLD)

Identifiers-Academic Self Concept

The interaction among ethnicity, socioeconomic status (SES), mathematics achievement level, and gender on student beliefs about themselves as learners of mathematics was studied through in-depth interviews with high school students. One hundred high school students were interviewed. Half were:
(1) African American or White; (2) female or male; (3) high-math or low-math achievers; and (4) residing in high and low SES communities. Dependent variables, based on student responses, were educa-tional aspirations and mathematics self-concept, while demographic variables such as gender and ethnicity were independent variables. Findings re-veal interactions of mathematics achievement by ethnicity, ethnicity by math achievement by SES, and gender by math achievement. The significant reported interactions involve mathematics achievereported interactions involve maintenances achieve-ment, yet mathematics coursework and achieve-ment levels are not commonly studied when reporting socioeconomic, gender, and ethnic differ-ences of mathematics attitudes. Males were more likely than females to attribute intrinsic constructs as reasons for their mathematics grades. Findings about African American students support research that dispels the myth that African American youth have little academic self-concept and that indicates that minority youth are not easily discouraged by low achievement. A two-dimensional, four-category model for clas-A two-dimensional, four-category model for classifying the way that people relate to others, or relationship style, was developed by T. Alessandra (1987). The model characterizes style in terms of openness, with poles of open and self-contained, and directness, with poles of direct and indirect. Combining the poles of the two dimensions yields the relationship types of: (1) director; (2) thinker; (3) socializers, and (4) relater. These dimensions (3) socializer; and (4) relater. These dimensions were used to create a 16-item semantic differential scale called the Test of Relationship Style. After an initial test with 100 undergraduates, the instrument was administered to 58 men and 96 women participating in an amateur tennis tournament, who also completed measures of goal and task orientation, sportsmanship, mood, and liking for challenge. Sub-jects were classified into the four relationship styles and compared for the other measures. Directors tended to be male, tennis singles players, with poor sportsmanship, high ego orientation, and a good bit of anger, while relaters were women with low ego orientation, doubles players, with little inclination for challenge. Socializers were more likely to be women with good sportsmanship attitudes, little anger, and an inclination to be challenged. Thinkers were likely to be in the middle on most things. Findings conformed to anecdotal descriptions of the four relationship styles, providing some confirmation of validity. (Contains one table, two figures, and six references.) (SLD)

Evidence is presented for the validity and reliability of a student annotation form used to collect stuent reflections on work samples in portfolios. The form was designed to be general enough to apply to many grades and subjects and simple enough for students at all levels to complete. The annotation forms asked students to indicate how difficult they found the work sample to be, whether they would like to do more work, and why. The difficulty and "do-more" questions were multiple choice, but the 'why" was open-ended. For each work sample that "why" was open-ended. For each work sample that illustrated a curriculum objective selected for inclu-sion in an evaluation portfolio, students completed an annotation form. Study 1 was performed with 1994 data from 367 students in grades 1 though 10 and a total of 1,678 annotated work samples. The validity and reliability of the difficulty and do-more judgments were confirmed. A constructed measure of academic self-efficacy, which looked promising at first, failed a validity check. Study 2 used data from 1995 for 313 students in the same grades, and from 1995 for 315 students in the same grades, and a total of 2,862 annotated work samples. The quantitative reliability and validity results were replicated for the difficulty and do-more questions. (Contains 1 figure, 15 tables, and 11 references.) (Author/SLD)

general) in a school district that consists of a city and an independent borough. Portfolios offered an opportunity to collect and examine multiple mea-sures of performance for decisions previously made on the basis of language arts grades. Criteria-for-Placement sheets were designed as cover sheets for the portfolios, and portfolio contents, placement criteria, and rubric design were aligned with the transitional outcomes defined. Writing samples were scored on four dimensions and used with other criteria such as test scores, grades, and work and study habits to place 123 students. The effect of the new criteria was to make recommendations for Academic English more rigorous. The Criteria-for-Placement form exhibited acceptable validity and reliability in the pilot study. Examination of rater bias and of student outcomes after placement are recommended for further study. (Contains eight unnumbered tables and three references.) (SLD)

The relationship between research and autobios-

The relationship between research and autobiography is explored. The planned study was a qualitative study of literacy methods instruction at the tive study of literacy methods instruction at the college level, a case study of one class of students and their professor. The study was based on the premise that preservice teachers need experience-based learning opportunities in the classroom in order to acquire a practical teaching pedagogy and knowledge base. As the study progressed, it became not just an observer's account of another teacher. What a self-reflective and open-ended reteacher, but a self-reflective and open-ended re-search narrative. The issue of the researcher's subjectivity became an important dimension of the work. Unless the researcher understood herself in relation to the study, there was no basis for judging alternatives, initiating change, and responding to students' needs in the learning process. Autobiogra-phy became a link between theory and practice in the dual roles of teacher and researcher. It played a role by allowing the researcher to make sense of experience after the fact. (NAEP) serves as the nation's primary indicator of what school children know and can do. This study what school children know and can do. Ins study examines the policy relevant variable, computer use in the classroom, as indicated by the 1992 NAEP Trial State Assessment data for Mississippi. After a preliminary examination of other variables relevant to educational policy, a hierarchical linear model analysis was performed for the composite mathe-matics score within the eighth grade in Mississippi. Gender, race-ethnicity, and socioeconomic differ-ences in scores were identified, and their correlation with school and student variables was explored. In Mississippi, 53% of students did not have computers available in their classrooms. While neither availability/access nor frequency of computer use was found to be statistically significantly associated with average school achievement, both variables showed associations with the gap between minority and nonminority students. In schools where computers were the most available and accessible, the gap be-tween minority and nonminority students was significantly reduced. Implications of these findings for educational policy are provocative. (Contains 6 ta-bles, 9 figures, and 18 references.) (SLD)

Conditional item independence, also known as local independence, is necessary for the accurate estimation of item parameters within item response theory (IRT). Given that the condition of local independence will be violated to at least some degree when unidimensional models are used to represent multidimensional data, it is important to study the robustness of the unidimensional IRT models under these conditions. This paper identifies the sources and effects of local dependence for a national stan-dardized achievement English test. The G-squared index and NOHARM (C. Fraser, 1988) residual analysis were selected as the most appropriate mea-sures of evaluating the sources of local dependence. Results of the two analyses show that the last 20 items of the English test contain local dependence, which is primarily a speededness effect. It is also apparent that the item parameter estimates of the three-parameter model were affected by this depenthree-parameter model were affected by this dependence. Results are similar to those of previous research in that local dependence was found to affect estimated information and reliability when the test was scored polytomously. **Testing Program** The American College Testing Program (ACT) is field testing a portfolio assessment model. The field test is designed to determine whether it is possible to implement a portfolio assessment model on a national level that will result in scores that are of sufficient reliability and validity that they can be used for decisions at the student level. An early decision by the ACT was to develop the assessment with the direct collaboration of teachers. Represent-atives of national education organizations nomi-nated schools to participate, and seven schools were selected as design partners for the development ef-fort. Each appointed a teacher to the design team, which met to decide on a definition of the portfolio system and a concept for the field test. Eleven to 13 work sample descriptions were then developed for each of the content areas of language arts, mathematics, and science. At the beginning of the school year, the school determines five work sample descriptions that will be used for each course and students are given guidelines to help them in the formation of their portfolios, which eventually will include an item for each of the work sample areas. The five entries and the student's self-reflective letthe results and the student's self-reflective let-ter are sent to the ACT for scoring. Pilot implemen-tation and study with 35 teachers resulted in a revised system that 22 schools will test in the 1995-96 school year. (Contains 1 table and 10 refer-ences.) (SLD)

Standard Setting

Some standard-setting methods require judges to estimate the probability that an examinee who just meets an achievement standard will answer each of a set of items correctly. These probability estimates are then used to infer the values on some latent seal that, in theory, determines an examinee's responses. The paper focuses on the procedures used to convert the probability estimates into performance standards. A number of procedures are described that have been traditionally used, including simple summation, simple ability averaging, weighted abil-ity averaging, and least squares statistics. Some new procedures for estimating achievement standards from subjective probability estimates include an unweighted least squares approach, maximum likelihood (MLE), and modifications to MLE that consider posterior distributions. MLE, unweighted consider posterior distributions. MLE, unweignited least squares, and simple ability averaging tech-niques were applied to data from the 1992 National Assessment of Educational Progress reading and mathematics tests for grades 4 and 12. These three approaches were evaluated with a jackknife design. Results for the different procedures were different, with lower achievement results and smaller standard errors from the MLE and least squares procedures than from the traditional simple ability averaging. The most desirable approach, however, may still depend on other than statistical criteria. (Contains one figure, six references, and five tables.)

Identifiers—Case Method (Teaching Technique),
Problem Based Learning

Concept maps have been used successfully in science and mathematics education in a variety of settings. This paper describes the application of the metacognitive tool, concept mapping, to the devel-opment of an integrated veterinary curriculum, to opment of an inegrated veetinary chircular, the development of case-based exercises for prob-lem-based learning, and as a learning tool for stu-dents working individually or in small groups. Examples are drawn from courses developed for a Examples are drawn from courses overloped for a new veterinary curriculum implemented in 1993. Special attention is paid to a course taught to 65 veterinary students in the spring of 1995 on fluid and electrolyte disorders. Concept maps were integral to the design and delivery of the course, and were included in the final examination. The use of concept maps to this extent was well received by students. The vast majority claimed that the con-cept maps greatly facilitated their understanding of the relevant pathophysiologic mechanisms contrib-uting to an acid/base disturbance or fluid disorder. uting to an acid/oase disturbance or fluid disorder. Responses from the faculty involved with the course were also very positive. It is argued that concept maps can help make conceptual relationships explicit, identify errors and omissions, and reveal misconceptions in students' understanding. Eighty-five fourth- and eighth-grade learning disabled students whose individualized education plans specified untimed achievement testing were tested with the Reading Comprehension subtest of the lowa Tests of Basic Skills, either according to the publisher's 40-minute time limit or with a revenue. the publisher's 40-minute time limit or with an extended time limit of 2 hours, 30 minutes. Results were compared with those from a parallel form of the test administered 8 months earlier. Measures included grade-equivalent and normal curve equiva-lent scores, completion rates, amount of time needed to complete the test, and KR-20 reliabilities based on students in each cell. All but one of the fourth graders in the extended time group finished the test in the publisher's time limit. Twenty-two of the 26 eighth graders in the unlimited time group took longer than the publisher's limit. Despite methodological problems centering around student motivation and attitudes toward testing, the study suggested that the test may be more reliable when administered without time limits, and students' merely knowing that unlimited time is available may yield higher scores, even if no additional time is actually used. Equating multiple test forms is frequently desired. When multiple forms are linked in a chain of equating, error tends to build up in the process. This paper compares three procedures for equating multiple forms in a common-form design where each school administered, in a spiraled fashion, only a subset of multiple forms. Data used were from a tryout admultiple forms. Data used were from a tryout ad-ministration of a grade-11 proficiency examination for which 10 forms of reading, 10 of science, and 9 of mathematics examinations were administered. The results were evaluated with regard to the amount of equating error. The three approaches dif-fered in terms of the presence or absence of "ex-plicit" equating of equivalent groups based on the observed ability distributions and whether calibra-tion samples were combined across common forms tion samples were combined across common forms tion samples were combined across common forms or not. The approach that involved explicit equating and combined-group calibrations resulted in less bias and standard error. Three Parameter Model
The presence of multiple readings of a student sponse to a constructed-response item in a large-scale assessment requires a procedure for combining the ratings to obtain an item score. An alternative to the averaged item ratings that are usually used is the summing of ratings for each item. This study evaluated the effect of summing as opposed to averaging ratings in situations when both polytomous constructed-response and dichotomous selected-response (multiple choice) items were used to measure one construct and then placed on a common scale. The effects of these two aggregation methods on two item response theory models, the Rasch model, and a combination of three-parameter logistic and generalized partial credit models (the "generalized" model), were also studied. Data came from three forms of a state high school proficiency test. The effect of summing, as opposed to averaging ratings, varied across the three content areas of mathematics, reading, and science, when evaluated with the generalized model. For reading, summing reduced test information in the lower portion of the scale and increased it in the upper portions. For mathematics, the effect of summing ratings was to decrease the precision of ability estimates, and in science, summed ratings resulted in test information that was increased or decreased relative to averaged that was increased or decreased relative to averaged ratings in different parts of the scale. Six appendixes present supplemental information on summed ra-ings and item parameters for the content areas. (Contains four tables, six figures, and nine refer-

ment, \*Mechanics (Physics), \*Motion, Participa-

Identifiers—\*Complex Concepts
This paper reports on results of a series of three group interviews with three high school sophomores who used a motion detector to explore a mechanical device, the Bouncing Car device, that can display periodic and chaotic behaviors. The ways that stu-dents interacted with the Bouncing Car and used their body motions and imaginations to try to experience the motions the device made were observed. Observations suggest that an important contribu-tion to student interactions with physical devices of this sort comes from their reflections on everyday bodily experience. Four episodes in the students work with the device are described, showing the growth of a sense of complexity throughout these episodes, from their initial descriptions of behaviors obvious to them to a sense of the ways in which the Bouncing Car's behavior is fundamentally unpre-dictable. This development supports the notion that complexity or simplicity are not "in the device," but in the course of experience with the device, and that complexity is not a given, but an outcome of the active participation in the conversation about and experimentation with the tools at hand. Five issues relative to the use of different Ordinary Least Squares (OLS) and Hierarchical Linear Modeling (HLM) models to identify effective schools and teachers were examined using data from all students in the Dallas (Texas) public schools in grade 3 in 1994 and grade 4 in 1995. OLS models using first- and second-order interactions required results that were very close to these proproduced results that were very close to those pro-duced by two-level HLM models at the school level and two- and three-level HLM models at the teacher level. Most OLS regression and HLM models used in this study accounted for more than 70% of the variance in student achievement in reading and mathematics. Results produced by all the models were extremely consistent, and correlations produced by the various models were all generally above 0.90. Correlations of results with important school, teacher, and student-level contextual variables were negligible for all models, meaning that the various models produced results that were free from bias relative to important contextual variables. Correlations of results with prescore characteristics were negligible for all models, meaning that the various models produced results that were free from bias relative to the level of pretest scores. Taking all results into consideration, it is recommended that a two-level HLM model (student-school) be implemented to determine school effect, and that the empirical Bayes residuals from the model be adjusted with an adjustment for shrinkage to form the basis for estimates of teacher effect. Appropriate formulas for this task are included. (Contains 34 references.) (SLD)

Identifiers—Alternative Assessment

The development of innovative test item types that use multimedia technology to improve item au-thenticity and interaction and allow for objective scoring through partial-credit scoring methodolo-gies was studied. Science test items were developed gies was studied. Science test items were developed for community college developmental students using "Authorware 3.0," an instructional compact disc. The items used graphics and animation for the presentation of stimulus materials, the presentation of hints, and for item response alternatives. Forty-one students completed the test items and a questionnaire about their responses to the test items. Students had not received instruction in the concepts tested and scores were about as high as concepts tested, and scores were about as high as could be expected, although an apparent error in the could be espected, although an apparent error in the programming of the scoring may have further reduced scores. Overall, items were received positively. Students seemed to like the innovative format, and it is thought that the partial-credit scoring could easily to transferred to other subject matter. Future studies are planned that will embed assessments in the instructional materials. Appendix A presents the feedback guestionnairs and andix A presents the feedback questionnaire, and ap-pendixes B through E present student responses to particular test items. A 67-item Assessment Practices Inventory (API)
was administered to 311 inservice teachers. The application of principal components analysis to the data yielded a 6-factor solution that explained 64% of the variance. The Rasch rating scale model was applied to the API to estimate item calibrations. The applied to the API to estimate item calibrations. The factor analyzed assessment categories were then ranked in order by difficulty based on mean logits. The distribution of mean logits ranged from -.35 to 0.78. Communicating assessment results was the easiest assessment category. Interpreting standardized test results, conducting classroom statistics, and using assessment results in decision making constituted the most difficult assessment categories. Nonachievement-based grading was more difficult than recommended grading practices, and performance assessment was more difficult than ps than recommended grading practices, and perfor-mance assessment was more difficult than pa-per-pencil tests. The identification of the hierarchy of classroom assessment categories provided useful information for measurement training and teacher education in assessment. The findings justified on-going research on grading practices, and supported the call in the assessment community for a shift of instructional emphasis from traditional objective tests to alternative assessments. Identifiers-Reform Efforts

The 307 schools funded by the Ohio Venture Capital program were the focus of a study on teacher empowerment. This paper focuses on the method used to maximize survey responses, rather than on the study findings. Data were sought from the build-ing principals and 10,544 classroom teachers to cre-ate a "total picture" of the individual school at a particular "point in time" in the school restructuring process. The metaphor, "a snapshot in time," was used to collect the data. A limited edition print of a painting of an early Ohio school was used as an incentive for schools that returned a total picture. An original painting for the teachers' lounge was promised to the school with the highest return rate. The return rate was calculated for each school as responses were received, and statistical techniques were used to determine the representativeness of the sample schools and responding teachers. Initial responses that met the "snapshot" criteria were re-ceived from 104 schools, of which 56 had 100°, participation. The overall building return rate was 59.6% and the teacher return rate was 28.90°. participation. The overall building return rate was 58.6% and the teacher return rate was 38.8%. The metaphor created an eye-catching and memorable survey that was apparently well received by respondents. An appendix presents the survey cover letter. (Contains 1 table and 17 references.) (SLD)

Results from an alumni survey for the School of Education and Related Professional Studies of Rowan College (New Jersey) were analyzed and evaluated. The survey had been developed as a result of a previous educational practicum. Research questions were how well the School had prepared its graduates, which program goals and objectives the graduates found most useful, and whether there were areas in which the School could prepare its students better. Data collected were first presented to the individual departments of the School, and were then interpreted for the entire School. The questionnaire was sent to 300 recent graduates. Of these, 134, or 45%, were returned. Alumni felt that they had received the proper training and necessary help to feel confidant in their present jobs. They did think that the School should investigate increased training in the newer technologies needed in teaching and nursing. It was interesting to note that 83.5% of the graduates were enrolled in some form of continuing education, suggesting that the School's goal of creating life-long learners was being Ways to use the survey data most effect tively are discussed. Appendixes contain a descrip-tion of evaluation committee members, a cover letter, the alumni survey, and questionnaire results by school department. (Contains 11 tables and 16 references.) (SLD)

Identifiers—\*Covariance Matrices, \*Variance (Statistics)

The one observation per cell two-way items by examinees random effects analysis of variance (ANOVA) with all error components zero is considered. The estimated variance components are ex-pressed as functions of the inter-item covariance matrix and the inter-examinee covariance matrix. These expressions show that under the random effects model if the inter-item and inter-examinee covariance matrices are unconstrained then both the number of items and the number of examinees must approach infinity for the estimates of any of the variance components to be consistent. However, if these two covariance matrices are constrained so that each has homogeneous variances and convariances, then consistent estimates of the variance components can be obtained without both the num-ber of items and the number of examinees simulta-neously approaching infinity. (Contains seven references.) (Author)

This study investigates the dimensionality of the Test of English as a Foreign Language (TOEFL)

reading test, based on the specifications in use as of April 1991. Of particular interest was whether four item types identified in the test specification as "reasoning items" could be shown to measure, in reasoning items could be shown to heastire, in addition to general reading ability, any abilities not measured by the other item gypes in the test. Two techniques, Stout's procedure and NOHARM analyes, were used to investigate the hypothesized two-factor model. In both cases the data failed to fit the model, indicating that TOEFL "reasoning items" cannot be shown to measure a unique construct. However, the followup exploratory analyses indicated that all 10 test forms used in the study indicated that all 10 test forms used in the study violated the assumption of essential unidimensionality, and all of the forms appeared to fit a two-factor model where the second factor may be related to passage content or position. This study continued the research on analogy

This study continued the research on analogy problem-solving on psychometric tests pursued by I. Bejar, R. Chaffin, and S. Embretson (1991). Characteristics of a semantic taxonomy and a cognitively and empirically motivated intensional/pragmatic (I/P) dichotomy were explored. There were two research questions: (1) Could the results of Bejar et al. be replicated with items from the Scholastic Aptitude Test (SAT)? and (2) Would factor analyses support the bidimensional processing structure suggested by the I/P distinction? A specially constructed test of disclosed SAT analogies was administered to a group of 189 undergraduate students. Although factor analyses did not support the expected bidimensionality, a better understanding of both the semantic taxonomy and the I/P dichotomy was achieved. Suggestions are given for future research. (Contains 2 tables, 7 figures, and 21 references.) (Author/SLD)

Gender and ethnic group differences on the Analytical Writing Assessment that is part of the Graduate Management Admissions Test were evaluated. Data from the first operational administration for 36,583 examinees in October 1994 were used. Standardized differences from the White male reference group were computed separately for men and women in four ethnic groups: (1) White; (2) Asian American; (3) African American; and (4) His-panic/Latino. Within the White, African American, and Hispanic/Latino groups, women received higher scores than men on the Analytical Writing Assessment; in the Asian American group, men re-ceived higher writing scores, but the difference was not as great as on the Verbal score. Examinees whose best language was not English scored views. whose best language was not English scored rela-tively higher on the Analytical Writing Assessment than on the Verbal measure. Simulations of eligibilthan on the versal measure. Simulations of engini-ity for an admissions pool suggested that the addi-tion of the Analytical Writing score would noticeably increase the number of women in the pool, but would have virtually no impact on ethnic inorities. Rater and score reliability were reasonably consistent across ethnic and gender groups. (Contains 4 tables, 9 figures, and 11 references.) (Author/SLD)

The various methods for computing the reliability
of scores on Advanced Placement (AP) examinations are summarized. For the free response portion
of the examinations, raters can contribute to score unreliability through both systematic severity errors (in which some raters consistently rate more se-verely than other raters) and through inconsistency. Inconsistency appears to be a much greater problem than systematic severity errors. Question-to-question variation (or score reliability) is seen as a greater problem than rater inconsistencies. The impact of increasing or decreasing the number of topics is demonstrated by showing the proportion of students correctly classified as the number of topics changes using the results of AP examinations for the changes using the results of AP examinations for the 1993 school year. Procedures to enhance both rate and score reliability are discussed. A table of score reliability and correct grade classifications is presented as an appendix (Contains I table, 3 figures, 1 appendix table, and 15 references.) (Author/SLD)

(CEEB), \*Choice Behavior
This study assessed the ability of high school advanced placement history students to choose the essay topic on which they can get the highest score. A second, equally important, question was whether the score on the chosen topic was more highly related to other indicators of proficiency in history than the score on the unchosen topic. Overall, for both U.S. and European history, scores were about one-third of a standard deviation higher for the preferred topic than for the other topic. For U.S. history, about 32% of the students made the wrong tory, about 32% of the students made the wrong choice; that is, 32% got a higher score on the other choice; that is, 32% got a higher score on the other topic than on the preferred topic. In European history, 29% made the wrong choice. In the U.S. history sample, the preferred essay correlated 0.40 with an external criterion score versus 0.34 for the other essay. In the European history sample, the preferred essay correlated 0.52 with the external criterion compared to 0.44 for the other topic. An appendix presents the U.S. and European history standard topics. (Contains four figures five tables standard topics.) standard topics. (Contains four figures, five tables, and five references.) (CEEB)
If a student writes two essays, the score reliability can be estimated from the correlation between essays. However, if the essays are in different modes or require different skills, the reliability may be underestimated from the correlation. In Advanced Placement history examinations, students wrote Placement history examinations, students wrote one standard essay and one essay that required analysis and synthesis of historical documents that were included with the question statement. If these Document-Based Questions (DBQs) were assessing substantially different skills from the standard essays, then the reliability of DBQ scores would be under-estimated from their correlation with a standard essay score. A sample of 1,045 U.S. history students and 891 European history students participated in a special study in which they wrote essays for either 2 DBQ questions and 1 standard essay question or 3 standard essay questions. The DBQ correlated as highly with a standard essay as with another DBQ, suggesting that the simple correlation of the two types of scores did not underestimate the reliability of the essay scores. Appendix A lists standard essay topics, and Appendix B presents DBQ topics. (Author/SLD)

these principles and indicators to help guide the development of assessment systems that can meet the needs of today's educational environment. The following principles reflect that the key purpose of assessment is to serve learning: (1) the primary purpose of assessment is to improve student learning;
(2) assessment for other purposes supports student learning; (3) assessment systems are fair to all students; (4) professional collaboration and development support assessment; (5) the broad community participates in assessment development; (6) com-munication about assessment is regular and clear; and (7) assessment systems are regularly reviewed and improved. Included with the statement of principles are a glossary, a 39-item bibliography, a list of 10 resource organizations, a discussion of how the principles were developed, a summary of the princi-ples, and a list of organizational and individual signers. An alternative is represent for the Johnson Neyman Technique

An alternative is proposed for the Johnson-Ney-man procedure (P. O. Johnson and J. Neyman, 1936). Used when heterogeneous regression lines for two groups are analyzed, the Johnson-Neyman procedure is a technique in which the difference between the two linear regression surfaces for the criterion variate (Y) is estimated conditional on a realization of the predictor variate (X). The motiva tion of the alternate procedure is to estimate the point on the X variate at which two heterogeneous regression surfaces intersect. An expression of the standard error of the estimate provides, at a given level of alpha, a closed confidence interval for the point of intersection and open regions in the domain of X in which it may be stated with confidence that they do not span the point of intersection. The pro-cedure is illustrated, and its accuracy evaluated through simulation. An advantage of the intersection-point confidence-interval procedure is primar-ily that it declares significant all differences between estimated regression surfaces that are larger than those in the nonsignificant region, should a signifi-cant region exist. Situations under which the John-

son-Neyman procedure is preferable are discussed. (Contains 7 tables and 10 references.) (SLD) ED 400 336 TM 025 762

Fan, Xitao And Others
The Effects of Sample Size, Estimation Methods,
and Model Specification on SEM Indices.
Pub Date—9 Apr 96

Note-61p.; Paper presented at the Annual Meet-ing of the American Educational Research Asso-

ing of the American Educational Research Asso-ciation (New York, NY, April 8-12, 1996). Pub Type— Reports - Evaluative (142) — Speeches/Meeting Papers (150) EDRS Price - MF01/PC03 Plus Postage. Descriptors—\*Estimation (Mathematics), \*Good-ness of Fit, \*Mathematical Models, Monte Carlo Methods, \*Sample Size, \*Structural Equation Models Identifiers Covariance Matrices, \*Specification

A Monte Carlo simulation study was conducted to investigate the effects of sample size, estimation method, and model specification on structural equa-tion modeling (SEM) fit indices. Based on a bal-anced 3x2x5 design, a total of 6,000 samples were generated from a prespecified population covari-ance matrix, and eight popular SEM fit indices were ance matrix, and eight popular 32m in minces were studied. Two primary conclusions were suggested. First, for misspecified models, some fit indices appear to be noncomparable in terms of the information they provide about model fit; some fit indices. also seem to be more sensitive to model misspecifi cation. Second, estimation method strongly influ-enced almost all the fit indices examined, especially for misspecified models. These two issues do not appear to have been well documented in the previliterature. Perhaps the focus of most previous

simulation studies on correctly specified models may have failed to detect these dynamics. It is fur-ther suggested that future research should study not only different models relative to model complexity, but also a wider range of model specification condi tions, including correctly specified models as well as models specified incorrectly to varying degrees. (Contains 2 figures, 6 tables, and 26 references.) (Author/SLD)

The goal of this paper, and the symposium it rep-resents, is to provide an examination of the perspec-tives of district personnel from four diverse states. The papers present the current status of legislated student assessment programs in California, Colorado, Connecticut, and Illinois. Similarities and differences in implementation methodology are discussed. Results are presented from an interstate survey of district test directors relative to assess-ment trends and the impact of the state programs. ment trends and the impact of the state programs. The current status of plans relative to the evaluation of programs funded by Title 1 is reviewed. The following chapters are included: (1) "The California Perspective" (Mardel R. Kolls); (2) "The Colorado Perspective" (Kevin Matter); (3) "The Connecticut Perspective" (Mary E. Yakimowski); and (4) "The Illinois Perspective" (Carole Perlman). Survey results represented about 35% of the student enrollment in California (84 school districts), over 53% of Students in Colorado (55 districts), 50.1% of Connecticut students (104 districts), and 59 districts in Illinois. An appendix contains the survey text. (SLD) (SLD)

This publication presents statistical information about elementary, secondary, and higher education in the United States in compact form. This informa-tion is presented in much greater detail in the "Di-gest of Education Statistics," The Condition Education," and "Youth Indicators." In 1995 there were about 45 million students in public elementary and secondary schools, and an additional 5.7 million in private schools. These figures indicate a substantial increase over enrollments in 1985, as charts detail increase over enrollments in 1985, as charts de-tail. This trend is expected to continue, with approximately 37.3 million students expected in the elementary grades in 1996, and a projected enroll-ment of 14.4 million in secondary schools. The pro-portion of minority students has increased in U.S. schools since 1984, reaching about 32.4% in 1994.

In 1995, approximately 9 million students in higher education attended four-year schools and about 6 million attended two-year schools. Data are also provided on the number of teachers at each level of education, teacher salaries, and teacher characteristics. A section presents information on the out-comes of education, with data on graduates, dropouts, and literacy rates. A final section contains statistical data about educational finance, including income and expenditures, and sources of student aid and scholarships. (Contains 12 figures and 30 ta-

Identifiers-\*National Assessment of Educational

The National Assessment of Educational Progress (NAEP) is working to increase the numbers of stu-dents with disabilities (SD) or limited English proficient (LEP) students who are included in the assessment. Information is presented on the assessment. Information is presented on the changes made to the inclusion criteria, the types of accommodations being offered, new procedures implemented in 1996, and ongoing research studies. The percentages of SD and LEP students excluded have been fairly steady over time, with about 5% excluded due to Individualized Education Plans (IEPs) and 1% excluded due to LEP. An evaluation conducted in 1994 found that prany of these structures are the second of the conducted of the second of th conducted in 1994 found that many of these stu-dents were, in fact, capable of participating in the assessment. In preparation for the 1996 assessment, the NAEP field tested the new inclusionary criteria and the use of various accommodations and adaptaand the use of various accommodations and adapta-tions for the mathematics assessment. Field test re-sults were generally encouraging, but did indicate that results for SD and LEP students may not be comparable to those of other students. A special sample design was developed for the 1996 NAEP to help clarify issues raised by the inclusion of addi-tional SD and LEP students. Current research is examining scaling, reporting, appropriateness, con-struct validity, language complexity, and inclusion issues. (SLD)

This volume is a statistical compilation of data on This volume is a statistical compilation of data on family structure, economic factors, jobs, extracurricular activities, health, and several dozen other elements that comprise the world of the 63.9 million students enrolled in U.S. schools in 1994. These facts present a composite of the youth experience, highlighting connections that might otherwise be missed between experiences inside and outside the school. An objective of the report is to present trends over time; whenever possible, tables go back as far as 1950 or earlier to provide historical context for today's issues. This edition has been designed to highlight information on high school graduates and highlight information on high school graduates and dropouts entering the workforce and forming famidisposus entering the workstore and forming families. Each indicator contains a table, chart, and brief descriptive text. The 69 indicators are grouped in the following sections to focus on particular areas of youth experience: (1) home, including demographics, family composition, and family income; (2) school, including descriptions, outcomes, and out-of-school experiences; (3) health; (4) citizenship and values; and (5) the future. A glossary is included. (Contains 69 tables and 69 charts.) (SLD)

Baccalaureate and Beyond Longitudinal Study (B&B:93) tracks the experiences of a cohort of recent college graduates, those who received the baccalaureate degree during the 1992-93 academic year and were first interviewed as part of the National Postsecondary Student Aid Study. The experiences of this group in the areas of academic enrollment, degree completion, employment, public service, and other adult decisions will be followed for about 12 years. Data will be used to address issues in a number of educational policy areas such as educational attainment, access to graduate and professional schools, the rate of return on educaprotessional schools, the rate of return on educa-tional investment, and patterns of preparation and engagement in teaching. The B&B:93 cohort con-sisted of about 12,500 individuals who were deter-mined to be potentially eligible for followup in 1994. Responses were obtained for 11,810 students. This report reviews: (1) the study purpose and design; (2) the B&B:93 sample design; (3) data collection: telephone and field survey procedures; (4) responsates; (5) evaluation of the survey instrument; (6) the transcript component of B&B:93/94; and (7) the weights development decumentation for the weights development of bab. 59.74 and (1) weights development documentation for the B&B-93.94 sample. Four appendixes provide additional details about methodology and present the student and parent questionnaires in table form. (Contains 31 tables, 3 appendix tables, 5 figures, and 2 references.) Examining the characteristics of school districts against the gainst the characteristics of 55.3 million 'school-age children" (3- to 17-years-old) plus 18and 19-year-olds who had not graduated from college) provides important insights into observed in-terrelationships. This report describes ways in which the characteristics of the children, such as household income, poverty status, and racial and ethnic composition, vary across school districts of different types. Individual, parental, and household characteristics of American school children are described and compared in several areas. Relation-ships among student and school district characteristics are presented through text, statistical tables, and graphs using material based on the "School District Analysis Book" (SDAB) developed largely from Census figures in response to a Congressional mandate. Demographic and enrollment profiles of the students and profiles of the districts are presented. Of the 48 million children aged 5 to 19 years in the United States, 91% were ageu 3 to 19 years in the Onted States, 91/8 were enrolled in school below the college level. Three appendixes present concepts and definitions, infor-mation on SDAB sources and data quality, and a report on the accuracy of SDAB data. (Contains 72 figures, 2 appendix figures, 17 tables, and 5 appen-dix tables.) (SLD)

\*Student Evaluation Identifiers—\*National Education Goals 1990

The National Education Goals Report serves as a barometer of the nation's progress toward the na-tional education goals defined in early 1990. This year's report, sixth in a series of annual reports planned through the year 2000, focuses on stan-dards and assessments, two areas of educational reform which are currently of interest to state and local communities. The report also updates informa-tion reported in 1991-1995 to indicate changes since the baseline reporting year whenever addi-tional data has become available. Chapter 1 answers frequently asked questions about setting standards and creating assessments and provides knowledge so that parents and students can actively participate in discussions and the decision making process in their communities. Examples of challenging state assessment programs and activities from Maryland, Connecticut, and Kentucky are given. Chapter 2 summarizes progress on each of the 25 core indicators and takes each of the national goals and sum-marizes what has been learned since 1991 and what remains to be discovered in that goal area. Chapter 3 outlines each state's progress on a set of core indicators that is similar to the national core indicators. Overall, the Goals Panel stresses that it will be impossible to achieve the National Education Goals impossible to achieve the National Education Goals unless states and local communities demand more from their students by setting rigorous standards for student achievement and by designing new forms of assessment to determine whether students have mastered challenging subject matter. Appendices include technical notes and sources for the national and state core indicators. (Contains 8 tables and 25 persons). (MAK) graphs.) (MAK)

Identifiers—\*Goal Setting, School Based Services
This paper compares and analyzes features of the
models represented in five efforts to provide coordinated services for children and families located in five cities in an effort to determine how best to study these programs in the future. The programs are: (1) the Minneapolis Youth Trust (Minnesota), a city-wide partnership of member organizations; (2) the Nation of Tomorrow, Chicago (Illinois), a college, community, and school partnership; (3) the School of the Future initiative, Houston (Texas), a project for school-based services; (4) the Family Service Center, Los Angeles (California), a center for school-based services; and (5) A Child's Place, Charlotte (North Carolina), which provides services for homeless children and families. The review of

the different program models indicates that, regardless of program specifics, certain areas are essential to a structural analysis. The first is the goal structur-ing process, and the second is the area of institutional interests and reward systems. The third focus should be on institutional environmental control, and the fourth should be the examination of institutional conventions. Every experiment in children's services coordination should be examined as a point along a process continuum from little or no integra-tion of services to a collaborative ideal by exploring these four institutional characteristics. (Contains 4 tables and 48 references.) (SLD)

Identifiers-\*Goal Setting, School Based Services It has long been recognized that organizations that provide education, health and other services to children and families do not work together easily, although coordination is recognized as desirable. This exploration of facilitation strategies in service coordination draws upon the study by the Center on Education in the Inner Cities of projects in Houston (Texas), Chicago (Illinois), East Los Angeles (California), and Minneapolis (Minnesota). The new perspective on how much institutions matter, characterized as the "New Institutionalism," sugcharacterized as the "New Institutionalism," sug-gests that there are two key insights to consider in exploring the institutional side of service coordina-tion. The first is that institutions under environmental pressure tend to protect their "core" technologies, and may tend to become more fragmented under pressure to change. The second insight is that deeply embedded routines, rules, and scripts are those most likely to result in eventual collaboration if they are taken into account by nur-turing collaboration from within. Efforts to promote collaboration requires a better understanding of the kinds of technical assistance needed. (Contains 44 references.) (SLD)

The urban teacher recruitment challenge documented in this report is the harbinger of potentially
more serious nationwide shortages to come. The
need for teachers of color in America's schools has
already reached critical proportions. Data in this

report were collected as part of a broad-based com-mitment to improved teacher recruitment and development by Recruiting New Teachers, Inc. (RTC) and its Urban Teacher Collaborative partners. In 1995 RTC mailed surveys to human resources administrators and superintendents in districts that are members of the Great City Schools. Thirty-nine of the 47 districts responded. Their responses indicate that special education is the teaching area in greatest demand, followed by science, mathematics, bi-lingual education, elementary education, and English as a second language. Districts were asked about the ways they try to recruit teachers. Some 76.9% of districts allow noncertified teachers to teach and 43.6% offer programs designed to prepare teacher aides for licensed teaching positions. The majority of districts also offer opportunities for mid-dle and high school students to explore careers in treaching. A survey responded to by 39 of the 50 Great City Colleges of Education profiled efforts to recruit minority students and described special placement programs to interest graduates in urban teaching positions. Results of both surveys confirm the immediate and anticipated demand for new us ban teachers, especially teachers of color and lan-guage minorities. (Contains 14 graphs.) (SLD)

demographic information on the socioeconomic conditions of Latinos, African Americans, Asian/Pacific Islanders, and Whites in San Francisco, based on an analysis of U.S. Census data for 1970, 1980, and 1990. Although it presents comparative information on the four population groups, the focus is on Latino families and children, who constitute 14% of the city's total population. A separate section explores demographics and socioeconomic status in the city's Mission district, one of 13 census districts in San Francisco. Since 1980 the number of Latinos in the Mission district has increased, to the point where 30% of the Latino population lives in the Mission. Section 1 presents data on the current socioeconomic condition of the population groups over time. Section 2 examines the Mission district over time. Section 2 examines the mission district in greater detail. Forty percent of the Latino population is of Mexican origin, with 5% of Puerto Rican and 2% of Cuban origin. The remainder are "other Hispanic," primarily Salvadorean and Gustemalan. Almost a quarter of the city's Latino population is Almost a quarter of the city's Latino population is under the age of 18. Twenty-three percent of the city's Latino children live in female-headed families; 20% of the city's Latino children live in poverty; and forty-nine percent of the children in the city's school district speak Spanish. Latinos lag behind other groups in educational attainment and continue to have the highest school dropout rate. In December 1994 the National Law Center on Homeless and Boother public days a replayin of

Homelessness and Poverty published an analysis of antihomeless laws and policies in 42 American cities. This report draws on those findings to focus on attempts to shut down or exclude service providers. Searches of the media, telephone interviews with service providers and public interest groups and attorneys, and government information provided the material for the report. The document provides sixty-one examples of local government and resi-dent opposition to the siting or operation of housing and services for homeless people from 36 local juris-dictions involving 50 proposed or existing facilities or services. Of the 61 examples, 21 proposed projects were halted, 3 existing facilities were forced to close, 2 were forced to move, 5 government-run facilities were closed by the jurisdiction, 18 service providers were able to establish or continue the opproviders were able to extend on the op-posed program largely as planned, and 9 cases re-mained unresolved. The most common approach to exclusion of service providers is the application of zoning and building codes. Even in areas where the service provider was able to overcome local opposition, the need to counter that opposition almost invariably imposed costs in terms of time, effort, and money that could have been used to provide housing and services. "Not in my backyard," or "Nimby," opposition is particularly unfortunate in that opponents' fears about service facilities are unfounded. Neighbors of these facilities frequently come to view them with approval after they have been established for some period of time. (Contains three tables.) (SLD)

Minority gangs of the 1980s are examined as
groups of juveniles and young adults and as a fraction of the forming underclass. Gangs today no
longer disappear as their ethnic groups rises socially.
Instead, gangs are becoming institutionalized in the Instead, gangs are becoming institutionalized in the central cities. This discussion of prior research in Los Angeles (California) and more recent studies in Milwaukee (Wisconsin) demonstrates that gangs are quite different than they were in the past. Un-derclass in this discussion refers to people perma-

nently excluded from participation in mainstream occupations who survive through a combination of economic resources that can include welfare and profits from crime. In neither of the Chicano communities studied in Los Angeles or Milwaukee have the gangs become involved in an organized crime infrastructure. Instead, a fraction of each gang clique moves into the underclass as the gang becomes an institutionalized feature of some poverty comes an institutionalized feature of some poverty communities and plays a role in the perpetuation of the underclass. In both cities gangs have also be-come support groups in correctional settings. Inter-views with 47 gang members from 19 of Milwaukee's gangs form the basis of this explora-tion. Five appendixes present the study question-naire and four tables of gang data. (Contains 3 figures, 6 tables, 4 appendix tables, and 144 refer-ences.) (SLD)

Constructivism

The strongest recent statement that inequality in America is the natural result of a free market came America is the natural result on a free market came in "The Bell Curve: Intelligence and Class Structure in American Life" by Richard Herrnstein and Charles Murray. These authors argued that intelligence determines how well people do in life, and the rich are rich largely because they are intelligent, the poor largely because they are not, and the middle class in middle circumstances mainly because they are of middling intelligence. The "Bell Curve" also attributed the strong connection of inequality to race and ethnicity to the fact that minorities, by nature, are not as intelligent as the dominant soci ety. This book uses the data from the National Longitudinal Survey of Youth used by Herrnstein and Murray to demonstrate that, contrary to their conclusions, inequality in America is not the inevitable result of free markets operating on natural intelligence, but that it is a social construction molded by social environment and conscious social policy. Americans have created inequality and they main-tain it. Specific chapters examine arguments of "The tain it. Specific enapters examine arguments of it held Curve" and show that inequality can be changed, and has, in fact, been changed to some extent already. (Contains 3 tables, 24 figures, and 446 references.) (SLD)

Identifiers—\*Direct Instruction

This book affirms that the behaviors of young peo-I his books infinish that the behaviors to young peep le from culturally diverse populations need to be viewed from a cultural perspective, and that instruction should affirm students and empower them to achieve maximally as well as to benefit others. A theme that underlies the entire book is the advocacy of direct instruction in social skills, followed by op-

portunities for practice and conditions for mainteportunities for practice and conditions for mainte-nance. The first chapter emphasizes the relationship between culture and social behavior and highlights the importance of ethnic identity. Chapter 2 out-lines generic and empirically validated methods for social skills instruction, consisting of skill training social skills instruction, consisting of skill training and cooperative learning procedures. Chapters 3, 4, 5, and 6 consider approaches pertinent to the education of Asian Americans, African Americans, and Hispanic Americans, respectively. Chapter 7 concludes the discussion with a consideration of gender differences. Within the framework of success for all, the book advocates evement over survival, prevention over intervention, development over containment, and proac-tive approaches over reaction. Differences, "Social Class, "Spanish Speaking, Stereotypes
This book is about language prejudice as experienced by Puerto Ricans in the mainland United States. Prejudice is expressed as social signs that include, but go well beyond, language. When people express linguistic prejudices, they generally start by objectifying the languages in question as though the languages were sharply defined. For Puerto Ricans in the United States, English is the more valued language, Spanish, the less valued. Most Puerto Ricans living in the United States speak English, but language, Spanish, the less valued. Most Puerto Ri-cans living in the United States speak English, but they are told that it is inferior English, as if English were a clearly defined object. The object of this inquiry is the indexical dynamic that sustains lan-guage prejudice, its structural source, and its enact-ment in daily routines as expressed in interviews. Chapter 1 shows that race and ethnicity are competing categories of origins difference, and that differing categories of origins difference, and that difference in language of origin is only occasionally safe in the United States. Chapter 2 explores the ways in which Puerto Ricans and their language came to be racialized in the United States. Chapter 3 explores functions of English and Spanish, and Chapter 4 considers how people perceive English correctness as it affects their lives. Chapter 5, based on interviews, explores the connections people find among race, language, and class. An appendix describes some sample speakers and gives some speech samples. Identifiers—Europe, \*Organisation for Economic Cooperation Development, United Kingdom, United States

This book examines the solutions that various members of the Organisation for Economic Cooperation and Development (OECD) nations have at-tempted to the question of whether schooling of tempted to the question of whether schooling of immigrant and language minority children should be organized with the intention of assimilating them into the dominant culture, or whether their cultural and linguistic distinctiveness should be maintained. The study uses a comparative perspective, but does not move country-by-country. The countries considered, in western Europe, the United Kingdom, and the United States, share characteristics of a highly developed economy, a democratic political and the United States, since that activates it is highly developed economy, a democratic political system, and the continuing presence of immigrant minority groups. Among the immigrant groups con-sidered are those from Turkey, Africa, the former Yugoslavia, and Asia. The first chapter reviews the controversies surrounding the education of immicontroversies surrounding the education or immigrant children, and the second chapter discusses immigration in OECD nations. Chapters 3 and 4 focus on the situation of language minority groups, and Chapter 5 discusses the languages and their maintenance. Chapters 6, 7, and 8 discuss some apmaintenance. Chapters 6, 7, and 8 discuss some ap-proaches that have been taken and describe some program models for educating immigrant children. Chapter 9 considers the policy implications of these practices and explores their success. (Contains 43 tables and 1,576 references.) (SLD)

The association of stressful life events with mother

The association of stressful life events with mothers' psychological distress and parenting was exam-ined in 79 African American mothers living in 1-and 2-parent households. Findings reveal that stress in the areas of family disruption and work problems in the areas of namy disruption and work protecting was associated with lower maternal acceptance. Family disruption was also positively associated with mothers' firm control of behavior. Family disruption and work related stress were also negatively associated with mothers' self-esteem. Health related the section of th stress was positively related to mothers' psychological distress. Mothers' self-esteem was positively associated with mothers' acceptance and negatively related to firm control. Results also reveal that related to firm control. Results also reveal that mothers' self-esteem mediates the association of family disruption and work related stress on mothers' acceptance. When the effects of mothers' self-esteem were controlled, significant relation-ships between family disruption, work related stress, and mothers' acceptance were no longer apparent. (Contains 1 table, 5 figures, and 27 references.) (Author/SLD)

Work Experience Identifiers—\*African Americans

This study examines economic and social stress-ors and their effects on the parenting styles and adolescent adjustment of African American fami-

lies. It systematically characterizes and explains the nes. It systematically characterizes and explains the nature of some of the chronic economic and social atressors experienced by poor African American families as they affect parenting and adolescent ad-justment, and addresses the processes linking family stressors to adolescent adjustment. The stressors stressors to adolescent adjustment. The stressors may include: (1) a high level of poverty; (2) low family income resulting from divorce, work cutbacks, or family illness; and (3) a high level of job uncertainly for various reasons. Research has indicated that economic hardship has a negative effect cated that economic hardship has a negative effect on psychological functioning and the quality of family relationships. The impact of living in stressful neighborhoods also causes psychological distress that results in less adequate parenting. Research on the linkage between African American parents' social networks and adolescent adjustment is scarce, but empirical studies have shown that adults and younger children benefit from the availability of an extended kin network and that social support from extended kin network and that social support from relatives enhances family functioning. Parenting style and family management practices may also be linked to adolescent adjustment. The processes that link stressful experiences to parental and adolescent adjustment need further exploration, as do the ways in which neighborhood characteristics affect family and adolescent adjustment. Normative data are needed to explain typical behavior patterns of poor and nonpoor African American families. Two re-lated publications are listed for additional reading. (SLD)

Objectives of the research project described in this report were to explore the African American

this report were to explore the African American adolescents' perceptions of the social forces shaping their lives and well being. The project examined: (1) perceptions and understandings of racial discrimi-nation; (2) their views of the value of schooling and the role of school achievement; (3) their self-perceptions in terms of abilities; (4) the impact of adolescents' ethnic identities on school performance and social adjustment; (5) the influence of peers on adolescents' perceptions of the importance of educational achievement; and (6) adolescents' relationships with their teachers. Parenting styles and parent-child relationships have also been exam-ined. Findings suggest that the more African American students perceive themselves as targets of discrimination, the less they believe that schooling is important, and the more they report symptoms of anxiety and depression. African American adolesanxiety and depression. African American adoles-cents perceive the inequalities that exist in Ameri-can society, and these perceptions affect their adjustment. Additional research is needed to exam-ine the effects of child-rearing practices common in African American families. Historical and sociological material concerning racism and discrimination in American society should be integrated into instructional material; this could have a positive effect on African American psychological adjustment and school achievement. Additional research with a focus on the African American subculture will help design programs and approaches that can overcome the effects of discrimination and socioeconomic fac-tors. ED 400 364 UD Felix-Ortiz, Maria Newcomb, Michael D. UD 031 342 Risk and Protective Factors for Drug Use a Latino Boys and Girls. Pub Date—Aug 96

Note—23p.; Paper presented at the Annual Meet-ing of the American Psychological Association

(104th, Toronto, Canada, August 9-13, 1996).

(104th, Toronto, Canada, August 9-13, 1996). Pub Type-Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Academic Aspiration, \*Adolescents, \*Drug Use, Grade 9, Grade 10, High Schools, High School Students, \*Hispanic Americans, Models, \*Risk, Sex Differences, \*Student Atti-

tudes, Surveys, Urban Youth Identifiers—California (Los Angeles), \*Latinos, \*Protective Factors

Risk and protective factor indices were developed to examine vulnerability to drug use among Latino high school students. Survey data was collected from 516 Latino 9th and 10th grade youth in the Los Angeles (California) area. Frequency and quan-tity of use data were collected for a range of drugs including inhalants, cocaine, and other hard drugs. Seventeen variables were examined for inclusion in a risk factor index (RFI) or protective factor index (PFI). The RFI consisted of low educational aspira-tions, perceived lack of opportunities, deviant acts, perceived community tolerance of drugs, perceived perceived community tolerance of drugs, perceived adult and peer drug use, perceived drug availability, and history of at least one suicide attempt. The PFI consisted of high emotional support, law abidance, religiosity, low emotional distress, self-acceptance, perceived parent and family support, perceived drug harmfulness, and negative history of sexual or physical abuse. Bivariate, multivariate, and structural equation models were used in the analyses. All of equation moders were used in the analyses. An of the variables except one were uniquely risk-induc-ing for these Latino youth. However, as a group, the PFI predicted several types of drug use for boys and girls. The epidemiological model is useful in begin-ning to understand the effects of multiple factors on drug use among Latino youth. (Contains 8 tables and 43 references.) (Author/SLD)

UD 031 343 Federal Title VI Enforcement To Ensure Nondis-crimination in Federally Assisted Programs. Commission on Civil Rights, Washington, D.C. Pub Date—Jun 96

Pub Date—Jun 96
Note—710p.

The U.S. Commission on Civil Rights conducted The U.S. Commission on Civil Rights conducted a comprehensive evaluation and analysis of the leadership of the Department of Justice in its Title VI programs and of the Title VI enforcement efforts of 10 Federal agencies and 10 subagencies, including the Department of Education. The purpose of Title VI is to eliminate illegal discrimination in programs or activities funded by the Federal Government. Title VI prohibits a broad range of discriminatory activities and practices. The government of the control o ment's de-emphasizing of civil rights implementa-tion, enforcement, and compliance activities, recent court decisions, and a lessening of Federal interest in state civil rights programs have resulted in defi-ciencies in Title VI enforcement. The Civil Rights Commission reexamined agency and subagency ef-forts in light of these policy changes. It is concluded that Federal Title VI enforcement programs at the Department of Justice and other agencies have ex-Department of Justice and other agencies have ex-tensive deficiencies. With the exception of the De-partment of Education, none of the agencies responsible for enforcing Title VI has an effective enforcement program. Nor do Federal agencies have the resources or personnel to examine the op-erations of state and local agencies that administer Federal funds to determine their level of Title VI enforcement. Numerous and detailed recommenda-tions are made for ensure meaningful, uniform, and comprehensive enforcement of Title VI of the Civil Rights Act. (Contains 16 tables.) (SLD)

## Subject Index

This index lists titles of documents under the major subject terms that have been assigned to chaterize their contents. The subjects, which conform to those presented in the Thesaurus of ERIC Descriptors and the Identifier Authority List, are in word-by-word alphabetical order.

As shown in the examples below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

## **Author Index**

This index lists documents under the name(s) of their author(s). The index is arranged in alphabetical order by the person's last name.

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection .

## Institution Index

This index lists the titles of documents under the institution responsible for them and/or the agency sponsoring them. The index is arranged in alphabetical sequence by the name of the university, agency, association, etc. Names beginning with the word "University" have generally been inverted in order to provide a more distinctive entry, e.g. Wisconsin University (for the University of Wisconsin).

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

This index lists documents under the Publication Type that has been assigned to them to characterize their form or organization, as contrasted to their subject matter.

As shown in the example below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section. The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The Publication Types are displayed in a classified index arrangement, according to the outline below.

# Clearinghouse Number/ED Number Cross-Reference Index

This index cross-references the temporary ERIC Clearinghouse accession number to the permanent ERIC Document (ED) accession numbers by which resumes are arranged in *Resources in Education* (RIE). Readers who have only Clearinghouse numbers for a given document may use this index to trace the item to this ED number and hence to its location in RIE.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The following Clearinghouse prefixes are used in this index.

AA — ERIC Processing and Reference Facility
CE — Adult, Career, and Vocational Education

CG — Counseling and Student Services

CS — Reading, English, and Communication

EA — Educational Management

EC — Disabilities and Gifted Education
FL — Languages and Linguistics

HE — Higher Education

IR - Information and Technology

JC — Community Colleges

PS — Elementary and Early Childhood Education

RC - Rural Education and Small Schools

SE — Science, Mathematics, and Environmental

Education

SO — Social Studies/Social Science Education

SP — Teaching and Teacher Education

TM - Assessment and Evaluation

UD - Urban Education

# THESAURUS ADDITIONS AND

## **CHANGES**

The following additions and modifications have been made to the ERIC controlled vocabulary since December 1994. They are, therefore, not included in the main body of the 13th (1995) edition of the Thesaurus of ERIC Descriptors.

Academic Senates (Colleges)
USE COLLEGE GOVERNING COUNCILS (unqualified use reference "Academic Senates"

Alternate Day Block Scheduling
USE ALTERNATE DAY SCHEDULES and BLOCK SCHEDULING

ALTERNATE DAY SCHEDULES Dec. 89
SN (Scope Note Changed) Scheduling attendance on alternate days—frequently refers to kinder-garten, preschool, or day care programs

AMERICAN DREAM The ideals of freedom, equality, and opportu-nity traditionally held to be available to every-one in the U.S.—also, the popular belief that perseverance and hard work in the U.S. will bring forth happiness, success, and material

BEREAVEMENT Deprivation or loss, especially of loved ones by death (note: prior to Jun96, this concept was frequently indexed by "Grief")

Dec. 95

BIRTHS TO SINGLE WOMEN UF Illegitimacy Illegitimacy Illegitimate Births (1967 1995) Nonmarital Childbirth Out of Wedlock Births Single Mother Births Unmarried Mother Births

**BLOCK SCHEDULING** An instructional arrangement whereby part or all of the daily class schedule is organized into blocks of time longer than an hour, to facilitate flexibility and diversity in instructional activities (note: prior to Aug96, this concept was indexed as "Time Blocks") Block Time Teaching (former UF of "Time

CAREER ACADEMIES

Aug. 95
SN Schools-within-schools (usually high-school level) focusing on broadly defined career themes (health careers, electronics, etc.), with highly integrated academic and vocational curricula and active involvement of local em-

UF High School Academies (Career Development)
Job Training Academies Partnership Academies (School and Business)

Vocational Academies

CHARTER SCHOOLS Public schools run by groups of parents, teachers, and administrators under contract with local or state school boards, and given broad freedom from regulations in exchange for the promise of such favorable outcomes as improved test scores, attendance rates, and dropout rates

**CHILDRENS WRITING** Writing by, not for, children (note: see also the Identifiers "Beginning Writing" and "Early

CLASSICAL LITERATURE (Scope Note Changed) Literature of ancient Greece and Rome (note: do not use for outstanding or time-honored books generally, for which see "Classics (Literature)"

CLASSICS (LITERATURE) Literary works of demonstrably enduring ap-peal and quality (note: do not confuse with the literature of ancient Greece and Rome, for which use "Classical Literature"—see also the Identifiers "Great Books Curriculum" and "Junior Great Books Program")

UF Literary Classics

Cocaine Prenatal Exposure USE COCAINE and PRENATAL DRUG EXPOSURE

Collaborative Teaching USE TEAM TEACHING

COMPREHENSIVE SCHOOL HEALTH EDUCATION

Sequential programs of health instruction, health services, and healthful school environ-ments that enable students in kindergarten through grade 12 to develop the awareness, knowledge, and skills needed for healthy behaviors-health areas covered include mental and emotional health, community and environmental health, consumer health, family life, growth and development, nutrition, per-sonal health and fitness, safety and accident prevention, disease prevention and control, and substance use and abuse UF Comprehensive School Health Programs

CONCEPT MAPPING

SN The identification, organization, and graphic depiction of relationships among concepts in a knowledge domain—the technique employs a node-link formalism in which domain key concepts are circled, bracketed, etc., arranged hierarchically (general to specific), then inter-connected by lines labeled with short explana-

Connective words, as "and," "but," "because," "even though," that join words, phrases, clauses or service and the control of t phrases, clauses, or sentences (note: see also the Identifier "Connectives (Grammar)")

Crack Babies USE CRACK and PRENATAL DRUG EXPOSURE

CULTURAL RELEVANCE Applicability of materials, methods, or pro-grams to one's own ethnicity, social status, gender, religion, home and community environment, and/or personal experiences (note: if possible, use the more specific term "Culturally Relevant Education")
UF Relevance (Cultural)

**CULTURALLY RELEVANT EDUCATION** 

SN Educational practices and resources that reflect the culture, values, customs, and beliefs of students (i.e., help to connect what is to be learned with the students' own lives)

Culturally Appropriate Education Culturally Responsive Education Culture Based Curriculum

Examining the structure of an animal or plant by cutting it apart-frequently computer-simulated, and may include human anatomical study (note: for operative medical treatment, use "Surgery")

Transmission of a print or electronic docu-ment, such as a journal article, from a vendor or a library to the requestor—may be fee-

Climatic period(s) of extreme dryness, in which natural water supplies are insufficient for plant life and other needs (note: see also the Identifier "Desertification")

EARLY IDENTIFICATION Diagnosis of an exceptionality (disability and/ or giftedness), medical condition, or risk fac-tor early in life or in the condition's early stages (note: prior to lund). tor early in life or in the condition's early stages (note: prior to Jun96, the instruction "Early Detection, USE Identification" was carried in the Thesaurus) Early Diagnosis Early Detection (former UF of "Identifica-tion")

ELECTRONIC JOURNALS

N Periodicals, usually topical and moderated, that are published and disseminated (sometimes on an irregular schedule) in the form of electronic text or hypertext on computer net-works (such as the Internet) or other comput-erized media (e.g., CD-ROM) Electronic Magazines

Online Iournal

**ELECTRONIC LIBRARIES** Services and collections of information made services and collections of information made accessible through computer networks—in-cludes services such as document delivery, end-user searching and training, network ac-cess, and online catalog enhancements, and access to collections of bibliographic and full-text databases, electronic journals, and digital

images Digital Libraries Virtual Libraries

EMERGENT LITERACY

Mar. 96

SN The early stages of learning to read and write
— an increasing awareness of the print world,
usually associated with young learners observing and experimenting with reading and
writing processes (note: in the 1980s, the
emergent literacy perspective was a departure
from the more traditional stage view of reading/writing readiness followed by formal
learning)

learning) UF Early Literacy

OWERMENT Through the statement of autonomy and freedom of choice for individuals or groups (note: use a more specific term if possible—see the identifiers "Community Empowerment," "Employee Empowerment," and "Stoff Empowerment," and "Staff Empowerment") Personal Empowerment

Self Empowerment

ENGLISH ONLY MOVEMENT Efforts to make English the single official language of a government or other group (commonly, of the nation and states of the

Teachers of English-language arts and letters (note: may be coordinated with "English (Second Language)" for teachers of English as a second language) ENGLISH TEACHERS

Faculty Senates (Colleges)
USE COLLEGE GOVERNING COUNCILS (unqualified use reference "Faculty Senates" was deleted)

FAMILY NEEDS

Conditions or factors necessary for optimal function, development, or well-being of fami-

FEMINIST CRITICISM

Description, interpretation, and evaluation of literature, art, music, educational programs, etc., from a feminist perspective (i.e., of female consciousness, women's rights, and the resistance to male domination)

FLOODS

Bodies of water that overtop their natural or artificial confines and that cover areas not normally underwater

**FOCUS GROUPS** 

Small, roundtable discussion groups charged with examining specific topics or problems (e.g., consumer preferences, product attributes, educational issues), including pos-sible options or solutions—focus groups usually consist of 4-12 participants, guided by moderators to keep the discussion flowing and to collect and report the results UF Focused Group Interviews

Government Policy USE PUBLIC POLICY

Hands on Learning
USE EXPERIENTIAL LEARNING

HANDS ON SCIENCE

Science activities and programs that require active personal participation

HEALTH MAINTENANCE ORGANIZATIONS Nav. 95

SN Prepaid comprehensive medical service sys tems (note: see also the Identifier "Social Health Maintenance Organizations")

Managed Care (HMOs)

HISTORIANS

Nov. 96 Scholars or writers of chronological accounts of human events

HOUSEWORK

Nov. 96

SN Tasks, including cleaning, food preparation, and doing laundry, that are necessary for the maintenance of a household (note: see also the Identifier "Division of Labor (Household)") Household Chores

Housekeeping (Households)

HURRICANES Tropical cyclones with high-speed winds equaling or exceeding 64 knots (73 mph)

Tropical Cyclones

Illegitimate Births (Del Dec95) USE BIRTHS TO SINGLE WOMEN

The international network of computer networks interconnected by routers or gateways and using the standard TCP/IP telecommunications protocol to transfer data such as electronic mail-the Internet connects millions of users among industry, education, government, research, commerce, and private house-holds (note: see also the Identifier "National Information Infrastructure" for documents related to the U.S. Government's Federal NII/ Internet policy initiative)

Electronic Superhighway Information Superhighway

JAPANESE CULTURE

Mar. 96

JOURNAL ARTICLES

Works of prose, complete in themselves, that are published with other such works in peri-odicals (note: corresponds to Pubtype Code 080-do not use except as the subject of a document)

Articles (Journals) Magazine Articles Periodical Articles

JOURNALISM RESEARCH Sep. 95

Basic, applied, and developmental research conducted to advance knowledge about journalism (note: use as a minor Descriptor for examples of this kind of research—use as a major Descriptor only as the subject of a

KEYWORDS

Sep. 96 In information science, words and phrases in an abstract, title, text, etc., of a work that identify its significant content (note: keywords are usually the uncontrolled or "natu ral-language" vocabulary—do not confuse with controlled subject headings, for which use "Subject Index Terms")—in learning and language development, words and phrases of prime importance to a particular task/activity, frequently associated with one another or with pictorial images for easy remembrance (note: see also more precise Identifiers "Keyword Mnemonics," "Keyword Method (Language Learning)," and "Keyword Method (Second Language Learning)")
UF Key Word Access Points

LANGUAGE MINORITIES Aug. 96

Groups whose native language is not the dominant language of the larger society (note:
"Limited English Speaking" may be more
appropriate for documents dealing with English-as-a-second-language instruction)

Linguistic Minorities Minority Language Groups

LIBRARY ADMINISTRATION Sep. 75 SN (Scope Note Added) Planning, organizing, directing, and controlling human or material resources within a library or library network

LIBRARY ADMINISTRATORS (former UF of "Library Administration")

Library personnel whose responsibilities may include managing library staff, evaluating programs, planning and managing budgets, developing collections, and planning library services (note: prior to Aug96, the instruction "Library Administrators, USE Library Ad-ministration" was carried in the Thesaurus)

LIBRARY DIRECTORS

Chief executive officers of libraries or library systems responsible for overall direction and coordination of library services, resources, and programs UF Head Librarians

MANDATORY RETIREMENT

Forced retirement upon reaching a maximum age—this age can be set through statute, court ruling, or contract

UF Compulsory Retirement

Sep. 96 Language of the indigenous Polynesian people of New Zealand

MAORI (PEOPLE)

Sep. 96

SN Indigenous Polynesian people of New Zealand

Mapping (Cartography) USE CARTOGRAPHY

(unqualified use reference "Mapping" was deleted)

NATIONAL PARKS

Areas of scenic, historical, scientific, or ecological importance protected and preserved by a national government for public enjoyment or

NATIONAL TEACHER CERTIFICATION Dec. 95 Use of nationwide competency assessment and testing to certify teachers (Note: Do not confuse with the Identifier "National Teacher Examinations," which is a specific test series published by the Educational Testing Service)
UF National Certification (Teaching)

NURSERY BHYMES Dec. 95 Short rhymed poems or songs for children that often tell a story

Mother Goose Rhymes Nutrient Deficiencies

USE NUTRITION

Nutritional Deficiencies USE NUTRITION

OLYMPIC GAMES

(Scope Note Changed) International program of sports competition held in a different country every 4 years (summer and winter games alternate in even-numbered years)—the mod-em Olympic Games, first held in 1896, are a revival of similar quadrennial contests held in ancient Greece (note: do not confuse with "Special Olympics")

OTITIS MEDIA

Infection, and/or collection of fluid, in the middle ear, occurring most often in infants and young children-may cause hearing loss in recurrent or long-standing cases Ear Infections (Middle Ear)

Middle Ear Disease

OUTCOME BASED EDUCATION

The effort, often by a state or local education agency, to organize all the features of schooling (including aims, curriculum, instruction, and assessment) so as to produce specifically delineated results (often including noncognitive as well as cognitive results) and generally with the expectation that all students will demonstrate such results

OBE

Outcomes Based Education Results Based Education

PACIFIC ISLANDERS

Indigenous peoples of Micronesia, Polynesia, and Melanesia, and their descendants (note: use a more specific term, if appropriatealso the geographic Identifiers lands" and "Oceania") "Pacific Is-

PAPAGO Jul. 66. (Scope Note Added) The Uto-Aztecan language of the Tohono O'Odham nation of American Indians—related to Pima, the two languages are sometimes referred to collectively as O'Odham, the Papago and Pima word for "people"

PARENT EMPOWERMENT

Promotion or attainment of autonomy and freedom of choice for parents

Iul 66

PARENTS WITH DISABILITIES Parents who have a disability or impairment of

ur any type
UF Disabled Parents

PERFORMANCE BASED ASSESSMENT Apr. 96 Evaluation of achievement, learning, etc., that requires direct demonstration of knowledge and skills via the construction of responses, and for which scoring can be based on the processes of the response construction as well as the final product-typically, performance-based assessments are designed to elicit and strengthen examinees' critical-thinking skills, problem-solving strategies, self-evaluation skills, and other higher-order thinking skills (note: do not confuse with "Performance Tests," whose usage is restricted to evaluations of manual manipulations and body movements—see also related Identifiers "Al-ternative Assessment," "Authentic Assessment," and "Direct Assessment"—prior to Apr96, the Identifier "Performance Based Evaluation" was used to index this concept)

Performance Assessment (Higher Order Learning) Performance Based Evaluation

PERFORMANCE TESTS

(Scope Note Changed) Tests that require the manipulation of objects or skilled bodily movements (note: do not confuse with "Nonverbal Tests," which minimize the use of lan-guage but may not emphasize the manipulation of objects or skilled movement-prior to Mar80, the use of this term was not restricted by a scope note—use "Perfor-mance Based Assessment" for "higher-order" performance testing)
Performance Assessment (Skilled Bodily

Movements) PETS Animals kept for pleasure and companionship (note: coordinate with individual animals as appropriate, e.g., Descriptors "Birds," "Horses" or Identifiers "Cats," "Dogs")

UF Companion Animals

POLITICAL CORRECTNESS The attempt in communication or other activity to be inoffensive and inclusive—may lead to censorship and intolerance in some cases, and is regarded with derision by many (note: see also the Identifiers "Speech Codes" and

"Hate Speech")
UF Politically Correct Communication

POPULAR MUSIC Music enjoyed by the general public and com-monly disseminated via the mass media (note: prior to Jan96, this concept was frequently indexed by "Popular Culture" coordinated with "Music" terms)

UF Pon Music

POSTTRAUMATIC STRESS DISORDER Acute or chronic delayed reaction to highly stressing events such as military combat, sexual assault, childhood abuse, natural disasters, unexpected deaths, and life-threatening accidents-symptoms include anxiety, depression, intrusive recollections, and emotional detachment

Post Traumatic Stress Syndrome Posttraumatic Neurosis

PRENATAL DRUG EXPOSURE SN Maternal drug use during pregnancy—also, a medical condition in infants and children resulting from such use

Drug Exposure in Utero Fetal Drug Exposure Prenatal Exposure to Drugs PRENATAL INFLUENCES

(Scope Note Changed) Factors occurring be-tween conception and birth and affecting the physical or mental development of an individual (note: use the more precise "Prenatal Care" or the narrower "Prenatal Drug Expo-sure," if appropriate)

Period of life at which the individual reaches sexual maturity and is capable of reproduction (note: see also the Identifier "Puberty Rites")

Woodlands of dense, mainly broad-leaved ev ergreen trees in areas of high annual rainfall (note: coordinate with Identifiers "Deforesta-tion," "Tropics," etc., as appropriate)

Rain Forest Preserves Temperate Rainforests Tropical Rainforests

READING MOTIVATION The arousal, direction, and sustaining of reading interest and activity for work, school, pleasure, or other purpose

RECIPES (FOOD) Instructions and ingredients for preparing food dishes

SCHOOL CULTURE Patterns of meaning or activity (norms, values, beliefs, relationships, rituals, traditions, myths, etc.) shared in varying degrees by members of a school community

Self Centeredness USE EGOCENTRISM

USE SEMIOTICS

Jul. 66

SERVICE LEARNING Learning through community service (or public service in a wider sphere), usually integrated with regular instruction in school or college (note: see also related Identifiers "Community Service," "Youth Community Service," and "National Service")

UF Community Service Learning

Social Context USF SOCIAL ENVIRONMENT

SOCIOLOGISTS Scholars who systematically study and critique the development, structure, functioning, and dilemmas of human society

STUDENT EMPOWERMENT Jul. 96 Promotion or attainment of autonomy and freedom of choice for students

TEACHER COLLABORATION An interactive process that enables teachers with diverse expertise to work together as equals and engage in shared decision making toward mutually defined goals

Collaborative Teachers Teacher Cooperation

TEACHER EMPOWERMENT Jul. 96 Promotion or attainment of autonomy and freedom of choice for teachers

TEACHERS WITH DISABILITIES Teachers who have a disability or impairment of any type UF Disabled Teachers

TECH PREP Sequential programs of study that integrate preparation for technical careers with academic education in a highly structured and closely articulated secondary and postsecondary curriculum, leading to a minimum of an associate degree or 2-year certifi-cate in a specific career field UF Two Plus Two Tech Prep

TIME BLOCKS

(now a narrower term of "Time") (Scope Note Added) (Note: prior to Aug96, this concept was a narrower term of "School Schedules," and its usage generally was re-served for that context—"Block Scheduling" has replaced it in the "School Schedules"

USE SCHEDULING

Timetables (School)
USE SCHOOL SCHEDULES

TOHONO O ODHAM PEOPLE A desert-dwelling American Indian people of southern Arizona and the province of Sonora n northwest Mexico (also, dispersed kin) UF Papago (Tribe)

TORNADOES Violently rotating storms, usually visible as funnel clouds, with wind speeds of 100-200 mph and causing considerable destruction when touching ground—most common in the U.S. and Australia

Two Plus Two Tech Prep Associate Degrees USE ASSOCIATE DEGREES and TECH PREP

SN Computer-generated simulations of three-di-mensional environments, intended to seem real, with which users interact using combinations of sensing and interface devices and

WORKPLACE LITERACY Feb. 96 SN Reading, writing, computation, and commu-nication skills performed in the context of job tacks

Job Literacy Job Related Literacy Occupational Literacy

WORLD WIDE WEB SN A hypertext-based information system for disseminating and retrieving text or multimedia files via the Internet—the files can be accessed with a browser program installed on the user's computer

Web (The) WorldWide Web Service WWW

Writing Development
USE WRITING (COMPOSITION)

### **Submitting Documents to ERIC**

#### What Kinds of Documents to Send ERIC

ERIC would like to be given the opportunity to examine virtually any document dealing with education or its aspects. The ERIC audience is so broad (encompassing teachers, administrators, supervisors, librarians, researchers, media specialists, counselors, and every other type of educator, as well as students and parents) that it must collect a wide variety of documentation in order to satisfy its users. Examples of the kinds of education-related materials collected are the following:

- · Research/Technical Reports
- Program/Project Descriptions
- · Opinion Papers, Essays, Position Papers
- · Monographs, Treatises
- · Speeches and Presentations
- Evaluation Studies
- · Feasibility Studies
- . State of the Art Studies
- · Instructional Materials
- Syllabi
- Teaching Guides
- · Resource Guides
- Manuals
- Handbooks
- Curriculum Materials
- Conference Papers
- Bibliographies
- · Legislation and Regulations
- · Texts, Questionnaires, Measurement Devices
- · Vocabularies, Dictionaries, Glossaries, Thesauri
- Statistical Compilations
- Taxonomies and Classifications
- Dissertations

ERIC does not accept non-print materials (such as films, filmstrips, videotapes, tapes, records, cassettes, etc.). However, if such material accompanies a printed text, ERIC may process the printed text and refer the user to the accompanying non-print components, as long as a source of availability for them can be cited.

A document does not have to be formally published to be entered into the ERIC database. In fact, ERIC seeks out the unpublished or "fugitive" material not usually available through conventional library channels.

#### Selection Criteria Employed by ERIC

#### QUALITY OF CONTENT

All documents received are evaluated by subject experts against the following kinds of quality criteria: contribution to knowledge, significance, relevance, newness, innovativeness, effectiveness of presentation, thoroughness of reporting, relation to current priorities, timeliness, authority of source, intended audience, and comprehensiveness.

#### · LEGIBILITY AND REPRODUCIBILITY

Documents may be type-set, typewritten, xeroxed, or otherwise duplicated. They must be legible and easily readable. Letters should be clearly formed and with sufficient contrast to the paper background to permit filming. Colored inks and colored papers can create serious reproduction problems. Standard 8½ "x-11" size pages are preferred.

Two copies are desired, if possible: one for processing into the system and eventual filming, the other for retention and possible use by the appropriate Clearinghouse while processing is going on. However, single copies are acceptable.

#### • REPRODUCTION RELEASE

For each document submitted, ERIC requires a formal signed Reproduction Release form indicating whether or not ERIC may reproduce the document. A copy of the Release Form appears as a separate page in each issue of this journal. Additional Release Forms may be copied as needed or obtained from the ERIC Facility or any ERIC Clearinghouse. Items for which releases are not granted, or other non-reproducible items, will be considered for announcement only if they are noteworthy education documents available from a clearly identified source, and only if this information accompanies the document in some form.

Items that are accepted, and for which permission to reproduce has been granted, will be made available by the ERIC Document Reproduction Service (EDRS).

#### Advantages of Having a Document in ERIC

Contributors of documents to ERIC can benefit in the following ways:

- Announcement—Documents accepted by ERIC are announced to some 2,000 organizations receiving the abstract journal Resources in Education (RIE).
- Publicity—Organizations that wish to sell their own documents in original copies can have this availability (together with address and price information) announced to users in RIE, thus serving to publicize their product. After the document is sold out at the original source, it is then still available through EDRS, if permission to reproduce has been granted to ERIC. (Original copy prices, while the supply lasts, are generally less, and are therefore more attractive to users, than EDRS on-demand duplication prices).
- Dissemination—Documents accepted by ERIC are reproduced on microfiche and distributed (at no cost to the contributor) to the more than 800 current subscribers to the ERIC microfiche collection.
- Retrievability—The bibliographic descriptions developed by ERIC are retrievable by the thousands of subscribers to the online database retrieval services (offered by commercial vendors such as BRS and DIALOG). In addition there are thousands of locations offering computer searches of ERIC based on either compact disk (CD-ROM) systems (offered by DIALOG, and SilverPlatter) or other local computer-based systems.
- Always "In Print"—The presence of a master microfiche at EDRS, from which copies can be made on an on-demand basis, means that ERIC documents are constantly available and never go "out of print." Persons requesting copies from an original source can always be referred to ERIC. This archival function relieves the source of a distribution burden and solves the availability problem when the source's supply has been exhausted.

In addition, submission of a document to ERIC reduces the overall likelihood of overlap, redundancy, and duplication of effort among users. It increases the probability that the results reported in the document will be available indefinitely and used in subsequent efforts.

To encourage submission of documents to the system, ERIC offers to send contributors notice of document disposition, giving the ED identification number (for ordering purposes) of those documents selected for RIE. Additionally, ERIC will send a complimentary microfiche to each contributor when the document is announced in RIE.

There are no fees to pay in submitting documents to ERIC, nor does ERIC pay any royalties for material it accepts. Other than a statement concerning permission to reproduce, there are no forms to complete.

(OVER)

#### Where to Send Documents

To submit your document for consideration for inclusion in the ERIC system, please choose one of the following:

1. Direct Submission to the Appropriate Clearinghouse

Select the Clearinghouse most closely related to the document's subject matter. A list of the ERIC Clearinghouses and their addresses, is on the inside back cover of this issue of RIE. Material is expedited if it is directed to the attention of "Acquisitions."

2. Submission to the ERIC Facility

If you are uncertain as to which Clearinghouse covers the subject matter of the document, it may be sent to the following address:

ERIC Processing and Reference Facility
Acquisitions Department
1100 West Street, 2d Floor
Laurel, Maryland 20707-3598

The ERIC Facility will forward all documents to the appropriate ERIC Clearinghouse for consideration. The Clearinghouse will contact the contributor directly with its decision.

#### INTERNATIONAL CUSTOMERS

- Current international postage rates in effect based on weight and destination
- · Please contact EDRS for shipping estimate

#### GENERAL INFORMATION

- DOCUMENT AVAILABILITY—ERIC uses 3 codes to indicate the format in which a document is available
  - · Level 1-available in both paper and microfiche
  - · Level 2-available in microfiche only
  - Level 3—not available through EDRS; see "Available From" in the abstract for source information
- ■EJ ARTICLES—EJ articles are NOT available through EDRS. For copies contact:
  - ISI (Institute for Scientific Information): 800-523-1850 or 215-386-0100
  - · UMI: 800-248-0360 or 415-433-5500
- ■PAPER COPY (PC)—A Paper Copy is a laser-printed reproduction of electronic images created from the microfiche of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

#### **■PAYMENT**

- Prices set forth herein do not include any sales, use, excise, or similar taxes that may apply to the sale of microfiche or paper copy to the customer. The cost of such taxes, if any, shall be borne by the customer.
- Payment terms are NET THIRTY (30) DAYS by check or money order payable to EDRS in U.S. DOLLARS drawn on a U.S. BANK.
- The DynEDRS, Inc. Federal ID # is 54-1828547
- REPRODUCTION—Permission to further reproduce a copyrighted document provided hereunder must be obtained from the copyright holder, usually noted on the front or back of the title page of the copyrighted document.
- CLAIMS POLICY—ALL SALES ARE FINAL. EDRS will replace products returned within 30 days of delivery due solely to reproduction defects or incompleteness caused by EDRS.

#### **DEPOSIT ACCOUNTS**

Customers who have a continuing need for ERIC Documents may wish to open a **Deposit Account**. Payments in U.S. dollars drawn on a U.S. bank may be made by check, money order, purchase order (domestic customers only), or by credit card (MasterCard or Visa).

- DOMESTIC CUSTOMERS can establish an account for a \$200.00 suggested minimum. If tax exempt, include a copy of the tax exempt certificate.
- ■INTERNATIONAL CUSTOMERS can establish an account for a recommended minimum of \$500.

#### OTHER EDRS PRODUCTS

- Standing Orders and Backfiles for either the FULL ERIC COLLECTION or individual CLEARINGHOUSE COLLECTIONS are available.
- ■EDRS also offers TOPICAL COLLECTIONS in several subject areas.

For more information, please contact a Customer Service Representative.

## **HOW TO ORDER**

### Resources in Education (RIE)

Resources in Education (RIE) is a monthly abstract journal covering the document literature of education. It is published for the U.S. Department of Education by the U.S. Government Printing Office (GPO). RIE consists of twelve (12) monthly issues (each announcing over 1000 documents and indexing them by Subject, Institution, Personal Author, and Publication Type) and two (2) cumulative semiannual indexes (January-June, July-December). RIE is sold by GPO on subscription or as individual issues on-demand. Stock is retained for only approximately six months; issues older than that are generally not available from GPO. Orders from foreign sources cost 25% additional, as shown in the table below.

NOTE: The Semiannual Index to RIE has been discontinued; the last issue was the volume for July-December 1994.

RIE Product (Master Stock No. 756-003-0	Domestic	Foreign	
Subscription to Monthly Issues — Single Copy On-Demand	(12 issues)	\$77.00	\$96.25
	(1 issue)	\$21.00	\$26.25

Mall Check or money order (full remittance required) made payable to Orders: "SuperIntendent of Documents":

Mall to: Superintendent of Documents
U.S. Government Printing Office
Washington, DC 20402-9371

Telephone Acceptable credit cards are: Choice, Mastercard, or VISA. You may also charge against your pre-paid GPO deposit account, if available.

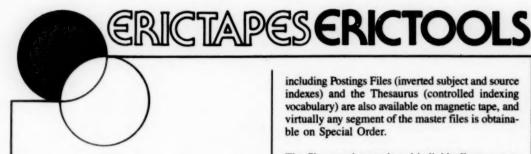

Call: 202-783-3238 (Note: This is not an FTS or AUTOVON line.)

Customer Publication service section (Inquiries about a publication order.)
Service: 202-275-3050

Subscription research section (Inquiries about a subscription order.) 202-275-3054

Deposit account section (Inquiries about deposit accounts.) 202-275-2481

Depository libraries should contact: 202-275-1006 (Library Programs Service)

### HAVE A COMPUTER?

## LOOK AT ERICTAPESI

The Educational Resources Information Center (ERIC) database is available on magnetic tape in a variety of options. Under special authorization from the U.S. Department of Education, these tapes are offered at unusually low cost to encourage the widest possible dissemination.

The ERIC database provides coverage of the significant literature in the field of educational resources. Report literature (announced in Resources in Education (RIE)) is covered from 1966 to date: journal article literature (announced in Current Index to Journals in Education (CIJE)) is covered from 1969. Monthly, quarterly, and annual updates are available for both RIE and CIJE, so that the files may be kept current.

The basic files are available in the ERIC Format (IBM/OS variable length records). These files include the complete resume (document description, indexing, and abstract or annotation) of each document or journal article announced, in accession number order. A variety of peripheral files,

including Postings Files (inverted subject and source indexes) and the Thesaurus (controlled indexing vocabulary) are also available on magnetic tape, and virtually any segment of the master files is obtainable on Special Order.

The files may be purchased individually or on annual subscription. The files are written on new, high quality, 9-track tapes (600, 1200, or 2400-ft., as appropriate) at either 1600 or 6250 BPI and are guaranteed. Prices per tape reel start as low as \$75.

## NO COMPUTER?

## LOOK AT ERICTOOLS!

For organizations without access to a computer.\* ERICTOOLS provide manual access to the ERIC document collection. ERICTOOLS are a series of printed indexes, directories, and cross-reference lists, distributed internally to components of the ERIC network. The Title Index provides access by document title. The Source Directory provides access to all organizational names used in the system, i.e., corporate authors and sponsoring agencies. Crossreference lists lead the inquirer to the accession number (ED number) from: Report Number; Contract Number; and Clearinghouse Accession Number.

ERICTOOLS are available individually and on annual subscription. Prices start from as low as \$20 for some individual documents.

\* Many of these documents are also valuable tools for computer searchers.

For additional information, complete and mail the reply form or call: ERICTAPES/ERICTOOLS, 1100 West Street, 2d Floor, Laurel, Maryland 20707-3598, 301-497-4080

PLEASE SEND ME INFORMATION ON THE ITEMS CHECKED BELOW:

#### Toll-Free 800 Number Makes Education Information Accessible

ACCESS ERIC is your gateway to the Educational Resources Information Center (ERIC), a nationwide information service designed to make education literature readily accessible.

With its toll-free number, **1-800-LET-ERIC**, ACCESS ERIC makes it easy for you to locate and obtain education information. One call puts you in touch with information specialists who can answer questions about ERIC, refer you to subject-specific information sources, and provide education-related publications produced by ERIC.

Sponsored by the U.S. Department of Education, Office of Educational Research and Improvement, ERIC helps teachers, librarians, students, parents, researchers, and policymakers stay abreast of the most important developments in the education field. Through ERIC, you can access information on a wide range of subjects.

In addition, ACCESS ERIC recently introduced four reference and referral databases to guide you through the vast world of education information. These databases are also available as print directories.

- ERIC Digests Online--Synthesizes information for you and includes more than 470 full-text ERIC Digests (two-page summaries) on current topics in education.
- ERIC Information Service Providers.-Lists nearly 1,000 agencies, such as libraries and information centers, that provide computerized searches of the ERIC database, have a sizable collection of ERIC microfiche, or subscribe to and collect ERIC hard-copy reference tools.
- Education-Related Information Centers--Helps you quickly locate agencies knowledgeable about your subject needs. Describes more than 200 resource centers that cover a broad range of education-related topics and provide user services, technical assistance, and information dissemination.
- Education-Related Conferences--Presents nearly 500 international, national, State, regional, and local education-related conferences covering the entire calendar year.

And, to help you stay up to date on a broad range of education-related issues, ACCESS ERIC offers <u>free</u> subscriptions to *The ERIC Review*. You can also order copies of *A Pocket Guide to ERIC* and other resources to help you access and use ERIC.

Gain entry to a world of education literature. For more information, call 1-800-LET-ERIC, Monday to Friday, 8:30 a.m.-5:30 p.m. (eastern time), or write:

ACCESS ERIC 1600 Research Boulevard Rockville, MD 20850

## MAJOR VENDORS OF ERIC ONLINE SERVICES AND CD-ROM PRODUCTS

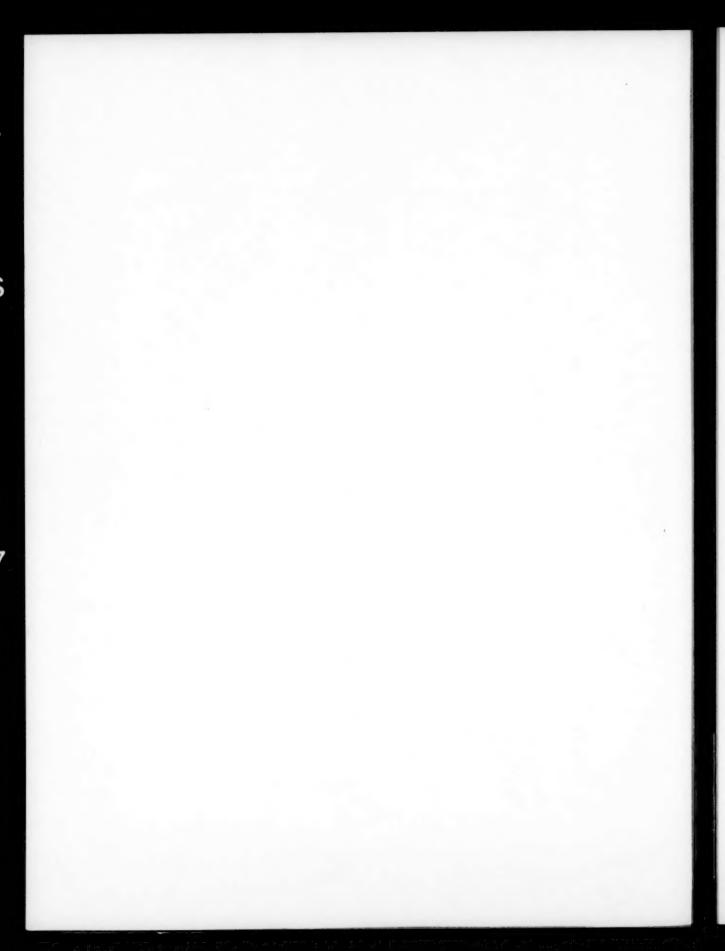

The ERIC database is one of the most widely used bibliographic databases in the world. Users from approximately 100 countries perform an estimated half million online or CD-ROM searches a year using a variety of available commercial systems (listed below).

Users wishing to search ERIC online need a computer terminal equipped with a modem that can link by telephone with the vendor's system. Those preferring stand-alone CD-ROM systems must have a computer equipped with a CD-ROM drive.

As an alternative to acquiring your own ERIC search capability, the *Directory of ERIC Information Service Providers* (available from any ERIC component) lists approximately 1000 organizations that perform ERIC searches on demand for users.

## **ERIC Network Components**

There are currently sixteen (16) ERIC Clearinghouses, each responsible for a major area of the field of education. Clearinghouses acquire, select, catalog, abstract, and index the documents announced in Resources in Education (RIE). They also prepare interpretive summaries and annotated bibliographies dealing with high interest topics and based on the documents analyzed for RIE; these information analysis products are also announced in Resources in Education.
